CREATE passive and active networks, voltage dividers, isolation networks or attenuators with these units. Solder turret terminals for permanent noise-free connection of components, etc. Entire unit may be potted or encapsulated.

Housing molded of thermosetting electrical grade phenolic. Cover, punched XXP laminated paper base phenolic. Color, housing and cover, BLACK. Cover plate and 2 each #2-56 cover screws included.

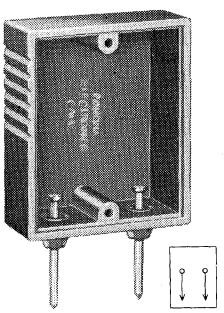
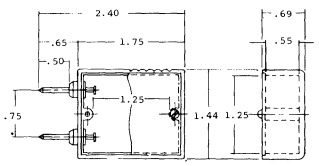
COMPONENT MOUNTING—ACROSS PIN TIP PLUGS





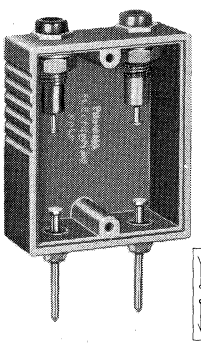
UPPER: No Connection.

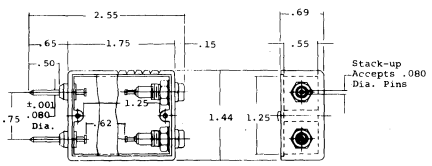
LOWER: Pin tip plugs, .080 dia. on ¾" centers. Plug bodies and solder turret terminals, brass, nickel plated.

APPLICABLE SPECIFICATIONS:
Operating Temp.: —25°C to +125°C
Working Voltage: 5000 VDC.
Current: 5 Amps Cont., 10 Amps Int.

MODEL 2268 QUANTITY DISC. CODE **A** **NET 1.95**

COMPONENT MOUNTING—PIN TIP JACKS TO DOUBLE PIN TIP PLUG—JUNIOR SIZE





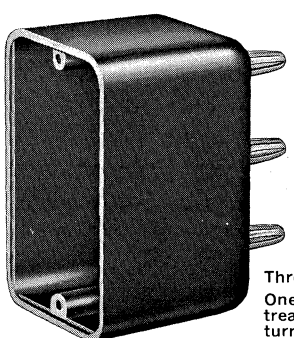
UPPER: Tip jacks, on ¾" centers, per MS-16108. One Red, one Black.

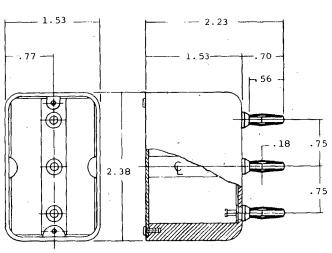
LOWER: Pin tip plugs, .080 dia. on ¾" centers. Plug bodies and solder turret terminals, brass, nickel plated.

APPLICABLE SPECIFICATIONS:
Operating Temp.: —25°C to +125°C.
Working Voltage: 5000 VDC.
Current: 5 Amps Cont., 10 Amps Int.

MODEL 2260 QUANTITY DISC. CODE **A** **NET 4.85**

COMPONENT MOUNTING — (3) ¾" SPACED BANANA PLUGS — KING SIZE





Three-in-line ¾" Spaced Banana Plugs.

One piece beryllium copper spring, heat treated, nickel plated. Plug body and solder turret terminals, brass, nickel plated. For use with standard .166" dia. banana jacks.

APPLICABLE SPECIFICATIONS:
Operating Temp: —25°C to +125°C.
Working Voltage: 5000 VDC.
Current: 15 Amps Cont., 30 Amps In.

MODEL 1943 QUANTITY DISC. CODE **A** **NET 2.75**

POMONA ELECTRONICS

SHIELDED "BLACK BOXES" SIZE "A"

NOW AVAILABLE, *SHIELDED* "BLACK BOXES." Boxes that fulfill the requirement for RF applications.

Ideal for compact packaging, eg., voltage dividers, isolation networks, impedance matching networks, and other varied uses.

Cover and self-tapping screws included.

APPLICABLE SPECIFICATIONS: (ALL MODELS)

Operating Temp.: −55°C to +150°C.
Working Voltage: 500 V Peak (Model 2415, 1500 V Peak).
Noise Rejection: Greater than 70DB.

FEATURES:

- SHIELDED HOUSING; Die Cast Aluminum. FINISH: BLUE baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.
- COVER; .040 Thick Aluminum #6061-T6 with clear anodized finish per MIL-A-8625A.
- Four screws secure cover for proper shielding.
- Solder turret terminals for permanent noise free connection of components.

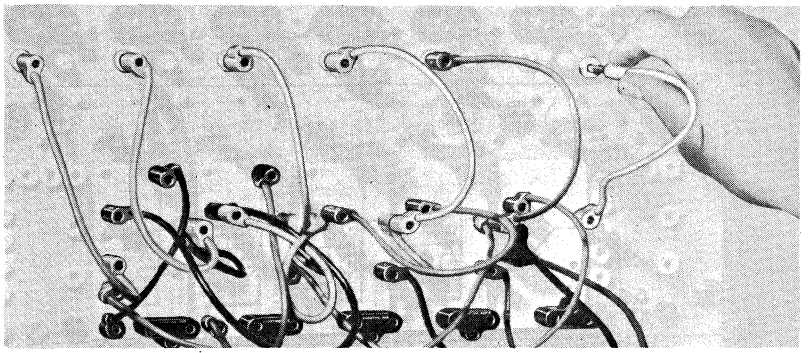
PATCH CORDS BANANA PLUGS

POMONA BANANA PLUG PATCH CORDS

Tough thermoplastic insulation molds the plug and leads into a strong moisture resistant integral unit. Excellent for computer board and test equipment applications. Used by leading industries in applications where extreme reliability is of prime importance.



FEATURES

- One piece beryllium copper heat treated spring for maximum long life.
- Rounded spring design results in maximum contact area.
- Extra flexible polyvinyl insulation used on all leads.

SPECIFICATIONS

- Fits standard 0.166 dia. banana jacks.
- Spring, beryllium copper alloy 170 per QQ-C-533.
- Plug body, brass per QQ-B-626, Comp. 22.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 ohms per banana plug.
- Operating Temp.: −0°C to +105°C.
- Wire, 18 AWG, stranding 65 x 36 T.C.
- Insulation, polyvinyl .144" O.D.
- Ratings: 15 A. Cont., 30 A. Int. 10,000 W.V.D.C.

POMONA ELECTRONICS

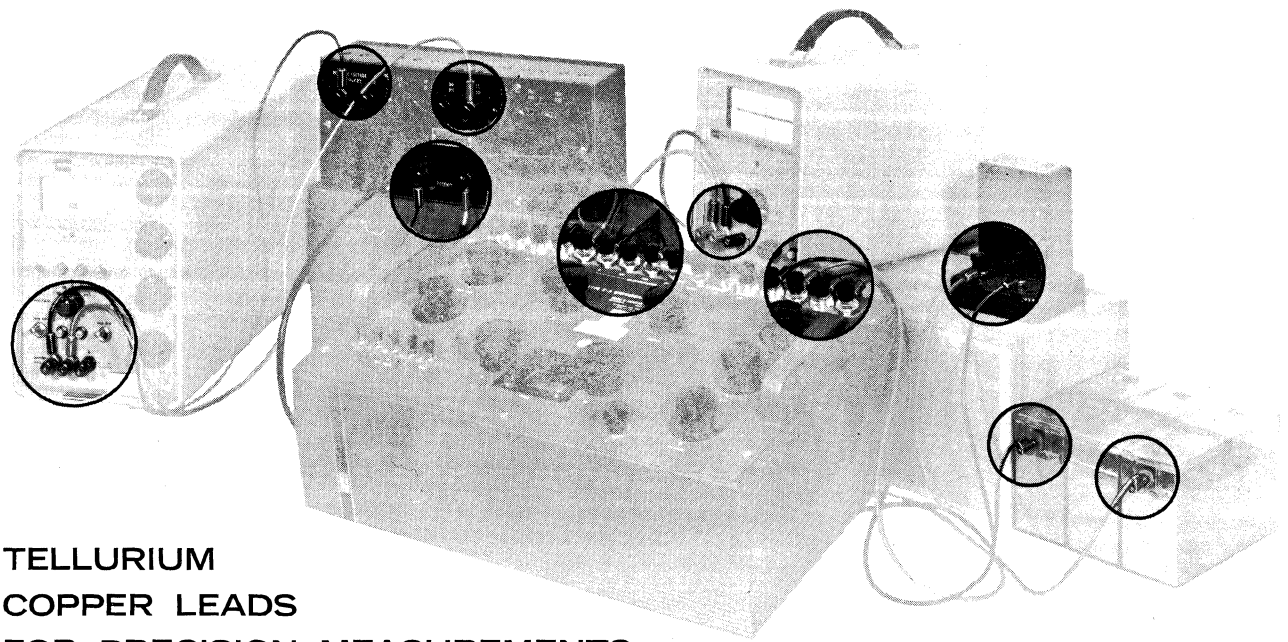
JUMPERS – LOW THERMAL E.M.F.



TELLURIUM COPPER LEADS FOR PRECISION MEASUREMENTS

POMONA ELECTRONICS has advanced the state of the art in measurements where Thermoelectric Effects are significant sources of error. Comparators designed for use with the Kelvin-Varley voltage divider and microvolt leads were tested with Primary Standards Laboratory equipment.
Thermoelectric voltages were not detected until the most sensitive galvanometer range was used.

THERMOELECTRIC PROPERTIES—Tellurium copper gold plated spade lugs cold-staked to multi-stranded 12 gauge COPPER wire minimize thermoelectric effects—an absolute necessity for low voltage, high precision measurements.

LOW RESISTANCE—12 gauge multi-stranded COPPER wire results in extremely low cable resistance. Spade lugs plated with 50 micro inches gold for minimum contact resistance and minimum thermal EMF when using copper binding posts. (Less than 0.01 μv/c°).

POMONA ELECTRONICS

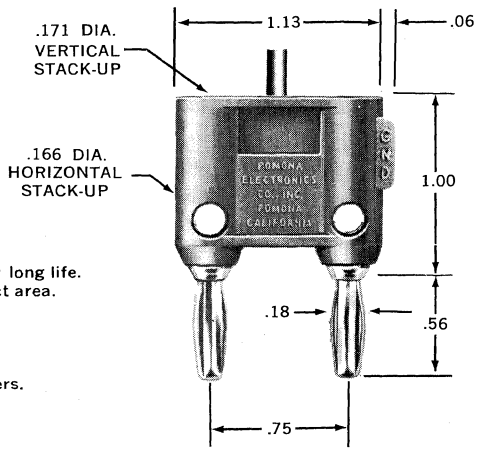
PATCH CORDS DOUBLE BANANA PLUGS

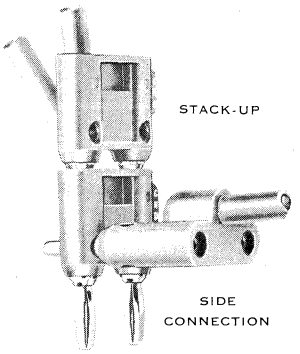
POMONA MOLDED DOUBLE BANANA PLUG PATCH CORDS AND TEST LEADS

. . . indispensable for bridge transformer connections, three terminal capacitor measurements and general hook-up for two wire systems. They are horizontally and vertically stackable in parallel.

Tough thermo-plastic material molded to plug body and cable insures maximum strength, moisture resistance and excellent insulative properties.

Used by leading industries in applications where extreme reliability is of prime importance.





FEATURES . . .

- One piece beryllium copper heat treated spring for long life.
- Rounded spring design results in maximum contact area.
- GND., clearly molded on plug body and shell.
- Solder-bonded noise-free connections.

SPECIFICATIONS . . .

- Fits standard 0.166 dia. banana jacks, on ¾" centers.
- Contact resistance less than 0.001 ohms per plug.
- Spring beryllium copper alloy 170 per QQ-C-533.
- Plug body brass per QQ-B-625, Comp. 22.
- Nickel plated per QQ-N-290, Class 2.

IC SOCKETS — SYSTEMS — ACCESSORIES for TO-5, Flat Pak and DIP — TEST, BREADBOARDING and PACKAGING.

TRANSISTOR SOCKETS Molded and fabricated — For test and packaging — TO-5, TO-18, TO-3 and TO-66.

PIN SOCKETS For leads .010″-.100″ Dia. Over 200 standard styles. Ideal for making module or custom sockets, for relays, or any component. MINIATURE TERMINALS — mate with pin sockets. Over 100 standard styles. SPRING-LOADED CONTACTS for data cards, PCB and component test, lab and prototype.

COAX CONNECTORS AND SPLICES 1-4 conductors; high reliability.

PIPE COUPLINGS STAINLESS STEEL ⅛ thru 2″ NPT.

SCREW MACHINE PRODUCTS — 0″-3″ capacity. Sample lots to high volume. PLASTIC MOLDING — THERMOSETS AND THERMOPLASTICS — Insert molding and encapsulating to very close tolerances.

Also Specials, Customs, Modifications, and Prototype Development.

Pyle-Star-Line® Connectors

Pyle miniature connectors for electronic power and control

Miniature connectors exceeding MIL-C-26500B specifications. Pyle-Star-Line **Mercury Series** connectors are available in stainless steel and aluminum hardware. Stainless steel inhibits corrosion possibilities, extends wear-life, needs no conductive finishes for grounding. Insulator components resist most corrosive fluids and oils, offer complete sealing against moisture, and operate in temperatures up to 392° F.

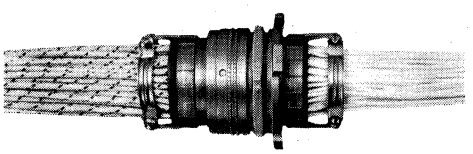
Available with bayonet or threaded coupling in four shell styles: flange mounted receptacles; D-hole mounted receptacles; straight plug, and hermetic solder-mount receptacles. Stainless steel accessories offered for RFI and radiation resistance.

	Stainless Steel	Aluminum
SHELL SIZES:	**14, 16, 18, 22**	**10, 12, 14, 16, 18, 22**
CONTACTS (AWG):	**20, 16, 12**	**20, 16, 12**
NO. OF INSERT CONFIGURATIONS:	**14**	**14**

Miniature Environmental Firewall Connectors. Pyle-Star-Line **Phoenix Series** firewall connectors meet the environmental requirements of Military Specification MIL-C-26500B while exceeding Class K requirements of Military Specification MIL-C-5015D.

Reliable, ruggedly constructed, impervious to moisture and aircraft fluids, and capable of continuing operation at adverse temperatures. Standard installation tools or procedures.

The Phoenix connector has investment-cast stainless steel shells. Threaded or bayonet couplings are available for either square flange or single hole mounting receptacles. Collet retained rhodium plated contacts. Thermocouple contacts are available in sizes 16 and 20.



SHELL SIZES: 14, 16, 18, 22
CONTACTS (AWG): 20, 16, 12
NO. OF INSERT CONFIGURATIONS: 7

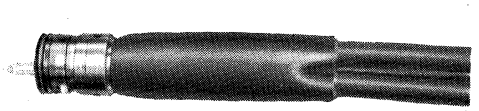
Miniature connectors to NAS 1599 specifications. Pyle-Star-Line **Venus Series** connectors feature unique environmental sealing of individual contacts, combined with interfacial cork-in-bottle seal and multi-riser seal. Rear release of simple collet retained contacts with plastic tool.

Bayonet coupling types (EB) mate with MIL-26482 connectors and threaded coupling types (ET) mate with MIL-C-26500B connectors.

	EB Series	ET Series
SHELL SIZES:	**10 through 24**	**10 through 22**
CONTACTS (AWG):	**20, 16, 12**	**20, 16, 12**
NO. OF INSERT CONFIGURATIONS:	**13**	**13**

CABLE HARNESSES

Cable Harnesses utilize Pyle-National "know-how" with connector terminating, potting and molding to cables. Eminently qualified by special equipment and experience to work with connectors and cable assemblies of varying sizes, insulations, jackets and connector configurations. Single source responsibility for dependable performance.

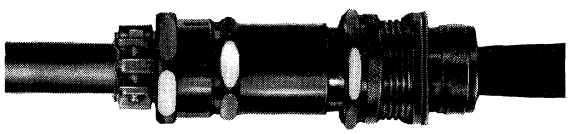


Pyle-National

Connector Division The Pyle-National Company
Chicago, Illinois 60651 (A.C. 312) DI 2-6300

To Meet Critical Application Requirements

Pyle Heavy-duty connectors for electric power and control



General duty connectors. Pyle-Star-Line **Neptune Series** connectors resist moisture, shock, vibration, chemicals, corrosion, pressure, temperature extremes. Rugged hard-coated aluminum shells. Insert configurations ranging from 3 to 143 contacts are available for any application with either captive solder contacts, or push-in crimp (or solder) removable contacts. The collet retained crimp contacts are designed for low insertion and high retention force, and may be easily removed from the rear of the insert with an expendable plastic tool, supplied with each connector.

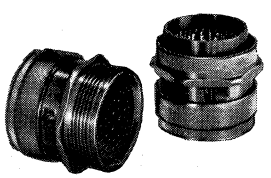
Circuit breaking plugs and receptacles are UL listed. A wide choice of accessory hardware, including RFI shielding capability, is available for your requirements.

SHELL SIZES: 12, 16, 20, 24, 28
CONTACTS (AWG): 18 to 350 MCM
NO. OF INSERT CONFIGURATIONS: 150

Quick connect and disconnect connectors. Pyle-Star-Line **Class Q Series** operates with an axial "push" visibly and audibly engaging, locking and environmentally sealing the connector. An axial "pull" instantly disengages the plug and receptacle.

The simplified design of the connectors permit quick make-and-break without complicated mechanisms. For high reliability and durability in performance, rugged hardware and environmentally sealed inserts have been proven under arctic and tropic conditions. Crimp or solder contacts may be specified.

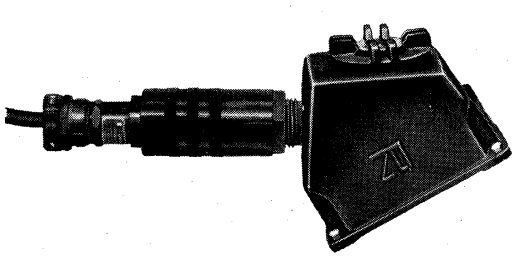
SHELL SIZES: 12, 16, 20
CONTACTS (AWG): 18 to 350 MCM
NO. OF INSERT CONFIGURATIONS: 75



Indexable test connectors. Pyle-Star-Line test connectors prevent physical and electrical damage and facilitate monitoring voltages or signals in circuits. Pyle-Star-Line Test Probe connectors couple to connector under test to enable a test probe to be used at exposed end of insert.

Easy multiple indexing accomplished without tools. Contacts are push-in, removable crimp type. Protective caps available for plugs and receptacles.

SHELL SIZES: 12, 16, 20, 24, 28
CONTACTS (AWG): 18 through 1/0
NO. OF INSERT CONFIGURATIONS: 36



Explosion-proof electrical connectors. Pyle-Star-Line explosion-proof connectors are suitable for use in all Class I, II and III hazardous areas. This includes Groups A, B, C, D, E, F, and G. They have been certified by Underwriters' Laboratories, Bureau of Mines, Canadian Standards Association, and Factory Mutual.

Available for 30, 60, 100 and 200 ampere circuitry.

SHELL SIZES: 16, 20, 24, 28
CONTACTS (AWG): 4, 1/0, 4/0, 350 MCM
NO. OF INSERT CONFIGURATIONS: 11

REYNOLDS INDUSTRIES, INC.

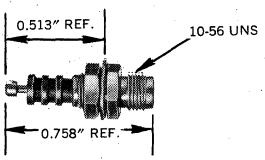
High Voltage Coaxial Connectors

P.O. Box P-850, Marina Del Rey, Calif. 90291 · (213) 823-5491/870-5671 TELEX: 65-2424

SERIES 600 S HIGH ALTITUDE, HIGH VOLTAGE COAXIAL CONNECTORS AND CABLE ASSEMBLIES

VOLTAGE RATING: 10,000 VDC PANEL CONNECTORS, CABLE CONNECTORS AND CABLE ASSEMBLIES (ADAPTERS 5000 VDC.)

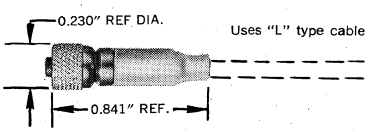
PANEL CONNECTOR: P/N 167-3771



Rated at 10KVDC at any altitude for limited pulse applications, such as EBW firing circuits, providing the rear portion of the connector is suitably encapsulated and it is mated to P/N 167-3770. Threaded sleeve couplings. Gold plated.

Production Test: 100% tested @ 15KVDC for 10 sec. 2% lot tested at altitude to 21KVDC, 3 minutes min.

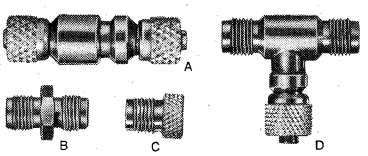
CABLE CONNECTOR: P/N 167-3770



Rated at 10KVDC at any altitude for limited pulse applications, provided it is mated to a suitably encapsulated P/N 167-3771. Threaded sleeve coupling. Soldered center contact and braid assembly. Uses "L" type cable, Reynolds P/N 167-2896. Gold Plated.

Production Test: All insulators are tested to withstand 15KVDC for 10 sec. 2% of each lot are cabled and tested at altitude to 21KVDC, 3 minutes min.

COAXIAL ADAPTERS: RATED 5000 VDC



Rated at 5KVDC for limited service under steady state DC condition. Coupling: Threaded Sleeve. *A:* Double End, Female. P/N 167-3887. *B:* Double End, Male. P/N 167-3318. *C:* Shorting Plug, Male. P/N 167-3833. *D:* "T" Adapter. P/N 167-3888.

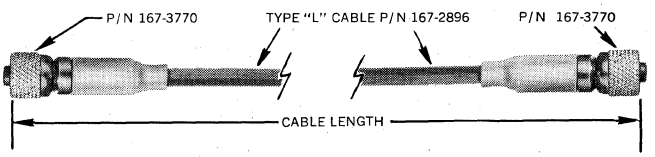
Production Test. 100% tested at 7.5KVDC, 10 sec. Max. permissible leakage: 10 microamperes (mated).

COAXIAL CABLE ASSEMBLIES: P/N 167-3306

Rated to 10KVDC for limited pulse applications at any altitude. Uses P/N 167-3770 connectors, Reynolds "L" cable. Soldered per MIL-S-6872.

Production Test: 100% test @ 21KVDC for 15 sec. Max. Leakage: 10 microamperes. Inspected for pin-to-pin or point-to-point continuity of center conductor and shield after assembly.

To Order: Add length desired to basic part number using a dash and "__F" for feet, "__N" for inches. Example: 167-3306-10F-8N is 10 feet 8 inches long.

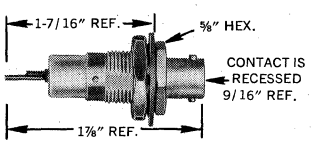


SERIES 500 HIGH VOLTAGE COAXIAL CABLE CONNECTORS AND CABLE ASSEMBLIES

VOLTAGE RATING: 10,000 VDC*

*The voltage ratings shown are for limited service under steady-state DC conditions at sea level. Under these conditions, the connectors operate in the corona region, and therefore have a limited service capability.

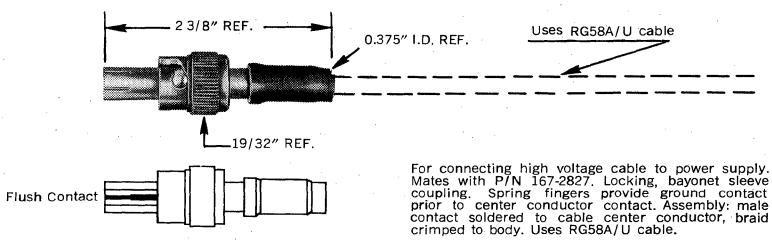
RECESSED CONTACT PANEL CONNECTOR P/N 167-2827



Recessed contact for use on the "hot" side of a HV circuit to minimize personnel hazard. Leakage (unmated): less than 1 microamp. at rated voltage. Spring fingers on mating connector 167-2826 provide ground before center conductor makes contact. Coupling: bayonet sleeve.

Production Test: 100% tested @ 13KVDC, 15 sec.

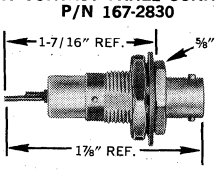
FLUSH CONTACT CABLE CONNECTOR P/N 167-2826. (MATES P/N 167-2827)



For connecting high voltage cable to power supply. Mates with P/N 167-2827. Locking, bayonet sleeve coupling. Spring fingers provide ground contact prior to center conductor contact. Assembly: male contact soldered to cable center conductor, braid crimped to body. Uses RG58A/U cable.

Production Test: 100% tested at 13KVDC for 15 sec.

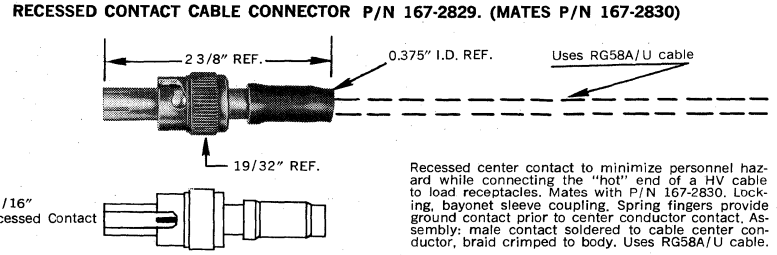
FLUSH CONTACT PANEL CONNECTOR P/N 167-2830



For use on the load or "cold" side of a high voltage circuit. Mates with P/N 167-2829. Coupling: bayonet sleeve. Spring fingers on mating connector provide ground contact before center conductor contact.

Production Test: 100% tested at 13KVDC for 15 sec.

RECESSED CONTACT CABLE CONNECTOR P/N 167-2829. (MATES P/N 167-2830)



Recessed center contact to minimize personnel hazard while connecting the "hot" end of a HV cable to load receptacles. Mates with P/N 167-2830. Locking, bayonet sleeve coupling. Spring fingers provide ground contact prior to center conductor contact. Assembly: male contact soldered to cable center conductor, braid crimped to body. Uses RG58A/U cable.

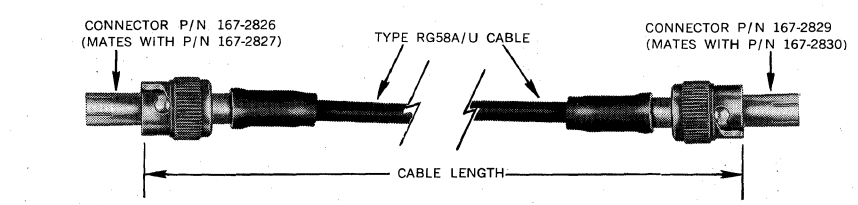
Production Test: 100% tested at 13 KVDC for 15 sec.

COAXIAL CABLE ASSEMBLIES: P/N 167-2969

Rated at 10KVDC with both ends mated. Comprised of P/N 167-2829 (recessed contact) for "hot" end of cable, and P/N 167-2826 (Flush contact) for connection to power source. Uses RG58A/U cable.

Production Test: 13 KVDC potential between center conductor and shell: 15 seconds minimum.

To Order: Add length desired to basic part number using a dash and "__F" for feet, "__N" for inches. Example: 167-2969-10F-8N is 10 feet 8 inches long.

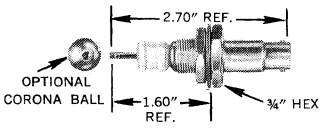


SERIES 531 SAFE HIGH VOLTAGE COAXIAL CABLE CONNECTORS AND ASSEMBLIES. Center Contact on Panel and Cable Connectors is Recessed 0.556"

VOLTAGE RATING: 10,000 VDC*

*The voltage ratings shown are for limited service under steady-state DC conditions at sea level. Under these conditions, the connectors operate in the corona region, and therefore have a limited service capability.

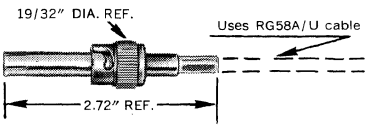
"SAFE" PANEL CONNECTOR: P/N 167-3555 RECESSED CONTACT



Provides rated voltage standoff, mated or unmated. Recessed contact for minimum personnel hazard. Less than 1 microamp. leakage at rated voltage (unmated, with corona ball). Mates with P/N 167-3554. Coupling bayonet sleeve. Mating connector provides ground contact before center conductor makes contact. To order corona ball, add "B" to part number.

Production Test: 100% tested at 15KVDC for 15 sec.

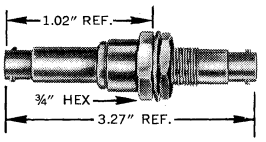
CABLE CONNECTOR: P/N 167-3554



Provides rated voltage standoff, mated or unmated. Recessed contact for minimum personnel hazard. Leakage (unmated) at rated voltage: less than 1 microamp. Mates P/N 167-3555 and 167-3646. Coupling: bayonet sleeve. Provides a ground contact prior to center conductor establishing contact. Assembly: soldered center contact, crimped sleeve braid. Uses RG58A/U cable.

Production Test: 100% tested at 15KVDC for 15 sec.

DOUBLE ENDED PANEL CONNECTOR/ADAPTER: P/N 167-3646



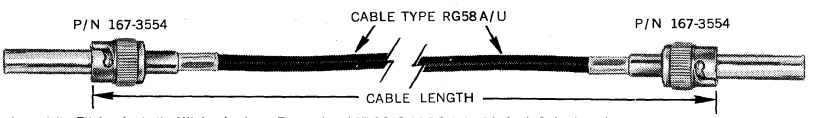
Panel mounted coupler for connecting to two cables. Recessed contact for min. personnel hazard. Leakage (mated or unmated) at rated voltage: less than 1 microamp. Mates P/N 167-3554, both ends. Mating connector provides ground before center conductor makes contact. Coupling: bayonet sleeve locking.

Production Test: 15KVDC for 1 minute.

COAXIAL CABLE ASSEMBLY: P/N 167-3648

Comprised of P/N 167-3554 connectors (recessed contacts) at both ends for minimum personnel hazard, Mates P/N 167-3555 and P/N 167-3646 Leakage at rated voltage less than 1 μa. Uses RG58A/U cable. Soldered per MIL-S-6872.

Production Test: 100% tested at 15KVDC for 1 min.



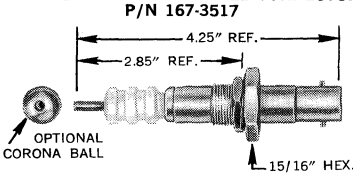
To Order: Add length desired to basic part number using a dash and "__F" for feet, "__N" for inches. Example: 167-3648-10F-8N is 10 feet 8 inches long.

SERIES 521 SAFE HIGH VOLTAGE COAXIAL CABLE CONNECTORS AND ASSEMBLIES. Center Contact on Panel and Cable Connectors is Recessed 0.896"

VOLTAGE RATING: 20,000 VDC*

*The voltage ratings shown are for limited service under steady-state DC conditions at sea level. Under these conditions, the connectors operate in the corona region, and therefore have a limited service capability.

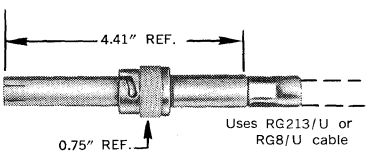
RECESSED CONTACT PANEL CONNECTOR P/N 167-3517



Provides rated voltage standoff, mated or unmated. Recessed contact for minimum personnel hazard. Less than 1 microamp. leakage at rated voltage (unmated, with corona ball). Mates P/N 167-3516. Coupling: bayonet sleeve. Mating connector grounds before center conductor makes contact. To order optional corona ball, add "B" to part number.

Production Test: 100% tested at 28KVDC, 15 seconds.

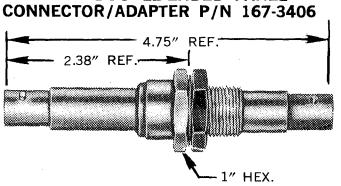
COAXIAL CABLE CONNECTOR: P/N 167-3516



Provides rated voltage standoff, mated or unmated. Recessed contact for minimum personnel hazard. Less than 1 microamp. leakage at rated voltage (unmated). Mates with P/N 167-3517 and P/N 167-3406. Grounds before center conductor makes contact. Coupling: bayonet sleeve. Uses RG213/U or RG8/U cable. Assembly: Soldered center contact, crimped braid.

Production Test: 100% tested at 28KVDC for 15 sec.

COAXIAL DOUBLE-ENDED PANEL CONNECTOR/ADAPTER P/N 167-3406



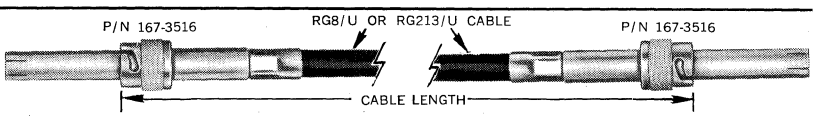
Panel mount coupler/adapter for connecting 2 cables. Recessed center contact for minimum personnel hazard. Leakage (mated or unmated) at rated voltage: less than 1 microamp. Mates P/N 167-3516 on both ends. Coupling: bayonet sleeve. Mating connector grounds before center conductor establishes contact.

Production Test: 100% tested at 28KVDC, 1 minute.

COAXIAL CABLE ASSEMBLY: P/N 167-3638

Comprised of P/N 167-3516 connectors (recessed contacts) at both ends for minimum personnel hazard. Mates P/N 167-3517 and P/N 167-3406. Leakage at rated voltage is less than 1 microampere. Uses RG8/U cable. Soldered per MIL-S-6872.

Production Test: 100% tested at 28KVDC for 15 sec.



To Order: Add length desired to basic part number using a dash and "__F" for feet, "__N" for inches.

Example: 167-3638-10F-8N is 10 feet 8 inches long. For RG213/U cable, add RG213 at end of part no.

SERIES 310 SAFE HIGH VOLTAGE, HIGH ALTITUDE, MOISTURE PROOF COAXIAL CONNECTORS AND ASSEMBLIES

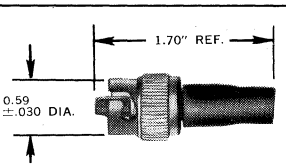
VOLTAGE RATING: 15,000 VDC*

*The voltage rating shown is for limited service under steady-state DC conditions. Under these conditions, the connectors operate in the corona region, and therefore have a limited service capability.

COAXIAL CABLE CONNECTOR: P/N 167-4356

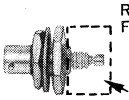
Rated at 15 KVDC at any pressure altitude for limited pulse applications, provided it is mated to a suitably encapsulated panel connector. Locking bayonet sleeve coupling. Assembly: female contact soldered to cable center conductor, braid crimped to body. Use type "C" cable (P/N 167-2669).

Production Test: 100% tested at 15 KVDC for 10 seconds max. 2% lot tested at pressures from sea level to a vacuum at 21 KVDC.



MATING CONNECTOR

Rear Mount P/N 167-3295 (shown)
Front Mount P/N 167-2370

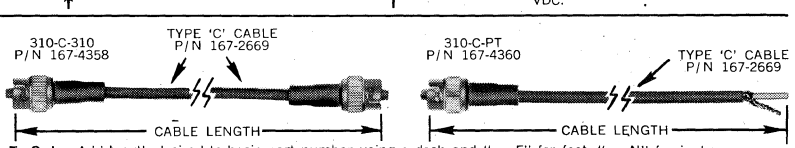


This area must be encapsulated or otherwise insulated when connector is subjected to reduced pressure, moisture or voltages above 5000 VDC.

COAXIAL CABLE ASSEMBLY: P/N 167-4358 and 167-4360

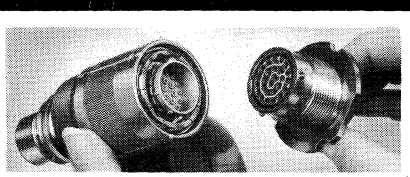
Type 310-C-310 (P/N 167-4358) cable assemblies are comprised of P/N 167-4356 connectors at both ends. Type 310-C-PT (P/N 167-4360) cable assemblies are comprised of a P/N 167-4356 connector at one end and pigtail leads at the other. Leakage at rated voltage is less than 1 microampere. Uses type "C" cable (P/N 167-2669). Soldered per MIL-S-6872.

Production Test: 100% tested at 21 KVDC for 15 seconds at a pressure altitude of 130,000 feet.



To Order: Add length desired to basic part number using a dash and "__F" for feet, "__N" for inches.
Example A: A type 310-C-310 cable 10-feet 8-inches long would be ordered as 167-4358-10F-8N.
Example B: A type 310-C-PT cable 10-feet 8-inches long would be ordered 167-4360-10F-8N.

SPECIAL CONNECTORS AND CABLE ASSEMBLIES



The connector assembly pictured at left is typical of many custom designed and produced connectors and cable assemblies produced by Reynolds Industries for critical and exacting programs for the military and space programs. If you require a special design for umbilical disconnects, interstage separation connectors or exploding bridge wire ordnance applications, we invite you to avail yourself of our twenty years of experience in this specialized field. Your inquiry is invited. □ The example shown is a stage separation connector produced by Reynolds Industries for a major aerospace contractor.

CONNECTOR-CABLE ASSEMBLIES

MOLDED PLUGS AND JACKS

Lab-Tronics molded assemblies are available in many variations both standard and special. Molded connectors are waterproof and provide strain relief. Standard cable jackets are smooth silver-gray non-contaminating high temp. P.V.C. Lab-Tronics can supply any type of cable assembly, lead assembly or wiring harness with molded, crimped or soldered terminations. Check with us first; we may have standard tooling for your special items.

MIX and MATCH, CUSTOMS or STANDARDS

L-T Connectors will accept almost any cable. Designs other than those listed are available. Contact us for information to meet your application. Here are a few of the many markets which are now served by LAB-TRONICS Division of Rowe Industries: **• Communications Systems & Equipment • TV-Radio-Phonographs-Stereo • Data Processing Equipment • Business Machines • Computers • Transportation • Vending Machines • Musical Instruments • Appliances.**

ORDERING INFORMATION

1. Specify Plug or Jack by part number for first end of assembly.
2. Specify wire or cable type.
3. Specify plug, jack, lug, terminal, or type of preparation (strip, split, and tin, etc.) for second end of assembly.
4. Specify overall assembly length.

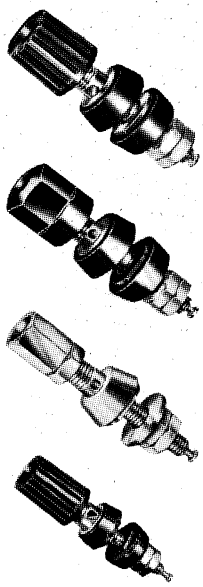
5-way® BINDING POSTS

5 WAYS TO CONNECT • GOLD-PLATED BRASS PARTS • RANGE OF COLORS

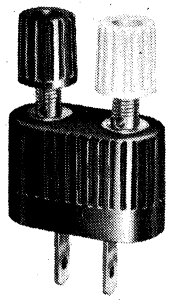


FLUTED NUT TYPES
Plastic parts of standard (not miniature) size types molded of Lexan polycarbonate resin; brass parts are gold-plated. Rated for 30 amperes, 1000 volts working. Nickel-plated brass types available on special order.

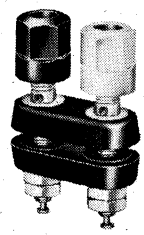
HEX NUT TYPES
Rated for 30 amperes, 1000 volts working. Brass parts are gold-plated; plastic parts are of nylon compounded to meet military specifications MIL-M-20693A, Type IV. Nickel-plated brass types available on order.

GROUNDING TYPE
For making rapid connections to ground. Made of finely machined brass nickel-plated and polished. Panel grounding collar frozen to shaft has "D" type shoulder for locking in keyed panel hole.

MINIATURE TYPES
Fluted nut design only. Rated for 15 amperes, 1000 volts working. Gold-plated brass parts; nylon plastic parts compounded to meet military specification MIL-P-20693A, Type IV. Types with nickel-plated brass available also.



DUAL ADAPTER TYPE
Designed to facilitate line voltage connections from output receptacles to binding posts. Has integral parallel-blade plug. Rating is 15 amperes, 125 volts. Body is black; captive black and white thumbnuts are mounted on ¾" centers. Brass parts are gold-plated. Ideal for safe, rigid connections to equipment lacking a parallel-blade plug and cord assembly.



DOUBLE ASSEMBLY TYPES
For instrument and equipment panels requiring binding posts mounted on ¾" centers. Rated for a current capacity of 30 amperes and a working voltage of 1000 volts. Brass parts are gold-plated; panel insulators in black only. Rugged, self-contained assembly makes mounting more accurate, faster and easier than two individual binding posts and gives maximum strength where connections are frequently made.

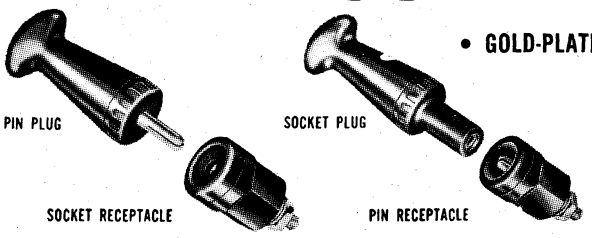
SUPERCON® ELECTRICAL CONNECTORS

• GOLD-PLATED CURRENT CARRYING PARTS • SIMPLIFIED, QUICK ASSEMBLY



Nylon plastic parts, gold-plated brass current-carrying parts. Plugs accomodate either soldered or solderless connections to a wide range of cable sizes. Plug grips are of a simple, two-piece threaded construction for quick assembly. Receptacles have color-matched nylon caps and bodies. 25, 50 and 100 ampere types are rated 125-250 volts a-c ord-c current rupturing, 600 volts disconnect use only. 250 ampere types are rated 600 volts disconnect use only.

AMPERES	PIN PLUGS TYPE†	SOCKET RECEPTACLES TYPE†	SOCKET PLUGS TYPE†	PIN RECEPTACLES TYPE†

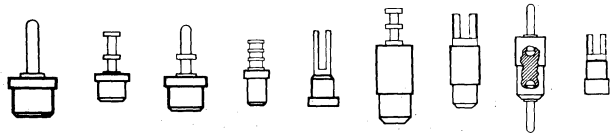
SEALECTRO CIRCUIT HARDWARE

PRESS-FIT® TEFLON* INSULATED TERMINALS

Simply punch or drill the correct hole in a chassis or panel and insert the "Press-Fit" terminal... it's in for good and with all of the outstanding insulating properties of Teflon. "Press-Fit" terminals are available in the most complete across-the-board selection of types in the industry—from micro-miniature units designed, developed and available only from Sealectro to heavy duty types especially designed for high current capacities.

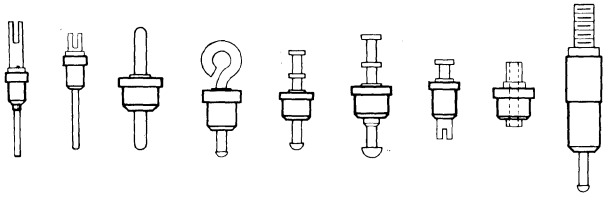
STAND-OFFS

Extremely wide selection of bushings, lugs, platings and finishes in micro-miniature, sub-miniature, and miniature sizes. One piece assembly—no additional hardware involved. From .073" to .215" diameter bushings with a variety of lug and body configurations. 10 E.I.A. colors available.



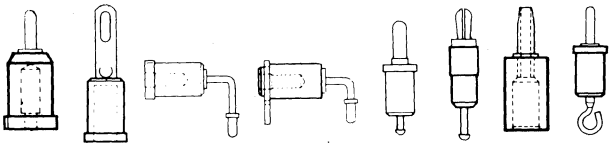
FEED-THRUS

Machined from virgin Teflon to extremely close tolerances for fast, easy and sure installation. Bushing diameters from .075" to .218" in over 350 micro-miniature, sub-miniature, miniature, and tubular units. Available in 10 standard E.I.A. colors and dozens of terminal styles.



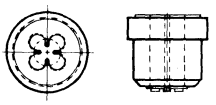
JACKS AND PROBES

Ideal for test points, instrument probes, jumper plugs and multiple connectors while many units are designed for printed circuit applications. Body and mating jack and probe configurations are available to fill virtually every requirement. Offered in 10 standard E.I.A. colors for ease of circuit coding.



CLOVERLEAF RECEPTACLES

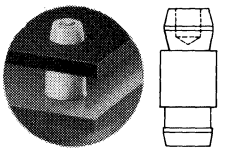
Designed to allow dip-soldering of metal chassis. Unique design for three, four or more thru-leads provides multi-wire connections with each wire in a perfect capillary flow configuration for positive, uniform solder connections. "Press-Fit" chassis installation.



U.S. Pat. No. 3,193,617

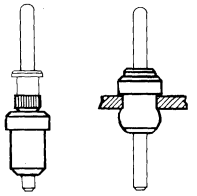
SPACER/BUSHINGS

Completely eliminate the need for metal stand-offs, spacers, and insulators. Install in seconds. Specifically designed for mounting printed circuit boards on metal chassis or panels. "Press-Fit" chassis installation with "snap-on" P. C. board mounting.



NEW *Riv-Loc* TERMINALS (Pat. Pending)

Riv-Loc terminals are a new type terminal designed for insertion in either chamfered or unchamfered holes. They overcome the inherent shortcomings of older semi-assembled terminal types while providing uniform above chassis height. After bushing insertion in the chassis, the lug is inserted from the major diameter side expanding the bushing and securely locking the terminal in the chassis.

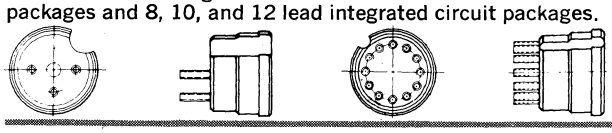


BEFORE INSTALLATION AFTER INSTALLATION

PRESS-FIT® TRANSISTOR & I. C. SOCKETS & HARDWARE

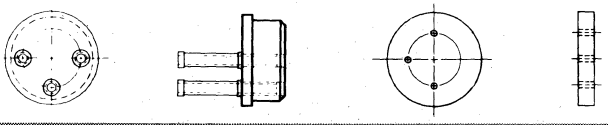
SOCKETS

Low cost, high precision sockets for transistors and integrated circuit packages offering "Press-Fit" installation combined with virgin Teflon bodies and precise contact design for maximum electrical and mechanical performance. Eight standard units designed for 3 and 4 lead TO-18 and TO-5 packages and 8, 10, and 12 lead integrated circuit packages.



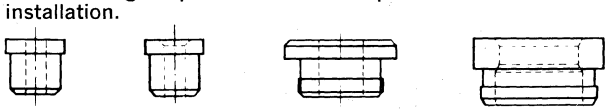
HOLDERS AND PADS

The widest line of Teflon transistor and I.C. holders and pads in the industry. Available in numerous JEDEC packages with from 3 to 12 leads. Color coded and precision machined from virgin Teflon.



"PRESS-FIT" BUSHINGS

A complete line of over 500 standard bushing configurations designed for lead feed-thrus, insulators, bearings, stand-offs, component mounting devices and hundreds of other applications. All machined from virgin Teflon, offered in E.I.A. colors, and featuring simple economical and permanent "Press-Fit" installation.



*Registered Trademark E. I. DuPont de Nemours & Co.

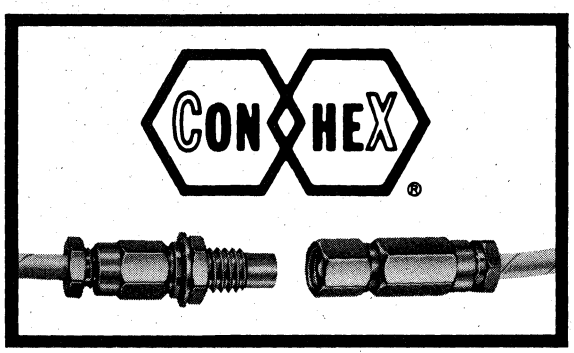
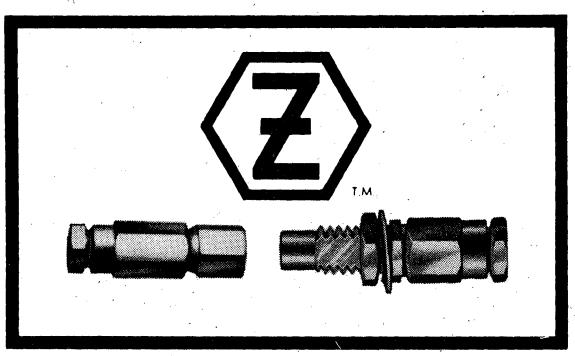
CONHEX® R. F. CONNECTORS



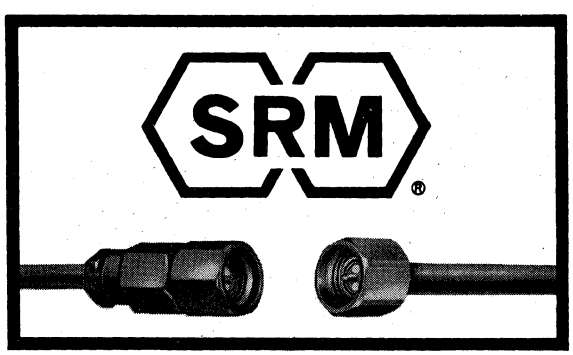
PERFORMANCE, PRICE, DELIVERY FOR RG-188/U AND SIMILAR CABLES UP TO 12.4 GHz

Conhex subminiature R. F. connectors are designed to meet or exceed the requirements of MIL-C-22557. Over 300 standard units — straight, right angle, bulkhead, strip-line, screw-on, snap-on and slide-on — are standard items.



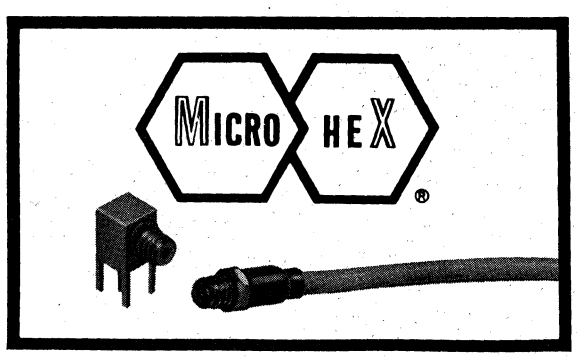
RELIABILITY AND HIGH PERFORMANCE IN AN ECONOMICAL CONNECTOR PACKAGE

Designed for complete compatibility with miniature coaxial cables, such as .141" diameter semirigid types, the Ƶ Series offers the optimum in performance, reliability and cost. More and major manufacturers are discovering that Sealectro Ƶ connectors not only meet their VSWR and power handling requirements but are many times more reliable than similar size connectors especially when subjected to adverse environmental conditions.



FOR STANDARD MATING ENGAGEMENTS AT REDUCED COSTS.

SRM connectors are designed to mate with standard OSM-type mating engagements at reduced cost. SRM connectors are designed for use with RG-141/U, RG-142/U, RG-188/U and similar subminiature coaxial cables, and provide maximum performance and minimum VSWR all the way to 18 GHz



MAXIMUM SPACE AND PAYLOAD SAVINGS WITH PERFORMANCE TO 5GHz

Specifically designed for microminiature RG-196/U and RG-178/U, Microhex connectors are the smallest commercially available. They combine extremely small size and light weight with exceptional performance and reliability. Over 50 standard types including straight, right angle, printed circuit, and bulkhead mounted units in screw-on, slide-on and snap-on are featured in the complete line.

SEALECTRO

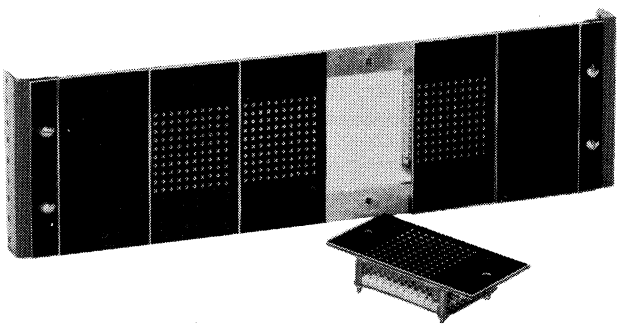
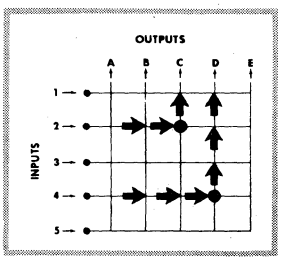
SEALECTROBOARD®

CORDLESS PROGRAMMING BOARDS



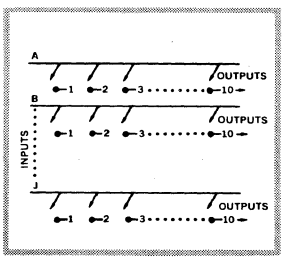
"Sealectroboard" programming and switching provides complete ease and simplicity of operation with drastic reductions in hardware and space. A single pin is used to complete the program circuit or insertion of a component . . . move the pin to a new location and you have a new program function. "Sealectroboards" are made in 2 to 5 deck versions and with a variety of pin styles such as shorting pins, diode holders and skip pins as well as with engraved or silk-screened panel marking and color coded program areas.

Modular "Sealectroboard" are designed to facilitate program board expansion in prototype and design applications and are offered off-the-shelf from Sealectro Distributors. Each modular board is a 10 x 10 matrix with two contact decks in bussed upper and lower or bussed upper, individual lower contact configurations. Companion mounting and panel pieces are designed for 19″ relay rack mounting and allow expansion from a single board up to 6 boards in just 5½″ of rack space. Write for our complete catalog and technical specifications.....



Bussed Upper and Lower Contacts

The Modular Sealectroboard is available with bussed upper and lower contacts and provides an ideal means for input/output switching. The standard 10 x 10 hole Modular Sealectroboard may be considered 10 Single Pole, Single Throw, Normally Open switches with 10 inputs each.



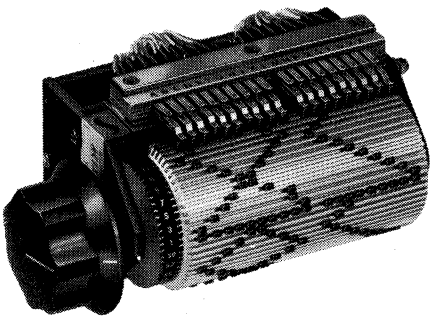
Bussed Upper and Individual Lower Contacts

The Modular Sealectroboard is also available with bussed upper and individual lower contacts which provide individual electrical access to each program hole and a path between many terminals and a lesser number of bussed terminals. The standard 10 x 10 hole Modular Sealectroboard with this contact configuration may be considered a 10 Pole, Single Throw, Normally Open switch with 10 positions per pole.

U.S. Pat. No. 3,027,534

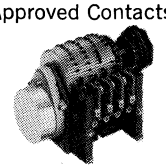
PROGRAM SWITCHING SEALECTROSWITCH®

PROGRAMMING SWITCHES

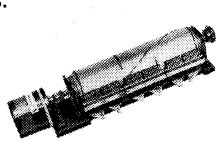


Programs may be changed in seconds without special tools and with 100% reproducibility. The Sealectroswitch programming switch provides a degree of versatility that can't be met by comparable devices . . . and in half the space and half the cost. Extremely high "built in accuracies" are provided through precision machined drums while flexibility is obtained through unique, field-adjustable, sliding contact actuators. Check these features • Field Adjustable Cams With Multiple ON/OFF Functions or Point-to-Point Switches • Manual or Remote Operation With Timing Motor or Solenoid Drive • Transfer Speeds to 50 Milliseconds Without Appreciable Contact Bounce • Removable Drums • Form A, B, and C Contacts in a Single Unit • Up to 57 Circuit Controls in a Single Unit. • Contacts Rated for Dry Circuit to 2 Amps, 24 VDC or 115 VAC. • Optional 10 Amp or 20 Amp, 115 VAC U. L. Approved Contacts.

Recycling timer with point-to-point or cam action, single snap-action contact.



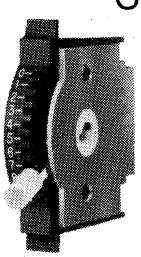
Enclosed, snap-action contacts and timing motor drive.



90 program positions, 57 contacts and timing motor drive.

U.S. Pat. No. 3,330,917 Also protected by foreign patents

SEALECTRO SLIDE 'N SWITCH™



The Sealectro Slide 'n Switch circuit selector is designed to provide a highly reliable random access switching device for the programming of all types of automated equipment. Standard units are 11 position, single pole with a built-in "skip" function. If it is desired to switch from position 1 to position 5, the Slide 'n Switch handle is pulled out and the switch handle moved from 1 to 5. No electrical contact is made with any of the intermediate switch contacts.

Multiple units may be stacked side-by-side to provide any number of decade switches while the unique printed circuit board construction of the switch permits any special electrical coding to be supplied at minimum cost. Slide 'n Switch output terminations mate with standard edge-mount pc card connectors.

SPECIALS (CUSTOM DESIGN)

Sealtron will design special connectors or modify standard connectors for manufacturers who, by reason of assembly, design, or economy, require these services and modifications. Unit designs and multi-piece copper-brazed construction can eliminate many production problems by minimizing joints where leakage could occur, reducing rejection rate by minimizing secondary operations, and rendering an economical end product.

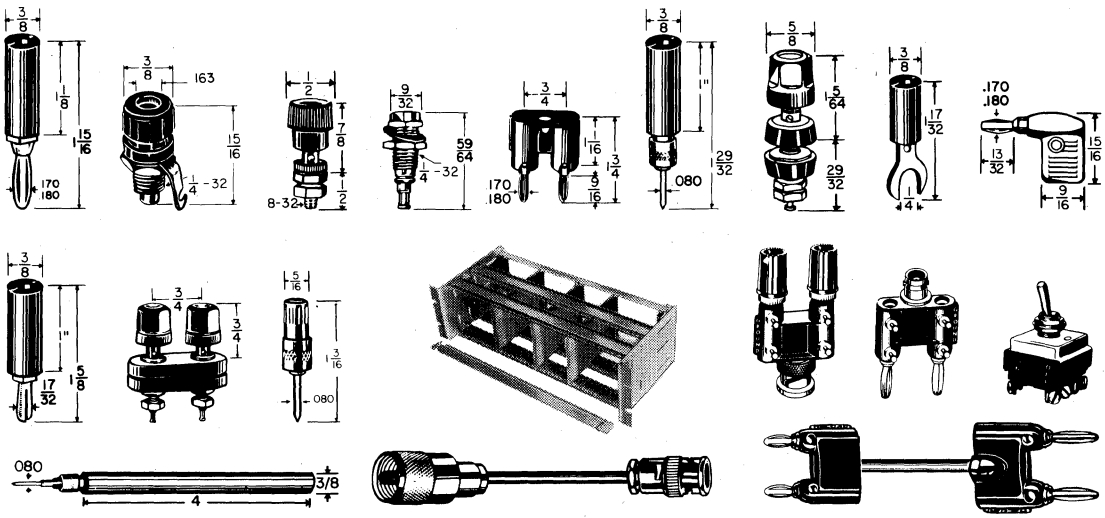
For Whatever You Need in

Electronic Components



MORE THAN TEN THOUSAND ITEMS MANUFACTURED UNDER ONE ROOF

- BINDING POSTS
- BANANA PLUGS & JACKS Insulated & Non-Insulated
- PHONE TIP PLUGS & JACKS Insulated & Non-Insulated
- Telephone Type Plugs & Jacks
- ALLIGATOR CLIPS
- TEST PRODS & TEST LEADS
- JUMPERS & PATCH CORDS
- SWITCHES Arrow, H-H, Kulka Cutler-Hammer, Micro, Continental-Wirt
- TEFLON & TURRET TERMINALS
- SHAFT ACCESSORIES
- ELECTRONIC HARDWARE Terminal Strips, Boards, Grommets, Bumpers, Bushings, Washers, Lugs
- KNOBS

You'll find these SMITH products on the shelves of leading industrial Electronic Distributors, throughout U.S.A. For your production runs, draw directly on our large plant inventories of standard components.

NATIONWIDE REPRESENTATIVES

The SMITH network of Qualified Sales Engineers is at your service! These men and their organizations are technically qualified and eager to help you with your requirements for standard or special components that we manufacture.

MODERN FACILITIES

We invite you to utilize our modern manufacturing facilities and methods for your molding, screw-machine, stamping or sub-assemblies. We are equipped for both long and short runs. From raw material to finished part, SMITH detailed workmanship and production efficiency assure a quality product, speedily and economically made.

SPECIAL REQUIREMENTS?

Use our Engineering and Production Facilities to design and develop new products or modify existing components to meet your specific needs. "Specials are Standard with SMITH!"

FOR ENGINEERS & PURCHASING AGENTS!

New Smith Catalog is an important Reference Work on electronic component parts, containing:
Detailed specifications! Data; Dimensional Drawings.

Tooling for Teflon* Terminal Installation

Because proper tooling is an important consideration and in order to fully benefit from the application of H. H. Smith Terminals, special tools and equipment have been designed to accomplish installation to the optimum degree.

Depending on requirements, a customer may order any of the listed equipment. Smith installation tooling is designed for utmost versatility. Removable multi-usage inserting tools permit flexibility with a minimum of down time required for changeover.

MINISERT AUTOMATIC	MINISERT MK I	UNISERT
		The MINISERT Automatic **feeds** and **inserts** teflon terminals **automatically**. This **low cost** air operated device **is fast** and **simple to set up** and **operate** and will install terminals pre-packaged in the unique Mini-Pak cartridge.	The MINISERT MK I semi-automatic eliminates the high cost of installing teflon terminals. **Practical** for Lab, model shop, or production application, the full range of terminals can be installed with a maximum of five tool sets.	***ATTENTION: HIGH VOLUME USERS!*** The UNISERT Universal teflon terminal inserting system meets the specific demands of high volume teflon terminal users. The **Unisert** may be operated utilizing its pantograph frame or with its uniquely designed anvil system. The **Unisert** has proven to be a reliable production tool, operating continuously on a multi-shift basis.

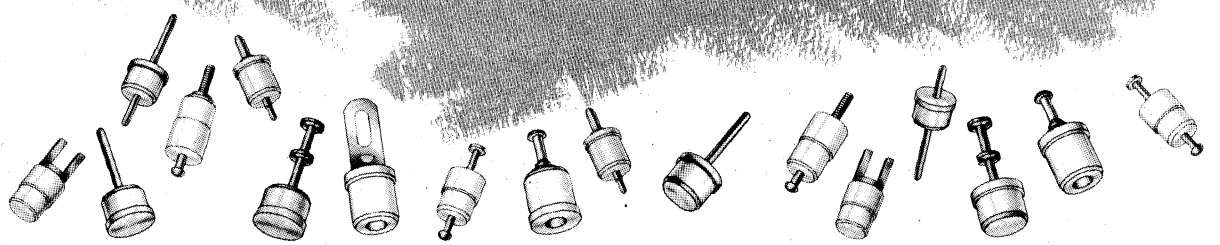
SMITH
Terminal Division

Herman H. SMITH, inc.

TEFLON TERMINALS



QUALITY	INVENTORY	SERVICE
Herman H. Smith manufactures its teflon terminals from virgin teflon that meets or exceeds the specifications of MIL-P-19468; and the requirements of MIL-T-55155 and MIL-C-39024. All phases of the manufacturing cycle are rigidly supervised by our Quality Control Department. The end product represents the ultimate in quality and reliability.	Herman H. Smith manufactures and stocks a complete line of teflon terminals, test jacks and transistor sockets . . . all colors . . . all sizes . . . all types. GUARANTEED STOCK AVAILABLE — contact your local rep or distributor for further information on our G S A program.	Herman H. Smith's design service offers a competent engineering, development and testing facility to resolve your application and product development problems. Smith's field engineering service is nationwide. These men are thoroughly experienced and can solve your design and production problems. They are at your service — CALL THEM.

THE MINIPAK CARTRIDGE is designed to work in conjunction with the **Minisert Automatic.** It contains a precision, hermetically sealed "carrier band" which protects the terminals from atmospheric contaminants, eliminating the problems of solderability and shelflife.

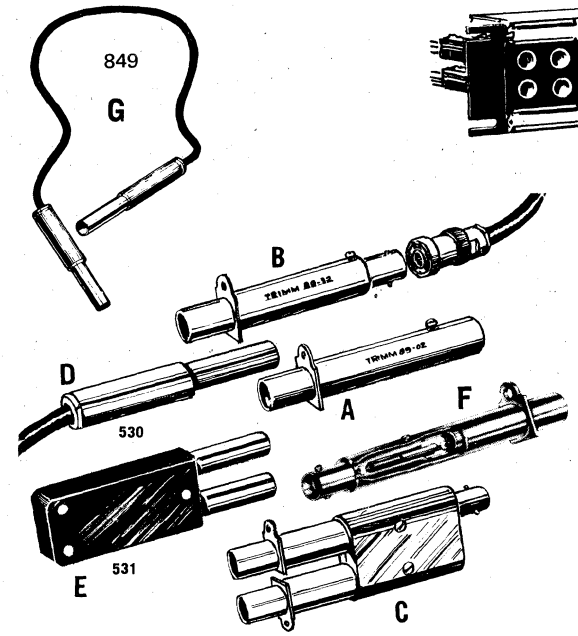
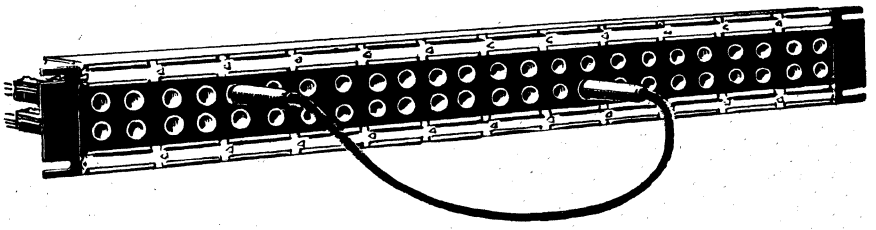
SMITH
Terminal Division

TRIMM INC.

- COAX PRODUCTS
- JACK PANELS
- TERMINAL BLOCKS





JACK PANELS—PATCH CORDS

TRIMM standard jack panels are available in several basic forms — all phenolic, all metal sandwich construction; and hybrid phenolic rear, metal front types. Also for use with either standard or miniature telephone jacks. See TRIMM bulletins.

SERIES SST — Standard sized telephone jacks, keys, lamp sockets, jack mounting strips, patch cords, plugs; coax jacks, plugs etc.

SERIES IST — Intermediate sized coax jacks, plugs, jack mounting strips (correspond with W.E. miniature coax items).

SERIES MST — Miniature telephone jacks, patch cords, plugs, jack mounting strips and other related items.

COAXIAL PLUGS & JACKS

A condensed listing of TRIMM's coaxial plugs, jacks and jack mounting strips used for monitoring and patching high frequencies or pulse circuitry is given below. Request Section 60 of our bulletins for additional data on TRIMM Coaxial Components.

SINGLE TYPE COAX JACKS

	W.E. Compatible	RCA Compatible	Cable
	64-88-02		RG-59 (Equiv. W.E. 560A)
	64-88-15		(Equiv. W.E. 558A)
	89-01	89-701	RG-58
	89-02	89-702	RG-59
A	89-05		RG-11
	89-06		RG-8, 9
	89-07	89-707	RG-54, W.E. 724 and Belden 8281; jack similar to W.E. 477B
	89-11		RG-187
	89-14		Amphenol 21-597 and RG-122U
B	89-15*	89-715	(*Similar to W.E.470B)
	89-32	89-732	Female BNC
	89-34	89-734	Female TNC

TWIN TYPES — NON-SWITCHING

	89-51	89-751	RG-58
C	89-52	89-752	RG-59
	89-57		W.E. 724 or Belden 8281
	89-82S	89-782S	Single BNC at rear

NORMAL THRU TWIN JACKS

	89-102	89-802	RG-59
	89-132	89-832	BNC at rear

COAX PLUGS

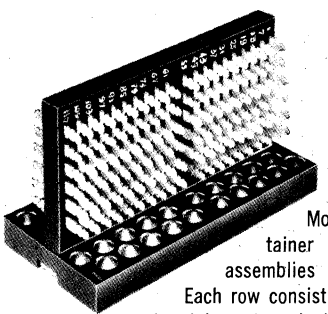
	64-530-6		RG-59 (Equiv. W.E. 440A)
	530-1	530-701	RG-58
	530-2	530-702	RG-59
D	530-6 (**)	530-706	RG-54, Belden 8281 or W.E. 724
	530-15	530-715	RG-58
	530-16	530-716	RG-59

(**) Similar to W.E. 358A

"531" SERIES BRIDGING PLUGS (E)
A twin coaxial plug (sometimes called a looping plug) internally wired and having no external cord connection.

TERMINATING JACKS (F)
These jacks are used in circuitry in which there is a need to maintain a known load in the circuit. When plug is fully inserted, load is automatically disconnected and circuit transferred to plug. Terminating resistor — ¼ watt 1% metallized film type in either 50 or 75 ohm.

"849" SERIES PATCH CORDS (G)
Use two "530" series plugs. They are available in length from six inches to 6 feet (or longer on special order).



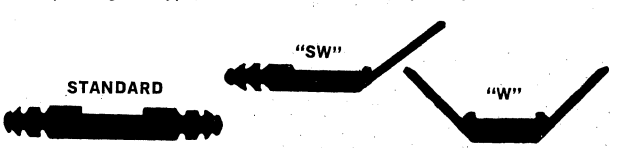
TERMINAL BLOCKS

Molded phenolic base and retainer strips used on all standard assemblies (dially!'s available to order). Each row consists of retainer strip with tintillate plated brass terminal lugs inserted into slots. Available in 20 and 26 terminals per row up to 14 rows high. Held together with machine screws passing through strips to base. Standard and alternate lugs shown below.

421A (No. of rows) 20 terminals per row } Have different
421C (No. of rows) 20 terminals per row } mounting means

427B (No. of rows) 26 terminals per row } "B" series most common; "D" series used on extra high assembly
427D (No. of rows) 26 terminals per row }

See TRIMM section bulletin 35 for more data. Pricing from $4 to $16 depending on type, number of terminals, quantity etc.



(NOTE: See SECTION 1300 on page 573 for TRIMM headsets, acoustical items and related products.)

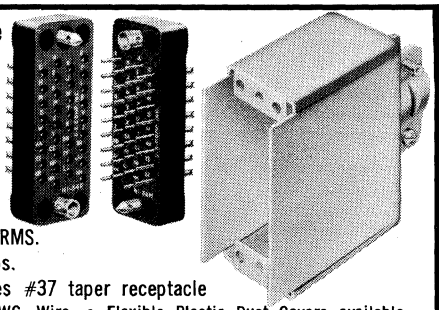
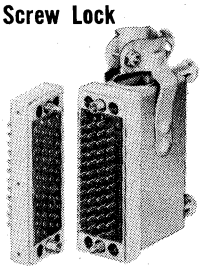
Rack and Panel Connectors

MI-SERIES - Miniature



Number of contacts: 7, 12 (8-4), 14, 18, 20, 21, 26, 34, 41, 50, 75
Maximum wire size: #20 AWG wire
Voltage breakdown between contacts — sea level: 3000V. A.C. RMS.
Current rating: 7.5 amps.
MI-SDL (solderless): uses #37 taper receptacle
Also available for #18 AWG. Wire. • Flexible Plastic Dust Covers available.

MI-BSL "FBI" SERIES - Miniature Bracket Screw Lock

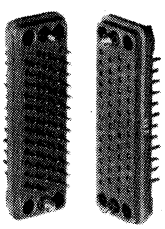


Floating Body Isolation

Number of contacts: 34, 41, 50, 75.
Maximum wire size: #20 AWG wire.
Voltage breakdown between contacts — sea level: 3000V. A.C. RMS.
Current rating: 7.5 amps.
Hoods: aluminum anodized.
Brackets: die-cast aluminum.
MI-BSL-SDL (solderless): uses #37 taper receptacle.
Patent Nos. 2,761,108, 2,845,603, 2,845,604.
Additional Patents Pending. Also available for #18 AWG. Wire.

IMI SERIES - Miniature

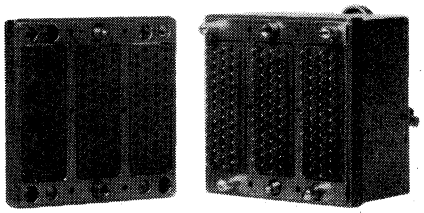
IMI-SL SERIES - Miniature Screwlock



(Similar to MI & MI-SL Series except: End Holes of 7 thru 26, & 41, and Center Holes of 34 thru 104 have Square Shape, for MS Hardware).
Number of contacts: 7, 9, 8-4, 14, 18, 20, 21, 26, 34, 41, 42, 50, 75 & 104.
Wire sizes accommodated: No. 20 A.W.G. (No. 18 on special order).
Pin diameter: .040
Current rating: 7.5 amps., max.
Test voltage, between contacts, sea level: Meets MIL-C-008384C requirements.
Contact options: Closed-entry, dip solder (.038 or .025 dia), turret.
Hardware: MS18194, MS18195, MS18196, MS18197 and MS Hoods (shields), all per MIL-C-008384C or its successor.
Guide pins and guide sockets: Many alternates.
Connectors and hardware qualified to MIL-C-008384C.
IMIs interchangeable with their counterparts in MI, REMI, and URC (size 20 contact) SERIES.
Patent No. 2,761,108. • Request Catalog IMI.

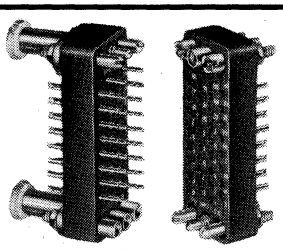
Floating Body Isolation

MI-BMSL SERIES Miniature Bracket Modular Screw Lock



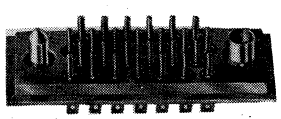
Number of contacts: 123, 150, 225.
Maximum wire size: #20 AWG wire.
Voltage breakdown between contacts — sea level: 3000V. A.C. RMS.
Current rating: 7.5 amps.
Hoods: aluminum anodized.
Brackets: die-cast aluminum.
MI-BMSL-SDL (solderless): uses #37 taper receptacle.
Patent Nos. 2,761,108, 2,845,603, 2,845,604. Also available for #18 AWG. Wire.
Additional Patents Pending

MI-KSL SERIES Miniature Hoodless Knob Type Screw Lock



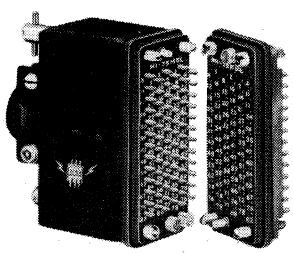
Number of contacts: 7, 12 (8-4) 14, 18, 20, 21, 26, 34, 41, 50, 75.
Maximum wire size: #20 AWG wire.
Voltage breakdown between contacts — sea level: 3000V. A.C. RMS.
Current rating: 7.5 amps.
MI-KSL-SDL (solderless): uses #37 taper receptacle.
Patent No. 2,761,108. • Also available for #18 AWG. Wire.

HMI-SL SERIES Hermetic Seal Miniature Screwlock



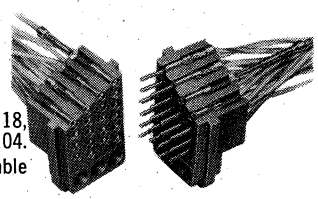
Number of contacts: 7, 12 (8-4), 14, 18, 20, 21, 26, 34, 41, 50, 75.
Voltage breakdown between contacts — sea level: 2200V. A.C. RMS, MIN.
Current rating: 7.5 amps.
Mates with corresponding MI-FSL (female) series connectors.
Also available in Draw-Pull Type. Mates with MI-F (female) Series Connectors.

MI-SL SERIES Miniature Screw Lock



Number of contacts: 7, 12 (8-4), 14, 18, 20, 21, 26, 34, 41, 50, 75.
Maximum wire size: #20 AWG. wire.
Voltage breakdown between contacts — sea level: 3000V. A.C RMS.
Current rating: 7.5 amps.
MI-SL-SDL solderless): uses #37 taper receptacle.
Patent No. 2,761,108. • Also available for #18 AWG Wire.

REMI® SERIES Standard and Screwlock

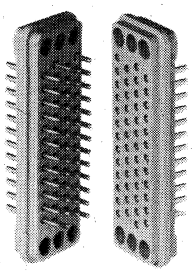


Number of contacts: 7, 12 (8-4), 14, 18, 20, 21, 26, 34, 41, 42, 50, 75, 104.
Type of contact: crimp style, removable with "snap-in, snap-out" feature.
Wire sizes accommodated: #14, #16, #18, #20, #22, #24, #26, #30 AWG and sizes #16 down to #32 per MIL-W-16878,
Snap-In . . . Snap-Out Contacts REMI Hand-Operated,* Pneumatic and Semi-Automatic Crimping Tools Available.
Patent No. 2,979,689 & 6 International Patents.
Contacts available meeting MS18134, MS18136, per MIL-C-23216, latest.
All sleeves meet MS18135. Insertion and Removal Tool Meets MS18137.
Request Catalog REMI. * MIL-T-22520 latest rev.

MIW SERIES

Miniature Rectangular Power Connectors

(Similar to MI Series except .062 dia. contact)



Number of contacts: 7, 9, 11, 14, 18, 20, 21, 26, 34, 41, 42, 50, 75, 104.

Pin diameter: .062

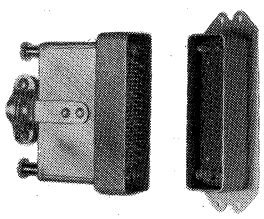
Wire sizes accommodated: up to #16 AWG.

Current rating: 13 amps., max.

Breakdown voltage between contacts — sea level: 2000V. A.C., RMS.

Connectors meet applicable provisions of MIL-C-8384, latest revision.

XMI Protective Shells for MI SERIES
XIMI Protective Shells for IMI SERIES
XREMI Protective Shells for REMI SERIES
XURC Protective Shells for URC SERIES



Number of contacts: 7, 14, 18, 20, 26, 34, 42, 50, 75, 104.

Material: Top quality aluminum, per Fed. spec.

Meet latest revision MS17775 unless otherwise specified.

Anodized per latest revision MIL-A-8625, or special conductive finishes on request.

Used on plugs and receptacles, all draw-pull or screwlock types.

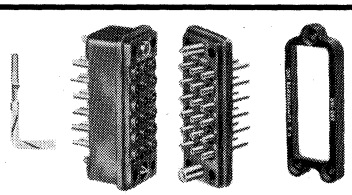
Polarization optional, at specified position.

For 9 & 66 contact shells, write factory.

Request Catalog IMI, REMI, or URC.

980 SERIES

Power Guide Pin Spring Release



Number of contacts: 12, 18, 24, 34.

Maximum wire size: #16 AWG. wire.

Voltage breakdown between contacts — sea level: 4600V. A.C. RMS.

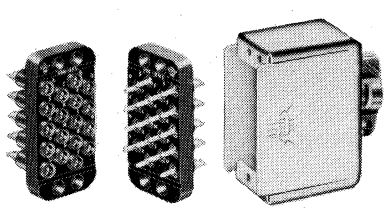
Current rating: 13 amps.

980-SDL (solderless): uses #53 taper pin.

Patent No. 2,658,182.

Request Catalog 980-990.

990 and 990-S (Short Contacts) SERIES - Power



Number of contacts: 7, 10, 15, 18.

Maximum wire size: #16 AWG. wire.

Voltage breakdown between contacts — sea level: 4000V. A.C. RMS.

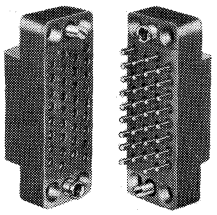
Current rating: 13 amps.

990-TU (Turret type).

Request Catalog 980-990.

ANYCON* Connectors

URC and URC-SL SERIES



Number of contacts: 9, 14, 18, 20, 26, 34, 42, 50, 66, 75, and 104.

Maximum wire size: #16 AWG.

Voltage breakdown between contacts — sea level: 2950V. A.C. RMS.

Current rating: 13 amps.

Contac size (standard): 20 & 16.

Shielded coax contacts: See list below.

Contacts — Removable, crimp-type. Socket closed entry type: See list below.

Order contacts separately.

Connectors meet MIL-C-22857, latest revision. Also commercial.

Both draw-pull and twin screwlock types available, with or without hoods or shells.

Crimping tools, insertion and removal tools available.

Patent No. 2,761,108. UNDERWRITERS' LABORATORIES APPROVED.

* ANY CONtact, std. size 16 or 20, or shielded coax in ANY CONtact position.

Request Catalog URC.

URC ANYCON CONTACTS

STANDARD, CONTACT SIZE 16 † ‡

MS17803-16-16 Pins for wire sizes 16, 18, 20 AWG.

MS17803-16-20 Pins for wire sizes 20, 22, 24 AWG.

MS17804-16-16 Sockets for wire sizes 16, 18, 20 AWG.

MS17804-16-20 Sockets for wire sizes 20, 22, 24 AWG.

† Qualified against MIL-C-23216.

‡ Available also in contact size 20 for wire sizes 16 thru 30 AWG.

SHIELDED 'COAX',* CONTACT SIZE 16

MS18232-1 Pins for RG-178B/U & RG-196A/U cable.

MS18233-1 Sockets for RG-178B/U & RG-196A/U cable.

MS18265-1 Sockets for RG-161/U, RG-179B/U, & RG-187A/U cable.

MS18265-2 Sockets for RG-174/U, RG-188A/U, & RG-316/U cable.

MS18266-1 Pins for RG-161/U, RG-179B/U, & RG-187A/U cable.

MS18266-2 Pins for RG-174/U, RG-188A/U, & RG-316/U cable.

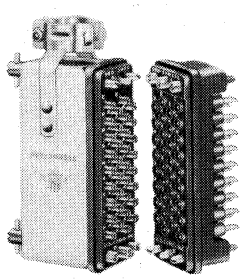
* For government end use.

Crimping tools per MIL-T-22520 (latest) and/or MS drawing requirements. Hand, semi-automatic, and automatic.

Request Catalog URC.

980-SL SERIES

Power Screw Lock



Number of contacts: 12, 18, 24, 30.

Maximum wire size: #16 AWG. wire.

Voltage breakdown between contacts — sea level: 4600V. A.C. RMS.

Current rating: 13 amps.

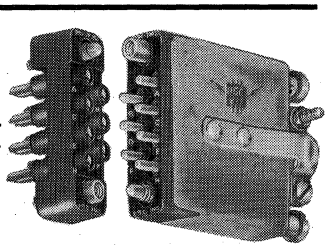
980-SL-SDL (solderless): uses #53 taper pin.

Patent Nos. 2,658,182, 2,761,108.

Request Catalog 980-990.

990-SL SERIES

Power Screw Lock



Number of contacts: 7, 10, 15, 18.

Maximum wire size: #16 AWG. wire.

Voltage breakdown between contacts — sea level: 4000V. A.C. RMS.

Current rating: 13 amps.

990-TU (Turret type).

Double Lead threads, "Twice the speed with Double Lead."

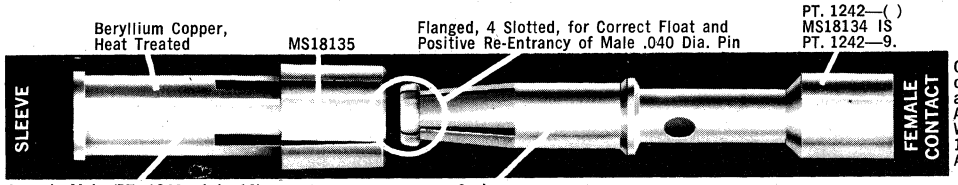
Patent No. 2,761,108.

Request Catalog 980-990.

THE REMI CONCEPT

Removable • Closed Entry • Crimp Type Contacts — Mechanical Stresses Confined between METALLIC Elements.

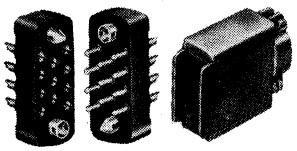
REMI Connectors Mate with REMI, MI, or URC (with .040 Dia. Contact) Series.



Crimp Barrels of Both Male and Female Accommodate Wire Sizes 14 thru 30 AWG.

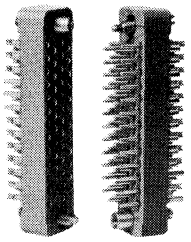
Rack and Panel Connectors & Edgeboard P.C. Connectors

SMI SERIES - Subminiature



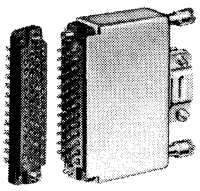
Number of contacts: 5, 7, 11, 14, 20, 26, 29, 34, 42, 50, 75, 104.
Maximum wire size: #20 AWG. wire.
Voltage breakdown between contacts — sea level: 1950V. A.C. RMS.
Current rating: 7.5 amps.
Also available with closed entry contacts — CSMI Series.
XSMI Protective Shells available for all types. Request Catalog SMI.

UMI SERIES - Ultraminiature
Draw-Pull & Screwlock



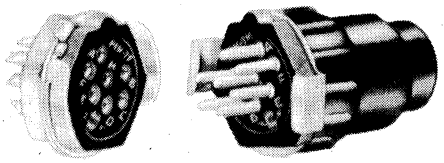
Number of contacts: 5, 7, 9, 11, 14, 20, 26, 29, 34, 44, 50.
Maximum wire size: #22 AWG. wire.
Voltage breakdown between contacts — sea level: 1800V. A.C. RMS.
Current rating: 3 amps.
Patent No. 2,761,108.
ALSO AVAILABLE WITH:
Closed Entry Contacts: CUMI Series.
Removable Crimp Contacts: RUMI Series.
.025 D. Pin and Socket: SSMI Series.
Request Catalog UMI-RUMI.

SMI-HSL - Subminiature Hooded Screwlock
SMI-KSL - Subminiature Hoodless Screwlock (Not Shown)



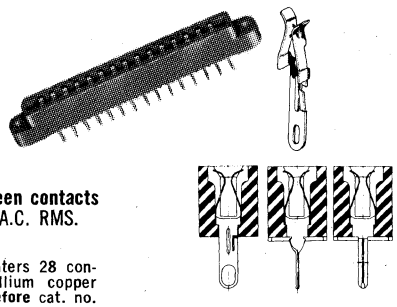
Number of contacts: 5, 7, 11, 14, 20, 26, 29, 34, 42, 50, 75, 104.
Maximum wire size: #20 AWG. wire.
Voltage breakdown between contacts — sea level: 1950V. A.C. RMS.
Current rating: 7.5 amps.
Also available with closed entry contacts — CSMI-SL Series.
Patent Nos. 2,761,108 & 3,030,602. Request Catalog SMI.
XSMI Protective Shells available for all types.

MH SERIES
Miniature Hex



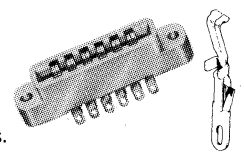
Number of contacts: 4, 5, 7, 9
Current rating: 7.5 amps.
Maximum wire size: #20 AWG. wire.
Voltage breakdown between contacts — sea level: 1215V. A.C. RMS.
Voltage breakdown contacts to ground: 1785V. A.C. RMS.
MH-SDL (solderless): uses #37 taper receptacle.
ALSO AVAILABLE FOR #18 AWG. WIRE
Patent No. 2,848,702.

UPCR SERIES
Single Row Printed Card Receptacle



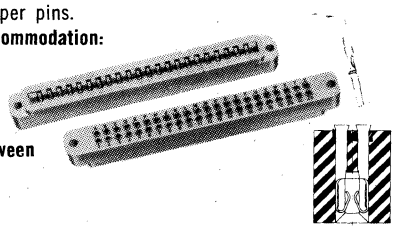
Number of contacts — (Phosphor Bronze): 6, 10, 15, 18, 22.
Solder wire hole size: .05 x .12.
Voltage breakdown between contacts — sea level: 2500V. A.C. RMS.
Current rating: 5 amps.
Also available on .125 centers 28 contacts UP4CR-28. For beryllium copper contacts add prefix "B" **before** cat. no.
Polarizing pins and contacts — snap-in or out design permitting easy interchangeability.
Patent No. 2,835,689. Request Catalog UPCR.
Connectors meet MIL-C-21097, latest revision.

UPCR-D - Double Row Printed Card Receptacle - Solder Type Terminals



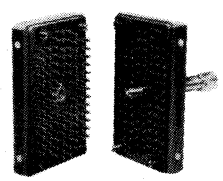
Card range thickness accommodation:
UPCR-D: .058 - .072 (nom. 1/16")
UPCR-93D: .080 - .104 (nom. 3/32")
Number of contacts (Phosphor Bronze*): 6, 7‡, 10, 15, 18, 22 per row, (2) rows.
Solder wire hole size: .05 x .12.
Voltage breakdown between contacts — sea level: 2500V. A.C. RMS.
Current rating: 5 amps.
Both bifurcated and non-bifurcated contacts available.
Polarizing pins and contacts — snap-in or out design permitting easy interchangeability.
* For beryllium copper contacts add prefix "B" **before** catalog number.
‡ Molded in polysulfone, one of the strongest, most heat-resistant, self-extinguishing thermoplastics available. Excellent electrical properties. For availability of other items in polysulfone, contact factory.
Patent No. 2,909,755. Request Catalog UPCR.
Connectors meet MIL-C-21097, latest revision.

UPCR-DTLP - Single Row Dual Linked Contact



UPCR-DLTP: Uses #53 taper pins.
Card Range thickness accommodation: .052 - .072 (nom. 1/16")
Number of contacts (Beryllium Copper): 18, 22.
Voltage breakdown between contacts — sea level: 2500V. A.C. RMS.
Current rating: 5 amps.
Tails locked in place with stainless steel retaining ring which controls retention force on the #53 taper pins accepted by contacts.
Request Catalog UPCR.

MIWC SERIES - 104 Contact Center Screwlock Plugs & Receptacles



Connector type: Rack and panel.
Contact types: 0.062 dia. pin and mating closed-entry socket.
Contact spacing: 0.150 center-to-center.
Current rating: 13 amps. max. 10 amps cont.
Voltage breakdown between contacts — sea level: 3000V. A.C. RMS.
Solder cup: 0.073 dia. for #16 AWG. max. wire.
Available versions: MIWC-104M2SL, MIWC-104F2K } (illustrated above) MIWC-104M2K, MIWC-104F2SL

CONNECTOR TYPES AVAILABLE:

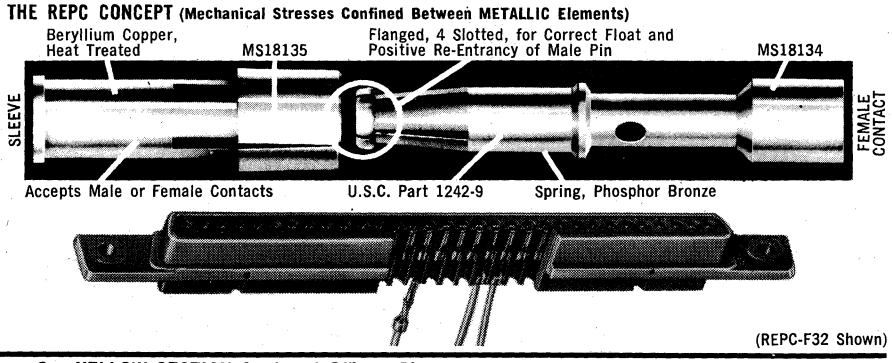
Rack and Panel	Test Point
Plug and Receptacle	Miniature Hexagonal
Edgeboard	Circular
Two-Piece Printed Circuit	Zero-Entry-Force P.C.
High Density	Hermetically Sealed

U.S.C. Manufacturers' Connectors and/or Contacts Meeting or Exceeding All Applicable Provisions of Latest Revision of:

MIL-C-8384	MIL-C-39029
MIL-C-21097	MIL-C-55302
MIL-C-22857	MS18134
MIL-C-23216	MS18136
MIL-C-23353	NAS713, NAS714,
MIL-C-25955	NAS715

Quality Control to Latest Revision of MIL-Q-9858, MIL-I-45208, NASA NPC200.
Calibration Per MIL-C-45662 Traceable to National Bureau of Standards.

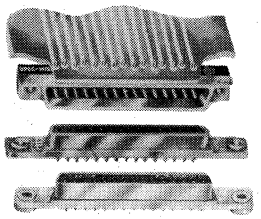
THE REPC CONCEPT (Mechanical Stresses Confined Between METALLIC Elements)



(REPC-F32 Shown)

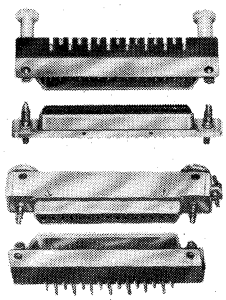
Two-Piece P.C. Connectors & Removable Crimp Contact Connectors

UPCC-M & F SERIES
Printed Circuit Connectors & Mates (Meet MIL-C-23353/1, 2, & 3 and NAS 713, 714, 715)



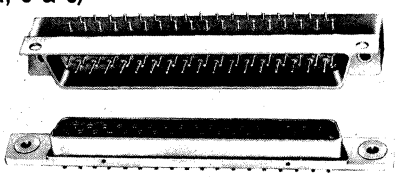
Contact spacing: 0.156.
Number of contacts: 7, 11, 15, 19, 23, 32.
Male dip solder. Card range thickness accommodation:
UPCC-M( ) A, B, or C: 1/16", 1/8", or 1/4".
Female UPCC-F( ): Max. #20 AWG. wire.
Female dip solder terminals. UPCC-FDN( ).
Current rating: 7.5 amps.
Voltage breakdown between contacts — sea level: 2500V. A.C. RMS.
REPC-F series also mates with UPCC-M series.
Request Catalog UPCC-REPC.

UPCC-SL SERIES - Printed Circuit Screwlock & Mate
UPCC-SLH SERIES Hooded Screwlock & Mate



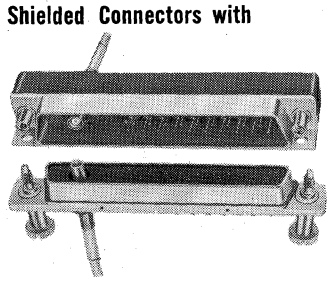
(Meet applicable provisions of MIL-C-23353 & NAS-713, 714, 715)
Contact spacing: 0.156.
Number of contacts: 7, 11, 15, 19, 23, 32.
Current rating: 7.5 amps.
Voltage breakdown between contacts—sea level: 2500V. A.C. RMS.
UPCC-SL
UPCC-M2K-( ) A, B, C for 1/16", 1/8", 1/4" P.C. or — E for solder eyelet.
UPCC-F2SL-( ) for #20 max. AWG. wire or — TU for turret terminals.
UPCC-SLH
UPCC-M2SL-( ) A, B, C for 1/16", 1/8", 1/4" P.C. or — E for solder eyelet.
UPCC-F2HSL-( ) for #20 max. AWG. wire or — TU for turret terminals.
Patent No. 2,953,767. Request Catalog UPOC-REPC.

UPCC-SGM & SGF SERIES - Printed Circuit Connector & Mates (Meet MIL-C-23353/4, 5 & 6)



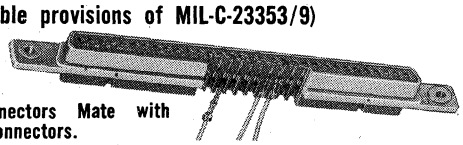
Contact spacing: 0.100
Number of contacts: 11, 17, 23, 29, 35.
Male dip solder. Card range thickness accommodation:
UPCC-SGM( ) A, B, or C: 1/16", 1/8", or 1/4".
Female dip solder terminals. UPCC-SGFDN( ).
Current rating: 7.5 amps.
Voltage breakdown between contacts — sea level: 2360V. A.C. RMS.
REPC-SGF series also mates with UPCC-SGM series.
Request Catalog UPCC-REPC.

TWO UNIT UPCC - 19 Pin Shielded Connectors with Coaxial Contacts



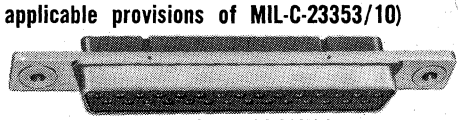
The male connectors meet all applicable provisions of the latest revisions of MIL-C-23353 and MIL-C-23353/6.
The female connectors meet all applicable provisions of the latest revisions of MIL-C-23353 and MIL-C-23353/4.
COAXIAL CONTACTS: High mating retention type plug with socket of top quality beryllium copper, gold over nickel plated. Receptacle with .031 nom. dia. pin of top quality beryllium copper, gold over nickel plated. Plug and receptacle are of snap-lock mounting type and are for use with RG180/U or RG195/U cable (Ref.).
Request Catalog UPCC-REPC.

REPC-F SERIES - Female Chassis Connector (Meet applicable provisions of MIL-C-23353/9)



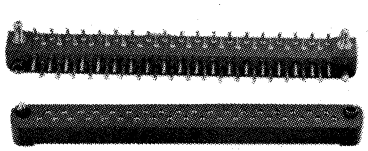
REPC-F( ) Connectors Mate with UPCC-M( ) Connectors.
Type of Contact: Removable ("snap-in, snap-out") crimp type, closed-entry.*
Contact spacing: 0.156.
Number of contacts: 7, 11, 15, 19, 23, 32.
Wire sizes accommodated: #14, #16, #18, #20, #22, #24, #26, #30 AWG. wire and sizes #16 down to #32 per MIL-W-16878.
Crimping tools: Hand-operated MIL-T-22520C and MS, also pneumatic and semi-automatic types.
Current rating: 7.5 amps.
Voltage breakdown between contacts — sea level: 2500V. A.C. RMS.
Patent No. 2,979,689 & 6 International Patents.
* Contacts meet MS18134 } per MIL-C-23216
* Sleeves meet MS18135 }
Request Catalog UPCC-REPC.

REPC-SGF SERIES - Female Chassis Connector (Meet applicable provisions of MIL-C-23353/10)



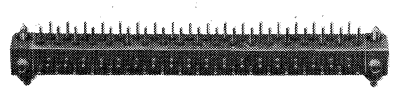
REP-SGF( ) connectors mate with UPCC-SGM( ) connectors.
Type of contact: Removable ("snap-in, snap-out") crimp type, closed-entry.*
Contact spacing: 0.100.
Number of contacts: 11, 17, 23, 29, 35.
Wire sizes accommodated: #14, #16, #18, #20, #22, #24, #26, #30 AWG. and sizes #16 down to #32 per MIL-W-16878.
Crimping tools: Hand-operated MIL-T-22520C and MS, also pneumatic and semi-automatic types.
Current rating: 7.5 amps.
Voltage breakdown between contacts — sea level: 2360V. A.C. RMS.
Patent No. 2,979,689 & 6 International Patents.
* Contacts meet MS18134 } Per MIL-C-23216, latest revision.
* Sleeves meet MS18135 }
Request Catalog UPCC-REPC.

MIG SERIES
Right Angle Plug & Receptacle Connectors



Contact spacing: 0.100.
Number of contacts: 11, 15, 23, 37.
Male dip solder. Card range thickness accommodation.
MIG-M: from 1/32" to 1/4".
Female. MIG-F: Max. #20 AWG. wire.
Current rating: 7.5 amps.
Voltage breakdown between contacts — sea level: 1060V. A.C. RMS.
Request Catalog MIG-WG-RWG.

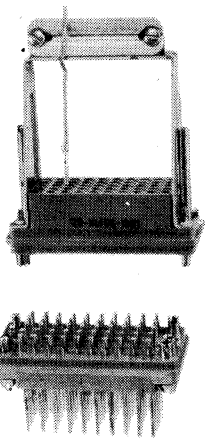
WG-37M - Connector Plug, Right Angle .100 Grid P.C.
RWG-37F - Mating Receptacle, Crimp Removable Contacts



Number of contacts: 37.
Wire sizes accommodated: #14 to #30 AWG.
Dielectric withstanding voltage between contacts: 1500V. D.C. at sea level.
Current rating: 7.5 amps., max.
WG-37M: is screw mounted. **WG-37MR:** is rivet mounted.
RWG-37F: uses MS18134 contact & MS18135 sleeve of MIL-C-23216 latest rev., and other REMI contacts.
Crimping tools: per MIL-T-22520 latest, and commercial. Hand, semi-automatic and automatic.
Patent No. 2,979,689 & 6 International Patents. Request Catalog MIG-WG-RWG.

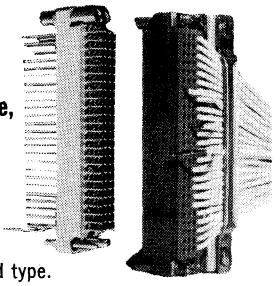
Miscellaneous Connectors

URG-50M1SL-WW - Connector Plug, Wire-Wrapped Terminals
URG-50FIK-BC - Mating Receptacle, Crimp Removable Contacts
.200 x .200 contact grid spacing



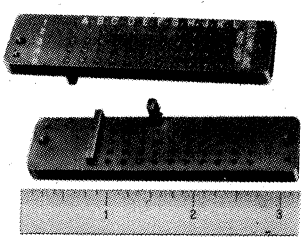
Number of contacts: 50.
Pin diameter: .062.
Male terminals: .045 square, wire wrapped type.
Female contacts (ordered separately): Meet MS17804-16-16 of MIL-C-23216 latest.
Wire accommodation: #16, #18, #20 AWG.
Crimping Tools: per MIL-T-22520 latest, and commercial. Hand, semi-automatic and automatic.
Current rating: 13 amps., max.
Dielectric withstanding voltage, between contacts — sea level: Depends upon wire sizes used on males.
Connectors meet all applicable provisions of MIL-C-22857, latest revision

GR-100MISL-WW Connector Plug, Wire-Wrapped Terminals
RGR-100FIKL-CC - Mating Receptacle, Crimp Removable Contacts
.100 x .100 contact grid spacing



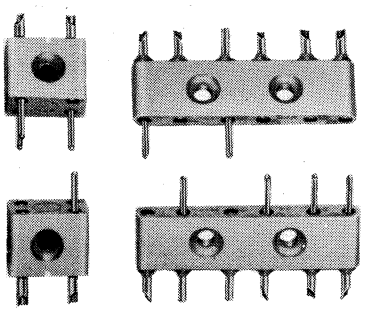
Number of contacts: 100.
Pin diameter: .031.
Male terminals: .025 square, wire wrapped type.
Female contacts (ordered separately) wire accommodation: #22 thru #26 AWG.
Crimping tool: MS3198-1 per MIL-T-22520, latest revision.
Current rating: 5 amps., max.
Dielectric withstanding voltage, between contacts — sea level: Depends upon wire sizes used on males.
Contacts meet applicable provisions of MIL-C-23216, latest revision.
Connectors meet applicable provisions of MIL-C-8384, latest revision.

NOG SERIES



Number of contacts NOG-( )F: 5, 10, 20, 55.
Number of contacts NOG-( )M: 1, 2, 3, 4, or 5.
Contact size 20: .040 dia.
P.C. dip solder terminals: .020 dia.
Current rating: 5 amps, continuous.
Voltage breakdown between nearest contacts sea level, normal humidity: 3000V. A.C. RMS.

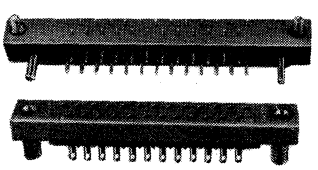
Side Mounting Miniature Connectors



Number of contacts: 4 or 6.
Pin diameter: .040.
Wire sizes accommodated: #20 to #22 AWG.
Current rating: 7.5 amps., max.
Voltage breakdown, between contacts — sea level: 2000V. A.C., RMS.
Many polarizations available (males and females in same connector body).

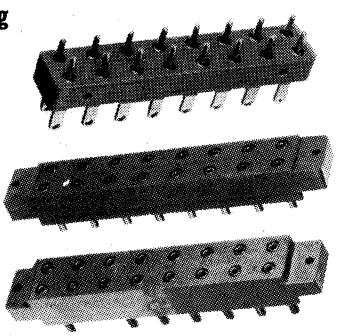
MG-4M & F **MG-6M & F**

901-25M - Connector Plug Right Angle .100 Grid P.C.
901-25F - Mating Receptacle, Solder Eyelet Terminals



Number of contacts: 25.
P.C. thicknesses accommodated: 1/16", 1/32", 5/32".
Pin diameter: .040.
Current rating: 5 amps. continuous.
Operating voltage — sea level: 900V. A.C. RMS.
Female contacts: Solder eyelet accepts 2 #20 AWG. wires.
Polarized foolproof assembly. Blind alignment.

960-16M - Power Connector Plug
960-16F - Mating Receptacle
960-16FT - Mating Receptacle (Anti-Rotation Contacts)



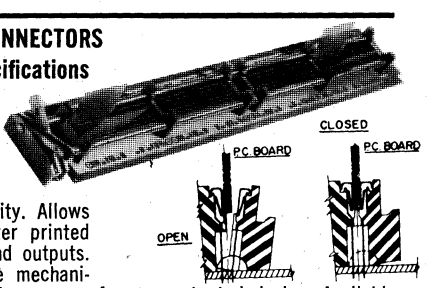
Number of contacts: 16.
Pin diameter: .094.
Male contacts, removable, dual wiring holes.
Female contacts, removable crimp type.
Wire sizes accommodated: #12 thru #20 AWG.
Current rating: 23 amps.
Polarization contacts available.
Breakdown voltage, between contacts — sea level: 6000V. A.C. RMS.

UTP-16 and UTP-S5 - Test Point Connectors

UTP-16
Number of contacts: 16.
Socket contact: accepts standard .080 dia. test probe and retains probe with spring pressure. Pin end of contact is .030 dia.
Current rating: 5 amps., max.
Breakdown voltage, between contacts — sea level: 3500V. A.C. RMS.

UTP-S5
Number of contacts: 5, button type.
Pin end of contact: .030 dia.
P.C. board accommodated: 3/32".
Current rating: 5 amps., max.
Voltage rating: 600V. A.C. RMS.
Test voltage — sea level: 1800V. A.C. RMS.

ZERO-ENTRY-FORCE CONNECTORS
Built to Customer Specifications



TYPICAL:

1.) (Illustrated). Z-E-F connector used in advanced computer applications involving maximum packaging density. Allows use of 3 edges of master printed circuit card for inputs and outputs. All connections are made mechanically and simultaneously by means of a cam-actuated device. Available in many configurations of connectors with from 56 to 520 contacts.

2.) (Not Illustrated). Z-E-F connector used in test set-up for special electronic modular components. Manual control levers are snapped closed, gently pressing the contacts against the module's pins for the test. Connectors come in 4 sizes (52 or 62 contacts), 3.6 in. long by 2 to 2.5 in. wide.

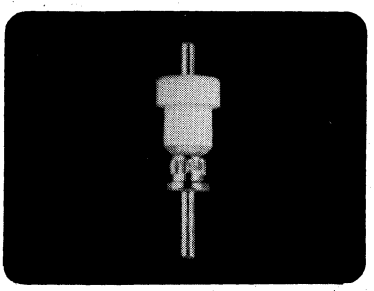
Write us about your requirements.

Rapid-Installing Teflon® Terminals

U. S. Terminals Inc. is staffed to meet your production needs for standard and special terminals quickly, and is tooled up for high production volume. We manufacture to applicable MIL-specs and design to satisfy special customer requirements.

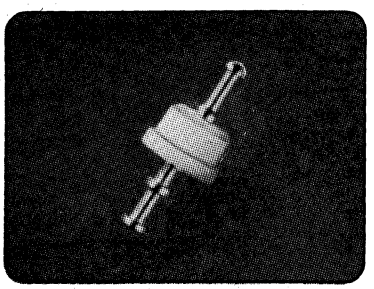
SLIP LOCK® terminals

No hole chamfering is ever required. Patented single-piece terminals can be inserted from either side of your chassis or card and lock in place under simple pressure. Reliability is unparalleled.



PRESS TYPE terminals

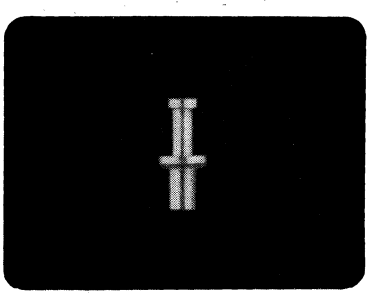
Press type terminals also are immune to mechanical shocks and vibrations and are suitable for all metal chassis applications. Electrode pins meet the latest exacting military specifications.



PRINTED CIRCUIT terminals

Bulletin 6802

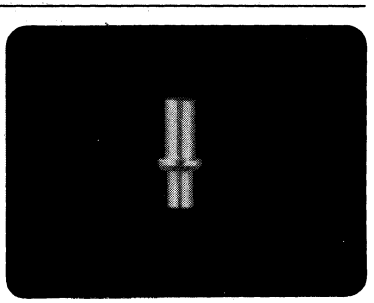
Available in brass or high-conductivity copper to meet the most exacting requirements. Precision machining assures trouble-free installation and service. Controlled heat treating and plating guarantee excellent solderability. Special designs are available.



PRINTED CIRCUIT sockets and test jacks

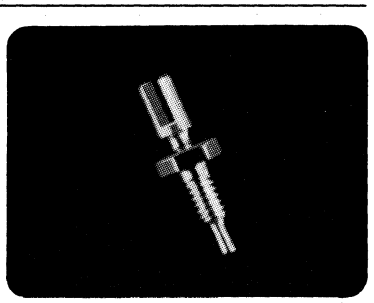
Bulletin 6802

Printed Circuit Sockets/Test Jacks offer new flexibility and compactness in printed circuit design. Suitable for test point jacks, min. tube sockets, module sockets, diode and transistor sockets and stacking P.C. boards.



GROUNDING terminals

Made to the same high standards as the above designs, grounding terminals are one-piece brass units, knurled or threaded for inserting or bolting to the metal chassis. Available in straight wire or slotted pin designs for soldering leads.



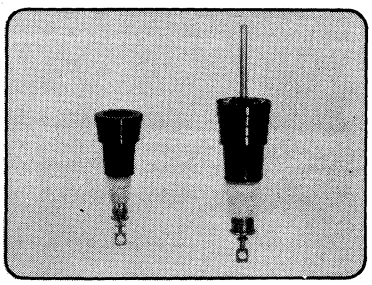
U.S. TERMINALS INC.

7502 Camargo Road, Cincinnati, Ohio 45243, Phone 513 561-8145 TWX 810-461-2290

Binding posts

Bulletin 6805

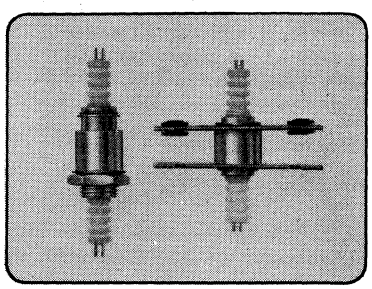
Binding posts incorporate Slip-Lock® design features for fastest production installation. One piece, no nuts or fasteners. They can be inserted blind from the front side of the chassis. Accept standard probes in integral jack.



High Voltage connectors

Bulletin 6804

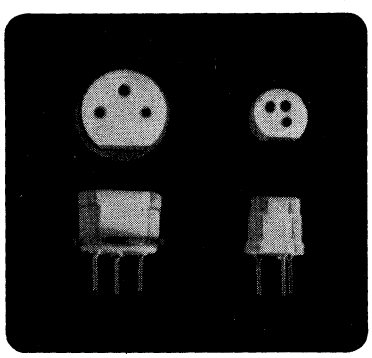
HV Miniature Connectors offer precise contact design, precious metal plating and Teflon insulation. Optimum creepage path for high-voltage use is engineered to meet MIL-C-8384. Breakdown voltages to 18,000 vdc.



BELTLINE transistor sockets

Bulletin 6901

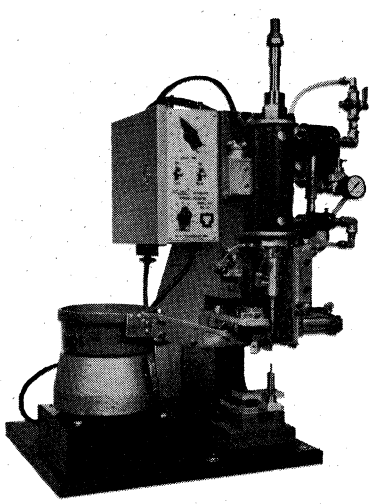
Easy installation sockets have beryllium copper age hardened receptacles; fit standard/existing mounting hole sizes. No chamfer necessary! Shoulder on pin at insulation prevents cold solder joints, pin extensions can be bent without cracking. "D" cross section prevents rotation. Teflon insulation is used. Lowest cost, highest quality sockets available. Special designs available, also Press Type Sockets.



Automatic insertion

For high production requirements, automated installation equipment is available on loan to U. S. Terminals' customers. The Model 415 Hopper-Fed Inserter shown here can save you time and money, speed your production 100 per cent to 500 per cent.

Send for comprehensive catalog.



U.S. TERMINALS

U.S. Terminals products are manufactured under one or more of the following patents: U.S.—3349365, 3095470, 3267205, 3244801; British—972756; Canadian—729317. Other patents applied for.

BEAUPLUG® Connectors / Plugs and Sockets

BEAUPLUG Series 3300

BEAUPLUG Series 3300 is interchangeable with Cinch-Jones 300 Series. Molded bakelite bases; cadmium plated contacts (gold, silver and rhodium available); polypropylene backshells (metal available); and bright plated hardware. UL rated at 250v at 10 amp.

Series 3300 Plugs and Sockets are available as: DB Deep Bracket Mounted; EB End Bracket; FHT Flared Hole Top; FHT-L Flared Hole Top Latch; FHT-K Flared Hole Top Keeper; CCE Cable Clamp End; CCT-L Cable Clamp Top Latch; CCT-K Cable Clamp Top Keeper.

BEAUCAP Octal Plug Caps

2001

Series 2001 octal type plug and socket caps replace the metal caps with rubber grommets and fishpaper insulation. (Beau Products Division does not make the octal plugs and sockets.) Type 2001-1 caps have no hole for cable; Type 2001-2 have cable hole in top; Type 2001-3 have cable hole on side; Type 2001-4 have cable hole top with cable clamp. 4 NEMA colors: black, blue, red, and green.

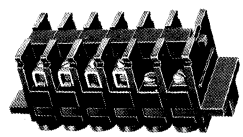
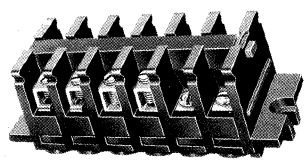
ADD-A-POINT Terminal Blocks

Medium Duty 600v, 5000 Series — Insulated moldings are of thermosetting phenolic material, Type CFG. Brass screw type connectors can be supplied with choice of box, pressure or screw type contacts. Pressure type features exclusive "Sure Grip" pressure pad design to insure against damage to the wire. **Series may be direct or channel mounted.**



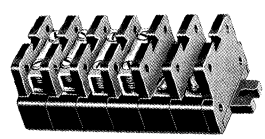
Model 5200

Heavy Duty 600v, 6000 Series — Material specification same as 5000 Series. Electrical specifications allow use of up to #4 wire with box type contacts. Available with either painted or plain marking surfaces.



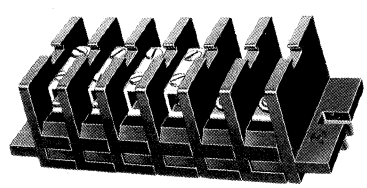
Model 6200

Miniature Medium Duty 600v, SM Series — Moldings are of thermosetting phenolic CFG material. Offering a low silhouette, these miniature blocks require less clearance than the conventional blocks. Available in box type, with or without pressure pad, or conventional screw contact. For service up to 40 amp.



Model SM

Heavy Duty 600v, P Series — Molded with the same material as above models, this larger series is rated up to 60 amp service. Available with box, pressure type or screw contacts of pure electrolytic copper. Like other models, the P Series is available for channel or direct mounting.



Model P

FAST-TAB Barrier Terminal Strips

VECTOR PATCHBOARDS

REMOVABLE PANEL PRE-PROGRAMING TYPE

- **Guaranteed Post Patching Capability Without Contact Damage**
- **All connections make and break simultaneously**
- **Mount In any position for space conservation**

Reliable, low cost, Vector Pre-Programing Patchboard units function like a multiple contact switch to engage and disengage up to 1200 contacts simultaneously with a single lever action. The units are most useful where: 1. Maximum flexibility of connection arrangements is required. 2. A variety of connection setups must be changed quickly and without error. 3. Quick retrieval and reuse of a previous connection arrangement is desirable.

Vector Pre-Program Patchboards are easy to use. Depressing the hand lever (see picture) causes the patch cord tips, previously arranged in a removable panel, to make a wiping contact with fixed receptacle frame contacts connected to associated equipment. Wiring tabs are supplied standard for solder or solderless slip-on contact, or for wire wrap. Contact springs are beryllium copper heat treated for long life, nickel plated or gold flashed. Receptacle frame is gray steel, heat treated on wear points.

Predrilled Rack Panel Adapter Plates available.

FIXED PANEL TYPE

Fixed Panel style Patchboards provide reliable low cost single conductor patching on control and test panels where pre-programing is not required. Low resistance beryllium copper, gold flashed contacts are independent wrap-around type and located on .265″ centers.

Single wire, piggy-back, splits, and jumper type programming patch cords are available. Permanent connections are made by soldering wires or using solderless slip-in contacts, crimped to wires (see above) on the rear of the boards. Boards listed have standard white alpha-numeric markings front and back and brackets are furnished as standard.

Special Sizes

Larger contact systems can be made by mounting standard panels adjacent. Special sizes up to 2200 contacts are readily made to order at minimum cost. Special marking and screening in colors are also available. Insulation material is black Epoxy .093″ thick. Terminals are beryllium copper, heat treated, nickel plated gold flashed per QQS-365. Plug tips are nickel plated brass and if so specified, gold flashed.

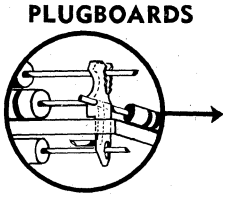
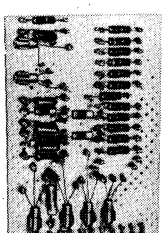
PLUGBOARDS

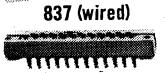


MINI-KLIP T28

Similar Type Plugboards with .042″ diameter holes spaced .1″ x .1″ available for D.I.P.'s



837 (wired)



R612-1

Receptacles listed are glass filled diallyl phthalate.

Use Plugboards with attached contacts for test circuits. P.C. prototypes and short runs. Precision pre-punched 1/16″ diameter holes on alternate 0.1″ centers permit maximum flexibility of component location. Vector T28 MINI-KLIPS, eyelets, or standard turned terminals may be located wherever desired. For maximum economy use epoxy paper boards; for military specification requirements or additional strength use epoxy glass. All Plugboards are 1/16″ thick and are available with Elco Varicon or 2 oz. copper etched contacts. Epoxy paper boards meet requirements MIL-P-22323 type PEE; Epoxy glass is G-10 grade per MIL-P-18177. Copper clad Epoxy paper meets MIL-P-13949 type PX, and copper-clad Epoxy glass meets MIL-P-13949B type FLGE-91.

VELCO CIRCUIT PROGRAMMING SYSTEMS

The VELCO Circuit Programming System offers unique, patented features which contribute to its superior flexibility and reliability. With VELCO circuit programming, interconnection patterns can be changed easily and quickly. The basic mating configuration is a knife switch which makes positive contact. When contacts mate, there is full wiping action with a contact pressure of approximately two pounds (as compared to ounces in other competitive arrangements). A wide variety of contact assemblies (from 110 to over 3000) is possible because of the modular arrangement of VELCO standard stock, 22-pin, module contact strips. The VELCO Circuit Programming System is available for either permanent wiring or patching.

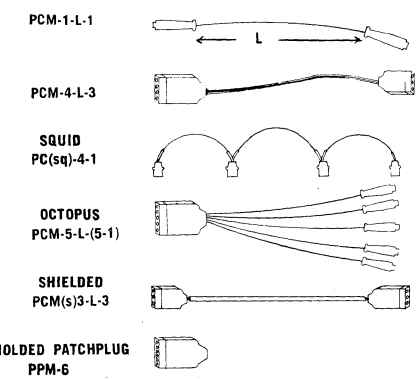
- **FLEXIBILITY AND RELIABILITY.**
- **MORE EFFICIENT UTILIZATION OF PANEL SPACE.**
- **RACK PANEL MOUNTED, *(Optional to customer's instructions).**
- **MARKING: Engraved or etched blanking strips available, mounted where customer specifies.**

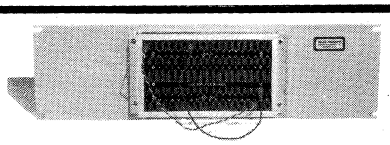
SPECIFICATIONS	Patchboard	Patchcord
A. MATERIALS AND FINISHES:		
All materials and finishes meet requirements of MIL-E-16400.	x	x
MATERIAL — FINISH		
Aluminum — Alkali etch, Iridite	x	
Stainless — Passivate	x	
Painted finishes optional		
B. DIELECTRIC MATERIALS:		
Molded Diallyl Phthalate	x	x
Molded Silicone Rubber		x
Polyethylene		x
C. CONTACTS:		
Brass, gold plate over albaloy	x	
Beryllium copper, gold plated		x
D. ELECTRICAL RATINGS		
Current: 5 amps		
Voltage: 600 volts rms at sea level		
Breakdown: 3200 volts d.c. between contacts		
Voltage drop: 5 millivolts at 2 amperes (max.)		

MULTICIRCUIT PATCHCORDS (from 1 to 22 contacts)

Available in many types and combinations. Molded in polyethylene or silicone rubber.



"L" DENOTES OVERALL LENGTH OF WIRE



***RACK MOUNTING** (Optional)
All sizes of boards can be supplied on a standard 19" rack panel thus:
(A) Modules Vertical: (Max. 50 modules)
Type FB1 on 7" panel (as illustrated)
Type FB2 on 12¼" panel
Type FB3 on 15¾" panel, etc.
(B) Modules Horizontal:

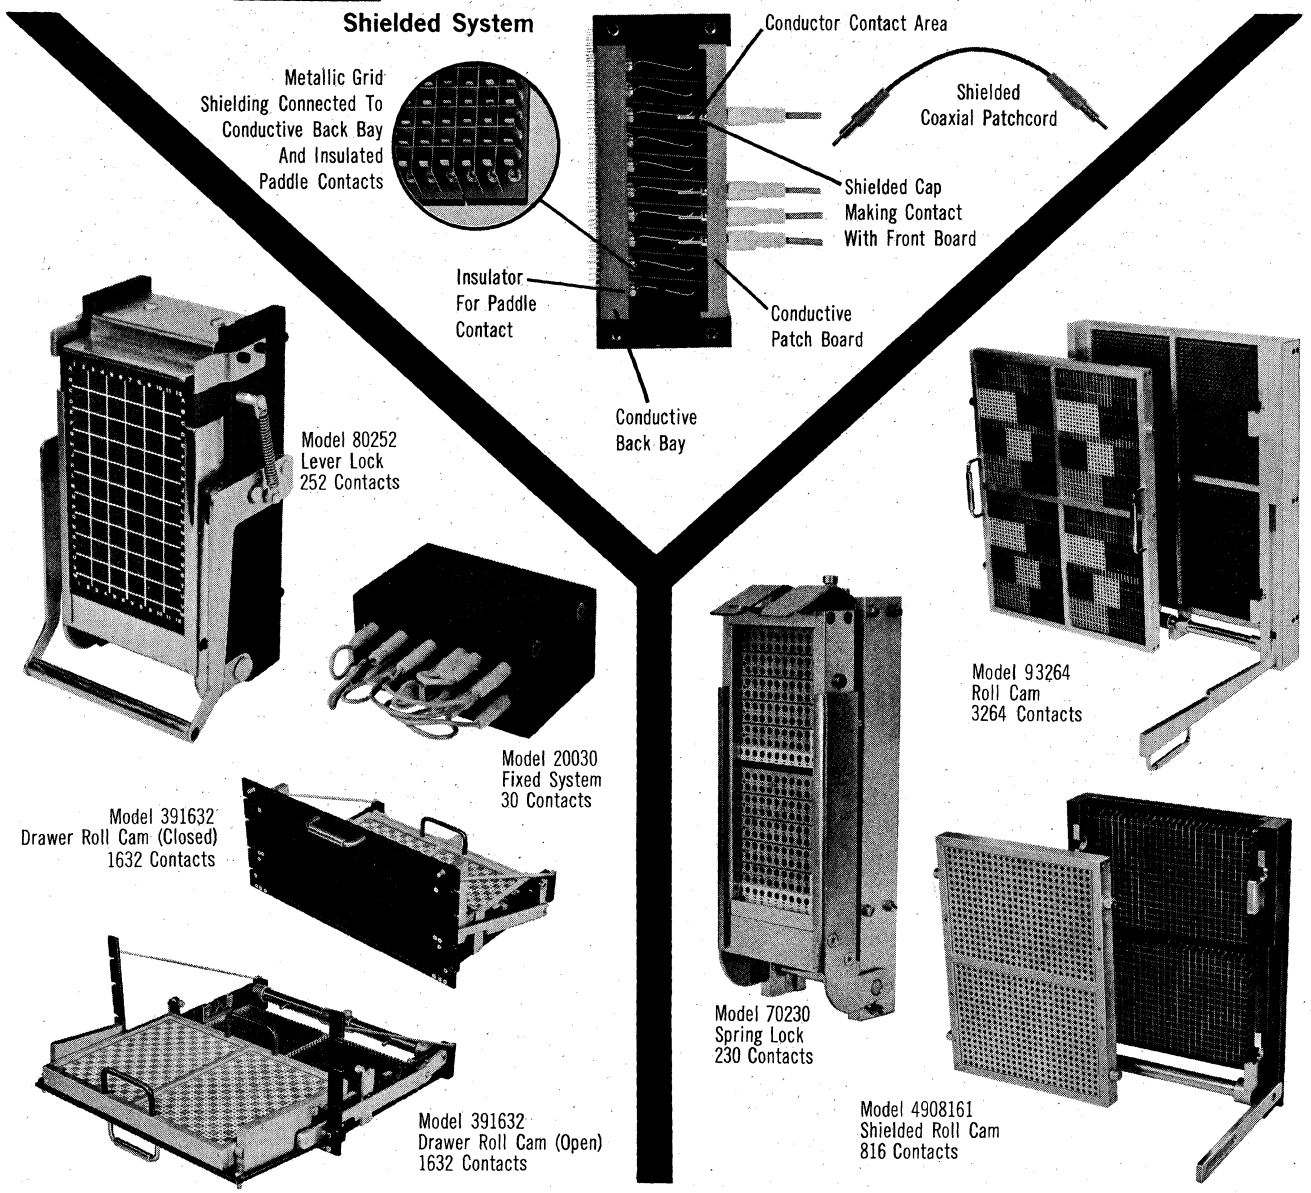
VIRGINIA ELECTRONICS CO., INC. • 2908 TELESTAR CT., FALLS CHURCH, VA. 22042 • PHONE: (703) 560-6500
SPECIALISTS IN COMMUICATION CONTROL AND AMPLIFIER SYSTEMS



VPC'S VERSATILITY INCREASES EFFICIENCY AND PROGRAMMING ABILITY

Virginia Panel Corporation offers a complete selection of programming systems ranging from 30 to 5,120 connections in three basic designs, **plus** custom designs to individual specifications.

In addition VPC now offers a new concept in shielded patchcord programming systems* . . . lower cost by using locking patchcords, molded conductive shielded type board. Module design offers great flexibility. Metallic-shielded paddle contacts reduce crosstalk, restrict outside interference. Drawer type systems permit lateral use of console space . . . release up to 50% more front panel area.

VPC systems permit quick changing for any use . . . test equipment, communication equipment, computers, automation controls. Design and construction permit either preprogramming of control panels or post patching while panel is engaged in receiver. Because of the interchangeability of many control panels with one receiver, previously programmed controls for established wiring combinations can be stored.

Camming action, spring contact and double wiping action, assure positive contact of mating connections. Both manual and permanent patchcords are available.

No. 20 AWG wire, covered with flexible (PVC) polyvinylchloride, is used in making patchcords. Durable materials and precise craftsmanship make possible the **unconditional guarantee** of VPC Patchcord Programming systems.

Contact Virginia Panel Corporation or your VPC Representative for additional information.

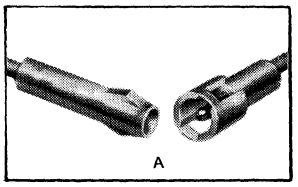
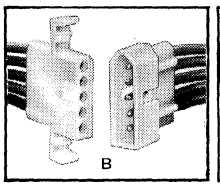
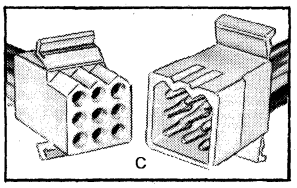
waldom/molex nylon connectors

250 VOLTS PER CIRCUIT







Waldom/Molex Connectors offer incomparable reliability, versatility and economy. Save time and labor. Nylon Miniature Connectors are available in 1 to 36 circuits and standard connectors from 1 to 15 circuits. Most types have integrally molded mounting ears for ease of panel mounting. All connectors, with the exception of single circuit types, are polarized. Both male and female pin terminals of the same mating diameters can be intermixed in the same housing. Waldom/Molex provides a complete range of manual production and prototype hand tools. Both male and female terminals may be extracted and easily replaced using ejector tools.

PLUGMOLD® MULTIOUTLET SYSTEMS FOR ELECTRONIC APPLICATIONS

Plugmold systems: the versatile, efficient way to organize electrical wiring and devices

To contain power wiring — along with a variety of outlets, switches, jacks, circuit breakers and other devices — use versatile Plugmold systems. Rugged, attractive Plugmold systems accommodate 14 to 2/0 AWG wire and accept a variety of electrical devices up to 60A, circuit breakers to 100A.

- With outlets and other devices placed where you need them, Plugmold adds efficiency and convenience wherever it is used.
- Made of steel, Plugmold protects wiring and keeps it accessible.
- A complete line of fittings makes it easy to apply Plugmold to almost any wiring situation.
- All Plugmold multioutlet assemblies and fittings are listed by Underwriters' Laboratories, Inc., and Canadian Standards Association.
- For engineering assistance, contact your nearest Wiremold representative — listed in the EEM yellow section.

Plugmold with prewired outlets

PLUGMOLD 2000 and 2200: Furnished completely prewired (No. 12 Type TW). Grounding outlets (15A, 125V) are spaced at regular intervals.

Outlet Spacing: 6, 9, 12, 18, 30, 60″ on centers.

Lengths: 1, 3, 5, 6′, and in Snapicoil® prewired harness up to 500′.

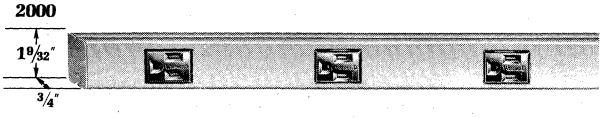
Circuit arrangements . . .

G Series: 2-wire, 1-circuit; Plugmold base serves as grounding conductor.

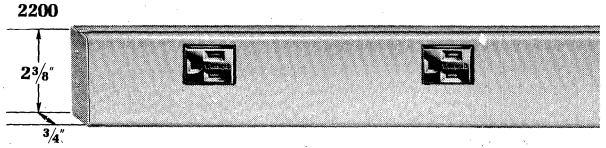
GA Series: 3-wire, 2-circuit; outlets wired alternately; Plugmold base serves as grounding conductor.

GB Series: 2-wire, 1-circuit; has insulated grounding conductor. (On special order, GB series available with insulated, isolated grounding conductor.)

2000



2200



Other Plugmold systems

Four types are furnished unwired. Outlets and other devices may be spaced as desired.

PLUGMOLD 2100: For use with various receptacles made by Wiremold (15A, 125V; 15A, 250V; 15A, 277V; and 20A, 125V). Devices include 2- and 3-wire receptacles, Lumiline single receptacle, single-pole switch, and keyless socket. Accepts wiring from 14 to 6 AWG. Devices can also be installed in 1-, 2-, and 3-gang Wiremold boxes as desired.

PLUGMOLD 3000: For use with most outlets (up to 50A) and devices designed for a 1-gang box. Accepts wiring from 14 to 2 AWG.

PLUGMOLD G-4000: Used with or without channel divider strip. With divider, one compartment holds power wiring (devices to 20A), the other carries low potential (communications, etc.) circuits. Without divider, the full channel accepts devices to 50A. Max. depth of devices, 1 5/8″. Accepts wiring from 14 to 2 AWG.

PLUGMOLD G-6000: For use with most outlets (up to 60A) and devices designed for a 1- or 2-gang box. Holds circuit breakers (to 100A). Accepts wiring from 14 to 2/0 AWG.

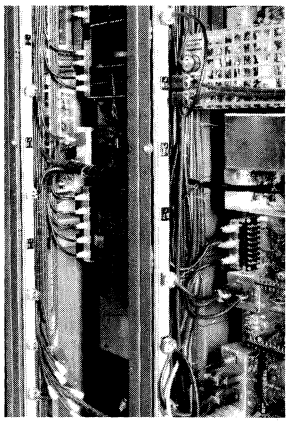
WIREMOLD®

PLUGMOLD® MULTIOUTLET SYSTEMS FOR ELECTRONIC APPLICATIONS

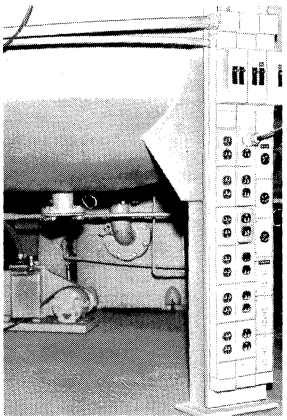
Typical uses of Plugmold

On original equipment: Plugmold adds value, convenience and efficiency to control consoles, cabinets, racks, benches, chassis, modular equipment, data processing equipment, trailers, shelters, etc.

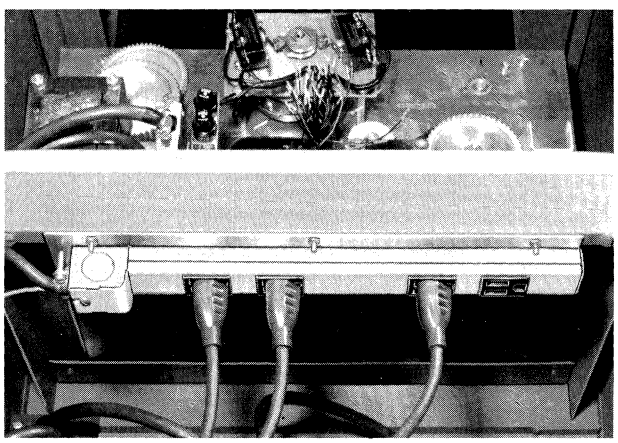
In laboratory and production areas: Use Plugmold on benches, over benches, on walls and partitions — wherever you need to put electricity to work.



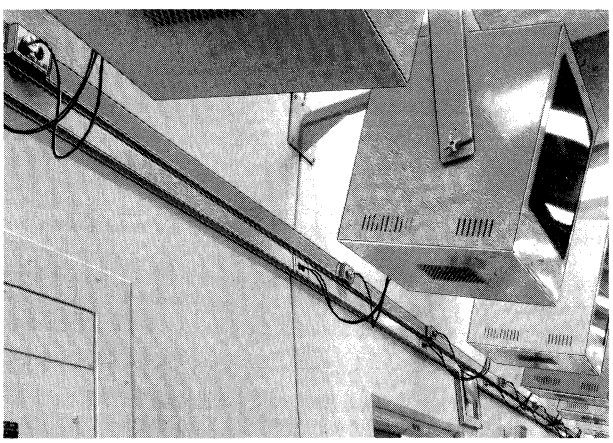
Strips of Plugmold in cabinets feed radio/TV transmitting equipment. *WTIC Broadcast House, Hartford, Conn.*



Rotary accelerator has Plugmold on leg to handle a variety of services. *G.E. Space Center, Valley Forge, Pennsylvania.*



Central time transmitter in computer uses Plugmold to feed power to fan, clocks, etc. *Friden, Inc., Rochester, N.Y.*



Plugmold brings power wiring and antennae leads to closed-circuit TV monitors. *J. F. Kennedy Space Center.*

20CSK Cord Set Kit

The Cord Set Kit converts runs of Plugmold 2000 into portable power units that can be easily moved with work benches, then plugged in again at a new location. Ideal for laboratory and production situations where changing needs require frequent repositioning of benches.

INSTRUMENTATION AND CONTROL DEVICES

• CURRENT, POWER AND PHASE SENSORS • ANALOG FUNCTION MODULES • MAGNETIC FLUX SENSITIVE ELEMENTS

SENSORS • CURRENT • POWER • PHASE

CURRENT • AC OR DC

Current sensors for measurement and control of AC or DC current featuring linear output electrically isolated from current carrying line. Fast response is available from most models with low power consumption and faithful reproduction of input waveform. Applications include high potential line measurements.

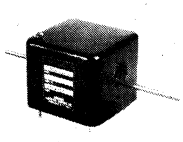
POWER • AC • DC



SERIES 4004

Instantaneous watt transducers suitable for measurement and control of AC or DC power. Models with current ranges of 50 amps and greater available with "THRU HOLE" permitting power measurements to be made without breaking into power line. The linear voltage output is the true product of current and voltage. Most models feature fast response.

Series Ranging	Range (watts)	Range (amps)	Output Voltage	Response

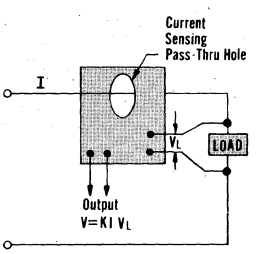
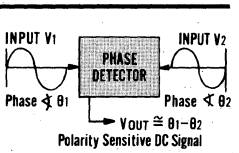
To WT4007	3000 to 100K	150 to 5000	0-250mv	200μs



PHASE • VARS

Series 2000

Units similar in size and configuration to the Current Series available for use as phase detectors. Output is DC offset signal proportional to cosine of the phase angle between the two inputs. Output is zero DC at 90° and 270° phase angle; maximum of ±125 millivolts at 0° and —125 millivolts at 180° phase angle. Excellent for null detection.



Characteristics in above specifications are typical and indicate general area of operations. We welcome your inquiry for models with other inputs/outputs; operating capabilities; configurations, etc. Standard units are extremely flexible and readily adapted to special requirements. Our application staff is available to help with solutions to your specific problems. Contact factory or engineering representatives for further information.

ANALOG FUNCTION MODULES

MULTIPLIERS • SQUARING, SQUARE ROOT, DIVIDERS

Solid state flux controlled magnetoresistance bridges designed to meet exacting requirements for analog multiplication, modulation, signal mixing, division, squaring, square root extraction etc. Component features electrical isolation between inputs, low noise and null, low distortion and phase shift.

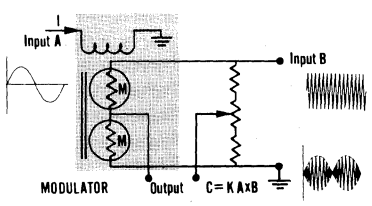
MODULATORS

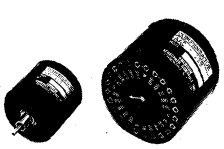
Series 2000

Ideal for controlling an AC carrier with a DC or low frequency input. Carrier frequencies of up to 1MHz can be modulated from DC to 400Hz with very low phase shift.

Units feature linear characteristics and distortion-free performance. These versatile modules can also be used for a wide range of demodulator applications.



FUNCTION GENERATORS • ANGULAR ERROR COMPENSATORS



Size 11 Size 18

For correction of repeatable errors in servo systems. Can be used to create master synchro, potentiometer or as a limited range function generator. Available in adjustable or fixed models. Concentric output and input shafts.

	Adjustable
Range	±40 min. to ±11°
Repeatability	±1 min. to ±20 min.
Adjustability	10 min. to 22°
Ripple	2 min. to 55 min.

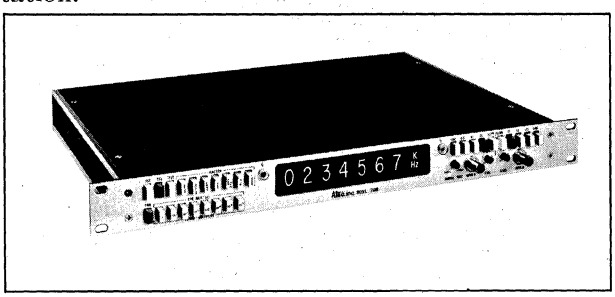
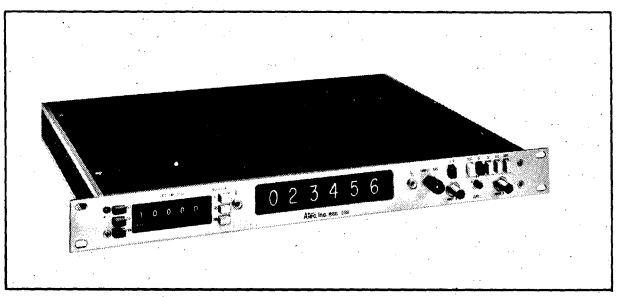
Atec sets the standard for Digital Counting Instruments...

Counters, Timers, Clocks, Totalizers, Comparators

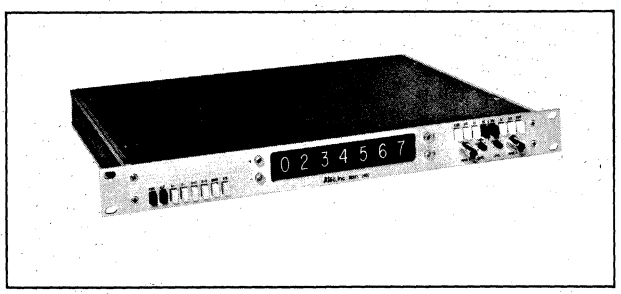
Precision and reliability in digital instrumentation at economical prices—that's Atec. *Versatility:* each instrument performs many functions. *Flexibility:* such features as extra digits, display storage, and high stability frequency standard may be added at any time. *Modern Design:* extensive use of IC's; standard plug-in modules; motherboard PC construction to minimize wiring. *Compact:* 1¾" high panels mount in standard 19" RETMA racks. *Extra Features:* remote programming, BCD output at TTL levels, inline readout, and self-testing are user benefits from Atec digital counting / timing / totalizing / sampling / comparing instrumentation.



Universal Counter Model 2000 provides six measurement functions: frequency, period, multiple period, time interval, ratio, scale (totalize) at frequencies up to 12.5 MHz. Registers and displays five decimal digits (up to seven optional). Inputs from 0.01 V RMS to 125 V RMS, AC or DC coupling. Crystal-controlled 1 MHz oscillator as frequency standard with excellent time, voltage and temperature stability. Price: $850.

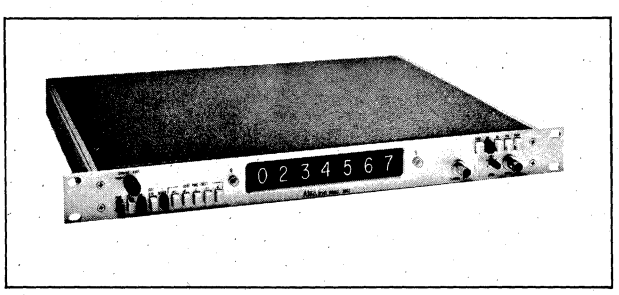


Variable Time Base or Rate Counter Model 2300 measures rate data over a wide range of counting intervals, 100 seconds down to 10 microseconds. Registers and displays four decimal digits (up to six optional). Rates to 12.5 MHz. Inputs from 0.01 V RMS to 125 V RMS. Frequency standard is 100 kHz crystal-controlled oscillator. Manual or remotely programmed control of gate time, multiplier, reset and storage. Price: $940.

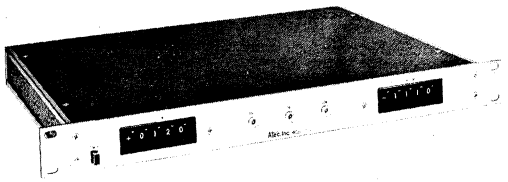


Bi-Directional Totalizer Model 2400 offers manual or remote selection of six operating modes: A+ adds pulses to register total at rates up to 10 MHz; A− subtracts pulses from register, 10 MHz maximum rate; other modes, 3 MHz maximum rate: A + B sums pulses at Inputs A and B and adds them to register; A−B adds pulses at Input A, subtracts at Input B; A quad B adds or subtracts pulses, depending on phase relationship; A as a function of B, pulses added or subtracted based on levels compared to threshold. Price: $895.

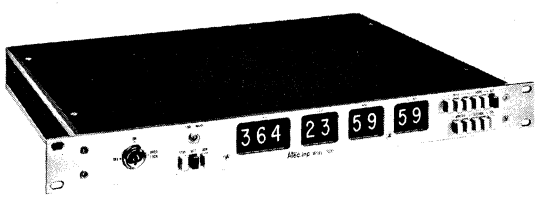
Time Interval Meter Model 2503 provides ultra-precise resolution from 0.1 microseconds to 10^8 seconds and can be used for such measurements as ballistic velocities, acceleration rates, nuclear phenomena, relay response times and many other transients. Inputs are adjustable for level, slope, polarity and coupling to trigger exactly at desired point on input waveform. Readout in milliseconds. Manual or remote programming. Price: $595.



Electronic Counter/Timer Model 2802 measures frequencies from DC to 12.5 MHz, time intervals to 1μsec (0.1 μsec with external clock), and also provides totalizing and ratio functions. Easily upgraded with options: registration and display of up to seven digits; 1 MHz crystal-controlled time base. Input: 10 mV, DC to 5 MHz; 30 mV, DC to 12.5 MHz. Overloads to 125 V. BCD output drives digital printers, tape punch units. Price: $455.



Digital Comparator Model 3200 is one of four models which generate output control signals, "Go-No-Go," "High/Low/In Limits", based on input data and pre-set limit values. Measurement comparisons are made by parallel computation as opposed to coincidence logic, permitting either moving or static BCD inputs to be compared to pre-established limits. These Comparators are specifically designed for local or remote limit programming and will accept BCD data from instrumentation inputs, including all Atec 2000 and 3000 series equipment. Models 3200 (dual limit) and 3201 (single limit) Comparators check unsigned "amplitude-only" data from rate and time interval meters. Models 3202 (dual limit) and 3203 (single limit) provide algebraic comparisons and interface with bi-directional totalizers and digital voltmeters. Prices: Model 3200. $625; Model 3201, $425; Model 3202, $825; Model 3203, $525.



Digital Clock Model 3000 provides both visual display and BCD output of elapsed or real time in days, hours, minutes and seconds. Time reference is either by an internal crystal-controlled oscillator, or optionally from a 1 Hz external signal. Operator controls permit any digit to be set to a desired number, to advance or retard time for updating, and for 24-hour (standard) or 12-hour (optional) cycles. Key-operated interlock switch prevents accidental destruction of time data. Outputs are four-line BCD signals to computers, printers, teletype couplers. Price: $1425.

Remote Programming Unit Model 2607 is useful for calibrating flow meters, monitoring RPM, measuring rate of consumption and similar applications. Operator manually selects a signal from one of two sources, and the unit then automatically applies suitable controls ("Gate Time" and "Multiplier") so that the output, which goes to an external electronic counter such as the Atec Model 2300, represents the desired engineering units. Price: $350. Other models with more channels available.

Frequency Deviation Meter Model 2910 measures frequency deviation in parts per 10^6 of an input signal from its set frequency. Increased resolution, deviation in parts per 10^7, is optional. Frequency standard is 10 MHz from internal crystal-controlled oscillator and harmonic multiplier. Three decimal digits and sign, with four-line BCD outputs are displayed. Maximum rate is 12.5 MHz. Typical application is monitoring quartz crystals during manufacture, measuring deviation from from desired exact frequency and then tuning crystals. Process is automated when 2910 is used with Atec Model 3200 Digital Comparator. Price (Model 2910): $1975.

Timer Model 1080A generates precise time delays to control external equipment. After manual "Start", a relay contact switches, holds for a pre-set period, then restores. Timing accuracy over the range 0.1 to 100.0 seconds is 0.025% exclusive of relay transfer. Applications: count gating to mechanical registers; photographic exposure control; turning equipment on or off after precise time delay. Panel height is 3½" (half-rack wide). Price: $725.

Strain Gage Digitizer Model 1086A performs two useful functions: (1) provides regulated 10 V DC output to excite transducer bridges; (2) offers choice of instantaneous or peak reading of digitized value of analog signals from strain gages used to measure torque, pressure, load or acceleration. Four decimal digit display; four-line BCD output drives digital recorders, computers, printers. Panel height is 3½". Price: $1495.

Storage Register Model 2911 furnishes memory on command for input data in signed digital form; also generates output signals to insert a starting count in an external register. Four decimal digits and sign are standard capacity .Storage time: 1 μsec or less. Useful with Atec Model 2400 Bi-Directional Totalizer. Price: $675.

Standby Power Supply Model 2906 is an accessory battery pack containing circuits which automatically charge the internal batteries when primary 115 V AC power is available. Exhausted batteries are recharged in 24 hours. Model 2906 is designed to prevent data loss in event of primary power failure. Instruments such as Atec Model 3000 Digital Clock will run up to two hours when 2906's batteries are fully charged. Price: $375.

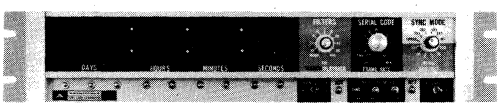
SERIES 7000
A Complete Family of Timing Instruments

Time Code Translator/Generator



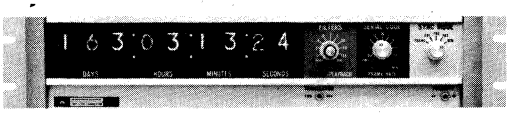
Model 7400

Model 7400 . . . The Model 7400 Time Code Translator/Generator is a two-in-one instrument, ideally suited for use in small data handling systems, data logging systems, laboratories, etc., wherever the requirement exists for both data recording and data playback operations.

This instrument performs both the time data translation and generation functions, utlizing only one set of "time-shared" logic circuitry, thus providing the versatility of two special purpose instruments with the economy of a single unit.

A few of the features that make the Model 7400 an outstanding instrument are: complete versatility through the use of optionalized function-circuit groups; single-cycle noise rejection and error frame bypass during time data translation; precision synchronization and external start during time data generation; and many others.

Time Code Translator

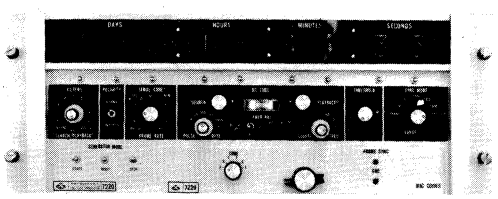


Model 7200

Model 7200 . . . The Model 7200 Time Code Translator is used in telemetry and data reduction systems, or wherever the need exists for translation of time data prerecorded onto magnetic tape.

The Model 7200 can, with appropriate optional circuits, reliably translate the IRIG and/or NASA standard time code formats in either the forward or reverse modes, at normal or accelerated speeds, while assuring complete AGC action over a wide range of tape speeds and input signal amplitudes. This capability makes the Model 7200 a valuable instrument for either manual or automatic tape search applications.

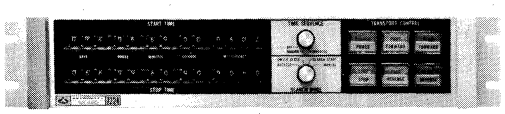
Universal Time Code Translator



Model 7220

Model 7220 . . . The Model 7220 Universal Time Code Translator is capable of translating virtually all standard time code formats in use today, (either dc level shift or amplitude-modulated sine wave carrier through the use of unique plug-in modules). This instrument may be used strictly as a time code translator, or as a tape search system when properly interfaced with an appropriate tape search, control unit (Astrodata Model 7224 Tape Search and Control Unit).

Tape Search and Control Unit



Model 7224

Model 7224 . . . The Model 7224 Tape Search Control Unit is utilized in conjunction with Astrodata time code translators to provide completely automatic or manual control of magnetic tape transport units during tape search and playback operations in both the forward and reverse modes.

This instrument features multiple control modes (search-to-start, single cycle, recycle, and manual) with a time resolution to 100 microseconds. Tape transport control functions are accomplished with momentary (or latching) contact closures/openings. Auxiliary contact closures are provided to aid in controlling the data reduction process.

ASTRODATA

SERIES 7000
A Complete Family of Timing Instruments

ASTRODATA has added a complete new line of compact timing units to an already substantial selection of precision timing instruments. This new line of timing units makes extensive use of proven dual in-line silicon integrated circuits mounted on function-oriented plug-in circuit boards.

The new line of timing units is designated as the 7000 Series, and comprises Time Code Generators, Time Code Translator /Generators, Tape Search and Control Units, and Remote Display units.

With the development of the 7000 Series timing units, Astrodata can provide instruments and systems to satisfy virtually all timing requirements, both simple and complex, including those that involve the stringent specifications of sophisticated data reduction and central timing systems.

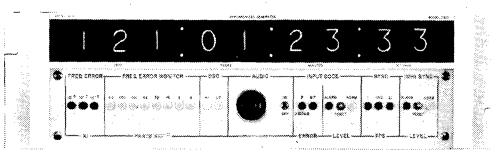
Versatility . . .The utmost in versatility of the 7000 Series timing units is achieved through utilization of optionalized function-circuits and/or plug-in modules in conjunction with predefined basic instruments.

The basic instruments contain all logic elements and controls required to perform the specific functions for which they were designed (i.e., time data translation, time data generation, etc.).

Reliability . . . All 7000 Series timing units combine compactness with minimum power consumption and maintenance time yet provide the maximum in performance and reliability through extensive use of TTL and DTL type integrated circuits and state-of-the-art design techniques. Dual in-line silicon integrated circuits are used throughout the 7000 Series timing units, except in some analog applications, and when output loading requirements necessitate the use of discrete components.

Maintainability . . . Small function-oriented plug-in type printed circuit boards are used in most 7000 Series timing units. These small circuit boards have card-edge test points which make circuit testing and trouble shooting fast and simple; their small size permits removal and replacement without disturbing adjacent boards or components; replacement cost is relatively inexpensive.

Synchronzed Time Code Generator

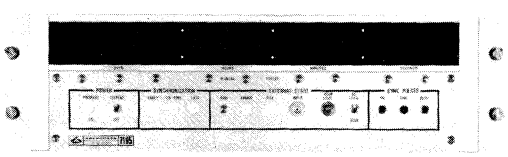


Model 7425

Model 7425 . . . The Model 7425 Synchronized Time Code Generator is an extremely sophisticated instrument that is unmatched in precision, quality, and reliability.

The Model can provide up to six serial time data outputs simultaneously (both dc level shift and modulated sine wave carrier), all precisely synchronized to IRIG A or IRIG B time data inputs from Central Timing Station. Precise synchronization is achieved with a unique digital resolver and servo system called ASTROLOCK. The ASTROLOCK system automatically compensates for frequency offset, drift rate and phase error of the internal 1 MHz oscillator and maintains a time error as small as ±5 microseconds/day with respect to an externally supplied reference, even if the reference signal is momentarily interrupted. The accuracy of this instrument makes it an excellent timing terminal.

Precision Universal Time Code Generator



Model 7195

Model 7195 . . . The Model 7195 Time Code Generator is the finest, most versatile generator ever designed. This instrument is accurate and stable enough for the most exacting standards-lab applications, yet versatile enough to accommodate complex range timing requirements.

The accuracy and stability of this instrument are made possible through the use of an extremely accurate 1 MHz crystal-controlled oscillator mounted in a temperature-controlled oven.

Accuracy is further enhanced through the use of precision control logic that allows synchronization to a time standard broadcast station such as WWV. Synchronization features include direct generator initiation from the output of a time standard broadcast receiver without intermediate buffering; propagation delay compensation with 10 microsecond resolution; synchronization resolution to within 30 nanoseconds.

Complete versatility of the Model 7195 is made possible through the use of optional functional-circuit groups. There are more than 30 such circuit groups available as standard options, and many more that are available as non-standard options. Some of the standard optional circuit groups include serial time data outputs (both dc level shift and modulated sine wave carrier) in the IRIG,NASA and AMR standard formats, plus many other standard and special formats (the Model 7195 may provide as many as 20 serial time data outputs simultaneously).

BASLER Electric Company
HIGHLAND, ILLINOIS
Box 269 Zip 62249—Phone 618-654-2341

Manufacturers of Magnetic Components, Power Control Equipment and Systems.

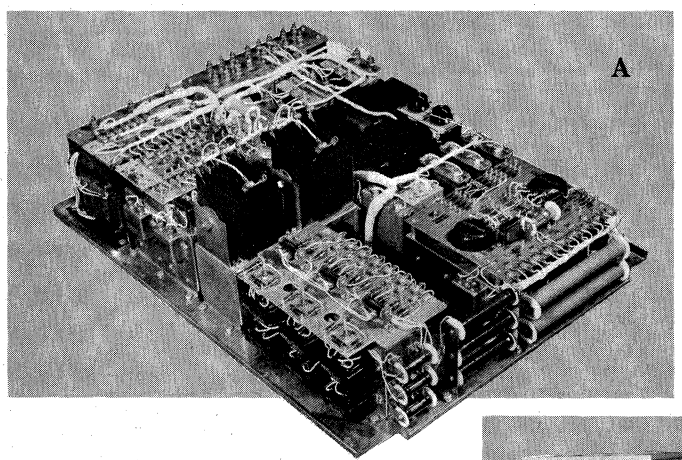
A. Motor Speed Controller—Standard and custom designs for machine-operator controlled industrial applications. Constant and variable speed . . . AC and DC motors . . . range of frequency and duty cycles . . . 50HP through 300HP.

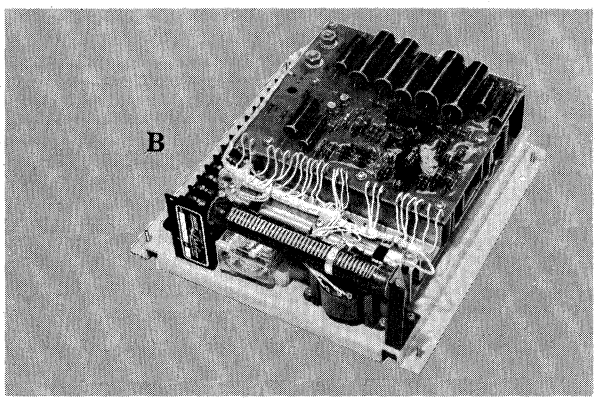
B. SR-Static Voltage Regulator—Solid state regulator responds in 16 milliseconds . . . Regulation better than ± ½ % . . . withstands 5 Gs from 20 to 500 Hz.

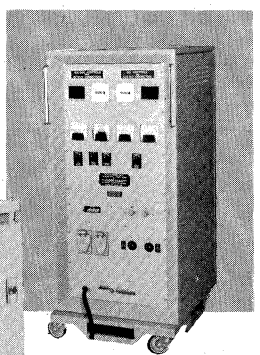
C. Static Power Unit—Does your 400-cycle and D.C. power source have portability, power isolation, power quality, electrical ruggedness and low noise level? Basler's does.

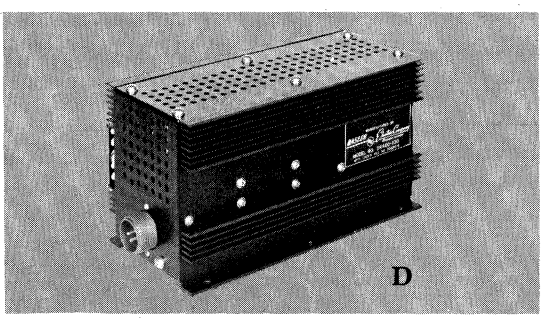
D. Static Inverter—Airborne Inverter. Built-to-drawings or Standard Designs.

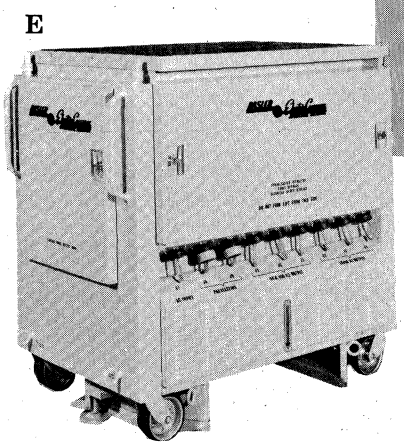
E. Static Power Cart—Mobile power unit designed for aircraft trainer/simulator use and suited for laboratory, classroom and "on line" power requirements where combinations of DC, 60 and 400 Hz power, with kilowatt capability, are required.











At Basler Electric, product capabilities are more than a mere possibility . . . they're a reality.

Quality "input" from engineering, design and manufacturing experience make Basler your obvious supplier of Magnetic Components, Power Control Equipment and Electronic Systems.

The units illustrated here are only representative of the broad range of electric and electronic products "on line" at Basler Electric.

For detailed information on these and other products by Basler, write for bulletins.

BASLER CONTROL EQUIPMENTS

BISSETT BERMAN E-CELL (TM)

Timing & Integrating Components

- *μWatt Power Drain*
- *One-Shot or Reusable*
- *Military or Commercial Specs*
- *Timing Range: Seconds to Months*
- *Integrating Range: 1 to near ∞ Events*

Something New Under the Sun!

1. WHAT IS AN E-CELL DEVICE?

An E-CELL device is a new kind of circuit element that looks like a discrete electronic component but does the work of a complex assembly. Its main functional part is a center electrode, which is surrounded by an electrolyte; the metallic container also serves as the second electrode. In terms of its physical operation, an E-CELL unit is a reversible micro-coulometer, i.e. it converts the current-time integral of an electrical function into an equivalent mass integral (or the converse operation) up to a maximum of several thousand microampere-hours. Exactly one atom is transferred for each electron impressed on the E-CELL unit. Power drain is normally in the microwatt region. The mass integral can be read out at a known current, the time to read it out being proportional to the original integral. When a mass is given as part of the initial condition, this same process generates a precise time interval.

2. WHAT DOES AN E-CELL DEVICE DO?

For *timing* applications a constant current is applied to a *pre-charged* E-CELL unit. The selected time delay is determined by a combination of the E-CELL type and the specific constant current being used. The range of timing is from seconds to months. The output voltage swing that occurs when the mass has been completely transferred is normally used as a bias transition with semiconductor devices. For *integration* applications an *uncharged* E-CELL unit accepts d-c, periodic, or random inputs in any waveshape and stores these as the mass equivalent of a current-time integral. Readout is handled in essentially the same manner that the timing function is handled for a pre-charged E-CELL unit, i.e. the measured time required to reach the point of the abrupt voltage swing, multiplied by the readout current, will be the accumulated charge integral. This could represent the total "count" of a series of events analogous to the input pulses.

3. APPLICATIONS

The scope of applications is as broad as timing and counting functions themselves. New uses are continually being devised. Here are two prime applications areas:

Control: You can use E-CELL devices in circuits for timing, gating, starting, stopping, delaying, relaying, monitoring, actuating, sequencing, measuring — wherever the control condition can be represented by an electrical signal.

Information Handling: You can use E-CELL devices in circuits for data capture, totaling and subtotaling time periods or discrete events, elapsed time logging, running time monitoring, out-of-limits logging, maintenance status reporting, real-time analog computing — wherever the input data can be represented by an electrical signal. Readout can be formatted as either analog or digital data.

PART NUMBER	PHYSICAL CHARACTERISTICS
400 SERIES	Single anode cell with leads; mil specs; ±4% charge accuracy for precharged types; −55°C to +71°C.
410† SERIES	Dual anode cell, with leads; mil specs; ±5% anode 2 charge accuracy; −23°C to +55°C.

Actual size shown.

†No. 410 Dual cells are available on special order with anode 1 charges from 0 to 40 μamp-hr and anode 2 charges from 0 to 3000 μamp-hr.

E-CELL TIMING COMPONENTS

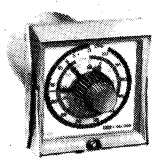
Industrial and Commercial Time/Count Controls

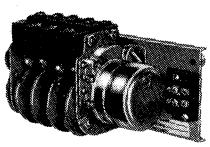
The broad line of Eagle Time/Count Controls includes electronic, electro-mechanical and pneumatic types in commercial, industrial, and military grades. Besides standard, catalog items, Eagle Signal designs and produces many custom time/count devices and systems for special applications. Write to the home office for complete catalog data or Bulletins mentioned. Application engineering consultation without obligation.

REPEAT CYCLE TIMERS



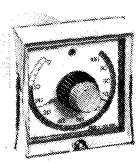
HG100 FLEXOPULSE TIMER—BULLETIN 321

A dual-function timer with a single, easy-to-set dial providing adjustable "on" and "off" time periods for cycles ranging from 30 seconds to 60 hours. Can be adjusted without setting cams or changing gears.



MULTIPULSE CAM TIMER—BULLETIN 340

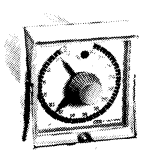
2 to 12 SPDT switches are actuated by adjustable cams. A complete selection of change gears and motors provides cycles from 6 sec. to 36 hours. Contact rating, 10 Amps. @ 120 VAC.



SOLID STATE REPEAT CYCLE TIMER—BULLETIN 322

Provides continuous on-off cycles from 3 to 1000 times a minute. The on and off cycles are individually adjustable on the dial. Load handling capacity 1 Amp. @ 120 VAC.

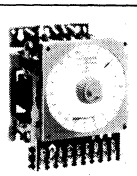
TIME DELAY OR SINGLE CYCLE TIMERS



CYCL-FLEX PLUG-IN TIMER—BULLETIN 125

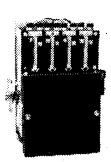
Plug in feature provides easy installation and reduces down time. Dial ranges from 5 sec. to 60 hours.

The Cycl-Flex series also includes a transistorized reset timer, an 80 count counter, pulse timer and percentage timer.



MICROFLEX TIMER—BULLETIN 110

Precision timing of 1/10 percent of full scale is provided by the 20 turn micrometer dial. Dial ranges from 20 sec. to 120 hours. Three load contacts are adjustable to hundreds of contact combinations—eliminate relays.



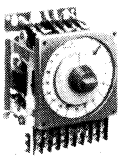
MULTIFLEX MULTIPLE CIRCUIT TIMER—BULLETIN 130

1 to 6 circuits are tripped open or closed according to settings on the linear scales. A repeat cycle model is available for continuous sequencing or programming.

SOLID STATE—CG SERIES—BULLETIN 158

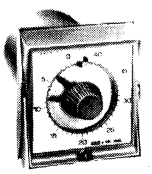
A solid state time delay relay that is reliable, accurate, and economical for applications requiring a delay up to 60 seconds. This knob-adjustable timer plugs into an octal relay socket and is a perfect replacement for pneumatic timers.

COUNTERS



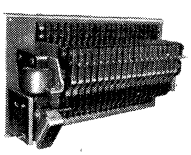
MICROFLEX RESET COUNTER—BULLETIN 720

Trips 3 SPST contacts at end of preset count. (19), (400), and (1000) count dials. Automatic reset. Available in impulse and shaft driven types. Contact rating 15 Amps. @ 120 VAC.



HZ 170 CYCL-FLEX COUNTER—BULLETIN 726

An impulse counter housed in the famous Cycl-Flex plug-in case. It has a single-turn dial with count ranges of 40 and 100. One switch operates simultaneously with the clutch coil as a hold-in circuit. Two other switches actuate at end of count.



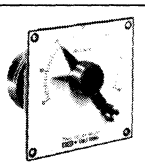
STEP SWITCH—BULLETIN 780

Up to 19 circuits turned ON and OFF in steps according to sequence established by break out cams. Use for programming machines and processes.

COMMERCIAL TIME/COUNT CONTROLS FOR CUSTOM APPLICATION

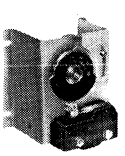
RESET TIMER—MODEL 88

A versatile little timer that can be used either as a delay timer, an interval timer, or a combination of the two. Precision adjustment, 10 amp contacts at 120/240 VAC, 6 seconds – 48 hour time ranges, and a cycle progress pointer are features.



MOTOR RESET TIMER—MODEL 84

Actuates a 5 Amp. SPDT switch at the end of a preset interval. Time ranges from 4 sec. to 5 minutes. A red cycle progress pointer indicates the progress of the timed interval.



REPEAT CYCLE TIMER—MODEL 220

This compact and easily adjustable timer with up to 25 amp contact rating has 286 standard time ranges and can be operated in any position. It is ideal for those applications in which an electrical circuit is to be interrupted in accordance with a prearranged time setting.

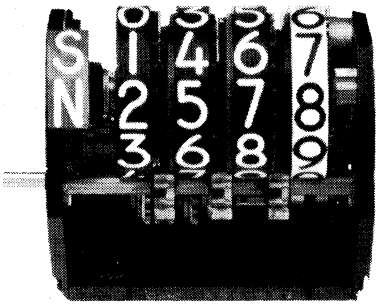
BOWMAR Precision

COUNTERS



BOWMAR REVERSING NAVIGATIONAL COUNTER

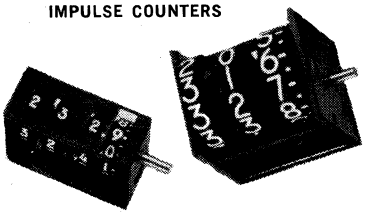
The Ultimate In:

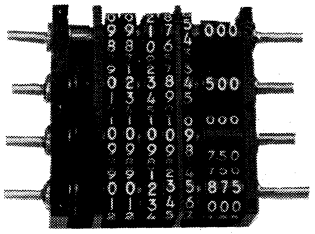
HIGH-SPEED
LOW-TORQUE
LIGHT-WEIGHT
MINIATURIZED RELIABILITY

Single-Bank display of latitude or longitude, and other navigational or decimal information is provided in Bowmar reversing counters; which reverse automatically with same direction of shaft rotation at zero or high points. Two to six drums.

Bowmar has unsurpassed capabilities in the design, manufacturing, and testing of:

REVERSING COUNTERS
ELAPSED TIME INDICATORS
EXTERNAL PINION COUNTERS
INTERNAL PINION COUNTERS
VARIATION COUNTERS
IMPULSE COUNTERS





Bowmar offers counters which satisfy every type equipment and application conceivable in electro-mechanical counting instrumentation. Bowmar's position of excellence has been earned through proven engineering competence, highly refined manufacturing and quality assurance programs. We also have the techniques and physical facilities to respond to critical needs, environmental testing and delivery requirements.

Fort Wayne, Indiana 46809

BOWMAR PRECISION ROTARY COMPONENTS

Offering maximum **reliability** for use in **Guidance, Navigation, Communications, Systems.**

Bowmar stocks "off the shelf" models and has **complete design and manufacturing facilities** for special applications in:

Servo Motors
Sizes 8 – 10 – 11

Motor Tachometers
Sizes 8 – 10 – 11

Stepper Motors
Sizes 8 – 10

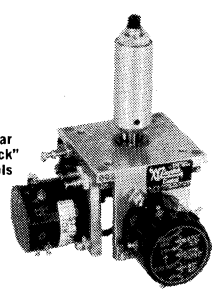
Synchros
All sizes, 8 thru 31

Gearheads, Speed Reducers
Sizes 8 – 10 – 11 – 15 – 18

Electro-Shift 2-Speed Gearchangers
Sizes 10 – 11 – 15 – 18 – 20 – 23

All components are available matched, preassembled, and pre-checked combinations meeting all military, industrial, and commercial standards. Bowmar is also a prime producer of many special geared devices including speed reducers, multi-shaft units, offset shaft gearheads, square gearheads, tandem gearheads for very high ratios, and all types of shafts, pinions, lengths, and other features.

Bowmar "Joystick" Controls



Handgrip movement in any direction produces corresponding rotation of potentiometers or other control components in the X and Y coordinates depending on stick position. Optional Z coordinate control is provided by clockwise or counter-clockwise stick rotation. Self-centering stick and other features available. Thumb operated safety interlock switch provided.

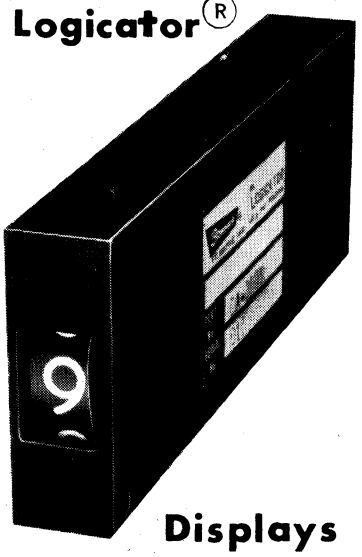
BOWMAR

Logicator®



Displays

For Direct Readout of Digital Computer Signals

IDEAL FOR AIRBORNE INSTRUMENTATION DISPLAY

"BACK-LIGHTED" for both bright daylight and dark night readability

LOW POWER consumption, (1 Watt) *INHERENT MAGNETIC MEMORY*

BCD, 5 or 6 wire input standards.

RELIABLE self-contained *ELECTRO-MAGNETIC* drive

MINIATURE size, lightweight, high stability

BOWMAR'S LOGICATOR® provides direct readout of digital computer signals with back-lighting for optimum day and night readability. Units may be adapted to special applications such as use of any computer code, message displays, and custom assemblies. Designed for reliability and stability under conditions of high vibration, shock and extreme temperature variations; the BOWMAR LOGICATOR® is built in accordance with Aircraft Equipment Specification Mil-E-5400.

Single-digit unit: 1.25″ x .45″ x 2.5″ (slightly larger in some applications depending upon mounting and input code required); ¼″ numerals; continuous duty.

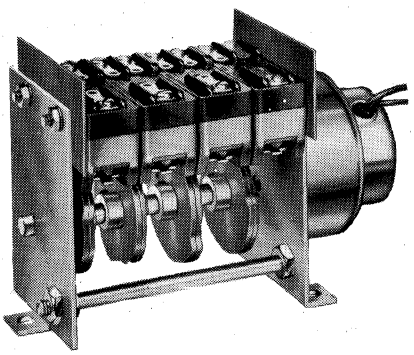
BRISTOL MOTORS / DIVISION OF VOCALINE

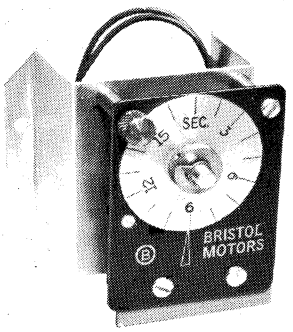
SYNCHRONOUS MOTORS AND TIMERS

Versatility is the characteristic which design engineers need — and find — in Bristol Synchronous Motors and Timing Devices. Bristol's unusually broad experience and range of design and manufacturing skills are particularly valuable where special requirements must be met.

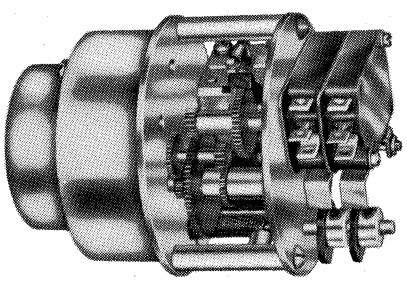
The devices shown are among the most widely used. All can be mounted in any position, and take a minimum of space. Materials are selected on the basis of their suitability to provide long service, and perform well under a variety of conditions. Bristol engineering service is available for applications that require custom design and manufacture.



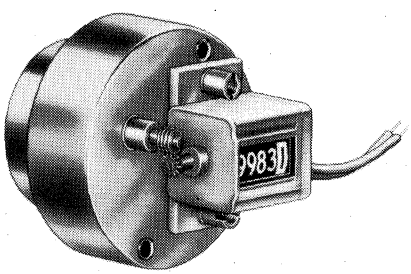
SERIES 31 REPEAT CYCLE TIMER. Low-cost multi-contact timer with high repeat accuracy. For vending machines, home appliances, industrial program controls. Speed Ranges: 1 Revolution Per Second to 1 Revolution Per Month. Motors standard, or high torque reversible. Switch Rating: 20 amp. at 115-230 V AC (also in ½ hp. at 125 V AC). Switches: enclosed snap action SPDT type. Cams: dual cams with set screws for field adjustment. Cut cams available on special order. Bulletin B-22.
One Switch Model $8.25 approx.
Four Switch Model $16.75 approx.



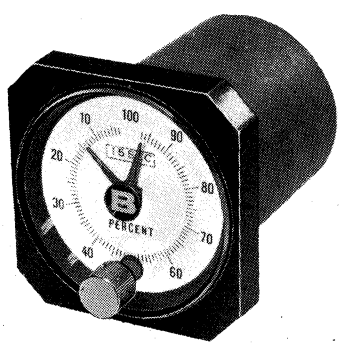
BRISTOL SERIES 55 DELAY TIMER, the low cost timer with the adjustable dial. For use when short time-delays are called for. This Delay Timer has a progress pointer which indicates the progress of a cycle, automatically resets when power to the duty-matched synchronous motor is interrupted and is manually adjusted by a selective dial which can be reset at will. The standard motor is for 115v/60 cycle, other voltages are available at small extra cost. Switch is SPDT rated 20 Amps resistive load at 115-230 VAC. Delay Timers are available in 15, 30, 60 and 120 second time delays. Bulletin B-32.
$14.00 approx.



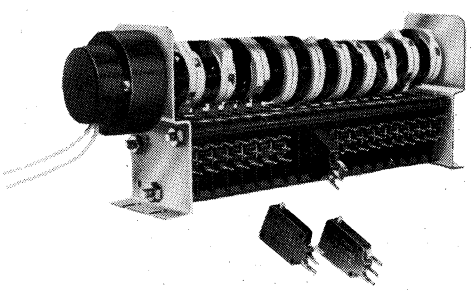
SERIES 21 TIME DELAY RELAY. General timer for instantaneous reset-type action, such as timers for photography, electronic safety, alarms, signals, etc. (Life expectancy over 1 million cycles.) Compact. Quick reset time (well under 1/5 second). Repeat accuracy better than 1% full scale. Time setting: 15 seconds to 3 months full scale. Rating: 10 amp (non-inductive load), Voltage: 115 V AC, 60 cycles standard. Optional adjustment feature available. Bulletin B-21.
One Switch Model $19.00 approx.
Two Switch Model $22.50 approx.



SERIES 41 ELAPSED TIME INDICATOR. Adaptable for panel or unit mounting, this low-cost series features simple installation, and a choice of four models with non-reset or reset counters. Maximum readings on both units from 9,999.9 minutes to 99,999 hours. 115 V AC, 60 Cycle standard. 50 Cycle and other voltages available. For further information on the three models above request Bulletin B-23.
Non-reset $14.00 approx.
Reset $20.00 approx.



SERIES 63 PERCENTAGE TIMER has a progress indicator which always shows the present position of the timer. This is an easily adjustable repeat cycle timer which makes or breaks an electrical circuit for an adjustable percentage of the full time cycle. Available in 7.5 second to 31 day time ranges, they are ideal for control of blowers, ovens, dryers, heaters, pumps, etc. Have repeat accuracy within ¼%. Panel mount. Automatic re-cycle. For complete information, request Bulletin B-30.
$27.00 approx.



SERIES 47 REPLACEABLE SWITCH REPEAT CYCLE TIMER is a multi-contact program timer which permits easy switch replacement without the necessity of disassembling. In addition one turn of the calibrated adjusting screw provides a 2% variation of cam time sequence. Switches are rated at 6 amps-115 volts. Available in a wide range of switches and speed combinations. Request Bulletin B-20
Two Switch Model $14.00 approx.
Six Switch Model $24.00 approx.

SEND FOR COMPLETE MOTOR AND TIMER CATALOG *

VOCALINE COMPANY OF AMERICA, INC., BRISTOL MOTOR/TIMER DIVISION

Timers and Motors to meet special applications are available from distributors. See Vocaline Bristol Motors Catalog for complete line of motors and timers.

IMMEDIATE DELIVERY FROM FRANCHISED VOCALINE\BRISTOL MOTORS DISTRIBUTORS

MAGSENSE®

CONTROLLERS, RELAYS, COMPARATORS, ALARMS

MAGSENSE Instrumentation-Current and Voltage sensing devices that will compare electrical signals of 10^{-10} watts with a known variable reference. This enables you to connect directly to such transducers as thermocouples, strain gauges, and DC tach generators. **No pre-amplifiers required.** Power gain of **100 BILLION** makes it possible to accomplish a variety of control/alarm tasks with these products.

FEATURES

- ☐ Input versatility—AC or DC isolated input
- ☐ Proven in service
- ☐ Zener stabilized set point
- ☐ Adjustable hysteresis—0 to 200%
- ☐ Solid-state reliability

BRIEF SPECIFICATIONS

MODEL	TYPICAL APPLICATIONS	INPUT RANGES	INPUT RESISTANCE	RESPONSE TIME	POWER REQUIRED	OUTPUT LOAD	PRICE*
 MODEL 30	Voltage sensitive relay, battery voltage monitor, pressure, force, strain, speed monitor	1 to 3 VDC, expandable	>100K ohms	<1 ms	12 or 28 VDC	Nonlatching—100 ma max. Latching—500 ma max.	$ 50
MODEL 70	Comparator, control relay, alarm, gap or band controller	0-100 μa 0-1 ma 0-10 ma 0-100 ma	100 ohms to 0.1 ohm	100 ms max. (10 ms available)	12 or 28 VDC	Nonlatching—.1 amp, .5 amp, DC; pulse output Latching—.5 amp max., DC	$ 60
MODEL 71	Time-proportional temperature controller	0 to 1000°F	For use with 15 ohm thermocouple	500 ms	28 VDC at 40 ma	Pulses at 2 KC rate—3 volts, open circuit voltage for 5 μs	$ 90
MODEL 73	Thermocouple relay for temperature alarm, control relay, proportional controller	0 to 50 mv	105 ± 10 ohms	500 ms	12 or 28 VDC	Nonlatching/latching—.1 amp, .5 amp, DC; pulse output	From $ 76
MODEL 77	Dual set point version of Model 70	0-100 μa 0-1 ma 0-10 ma 0-100 ma	210 ohms to less than 1 ohm	100 ms max.	12 or 28 VDC	Nonlatching—up to 100 ma	$ 99
MODEL 80	Comparator meets MIL-E-5272, temperature alarms, go/no-go logic, control relay, controller	0 to 500 μa	100 ohms ±10%	100 ms max. (10 ms available)	22 to 32 VDC	Nonlatching—50 ma max. Latching—1 amp max.	$ 90
MODEL 82	Comparator meets MIL-E-5272, internal set point, output equivalent of SPDT	DC, AC and bipolar DC volts, current	100 ohms ±10%	100 ms max. (10 ms available)	22 to 32 VDC	Nonlatching—500 ma max. Latching—1 amp	$170
MODEL 90	Thermocouple amplifier, thermocouple transmitter with cold junction compensation and excellent C.M.R.	0 to 50 mv	For use with 10 ohm thermocouple	1 cps	24 to 30 VDC	Proportional output, 4 to 20 ma DC	$110
MODEL 101	Single channel alarm/controller for temperature, pressure, speed, strain systems. Differential or time proportioning control action through use of Series 30,70 MAGSENSE BD.	micro-amp and millivolt signals from referenced transducers	100 ohms to 0.1 ohm	1 ms up	120 VAC, 60 to 400 Hz	Isolated DPDT 5A resistive or solid-state SCR output—1 KW	$136
MODEL 102	Dual channel alarm/controller for temperature, pressure, speed, strain systems. Differential or time proportioning control action through use of Model 77 MAGSENSE Board.	micro-amp and millivolt signals from referenced transducers	200 ohms to 0.1 ohm	100 ms up	120 VAC, 60 to 400 Hz	2 isolated DPDT 5A resistive	$188

*Single unit prices quoted. Reduced prices for quantity orders. Prices and specifications subject to change without notice.

Characteristics quoted in these specifications indicate the general area of operation for each model. Models with a variety of other input/output and operating capabilities are also available.

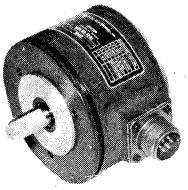
DIGITAL POSITION READOUTS

Digital measurement or control of rotational or linear position for machine-tool, process control, tracking, servo system and digital instrumentation applications.

Features

ECONOMY — Greatest Value per dollar . . . FULLY INTEGRAL SYSTEM — self-contained power supply for encoder as well as counter . . . MAXIMUM NOISE IMMUNITY — high-level encoder output coupled with line-receiver counter input . . . MATCHED ENCODERS and COUNTERS for best performance, reliability and accuracy . . . TTL INTEGRATED CIRCUITS used throughout . . . MULTI-FEATURE FLEXIBILITY satisfies a wide range of application requirements.

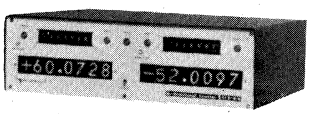


SHAFT-ENCODERS

Optical-OPTECON Incremental . . . economy price basis . . . fully integral circuitry (full voltage square-wave, pulse and/or zero outputs) . . . 150,000 hr. lamp . . . rugged . . . sizes 25 or 35 — commercial, industrial or military . . . hysteresis feedback for jitter-free operation . . . standard resolutions: 250, 360, 500, 512, 635, etc. cpt-up to 2540 on special order . . . ideal for digitizing rotational travel, position, or speed for measurement and control. PHOTOSYN Incremental Encoder . . . resolutions to 16,384 cpt at accuracies up to 10 arc-secs . . . fully integral circuitry . . . matched complementary push-pull photo transistors for highest noise immunity . . . 200,000 hr. lamp . . . hysteresis feedback . . . rugged . . . size 35 . . . Standard resolutions: 2048, 2500, 2540, 3600, 4069, 5000, 5400, 6350, 7854, 8192, and 10,000 — up to 16,384 on special order . . . Pulse rate to 1 MHz ...ABSOLUTE units to 16 bits non-ambiguous binary . . . sin-cos to 13 bits per quadrant.

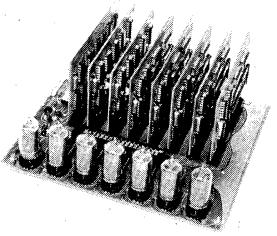
Magnetic — VERNISYN non-contact encoder . . . full-scale vernier and full-perimeter averaging . . . resolutions to 2^{21} . . . absolute serial pulse-train output. INCRESYN, incremental encoder for digital control and readout . . . high-signal magnetic pickoff, integral silicon circuits guarantee low noise susceptibility . . . ROTOSYN — compact absolute encoder . . . serial pulse-train output: each pulse represents 1/nth of circle . . . ideal signal recording or transmission to gated counter . . . resolution to 2^{11}.

READOUT COMPONENTS

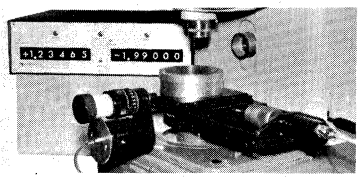


Bi-Directional Counters. All-TTL circuitry on plug-in PC cards . . . count and reverse to rates >5 MHz . . . single and multi-axis with ±4 to 7 decades, in line (Nixie) Numerical Display, BCD output, manual and pulse reset, overflow indication, remote display and thumbwheel preset options . . . Table or Rackmounted Cabinet . . . self-contained 110-117 VAC, 60-Hz supply.

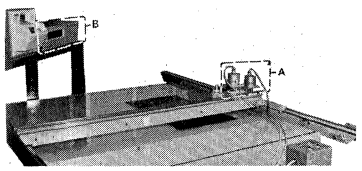
Bi-Directional Counter Module. Full single axis plug-in for direct installation in digital system cabinet . . . High reliability, compact, lightweight, all TTL integrated circuitry . . . 5 MHz count rate (incl. reversing) . . . economical base price includes: ±4 to 7 decades, buffered BCD output, five standard input modes for maximum flexibility, inputs for remote reset and presets, in-line display . . . optional-mounting container with connectors and terminals, power supply also available.



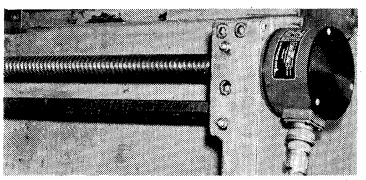
READOUT APPLICATIONS



Digitized Micrometer Assembly and Readout: interchangeable with existing micrometers to provide display or readout . . . advantageous for comparator or Microscope stage . . . produces 20,000 pulses per inch of travel fed to bi-directional counter with display and readout to 0.00005″.



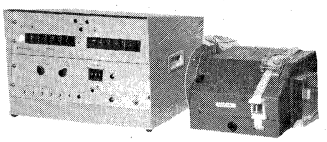
Coordinatograph Digital Readout Adaptor Kit provides numerical displays for greater accuracy and ease of use . . . replaces conventional x-y dials and verniers . . . for increased utility, reduced operator fatigue; reading errors eliminated . . . higher resolution (.0005″), 1:1, 2:1, 4:1 scaling, floating-zero reset (or preset) . . . also BCD output provided for printout, punchout or in-line computer interface.



English to Metric Conversion for Machine Tools: encoder converts inch-pitch lead screw travel into decimal fractions of a centimeter . . . enables machining to metric dimensions directly . . . two models available to accommodate 4-pitch, 5-pitch and 10-pitch machine tool leadscrews as well as 40 pitch micrometer lead screws.

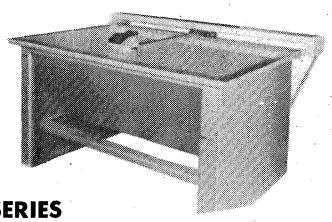
COORDINATE DIGITIZERS

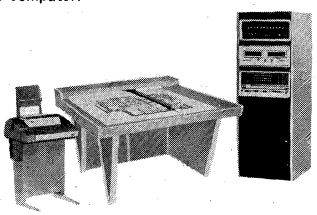
DATA TECH offers a full line of Coordinate Digitizers for N/C Tape Preparation and Graphical Codification in complete systems . . . great flexibility and advantages in: tape preparation for numerical control; image plane digitizing of projections; pattern, chart and photographic digitizing; precision drawing of templates and reticles; verification, precision plotting, cutting or positioning; and numerous others.



IPD SERIES

Image Plane Digitizer: coordinate digitizer specifically for work with film projections (such as bubble chamber tracks) . . . user oriented, consists of a rugged, stable, formica covered 1″ cast aluminum digitizing table with Readout/Buffer Control Electronics . . . resolution is 0.001″, accuracy to 0.002″ . . . compatible outputs provided for data compilation on punched cards, paper tape, magnetic tape or direct feed to computer.





APD SERIES

Adoptable Program Digitizer: hard-wired coordinate digitizer tailored to specific format requirements of NC tools . . . prepares final control tapes directly from artwork, non-dimensioned drawing or negatives . . . reduces operating costs, increases productivity. Rugged, fixed-position or tilt-top light tables in popular sizes . . . complete selection of **must** features and useful accessories . . . economical solution for NC tape preparation requiring extensive dimensioning; accuracy to 0.002″, resolution and repeatability to 0.001″.

UPD SERIES

Universally Programmable Digitizer: integrated coordinate digitizing system to handle a wide variety of NC format requirements . . . PDP-8L computer along with GRAFTRAN software provide complete program and functional flexibility (self monitoring, repeat patterns, editing, code conversion, etc.) . . . wide variety of operating features and accessory options . . . along with selection of fixed-position or tilt-top light table; accuracy to 0.002″, resolution and repeatability to 0.001″.

DIGITAL DRAFTING TABLE

For rough digitizing or precision layout and drafting . . . templates, reticles, scales, etc. . . . employs incremental encoders and dual-axis bi-directional counter with numerical display to indicate position of drafting head with resolution and accuracy of 0.001″ . . . Standard Table — 38″ x 60″ working area . . . height and tilt adjustments . . . features solid state circuitry, push-button control, economical modular design, selectable scale factors, position lock in and out, floating zero-reference, etc.

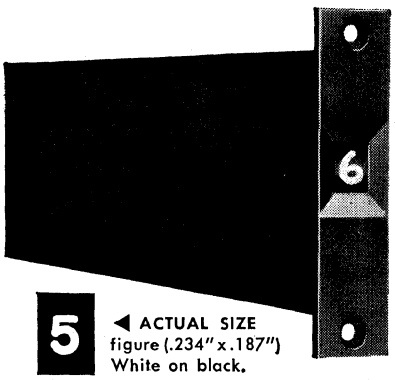
DURANT®
INSTRUMENT COUNTERS

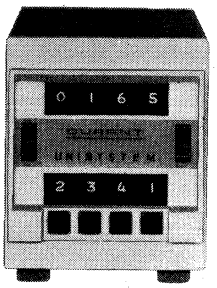


5 ◀ ACTUAL SIZE figure (.234" x .187") White on black.

UNIPULSER®
HI-SPEED DECADE COUNTER
with both VISUAL and ELECTRIC READOUT

An important, off-the-shelf component providing Extreme VERSATILITY, Space-saving COMPACTNESS, 100 Million COUNT LIFE, plus Attractive LOW COST.

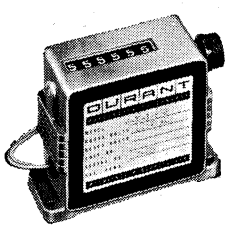
This unique decade counter of modular design, with speed of 40 pulses/sec. combines visual readout on a printed number wheel and electrical readout by means of an internal etched circuit switch. Each unit incorporates circuitry for resetting to zero and transferring the pulse from decade to decade in sequential counting. A Unipulser system can be adapted to Predetermined Counting (including automatic recycle), or for many other digital control requirements. Send for Catalog 90.



Durant 49600 and 49800 Unisystems are available as complete systems for desk, panel or relay rack mounting. 49600 model is additive with a variable predetermined number; 49800 is subtractive, with a factory-wired prewarn value.

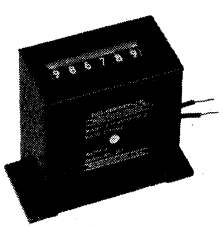
STANDARD ELECTRIC COUNTERS for INSTRUMENTATION

Durant Electrics, combining dependability, fast speed, legibility and long life with the advantages of remote counting of impulses, make them particularly adaptable for certain instrumentation applications. Most models available from stock — ready to be installed with other instrumentation in control panels, or as an integral part of a machine, instrument or system. Coils completely within frame — will not burn out if left on closed circuit. UL approval on 115 V. AC models.



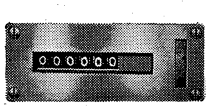
"Y" SERIES

Available with 4-6-7 figures (also dozens unit wheel). Built-in rectifier operates coil on dependable DC current. Speeds up to 1500 CPM. Knob, lock, or non-reset. Operates under severe shock and vibrations. *Models also available without rectifiers.*



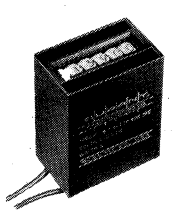
"YE" SERIES

A six figure model with instant push-button or electric reset. Can be reset under power or when coil is energized. High speed, up to 2400 CPM.



PANEL MOUNT

"Y" and "YE" Series can be mounted singly or in batteries with reading line flush with front of panel.



NEW "ME" SERIES

A small, precise electric counter. Available as six-figure non-reset and four-figure reset models, with base or panel mounting. DC and 115 VAC voltages available. Speeds to 1000 cpm. Request "ME" Bulletin.

SPECIAL ELECTRICS: If standard models cannot do your job, variations or specially developed counters can be engineered upon application.

STANDARD DIGITAL READOUT COUNTERS for SYSTEMS and INSTRUMENTATION

Durant pioneered the development of the first standardized line of stocked instrument counters for high speed, easy-to-read digital presentations. In just a few years this "first family" has grown from 96 model variations to over 200. This extensive selection of precision counters provides you with a wide choice of wheel sizes, number of figures, types of unit wheels, rotation and side of drive. In quickly satisfying virtually all of your design requirements, Durant will save you time and engineering costs. All models available Right or Left Drive, Clockwise or Anti-clockwise Rotation.

"Y" SERIES

Series Y — 11285 (24 models)
Hi-Speed Index, 2 to 7 figures

Series Y-8822 (24 models)
Single width unit wheel, 2 to 7 figures

Series Y-8823 (24 models)
1½ width unit wheel, 2 to 7 figures

Series Y-8829 (20 models)
Double width unit wheel, 2 to 6 figures

Series Y-8831 (16 models)
Dual Bank, in line. 2 to 5 figures/bank

Series Y-8831-1 (12 models)
Dual Bank, in line. Double width unit wheel. 2 to 4 figures/bank

Series Y-9425 (12 models)
Dual Bank, stacked. Single width unit wheel. 3 to 5 figures/bank

Series Y-9448 (12 models)
Dual Bank, stacked. 1½ width unit wheel

BEARING DEGREE COUNTERS

Series Y-9994 (4 models)
Double width unit wheel. Hi-speed Geneva Index. 4 figures only

Series Y-9992 (4 models)
Single width unit wheel. Hi-speed Geneva Index. 3 figures only

"D" SERIES

Series D-8856 (16 models)
Single width unit wheel, 3 to 6 figures

Series D-8861 (12 models)
1½ width unit wheel, 3 to 5 figures

Series D-11256 (12 models)
Hi-speed Geneva Index, 3 to 6 figures

"S" SERIES

Series S-9679 (12 models)
Sub-miniature, single width unit wheel. 3 to 5 figures

SPECIAL REVOLUTION COUNTERS — In addition to the above listed standard models, many other minor variations can be made on request for specific requirements.

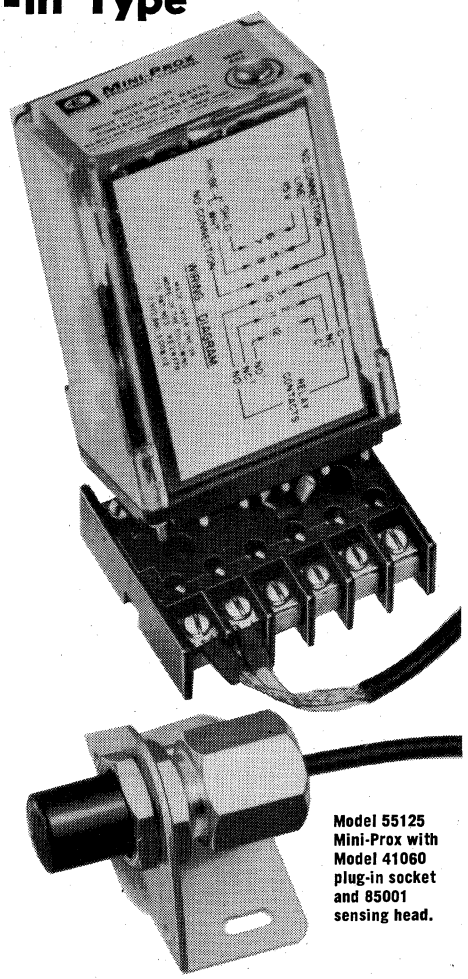
ELECTRO MINI-PROX

Low Cost — Plug-in Type



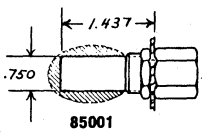
Model 55125 Mini-Prox with Model 41060 plug-in socket and 85001 sensing head.

Compact Proximity Sensing System for Non-contact, Detection and Control of Ferrous and Nonferrous Metals

Accuracy of sensing distance is often a critical factor in sensing and control applications. Mini-Prox accuracy can be depended upon in any environment; heat to +160°F or cold to −30°F at either probe or control. Line voltage variations from 105 to 130 volts — dust — moisture — vibration, none of these affect its accuracy. You can set it and forget it.

Plug-in design provides for easy wiring. Unitized construction eliminates soldering or wiring of sensitivity controls. Connections for power, sensing head and relays are made to screw-type socket terminals. Operations up to 600 per minute may be controlled or monitored by the Model 55125 illustrated. Electronic output models for higher speeds are also available.

5 STANDARD TEMPERATURE-STABLE SENSING HEADS



85001

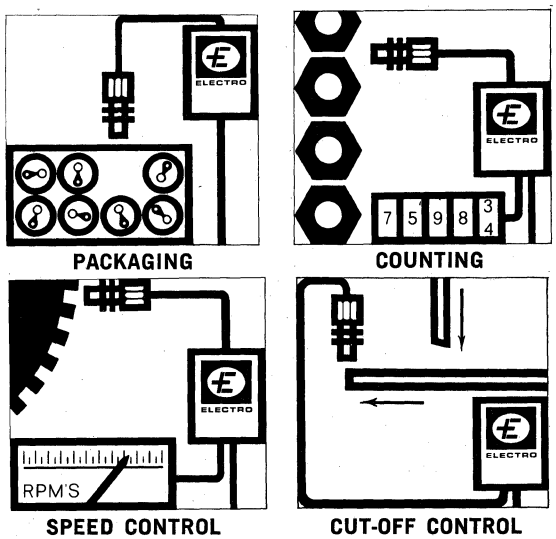
Model No.	Sensing Face Dia.	Sensing Range	Overall Length	Mounting	Cable
4943	.312″	.050″ to .250″	1⅝″	⅜″ - 24	10′
4944	.375″	.050″ to .250″	1¼″	clamp	10′
85.001	.655″	.050″ to .250″	2⅛″	bracket	10′
85.002	.655″	.100″ to .500″	2⅝″	bracket	10′
85.003	.750″	.300″ to 1.000″	3¾″	bracket	10′

MINI-PROX MODELS FOR A VARIETY OF FUNCTIONS

Model No.	Output	Additional Data
55125	10A DPDT Relay output	115V Power
55126	10A DPDT Relay output	230V Power
55141	Electronic output +12V metal near; −0.5V metal away	115V Power
55145	Electronic output +12V metal near; −0.5V metal away	230V Power
55132	Delayed-make relay unit	.05 - 1 sec. delay
55133	Delayed-make relay unit	.5 - 10 sec. delay
55136	Delayed-break relay unit	.05 - 1 sec. delay
55137	Delayed-break relay unit	.5 - 10 sec. delay
55148	Solid State AC output	3 Amp 200 Vp
55147	Solid State DC output	1 Amp 150 V max.
MINI-PROX OR MAGNETIC PICKUP SPEED CONTROLS		
55149	These 5 models cover 5 ranges from 0.1 Hz min. to 15,000 Hz max. Each have optional under or over-speed control and optional latching feature.	Freq. .1 to 1.5 Hz
55150		Freq. 1 to 15 Hz
55151		Freq. 10 to 150 Hz
55152		Freq. 100 to 1500 Hz
55153		Freq. 1000 to 15,000 Hz

CONTROL AND SENSING HEAD TEMPERATURE STABLE −30°F TO +160°F

MANY MONEY SAVING APPLICATIONS



PACKAGING — COUNTING — SPEED CONTROL — CUT-OFF CONTROL

Conveyor Control • Measurement • Missing Parts Detection • and many others.

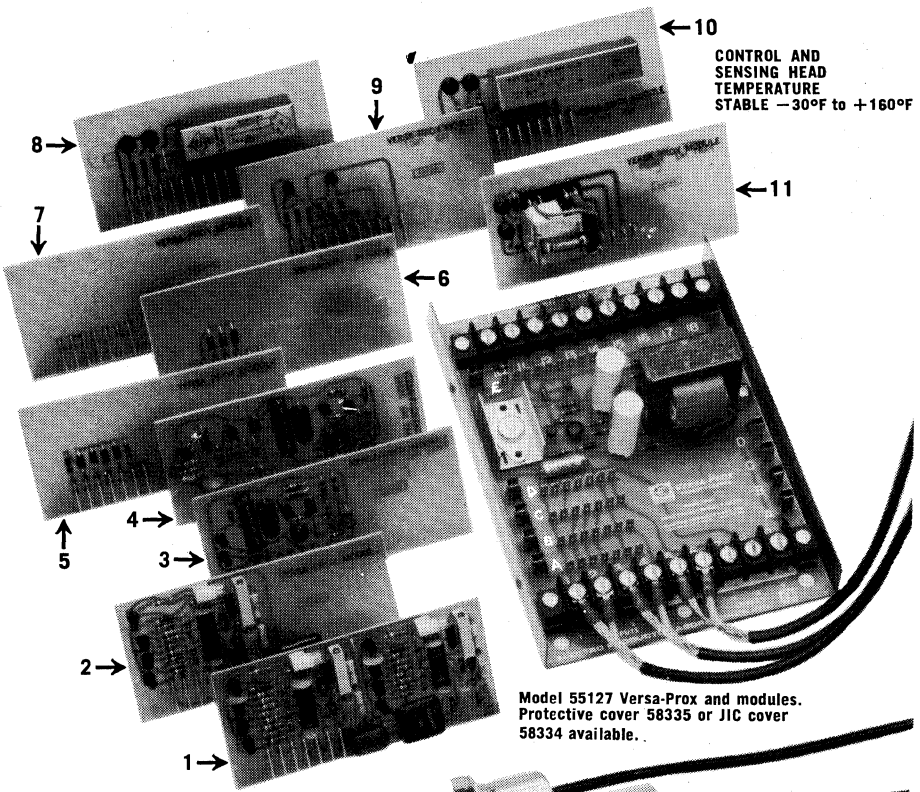
ELECTRO VERSA-PROX

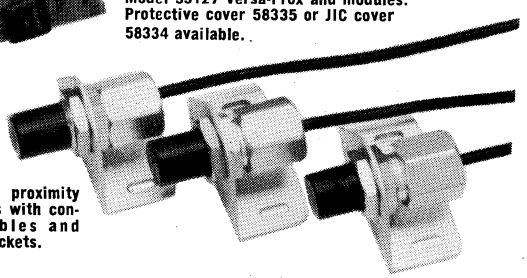
Modular Plug-in Proximity System enables you to tailor signal output to YOUR requirements

Versa-Prox is a new concept in proximity switch versatility. By means of plug-in modules in a five position "mother board", you can tailor detection or control to your exact needs — and change it in a matter of seconds, whenever your need changes.

The outputs of one, two or three transducers may be combined by means of digital logic to form a single output. This output may then be delayed until the output module is required to be energized for the selected control signal.



Model 55127 Versa-Prox and modules. Protective cover 58335 or JIC cover 58334 available.

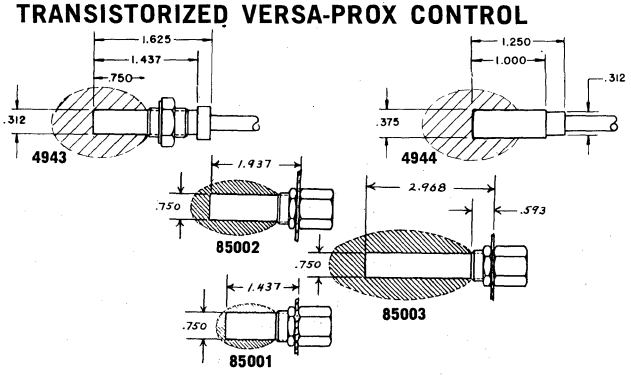


Models 85001 proximity sensing heads with connecting cables and mounting brackets.

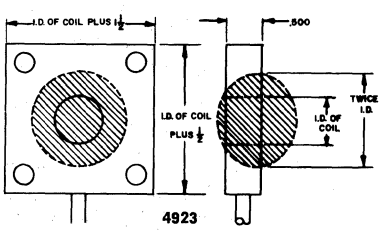
VERSA-PROX MODULES FOR MANY FUNCTIONS

Socket Insert	Module Model	Function	Key to Photo
A and B	76030	Single oscillator	2
	76031	Dual oscillator	1
	76049	Single photo electric amplifier	
	76056	Magnetic pickup signal conditioner	
C (only)	76033	OR	6
	76042	PASS	7
	76043	AND	5
	76048	3 - Input Comparator/Latch	
	76054	2 - Input Comparator/Latch	
C or D	76034	Delayed-make .05 - 1 sec.	
	76040	Delayed-make .5 - 10 sec.	3
	76035	Delayed-break .05 - 1 sec.	
	76041	Delayed-break .5 - 10 sec.	4
	76052	Pulse Width Control .05 - 1 sec.	
	76053	Pulse Width Control .5 - 10 sec.	
	76047	No - No Latch	
E	76036	Relay output 10-A DPDT	11
	76037	Electronic output +12V metal near −0.5V metal away	9
	76038	Reed Relay	10
	76039	Mercury Relay	8
	76050	Solid State AC output 3A 200Vp	
	76051	Solid State DC output 1A 150V Max.	

PROXIMITY SENSING HEADS FOR USE WITH TRANSISTORIZED VERSA-PROX CONTROL



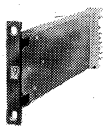
Model 4943 — typical of a selection of standard sensing heads available from stock for quick delivery.



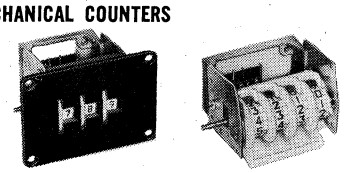
ELECTRICAL AND MECHANICAL COUNTERS AND NUMBERING DEVICES

INDICATING MODULE

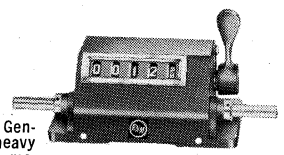
Stock U44 — Panel mount, indicating, up to 40 pulses per second, resettable by external switch using half wave rectified A.C. source with fixed plug and removable socket.
Dimensions: Front panel 1.680″ high x ¼″ wide; Overall length 4.216″; Body height 1.125″.
Price each: $12.00
Also available with electrical readout, print wheels, high speed operation 80 pulses/second.



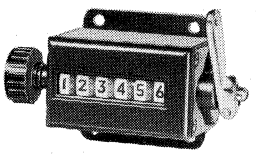
MECHANICAL COUNTERS



Stock M36 — Predetermining mechanical counter, 3 digit, 200 strokes per min. Predetermined contact is a single pole double throw switch, capacity 5 A., 250 V. A.C. Terminals on switch, panel mount, preset by 3 setting knobs.
Dimensions: 2.155″ long x 3.062″ wide x 2.312″ high
Price each: $14.30

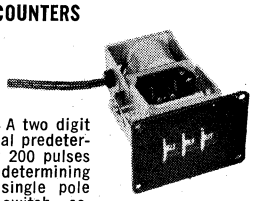


Stock M28 — General purpose heavy duty, 6 digit, mechanical double shaft counter, revolution drive, adds or subtracts one count for each complete revolution of input shaft, 10,000 CPM, base mount with resettable lever.
Dimensions: 3.094″ long x 2.250″ wide x 1.781″ high
Price each: $42.00

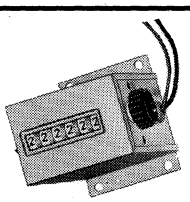


Stock M26 — Small medium duty 6 digit mechanical stroke counter with resettable knob and operating lever, 1000 CPM, base mount.
Dimensions: 1.63″ long x 1.00″ wide x 1.045″ high
Price each: $7.22

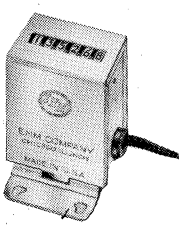
ELECTRICAL COUNTERS



Stock PE 35 — A two digit 115 W. electrical predetermining counter 200 pulses per min. Predetermining contact is a single pole double throw switch, capacity 5A, 250 V. A.C. panel mount. Preset by two setting knobs. U.L. Recognized.
Dimensions: 3.580″ long x 3.062″ wide x 2.312″ high
Price each: $19.90, 2 figures; $21.20, 3 figures

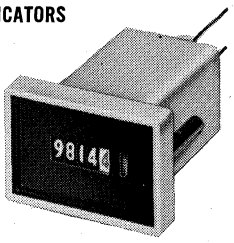


Stock E3A — Mount electrical impulse counter, standard speed (500 counts per min.), knob resettable 6 digits, 115 V 60 hz. U.L. Recognized.
Dimensions: 2.63″ long x 2.75″ wide x 1.87″ high
Price each: $12.50

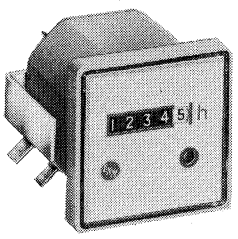


Stock E2B — Economy electric counter, 6 digit, 110 V. 60 hz. 600 CPM, 12″ leads, non-resettable, base mount, "L" shaped mounting holes. U.L. Recognized.
Dimensions: 2.340″ long x 1.718″ wide x 1.187″ high
Price each: $5.25

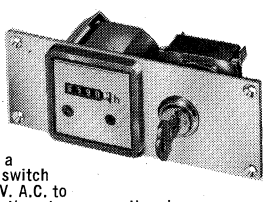
ELAPSED TIME INDICATORS



Stock T4B — Miniature elapsed time indicator, 5 digit, non-reset, 115 V. 60 hz., scale 9999.9 hours, with tenths in red, panel mount.
Dimensions: 1.72″ long x 1.59″ wide x 1.03″ high
Price each: $15.50

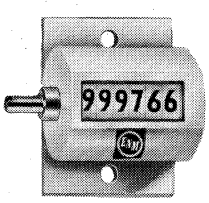


Stock T5B — Economy elapsed time indicator, 5 digit, non-reset, 110 V. 60 hz., scale 9999.9 hours, with tenths in red, mounting in 1.968 dia. hole or 1.781 square panel cutout.
Dimensions: 2.078″ long x 1.891″ wide x 1.891″ high
Price each: $15.00

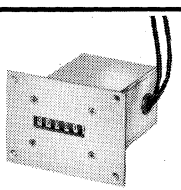


Stock P8C — Economy elapsed time indicator with security lock and key. Key actuates a standard D.P.S.T. switch 25 AMP, 120-250 V. A.C. to start equipment; thus true operating hours are recorded. 5 digit, non-reset, 110 V. 60 hz., scale 9999.9 hours with tenths in red, panel mount.
Dimensions: 1.828″ long x 5.505″ wide x 1.891″ high
Price each: $17.90

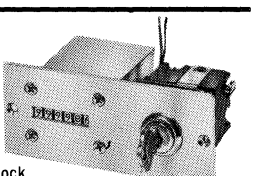
NON-RESET COUNTERS



Stock M21 — Small medium duty 5 digit mechanical revolution counter, 3000 CPM, non-resettable, base mount.
Dimensions: 0.876″ long x 0.938″ wide x 0.432″ high
Price each: $3.64

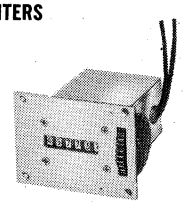


Stock P2A — Panel mount electric counter, 6 digits, 115 V. 60 hz., (U.L. Recognized) 500 CPM, non-resettable.
Dimensions: 2.63″ long.
Price each: $9.45

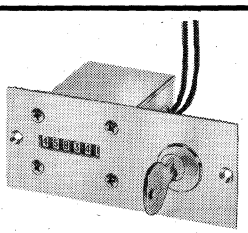


Stock P6A — Panel mount electric counter non-reset with key lock, controlling two electrical circuits, one operating the counter, the other operating the equipment, 6 digit, 500 CPM, 115 V. 60 hz., key switch; D.P.S.T. standard 25 AMP, 120-250 V. A.C.
Dimensions: 2.63″ long x 4.5″ wide x 1.87″ high
Price each: $15.10

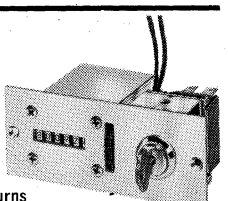
RESET COUNTERS



Stock P3A — Panel mount electric counter, 6 digit, knob reset, 500 CPM, 115 V. 60 hz. (U.L. Recognized)
Dimensions: 2.63″ long x 2.25″ wide x 1.87″ high
Price each: $12.50



Stock P4A — Panel mount electric counter, 6 digit, key reset, 500 CPM, 115 V. 60 hz. (U.L. Recognized)
Dimensions: 2.63″ long x 4.50″ wide x 1.88″ high
Price each: $28.15



Stock P7A — Panel mount electric resettable counter with an exclusive key switch which turns the equipment on or off. Key necessary for manually resetting to zero, 6 digit, 500 CPM, 115 V. 60 hz., switch D.P.S.T. standard 25 AMP, 120-250 V. A.C. (U.L. Recognized)
Dimensions: 2.63″ long x 4.5″ wide x 1.88″ high
Price each: $29.15

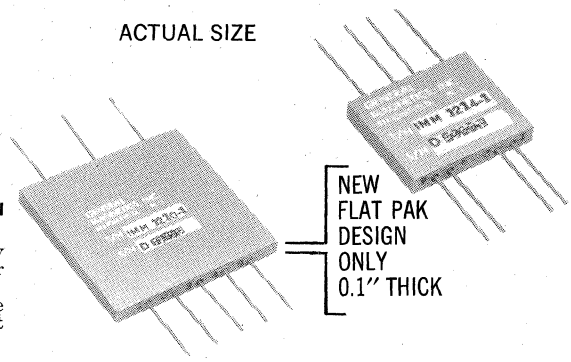
Flat Pak 'Mag Mod' Magnetic Modulators

ACTUAL SIZE



SPACE-SAVING MODULES THAT MEET TODAY'S MINIATURIZATION REQUIREMENTS

The Flat Pak Micro Magnetic Modulators feature an essentially drift free circuit with superior phase and gain slope stability over very wide temperature ranges.
Transformer-like ruggedness and reliability features characterize the dependability of these devices over wide dynamic ranges. Flat Pak Micro "Mag Mods" are shock and vibration proof.
Typical specifications:

TYPE NUMBER	IMM 1199-1	IMM 1210-1	IMM 1211-1	IMM 1212-1	IMM-1213-1	IMM 1214-1	IMM 1216-1

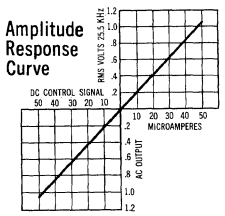
'Mag Mod' Micro-miniature Magnetic Modulators

... Design Analog Computers with Micro Magnetics

General Magnetics



Typical Performance Data — Model 748-3

- **Output distortion as low as 1%**
- **Electrical zero point and gain, repeatability and stability over the entire service life**
- **Extremely broad bandwidth**
- **Carrier frequencies as high as 5 MHz**
- **Input signal current resolution better than 0.001 μa**
- **Low milliwatt power consumption**

Circuit Isolation — DC to AC Sinusoidal Conversion and Amplification

"MAG MODS" PROVIDE FOUR QUADRANT OPERATION, extreme stability with negligible change of phase, gain and zero position over a wide temperature range. Design is simple, featherweight and rugged — with no vacuum tubes, semiconductors or moving parts to limit life.

MICRO MAGNETIC MODULATORS FEATURE an essentially drift-free circuit with superior phase and gain stability over wide environmental ranges. All the ruggedness, dependability, wide dynamic range and stability that are characteristic of the larger magnetic modulators are engineered into this new magnetic circuit. MICRO "MAG MODS" are shock and vibration proof, provide infinite standby and service life. The micro modulators below are typical; for specifications on other models request literature.

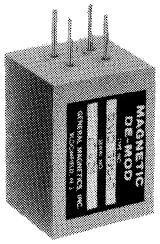
Design Analog Computers with Micro Magnetics..

G/M Solid State Magnetic Demodulators

FREQ. RANGE 60 Hz to 10 KHz

General Magnetics



G/M MAGNETIC DEMODULATORS are solid state circuits for converting phase reversing AC signal voltages into phase detected polarity reversing DC voltages; the amplitude and polarity of the DC output are directly proportional to the phase and amplitude of the AC signal.

- **High reference impedance resulting in very small reference power requirements**
- **Output as high as ±10 v. DC in present units**
- **Unit operation frequencies; 60 Hz to 10 KHz**
- **Operation over wide environmental range**
- **Very low DC offset null voltages (as low as 0.1% of full scale)**
- **Signal and reference terminals may be isolated**
- **Low output impedance**
- **Small physical size**

Micro Magnetic Multipliers

AC x DC MONOLITHIC ANALOG COMPUTING MODULES

..For Unlimited Life and Superior Performance!

General Magnetics

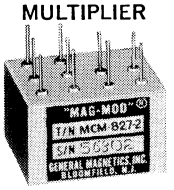
MONOLITHIC MICRO CIRCUIT BLOCK for analog voltage multiplying of DC x AC voltages.

ADDITION, SUBTRACTION, MULTIPLICATION, AND SQUARING of many voltage variables may be handled by one G/M Magnetic Microblock.

PRODUCT ACCURACY of up to 0.2% of full scale, with very slight derating over a wide temperature range.

Proven reliability—unlimited life
Extreme stability with negligible change of product accuracy over a wide temperature range
High shock and vibration proof
Bandwidth may be extended into the kilocycle
Low milliwatt power consumption
Four quadrant operation
Repeatable data over years of continuous unattended operation
Simple, lightweight, rugged
May be mounted directly on printed circuit cards

World's Smallest and Most Reliable G/M ANALOG VOLTAGE MULTIPLIER



New micro-miniature G/M Analog Voltage Multiplier as small as 0.1 cubic inch, weighing as little as 0.1 ounce.

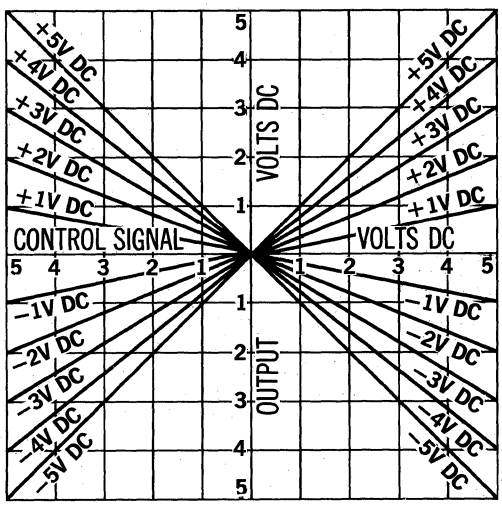
G/M Analog DC x DC Voltage Multiplier

General Magnetics

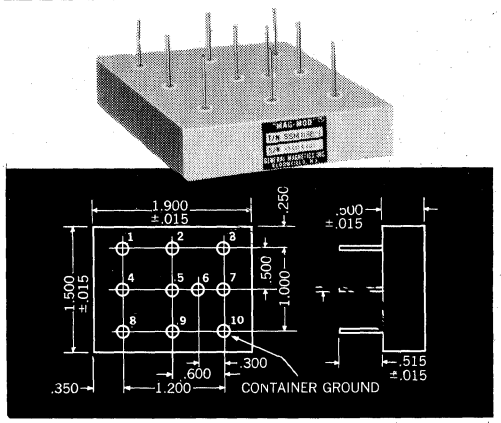
General Magnetics proven-reliable four quadrant multiplying module is particularly applicable for flight systems, analog computers, guided missiles, nuclear equipment, weapon control, etc. It features a product accuracy of at least 0.5% of full scale output amplitude.

Small in size — only 1.5 x 1.9 x .5 inches, Type SSM 1179-1 will provide repeatable data for years of continuous, maintenance-free service life. Simple, lightweight and rugged, this DC voltage multiplier may be mounted directly on printed circuit cards.



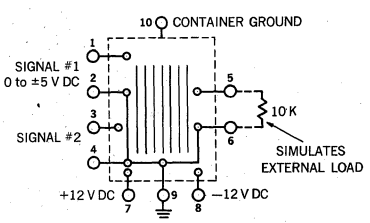
FEATURES:

20 K ohms input resistance, each signal
Four quadrant DC operation
Frequency response 0 to 100 cps
Product accuracy 0.5% or better, of full scale
Operation over a temperature range of −55°C to +100°C
High shock and vibration resistance



TYPICAL SPECIFICATIONS — TYPE SSM 1138-2	
Product Accuracy	*0.5% of full scale
Input Signal #1	0 to ±10 V DC to 100 cps
Input Signal #2	0 to ±10 V DC to 100 cps
Input Resistance	20 K ohms, both signals
Output	0 to 10 V DC ±5% to 10 K ohm load
DC Power Requirements	±15 V DC
Ambient Temperature Range	−55°C to +100°C

*INCLUDES TEMPERATURE DRIFT OVER SPECIFIED RANGE



TERMINALS:

7-9	+15 V DC, 30 MA DC (max.)
8-9	−15 V DC, 30 MA DC (max.)
5-6	OUTPUT, 0 to ±10 V DC ±5%, ACROSS 10 K
1-2	SIGNAL #1: 0 to ±10 V DC RIN = 20 K
3-4	SIGNAL #2: 0 to ±10 V DC RIN = 20 K
10	CONTAINER GROUND ONLY

Notes: Terminals 2, 4, 6 and 9 are common internally

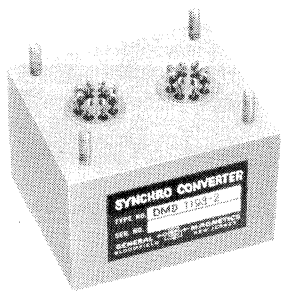
Solid State Sine-Cosine Synchro Converter

General Magnetics



This new encapsulated circuit converts a 3-wire synchro input to a pair of d-c outputs proportional to the sine and cosine of the synchro angle.

- Complete solid state construction.
- Occupies a volume of only 3.2 cu. in. (Single Channel)
- Operates over a wide temperature range.

	TERMINAL	FUNCTION

Typical Specifications
Type DMD 1193-2
Dual Channel Synchro Converter

ACCURACY—Overall conversion accuracy 6 minutes
AMBIENT TEMPERATURE RANGE — Operating, −40°C to +100°C
Storage, −62°C to −125°C
APPLICATIONS — Analog computers
Flight systems
Fire control
Guided missiles

DUAL CHANNEL SYNCHRO CONVERTER
General Magnetics Model DMD 1193-2 provides two (2) completely independent sine-cosine synchro converter circuits in one package. Overall conversion accuracy is six (6) minutes. Temperature range is −40°C to +100°C.

This new General Magnetics circuit converts a 3 wire synchro input to a pair of d-c outputs proportional to the sine and cosine of the synchro angle. The circuit features complete solid state construction, occupies a volume of only 3.2 cubic inches and operates over a wide temperature range. Overall conversion accuracy defined by the tangent of the angle whose sine and cosine are generated is six (6) minutes. Models are available with both single and dual channel outputs.

G/M Solid State Magnetic AC Line Regulators 0.1 REGULATION

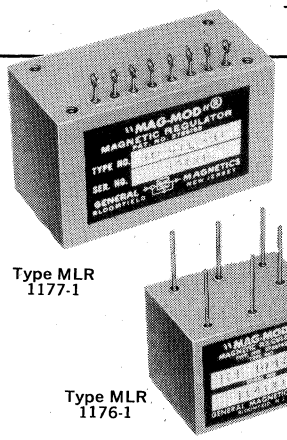
..For Unlimited Life and Superior Performance!

General Magnetics

- 0.1% total line load regulation
- Capable of handling ±10% line frequency variations without loss of regulation
- Output is a low distortion amplitude sinusoidal wave
- Efficient circuit design permits low power consumption
- Small size — lightweight — rugged
- Capability of operating at any center frequency to 50 KHz

AN ENTIRELY NEW TECHNOLOGY is utilized, which completely eliminates resonant tuned AC circuits, no bulky inductors, capacitors or buck-boost transformers are needed to obtain a total AC line load and frequency regulation of 0.1%. The output is a clean sinusoidal wave form containing low harmonic distortion. These G/M line regulators are particularly applicable to flight instruments, and analog and digital computers where an accurate and stable AC reference source is required.

TYPE UNITS



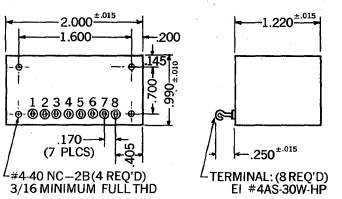
Type MLR 1177-1

Type MLR 1176-1

TYPICAL APPLICATIONS:

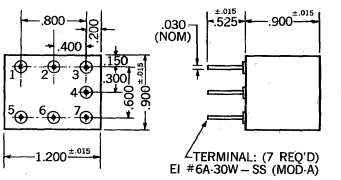
Specifications — Type MLR 1177-1

LINE VOLTAGE:	115 V ±20% 400 Hz ±10%
OUTPUT:	115 V ±1% 400 Hz (includes initial setting accuracy)
LOAD:	5 watts
DISTORTION:	Less than 2%
REGULATION:	±0.2%
D.C. POWER:	±28 V DC



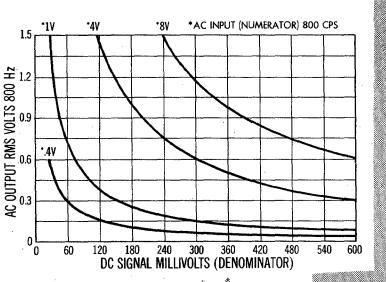
Specifications — Type MLR 1176-1

LINE VOLTAGE:	26 V ±20% 400 Hz ±10%
OUTPUT:	26 V ±1% 400 Hz (includes initial setting accuracy)
LOAD:	1 watt
DISTORTION:	Less than 2%
REGULATION:	±0.1%
D.C. POWER:	±15 V DC



Magnetic Division Modules

These modules can be engineered to meet the most exacting requirements. They employ a new concept which eliminates high gain operational amplifiers and logarithmic circuitry previously used in electronic dividers. This means fewer components resulting in high reliability, excellent stability, micro-miniature size and lower cost. The combination of magnetic and semiconductor circuitry results in analog division with accuracies of 1% or better over wide environmental ranges. The output is an AC sinusoidal signal which is the quotient of an AC numerator and a DC denominator.

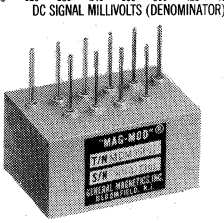


Specifications — Type MDM 889-1*

EXCITATION (NUMERATOR):	0.4 V to 8 V : 800 Hz
BIAS:	+30 V DC
OUTPUT LOAD:	5 K
SIGNAL (DENOMINATOR):	30 MV to 600 MV
AMBIENT TEMPERATURE RANGE:	0°C to +70°C

*Above specifications apply only to MDM 889-1 and may be changed to fit exact requirements

- Micro-miniature Size
- Completely Solid State
- Low Power Consumption
- Wide Numerator and Denominator Ranges
- Isolated Inputs
- Low Output Impedance



These dependable analog computing modules are widely employed in flight systems, fire control, analog computers, guided missiles, nuclear equipment, antennas and thousands of control systems. Micro-circuit, miniature, subminiature, standard and specials are available for proven reliability in linear division, trig function conversion, automatic gain control, etc., applications.

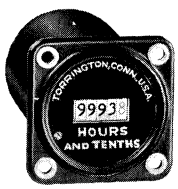
Full line of high quality industrial time count, control devices

ELAPSED TIME INDICATORS

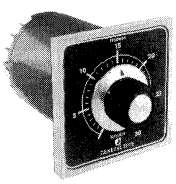
EF **BULLETIN HD-12**
Synchronous motor-driven, panel mounted non-resettable unit registers minutes and tenths, or hours and tenths. 6 digits. 120 or 240 VAC, 50 or 60 Hz. Round bezel 2⅞ diameter, unit depth 1.790" and barrel diameter 2.110".

EN & ER **BULLETIN HD-12**
Dust cover enclosed unit with round or square bezel. These meters read in minutes and tenths or hours and tenths. Can be resettable or non-resettable. Units operate on 120 or 240 VAC, 50 or 60 Hz. Bezel diameter 3½", Rd; 3.0", Sq. Unit depth 3¾", barrel 2²³⁄₃₂" dia.



7010-004 HERMETICALLY SEALED MILITARY TYPE INDICATOR **BULLETIN HD-12**
A very small, lightweight running time meter, hermetically sealed. Meets Mil specification requirements per Mil-M-7793C and Mil-E-5272C. Life tested over 78,000 hours. Readout four digits plus tenths. Temperature range −55°C to +85°C. Round case 1¾" square bezel, 2³⁷⁄₆₄" deep, barrel diameter 1½". 115 volts 400 Hz. Solder terminals. Shipping weight: ¾ lb. Also available as ED 71 Commercial version 60 Hz.

ELECTRONIC

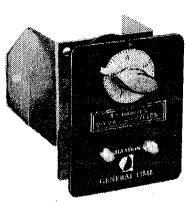


SERIES QT11 SOLID STATE PANEL-MOUNT TIMERS **BULLETIN QT-11**
Rugged, highly accurate. Adjustable time range. Internal load relay. Repeat accuracy ±1% of set value above 1 sec, even with voltage variations of ±10%, temperature variations 0° to 60°C. Maximum reset time .050 seconds. Life expectancy up to 10,000,000 operations, depending on load (1,000,000 operations at rated load). 117 VAC 60 Hz. Screw terminal block. Size: 3⅝" sq. x 4⅛" D, behind panel. Requires 3¼" dia. mounting hole. Shipping weight: 2 lbs.

HAYDON QT21 SOLID STATE REAR MOUNTING TIMERS **BULLETIN QT-21**
Moisture-resistant coated PC board. Knob-adjustable time periods. Rear mounting. SPDT relay 10 amps, 125 VAC resistive. Power input 117 volts, 60 Hz. Repeat accuracy ±2% of set value under constant conditions of temperature and voltage. Power standing on this timer has no damaging effect. Maximum reset time 130 milliseconds. Dial accuracy 10% of full scale. ¼" male spade terminals. Size: 3⅜" x 2⁵⁵⁄₆₄" x 3⅝". Two ³⁄₁₆" x ⅝" slotted mounting holes on 2⅞" centers. Average weight, 1 lb.

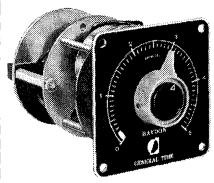
HAYDON QT52 SOLID STATE OCTAL PLUG TIMERS **BULLETIN QT-52**
Basically same specifications as QT21, except has octal plug mounting and DPDT relay. Size: 4⅜" x 3⁹⁄₁₆" x 2⅛".

ELECTRICAL RESET TIMERS

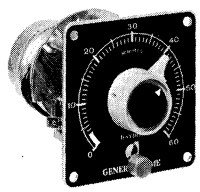


SERIES DA TIME DELAY TIMERS, REAR MOUNTING **BULLETIN HD-12**
Type DA11. Manually adjustable by knob. Apply wherever delay, interval or repeat cycle timing functions are required (repeat cycle requires two units). Resets to start position when power is removed. SPDT switch rated 20 amps. 125 or 250 VAC, resistive; solder lug terminals. Min. setting 0 sec. Repeat accuracy ±¾% of total time range. 5 watt motor. 120 VAC 60 Hz. U/L listed. Size: 3⅜" W x 2¹³⁄₁₆" D x 3⅛" H. Weight: 1½ lbs.
Type DA21. Same as DA11 but with locknut adjustment to eliminate tampering.

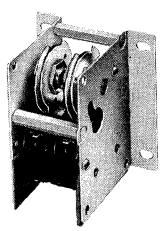
SERIES DP11 PANEL MOUNTING RESET TIMER **BULLETIN HD-12**
Adjustable time range by simple pointer knob. Apply wherever delay, interval or repeat cycle timing are needed. Readout of elapsed time by pointer in center of knob. Unit resets to start position when power is removed. 125 or 250 VAC resistive. Timing motor rated 5 watts max. 120 VAC 60 Hz. Repeat accuracy ±1% of total time range. Screw terminals. Size 3⁵⁄₁₆" sq. x 3³⁄₃₂" D., behind panel; requires 3³⁄₁₆" dia. mounting hole cut.

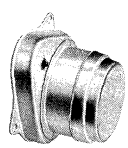


BN41 (INTERVAL) AND BN42 (DELAY) PANEL MOUNT **BULLETIN HD-12**
Dial and setting knob with readout of elapsed time by pointer in center of knob. SPDT relay rated 10 amps at 125 or 250 VAC. Timing motor rated 5 watts max. 120 VAC 60 Hz. Repeat accuracy ±¾ of 1% of total time range. Screw terminal block. Size: 3⅝" sq. x 4⅜" D.; behind panel. Requires 3³⁄₁₆" dia. mounting hole.



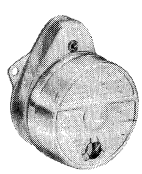
SERIES BJ-12 PUSH-BUTTON INTERVAL TIMER **BULLETIN BJ**
Panel-mount timer. Timing interval is initiated by manually setting knob to selected position and manually depressing the push button. Readout of elapsed time by pointer in center of setting knob. Instant reset to start position automatically. SPDT switch rated 15 amps, 125 or 250 VAC resistive. 120 VAC 60 Hz. Repeat accuracy ±½% of full scale. Combination spade and solder lugs size: 3⅝" Sq x 2²³⁄₃₂" D, behind panel; requires 3³⁄₁₆" dia. mounting hole. Weight: 1½ lbs.



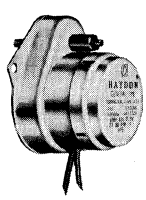


SERIES RE62 REPEAT CYCLE MULTI-CAM TIMERS BULLETIN HD-12
Run continuously, repeating set cycles of multiple switching operations as long as motor is energized. Complete unit requires one motor and one or more switch stacks. Two-switch unit size 2⅝" H x 3³⁄₃₂" W x 3⁹⁄₁₆" D; add 1¹⁄₁₆" to depth for each additional switch.

TIMING MOTORS



MA26 **BULLETIN MA**
The MP26 is a hysteresis type motor designed for timing operations. Power output is 6 oz./in. at 1 RPM 60 Hz. Output shaft speeds are available from 1 rev per month to 60 RPM. 450 RPM without gear-train @ 60 Hz. Output shafts are available in four standard, plus many special configurations in round, flatted, knurled, and with cross-drilled hole. Operating voltage ranges are 24, 120 and 240 VAC. Frictions are available for manual turning of shaft below 15 RPM. MP26 has standard pear shape gear housing and mounting flange. Mounting holes are on 1.875" centers.



MP20 POWER MOTOR **BULLETIN MP-20**
This timing size synchronous AC motor has an output rating of 200 oz./in. @ 1 RPM over the range of 103 to 132 VAC or 206 to 264 VAC at 60 Hz. Guaranteed minimum running life 10,000 hours. Output shaft speeds 1, 2, 3, 4, 5, 6, 10, 15, 20, 30 and 60 RPM. Output shaft available in 2 standard types, long round and long with flat, for other configurations consult factory. Mounting standard pear shape holes on 1⅞" centers. Rotation can be CW or CCW.

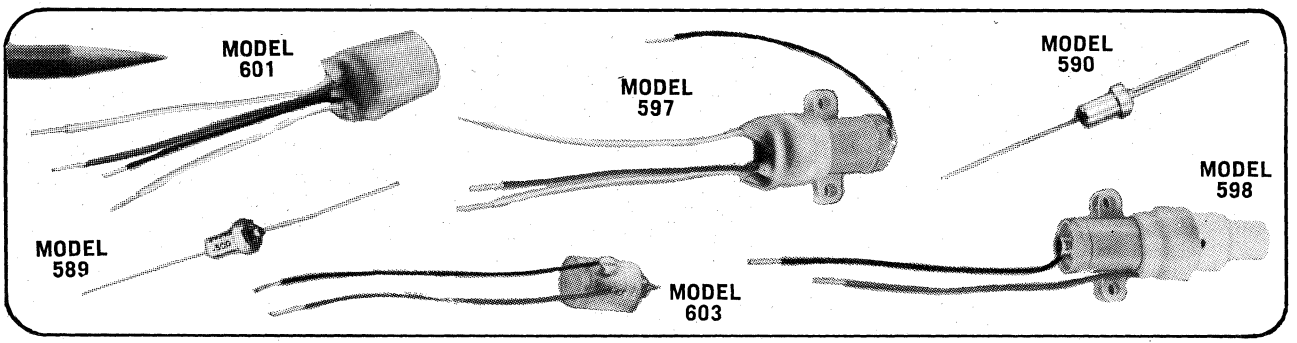
GIBBS TIMING ELECTROLYTIC CELLS



A MAJOR BREAKTHROUGH IN TIMING

Now available from GIBBS — two unique types of Timing Devices called Electrolytic CELLS or COULOMETERS. The timing capability of these units range from thirty seconds to many months. For the first time, the Design Engineer can specify just one type of timing device that is **infinitely variable** to accommodate a truly wide range of timing intervals, and meets all military environmental requirements.

GIBBS Electrolytic CELLS are available in two classifications; **mechanical switching** and **impedance-change switching.** Both classifications are dependent on a simple current/time relationship for their operation, and are specified in terms of "ampere-hour" capacity. The mechanical switching devices mechanically close (or open) switch contacts at the end of the timing period. The impedance change cells exhibit approximately a 10 to 1 change in impedance at the end of the timing period, sufficient to trigger an SCR or Transistor. Input currents range from 5 μA to 2.7 Ma.

GIBBS Electrolytic Cells are ideal for use where a predetermined time action is required. **Applications include:** Signal when maintenance is due; Indicate conclusion of warranty; End-of-life Indicator; Sonobuoy scuttling; Airframe Inspections, Ordnance Safety and Arming; or any timing function ranging from 30 seconds to many months where small size, low cost, ruggedness, accuracy and low current consumption are desirable.

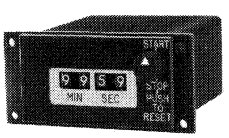
GIBBS Electrolytic CELLS are almost perfect current/time integrators and respond accurately to any input — steady state, pulse, square wave, triangular, etc. Because of this unique integration capability, the designer can successfully work with almost any number of inputs to accurately monitor system operating conditions. SEND FOR FREE DATA AND ENGINEERING APPLICATION NOTES.

SPECIFICATIONS — GIBBS ELECTROLYTIC CELLS

	Model Number	Capacity Microamp. Hours	Time Hours	Accuracy	Size, Inches (body)	Operating Temperature	Application — Operation
IMPEDANCE CHANGE	589-50	50	1-10	±5%	0.310″ dia. x 0.550″	−55°C to +76°C	Cell voltage triggers semiconductor circuit at end of timing period. Impedance-change type. Characteristic Z = 100 ohms before time-out, 50K after.
	589-100	100	2-20	±5%	0.310″ dia. x 0.550″	−55°C to +76°C	
	589-500	500	4-50	±5%	0.310″ dia. x 0.550″	−55°C to +76°C	
	589-1000	1000	8-100	±5%	0.310″ dia. x 0.550″	−55°C to +76°C	
	589-1500	1500	12-150	±5%	0.310″ dia. x 0.550″	−55°C to +76°C	
	589-2500	2500	20-250	±5%	0.310″ dia. x 0.550″	−55°C to +76°C	
	589-2650	2650	100-720	±5%	0.310″ dia. x 0.550″	−23°C to +76°C	
	589-3200	3200	100-800	±5%	0.310″ dia. x 0.550″	−23°C to +76°C	
	590-75-2650	75-Anode #1 2650-Anode #2	1.5-15.0 100-720	±5% ±5%	0.310″ dia. x 0.550″	−23°C to +76°C	Dual anode cell—combines long, short times same unit.
MECHANICAL SWITCHING	597	5350	30 sec.-10 days	±15%	.625″ dia. x 1.50″	−20°C to +38°C	Operates mechanical switch — Close circuit at end of time period.
	598	5350	1-240	±15%	.625″ dia. x 2.25″	−20°C to +38°C	Operates air valve — opens passage at end of time period.
	601	5350	1-240	±10%	.812″ dia. x 1.125″	−40°C to +76°C	Operates mechanical switch — Close circuit at end of time period.
	603	5350	1-240	±10%	.812″ dia. x .812″	−40°C to +76°C	Operates stab detonator.

GIBBS ULTRA-HIGH RELIABILITY DIGITAL COUNTERS

- TESTED BEYOND 100 MILLION OPERATIONS
- DIGITAL READOUT
- INSTANTANEOUS RESET
- HIGH SPEED INPUT
- ULTRA-HIGH RELIABILITY



This counter has been tested to over 100 million operations: Operating from pulse rates to 10 pps or more, its unique design features insure extremely long life, and guarantee rapid, ultra reliable reset operation. It may be preset to any given digit and reset by front panel actuation or remote electrical control. Easily adaptable to other numbering systems as well as base ten, time-of-day readout such as 23:59 is readily provided. Four and six digit models are standard — others are available on special order. Write for additional information.

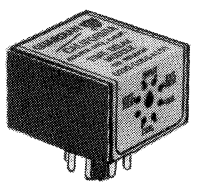
UNIVERSAL TIMING MODULES

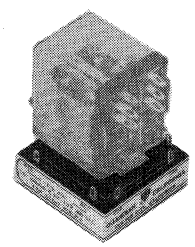


SERIES TMP

Series TMP Time Delay Modules are available in "on-operate" and "on-release" configurations with two time delay and three standard input voltage ranges. The time is externally adjustable within the two ranges from ½ to 100 seconds and 100 to 300 seconds. Repeatability is ±1 percent under normal conditions. Life expectancy is in excess of one-million cycles. Standard input voltages are 24VAC, 115VAC and 24VDC. Other ranges are available as options. The unit is terminated in an octal plug for quick mounting and remote control of relays.

SERIES TMT

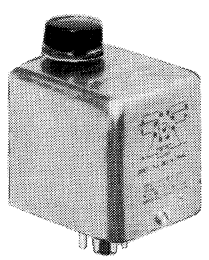
Series TMT Time Delay Modules are designed to permit a relay to be mounted directly onto the module or to permit stacking of TD modules for extended time delay periods. The unit can also be soldered directly to a printed circuit board if desired. Modules provides "on-operate" or "on-release" operation at input voltages of 24VAC, 115VAC and 24VDC. Other input voltages are available as an option. The time delay is externally adjustable within ranges of ½ to 100 seconds and 100 to 300 seconds. Repeatability is ±1 percent under normal conditions. Life expectancy is in excess of one million cycles.

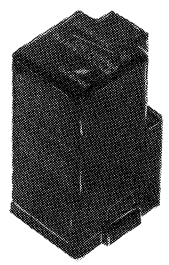


TIME DELAY RELAYS

SERIES TDO

Although it incorporates many features of more expensive units, California Guardian's Series TDO is the most economical 115VRMS solid-state time-delay on the market. Time delay is adjustable from 0.5 to 30 seconds and is controlled by a ten-turn potentiometer. The multi-turn potentiometer provides high resolution, easy reset and accuracy. Series TDO time delays are built to U/L standards. The unit terminates in a standard octal plug for easy mounting. It is accurate within 10 percent of a nominal setting over it's entire temperature range.

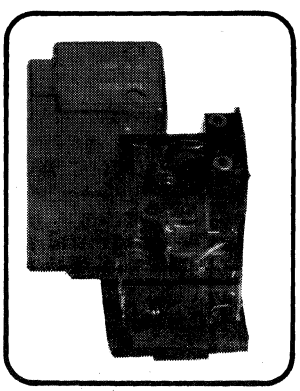




SERIES TD

Similar to high-priced military units, the lower-cost series TD is the most accurate and compact time-delay relay available from stock. Six models for 24VDC to 115VRMS provide delays from 0.5 to 180 seconds. Silicon semi-conductors and tantalum capacitors are utilized for reliability. A 15-turn screw-type potentiometer provides high resolution and accuracy. Recessed screw prevents inadvertent changing of time delay setting. Accuracy is 5 percent of nominal setting over it's complete temperature and voltage range. Repeatability is 2 percent after a line interruption of 50 milliseconds. DC units are polarity protected.

CONTROLLED SENSORS

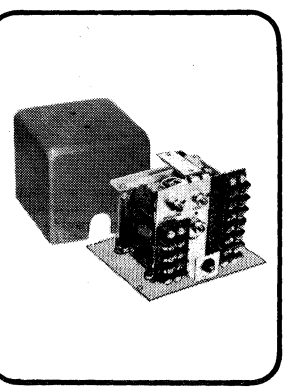


California Guardian's line of solid state controlled sensors and protective devices is the broadest available. Designed for the instrumentation and power equipment industries, sensors are available for 3-phase average sensing; over-voltage sensing; close differential voltage sensing; phase rotation sensing; and over-frequency and under-frequency sensing. Sensors are non-latching, may be interwired with a latching relay, or wired for self latching and pushbutton start and reset. The unit can be socket mounted or chassis mounted and wired with quick disconnect or soldered connections. Voltage and frequency sensors are transient protected.

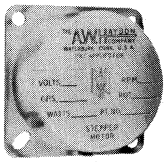
SPECIAL ASSEMBLIES

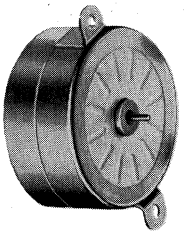
California Guardian will design any type of special sensor or control assembly. In most cases, circuitry has already been designed which eliminates engineering costs. For your special circuits, contact California Guardian. Our engineering department will give your requirements immediate attention.

The unit shown is an undervoltage sensing relay alarm designed for power utility use.



THE AWH AYDON COMPANY TIMING & CONTROL DEVICES



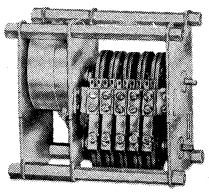


STEPPER MOTORS

A wide range of stepper motors, operating from simple pulse control circuits or electronic logic circuits. Miniature, high-torque, general duty, MIL-SPEC, industrial and commercial models -- unidirectional or bi-directional. Over 150 gear reductions available.

These steppers respond in discrete shaft angle increments to pulsed inputs. Some of their uses are driving counters, positioning synchros, pots, or rotary devices; driving cams, actuators, drums, or charts. They can be used for integrating, timing, data transfer, count or position memory, and for digital/analog conversion.

Low-cost, efficient units are available from The A. W. Haydon Co. to fit your application.

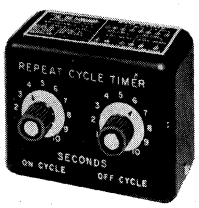


REPEAT CYCLE TIMERS

Both electromechanical and electronic low-cost industrial types handle up to 25 amp load. Standard motor-driven timers have up to 12 switches, cycle times from one second to five days. Sub-miniature units afford small size and lightweight plus ability to meet MIL spec environmentals.

Electronic timers feature versatility and fast timing capabilities for both industrial and military use. Typical industrial unit shown has solid state circuitry and has adjustable "on-off" times, which can be varied from 0.5 to 100 seconds independently. Fixed cycle time units capable of handling 100 amp loads can be supplied.

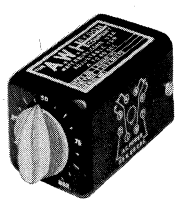
All repeat cycle timers available in AC and DC. The A. W. Haydon Co. welcomes special problems.



ELAPSED TIME INDICATORS

The A. W. Haydon Co. offers a complete line of elapsed time indicators for both industrial and military applications. These units dependably record the operating time of any mechanism. The industrial indicator shown measures only 37/64" square X 1 1/4" long and is available with a front or side readout.

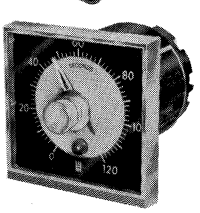
Also — miniature, subminiature, and microminiature military type units. Hermetically sealed, reset and non-reset types, available in 50, 60, or 400 Hz AC models and governed or ungoverned DC versions.



TIME DELAY RELAYS

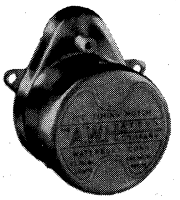
A broad line of electromechanical and electronic timers for industrial and military applications. Available in AC and DC, fixed or adjustable delay times. Motor-driven units are ideally suited for multi-switch requirements where fixed delay times between a number of circuits are required. Progress-indicating type (shown) has convenient knob adjustment, time remaining indicator, and easily read dial.

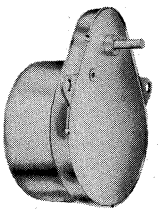
Solid state timing assemblies consist of an RC delay with a bridge-type pick-off network built into a high density welded module. Where size, weight, extreme environmental conditions, or very short delay times are required, these electronic units are particularly appropriate.



TIMING AND DRIVE MOTORS

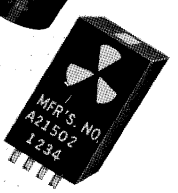
The A. W. Haydon Co. offers fifty three series of standard and special motors with a wide range of gear reductions. Quiet, self-starting, reversible, synchronous AC motors; all standard frequencies from 25 to 400 Hz. DC motors offer high starting torque, speed adjustable with voltage, easy reversibility, low power consumption. Hollow rotor design eliminates iron and prevents cogging, providing smooth, low-voltage starts and more constant speed under load variations. Chronometrically governed DC motors maintain constant speed from no load to full load, with voltage variations as great as ± 20%.





"BITE" INDICATORS

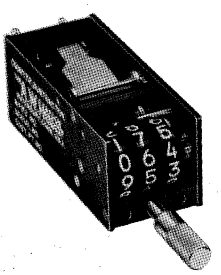
Microminiature BITE (Built-In-Test Equipment) indicators continuously monitor electrical or electronic circuits and give a visual warning of faulty performance. Even transient failures are indicated and are retained by means of magnetic latching until a reset signal is applied. These indicators elminate the need for special test instruments, trouble-shooting time, and highly trained personnel. They respond to a pulse width of 15 milliseconds and use power only to transfer the visual signal from "normal" to "malfunction". Round or rectangular models. All meet MIL-E-5400H (ASG) Class 1-A Equipment.



COUNTERS

Mechanical and electrical counters for OEM and military applications. Mechanical counters are available in various sizes and with any number of drums required. They are all of external pinion design, allowing high speed operation. They are highly accurate and have a long service life without maintenance or lubrication.

All mechanical counters can be furnished with suitable engines for electrically powered applications. Solenoids, timing motors, and stepper motors can be used, either unidirectional or bi-directional. Options: electric or manual preset or reset; internal switching; type of enclosure, including hermetically sealed; various mounting configurations; operating voltage and frequency. Also available are microminiature counters for military/aerospace applications.



TIME CODE GENERATORS

Electronic and electromechanical time code generators for aircraft, missile, ground support, and industrial applications. Typical electronic system shown provides illuminated visual readout plus modified IRIG, PARSET, and HUACHUCA codes. Other units manufactured by The A. W. Haydon Co. include Time of Year Generator, Elapsed Time Generator, etc. Accuracies up to 1 part in 10^8 are possible.

Electromechanical units use a synchronous motor-driven switch for a time base, and supply straight decimal or binary coded decimal switch patterns, rapidly stepped to provide digital time inputs to data handling equipment. Visual readout counter display. Readings from seconds to 369 days.

Other Time Code Generators to your specifications.

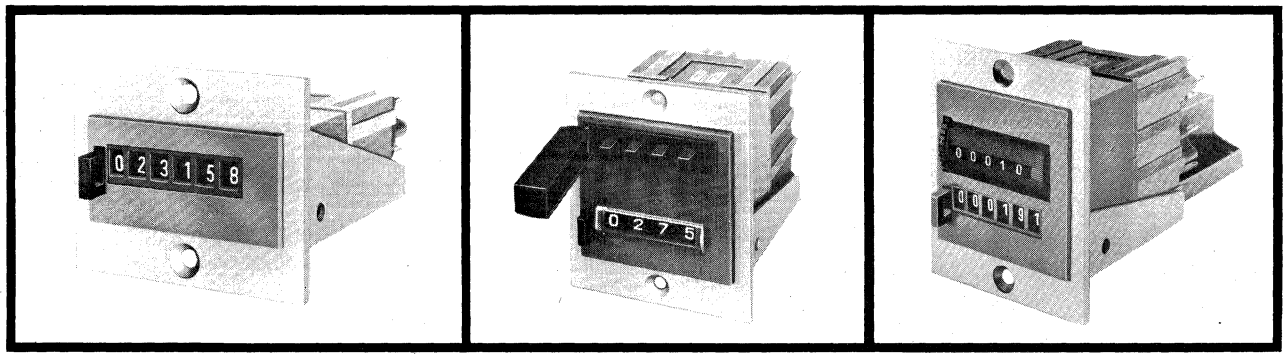
HECON QUALITY COUNTS

A Complete Line of High Performance Electro-Magnetic Counters

Hecon counters do more than count. They are highly reliable control devices that exercise control by counting.

Our exclusive building block design permits many system variations and applications. Used as an individual control instrument, or as part of a control system, Hecon counters can solve your control problems.

For reliable, low cost digital control systems, only Hecon offers a complete line of high performance electro-magnetic counters featuring closed loop design.



F 043 TOTALIZING COUNTER

Modular 6 digit plug-in unit, with either manual or electrical reset—speeds up to 60 counts per second—life in excess of 200 million operations.

FE 043 SUBTRACTING PREDETERMINING COUNTER

Modular 4 digit plug-in counter features easy push button preset and optional presignal. Available with manual/electric reset and automatic recycling. Speeds up to 40 CPS—life in excess of 200 million operations.

FA 043 PREDETERMINING COUNTER

Modular 6 digit plug-in unit, with manual, electrical or automatic reset, for speeds up to 35 counts per second—life in excess of 200 million operations.

HECON

Better by Design

Hecon engineers can help you solve your counting and control problems with Hecon high performance counters—reliably and economically. Write or call today for full information on these and other Hecon counters.

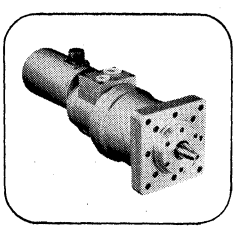
Automatic motion control in manufacturing, assembly & packaging? in production machinery & machine tools? in electronics & data processing? in research and development? welding? graphic arts & printing? or instrumentation?

ICON: your complete, ready source for direct digital positioning!

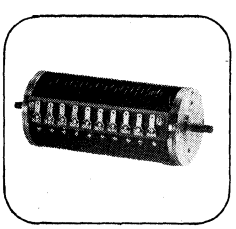
ICON automatic systems, subsystems and modules and know-how in stepping motor technology can help you automate your plant and products simply and economically!

ICON AUTOMATIC MOTION CONTROL SYSTEMS INCLUDE



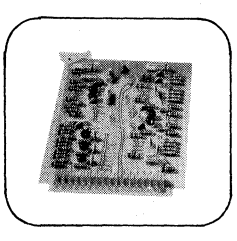
ELECTROHYDRAULIC PULSE MOTORS

. . . a complete line of high power motors built by Fujitsu, Ltd., for direct digital positioning in heavy applications such as machine tools, textile and printing machinery, welders, typesetters, automated production machinery, etc. Torque output exceeds 500 in-lbs. at 2000 steps per second. Power ranges from .8 to 6 HP at 8000 steps per second.



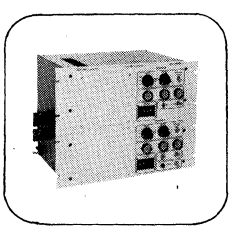
HIGH SPEED ELECTRIC STEPPER MOTORS

. . . variable reluctance steppers that are the fastest, most advanced digital actuators in America, today. Available in a wide range of torques with error-free response rates of 2000 pps, and running speeds in excess of 10,000 pps.



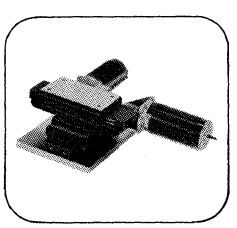
DIGITAL SYSTEM POSITIONING MODULES

. . . for the engineer who wants to design and package his own positioning control system. A full line of solid-state driver modules for most stepping motors, plus general purpose system logic modules using NAND logic.



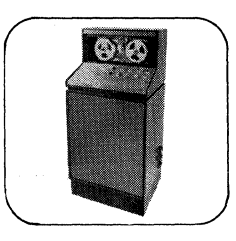
MULTI-AXIS STEPPER PROGRAMMERS & DRIVE UNITS

. . . Icon Series 400 positioning systems emphasize high motor performance and input flexibility. Able to drive up to 6 independent steppers of any type. Accept inputs ranging from switch closure to computer. Readily interface with other system elements.



NUMERICALLY-CONTROLLED X-Y TABLES

. . . two complete lines of X-Y tables covering the motion range from 2" x 2" through 12" x 12". Speeds in excess of 2 ips, resolution of .001 inch. Ideal for automation of production, assembly and test. Many control options available.



HIGH SPEED NUMERICAL CONTROL SYSTEMS

. . . with extremely reliable I.C. logic, very flexible program structure. Advanced, low-cost control for a wide range of automatic 2 or 3 axis point-to-point positioning applications. Open-loop, all-digital design for simple application, operation, service.

COUNTER—TIMERS

itron

ITRON COUNTER-TIMERS provide maximum performance and versatility for general-purpose time or frequency measurements up to 20 MHz. Their low costs are the result of large-scale production economies and the use of medium-scale integrated circuits rather than performance limitations. All of the performance and functions you expect from a general-purpose counter-timer are included. The Series 600 Counter-Timers each contain an operating/specifications brochure in a pocket built into the instrument to insure maximum benefit of the versatile design. Performance advancements include automatic sensitivity, syncrostart, extended range and an isolated input option. ITRON instruments are designed to be reliable through the use of quality components and maintainable through quick-access cases. A calibration record is kept within the instrument for immediate referral.

SERIES 600

COUNTER TIMERS—GENERAL PURPOSE, VERSATILE, LOW COST

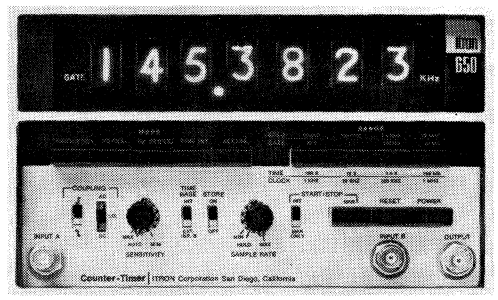
Functions: Frequency, Period, Multiple Periods, Time Interval, Cumulative Time Interval, Ratio, Multiple Ratio, Scale, Totalize, Cumulative Totalize, Generate, Stopwatch.
Range: DC to 20 MHz.
Digits: 5 and 6, + Extended Range.
Sensitivity: To 50 mVrms. Some are automatic.
Input Channels: Dual and single channels available.
Time Base: Crystal reference, 3 x 10^{-5} to 3 x 10^{-7}.
Size: Half rack.
Configuration: Portable or rack mount.
Options: Isolated inputs, BCD outputs, programming.

SPECIAL

COUNTERS AND TIMERS — SPECIAL PURPOSE, OEM

Functions: Frequency, Deviation, Bi-Directional, Multi-Channel, Variable Time Base, Preset.
Range: DC to 40 MHz.
Packaging: Custom.

COUNTER—TIMERS



From $500.

ITRON DIGITAL FREQUENCY METERS are specifically designed to measure low frequencies direct, with no calculations. A signal frequency such as 60 Hz is displayed as 60.000 with continuous resolution. Tracking logic is employed to eliminate long gate times and reset-recount interruptions. An analog output proportionate to segments of the signal frequency is available for continuous recording. Other performance advancements include automatic sensitivity and automatic ranging.

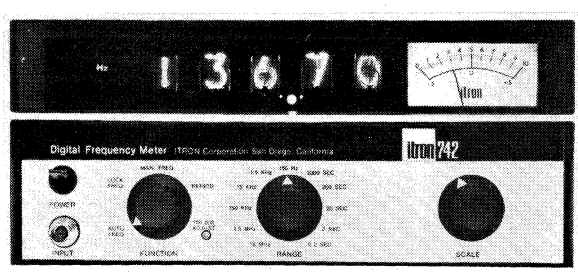
SERIES 740

DIGITAL

FREQUENCY METERS—HIGH RESOLUTION, LOW FREQUENCY

Functions: Frequency, Period, RPM.
Resolution: 0.001% Full Scale (1 x 10^{-3} Hz basic).
Range: 5 Hz to 15 MHz.
Ranges Full Scale: 150.000 Hz, 1500.00 Hz, 15.0000 kHz, 150.000 kHz, 1.50000 MHz, 15.0000 MHz.
Ranging: Automatic.
Accuracy: ±0.003% Full Scale.
Sensitivity: 50 mVrms automatic.
Logic: Continuous tracking.
Analog Output: Buffered 0-100 mV proportionate.
Size: Three-quarter rack.
Configuration: Portable or rack mount.
Options: BCD outputs.

DIGITAL FREQUENCY METERS



From $1,500.

SPEED-INDEPENDENT MAGNETIC PICK-UP

The B-12S Magnetic Pick-up is the first of a family of devices from ISC/Magnetics with output voltage amplitudes that are independent of the rate of change to the external magnetic field. This characteristic and its relatively low output impedance result in a device ideally suited for use with transistor circuitry of the type often found in flow control and computer peripheral equipments for *Static* as well as Dynamic sensing.

Typical output using a 20 pitch ferrous gear at a sensing distance of 0.020 inches is 1V peak to peak at an ouput impedance of 500 ohms.

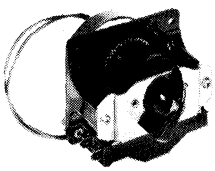
MALLORY INDUSTRIAL TIMERS

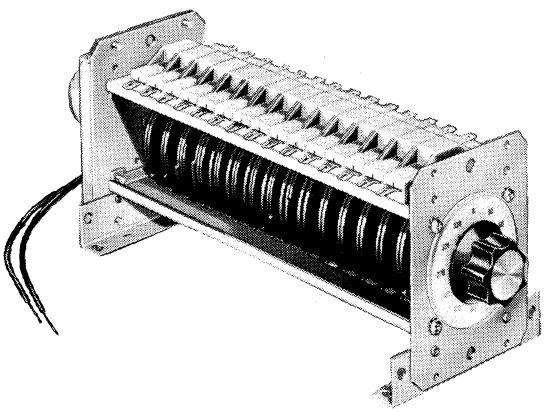
Series MIT



Miniature Industrial Sequence Programmers

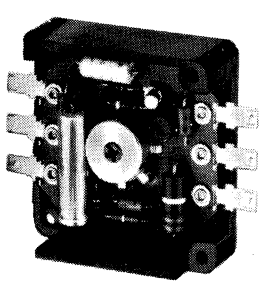
This small-size timer does big-size jobs. Measures only 2⅜" x 2⅞" x 2¾" including the motor. Comes with one or two cams, either adjustable or fixed. Select a cycle, from seconds to hours, change it with a simple manual adjustment. Designed for industrial service as interval or cycle timer.

Series IT



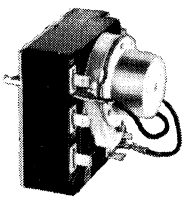
Multi-cam Industrial Sequence Programmer

Simple, quick, convenient. That's what it's like to change the cycle of this Mallory adjustable cam industrial timer. All you do is pull the spring-loaded cams apart, reposition to the cycle you want, let go... and you new cycle is locked in place. Changes as small as two degrees give flexibility to any automated product. The basic timer design comes in units of 5, 10 or 15 cams with virtually any time cycle and circuitry you need. Enclosed snap-action switches, tested for 1 million cycles, are rated 15 amps, 125 VAC.



Electronic assemblies— complete engineering and production facilities for design and manufacturing of special components.

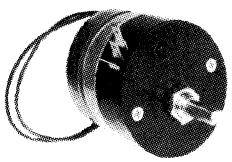
Series SD



Compact - Heavy Duty Timers

Switches four 25-amp circuits and a 10-amp circuit. The 3" x 3" x 1" size lets it fit behind a panel or inside a console. Designed for long-life, heavy-current applications such as dryers, furnaces, copying machines, battery chargers. Comes in a wide variety of time cycles and physical configurations.

Series LRT



Interval Timer

A compact, versatile hand-set electric timer. Heavy duty, 15 amp, rated switches provide a wide variety of switching functions. A neutral, or "center-off" switch position is available, as is a double upper ("make-make") configuration.

Setting the desired interval may be done by turning the shaft in either direction... even during a timing cycle. Many standard cams along with the wide range selection allow the LRT to meet most OEM dial layout specifications easily, without tooling.

"Hold" feature is available, allowing a non-timed setting during which the load under control is "on".

Applications include: hair dryers, heat lamps, blenders, battery chargers, food warmers, conveyor feeds, barn heaters, therapy machines, sterilizers and many others.

SPECIFICATIONS

OVERALL DIMENSIONS
2" dia. x 1¾"

AVAILABLE SWITCHING
SPST, SPDT, SPDT with neutral or double make positions (see other side)

SWITCH RATING
15 amp, 125/250 VAC
½ HP, 125/250 VAC

MOUNTING
Threaded bushing

TIMING MOTOR
Permanent magnet, 120 VAC, 60 Hz (standard)
24 to 240 VAC available — also 50 Hz

SHAFT ROTATION
Counter clockwise (standard), clockwise on request

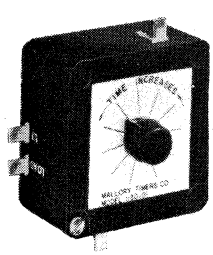
TERMINALS
¾" flag on one lead, other stripped (standard)

TIME CYCLES AVAILABLE

SECONDS	30	40	48	60	72	90	96						
MINUTES	2	2.5	3	4	5	6	8	20	30	40	45	50	60
HOURS	2	2.5	3	4	5	6	8						

More than 100 other speeds, not listed above, are available.

Series BST



Solid State Timer

All solid state reset interval timer. No moving parts. High repeat accuracy over a wide range of temperature and voltage. Rugged housing permits easy mounting and connections. Timer and power output circuits protected against transient surges, noise. Ranges to five minutes.

Standard Mallory components are available from authorized Mallory distributors throughout the United States.

Alarm, Control, Measurement Modules

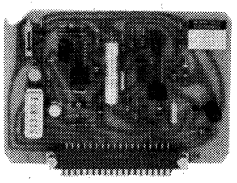

Fig. 1

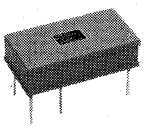

Fig. 2

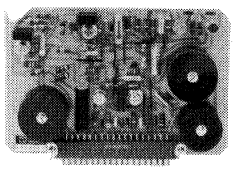

Fig. 3

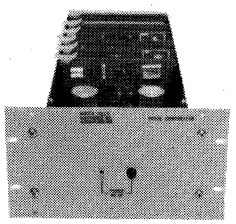

Fig. 4

ALARM DEVICES

LK-1 Ac Amplitude Alarm — Provides relay closure when input signal level exceeds preset value. Threshold level 20 - 100mV., 2 to 5000 Hz. Figure 1, 4″ x 6″ p.c. card.

PK-1 Phase Sequence Alarm — Furnishes energizing signal for external relay when phase relationship is correct in 2-phase 90° systems. 800 to 1200 Hz range. Other frequency ranges to order. Figure 2.

SK-1 Frequency Alarm and Relay — Provides relay closure when signal frequency corresponds to preset value anywhere in 10 Hz to 10 kHz range. 4″ x 6″ p.c. card.

TK-1 Temperature Alarm — Furnishes energizing signal for external relay when temperature is between two preset limits.

CONTROL DEVICES

DS Phase Shifter — Dc signal or resistance value determines phase shift at fixed frequency.

MF Ac Modulator-Filter — Furnishes low distortion signal at amplitude determined by dc control voltage. Fixed frequency in 60 Hz to 10 kHz range.

TC Temperature Controller — Close tolerance control with digitally set or fixed control temperature.

CONVERTERS – DC TO PARAMETER

DF 3101 Voltage to Frequency Converter — Furnishes output pulses at a repetition rate proportional to dc input level. Scale factor is 1 kHz/V from 0 - 10 V dc. Linearity better than ±2 Hz. Figure 2.

DS Dc to Phase — See DS under Control Devices.

MF Dc to Ac Amplitude — See MF under Control Devices.

SIGNAL SOURCES DC
High stability, line isolated

RS-10 Dc Voltage Reference Source — Output 10 V dc, 0 - 10 mA, 0.01% stability for input of 105 - 125 V rms, 55 - 500 Hz. 4″ x 6″ p.c. card.

VS-510 Programmable Dc Voltage Source — Output 0 - 35 V dc, 0 - 100 mA programmed by external resistor. Four-terminal sensing, short-circuit protected. 4″ x 6″ p.c. card.

SIGNAL SOURCES AC

VS-410 In-Phase Reference Source — Output 10 V rms ±0.1% at 0° or 180° with respect to input 26 V rms ±20%, 350 - 5000 Hz. Figure 3.

VS-420 Quadrature Reference Source — Same as VS-410 except + or −90°. Figure 3.

VS-430 Ac Voltage Programmable Source — Multiple preset, relay-selected, programmable output levels at 0° to 180° with respect to 10 V ±0.1% input, 350 - 5000 Hz.

VS-440 Ac Voltage and Phase Programmable Source — Multiple outputs preset, relay-selected programmable levels and phase angles between 0° and 360° with respect to 10 V ±0.1% input, 350 - 5000 Hz.

VS-450 Ac Continuously Programmable Voltage Source — Output adjustable 0 - 32 V rms by means of external potentiometer at 0° or 180° with respect to input of 26 V rms ±20%, 350 - 2000 Hz.

CONVERTERS – PARAMETER TO DC

FD-1 Frequency to Dc Converter — Has dc output proportional to frequency input over 0-10 kHz range. Linearity 0.1%.

PM-2 Phase Computer — Supplies dc output proportional to phase difference. Consists of 2 zero-crossing detectors and 1 phase comparator (described below), power supply and interconnctions. 5 cards with mounting. Figure 4.

PR-7 Ac to Dc Converter — Precision operational rectifier accepts inputs from 60 Hz to 10 kHz and furnishes dc output proportional to input. Linearity 0.1% Figure 2.

TV-2 Pulse Phase Comparator — Supplies dc voltage proportional to phase difference between 2 square waves. Scale factor to 0.1 V/° over 0° - 360° range. 4″ x 6″ p.c. card.

XD-3 Zero Crossing Detector — Supplies positive-going pulses at positive-going zero crossings of input waveform. For wide-band applications over input range from 1 - 125 V rms. 4″ x 6″ p.c. card.

XD-4 — Same as XD-3 but works down to 100 μV input level. 4″ x 6″ p.c. card.

If standard units do not meet your requirements, please send us your specifications indicating quantity for quotation.

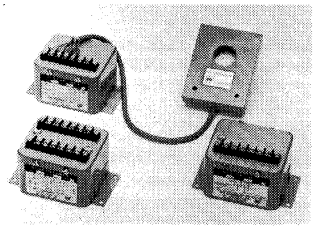
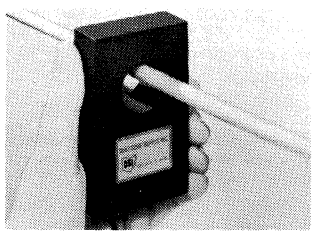
Precision Devices and Equipment for Current and Power Measurement

HALLTRON POWER COMPUTER



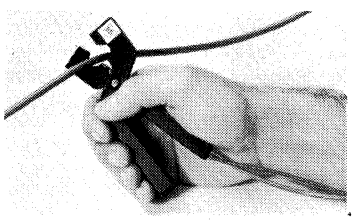
HALLTRON POWER COMPUTERS OR WATT TRANSDUCERS

The Halltron Power Computer provides a d.c. output signal proportional to the true power consumed by the load. Single and three phase units have fast response needed for sinusoidal or chopped waveforms and have an output which is electrically isolated from supply lines.



HALLTRON D.C. TO KILOHERTZ CURRENT TRANSDUCERS

Units with 100, 200, 400, 600, 1000 and 2000 ampere ratings, having d.c. to 5 Kilohertz response, an output of 50 millivolts, 1% linearity, and temperature effects less than 1% are stock items.
Other units can be supplied for special requirements such as 8000 ampere split-core units with associated power supply-amplifier to provide 0 to 10 Volt output.

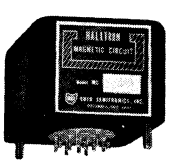


WIDEBAND HALLTRON CLAMP-ON CURRENT TRANSDUCERS

These new unique wide-band clamp-on current transducers provide an output signal proportional to enclosed current in the d.c. to megahertz range. The less than 1 microsecond rise time makes these units ideally suited for motor testing, inverter testing, power supply monitoring, automotive applications or other areas where interruption of high current lines is undesirable.

HALLTRON TRUE PRODUCT MULTIPLIER

O.S.I.'s Halltron, true-product multipliers provide an electrical output which is the product of two input currents which may be ± d.c. or time-dependent. High linearity and low-noise properties insure optimum performance in critical circuit applications. All units are supplied in hermetically sealed packages with, in most cases, dual magnetic inputs so that series or parallel operation can be obtained to satisfy various input requirements.



MODEL	INPUT 1	INPUT 2	OUTPUT MILLIVOLTS
MC-101	25/50 ma.	250 ma.	250
MC-103	250/500 ma.	250 ma.	250
MC-105	1.25/2.5 A.	250 ma.	250
MC-107	7.0 A.	250 ma.	250

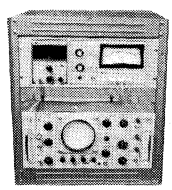
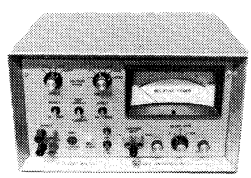
PC-K2	1ϕ 2 Wire	240	1000	50 @ 200KW
PC-2K2	1ϕ 2 Wire	240	2000	50 @ 400KW

Special units, for higher currents or higher voltages than listed in stock models, can be supplied for control applications.



WIDEBAND POWER MONITORING EQUIPMENT

The 4000 Series Power Monitoring Equipment is designed for industrial power monitoring applications in resistance welding, electrical discharge machines and other areas where high energy short duration pulses are used.



WIDE-BAND PULSE WATT METER

The 5000 Series wideband wattmeters provide the unique capability of measuring sub-microsecond pulse energies involved in switching transistors, silicon-controlled rectifiers, triacs, etc. Typical 30 nanoseconds rise-time and d.c. response permit detailed study of turn-on and turn-off and storage properties of solid state devices.

AMPERE-HOUR MONITORING EQUIPMENT

The A-H Series units provide bidirectional registration of charge and discharge in d.c. applications, thereby accurately indicating electrical energy consumed. 1% accuracy is maintained to current levels of 10,000 amperes.

TRUE PRODUCT WIDEBAND MODULATOR

The MC-500 true product modulators exhibit high linearity as indicated by over 60 db suppression of higher order product terms in double sideband suppressed-carrier operation without filtering. Carrier suppression in excess of 60 db is maintained to frequencies in excess of 200 Kilohertz.

ELECTROCHEMICAL PLATING CURRENT DENSITY METER

The CT-306 Plating Current density meter is designed to measure plating current in an electrochemical bath. This instrument is especially useful in starting up a plating bath and in quality control measurements to insure uniform plating of products. The CT-306 features a toroidal probe which can be placed in the plating bath to measure full scale current densities of 0.3 or 1.0 ampere per square inch. An accuracy of 3% of full scale or better is provided.

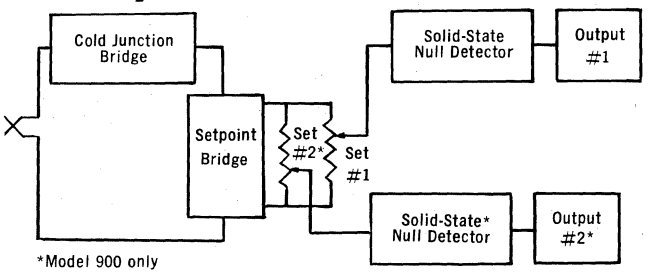
TEMPERATURE ALARMS and CONTROLLERS

ultraLARM™



*Model 900 only

SPECIFICATIONS

THERMOCOUPLE INPUTS AND RANGES (Standard):

Type J—Iron/Constantan
0 to 300°F, 0 to 900°F, 0 to 1200°F, 0 to 1600°F

Type K—Chromel/Alumel
0 to 1000°F, 0 to 2000°F

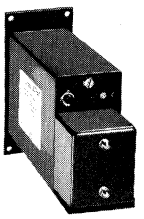
Type T—Copper/Constantan
0 to 300°F, 0 to 600°F

Other ranges and TC types available as options, also range cards for field changes.

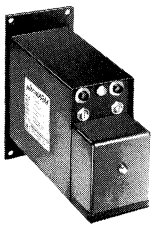
SENSITIVITY:	Less than 30 microvolts (approx. 1°F with iron-constantan T/C)
MV RANGES:	0 to +5 or 0 to +10 millivolts
REPEATABILITY:	To ±2F°
INPUT IMPEDANCE:	250,000 ohms min. at null; 100,000 ohms min. off null
FAILSAFE:	Upscale and also loss of power, standard; Downscale failsafe optional
OUTPUT:	SPDT rated 10 A, 120 VAC resistive load. Pushbutton reset with latching alarm optional

OVER-TEMPERATURE ALARMS

Solid-state, reliable protection against over-temperature/power failure



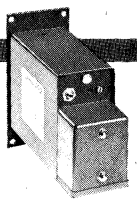
Model 500
Single-Setpoint Over-Temperature Alarm



Model 900
Dual-Setpoint Over/ Under-Temperature Alarm

DEADBAND:	1% nominal of full scale (900°F) factory preset; field-modifiable
OPERATIONAL AMBIENT:	0-150°F
AMBIENT TEMPERATURE EFFECT:	Less than ±0.02%/°F when used within ambient temperature extremes
OPERATE VOLTAGE AND POWER:	100-130 VAC; 50/60 Hz; less than 4 watts 240 VAC, 50/60 Hz operation optional
LINE VOLTAGE EFFECTS:	Less than 0.2% when Alarm operates within 100 to 130 VAC
SETPOINT ADJUSTMENT:	Infinite-resolution single-turn potentiometer standard; ten-turn potentiometer optional
ENCLOSURE:	Heavy-gauge steel with conduit mount provides two holes for ½-inch thinwall conduit. Designed for class 1, group D, division 2 installation. Hermetically sealed relay optional.
DIMENSIONS:	
BODY:	6.56″ H x 3.00″ W x 8.25″ D
PANEL CUTOUT:	5.00″ H x 2.75″ W
MOUNTING:	Rack, panel, or surface

ultraLARM™



PROPORTIONAL CONTROLLER

Solid-state, ultra-sensitive, time-proportioning temperature controller

MODEL 600

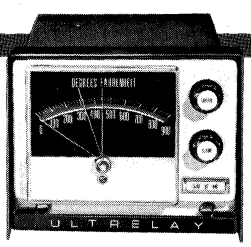
The ultraLARM proportional controller is extremely sensitive (to ¼°F) and maintains process temperatures accurately. The Model 600 switches power to the load and within a proportional band automatically regulates the ratio of ON to OFF as required.
A cycle rate adjustment is provided to permit matching the ultraLARM proportional controller to the thermal requirements of the process. Thermocouple cold-junction compensation is provided.

SPECIFICATIONS

All specifications and options for Model 600 are same as Model 500 above except:

SENSITIVITY:	Less than 7 microvolts (approx. ¼°F with Type J thermocouple)
REPEATABILITY:	Substitute **Control Capability:** To ±0.5°F
CYCLE RATE:	Adjustable from 90 to 360 cycles per hour nominal
PROPORTIONAL BAND:	3 to 30°F, dependent on cycle-rate setting. Proportional band decreases with increasing cycle rate
SETPOINT ADJUSTMENT:	Infinite resolution 10-turn potentiometer
DEADBAND:	Does not apply (automatic cycling)

ultRelay®



MONITOR/CONTROLLER

Solid-state, ultra-sensitive, versatile, indicating control

M/C 330

Temperature, pressure, flow, and virtually any physical force that can be translated into a-c or d-c millivolts (or changing resistance) can be monitored, indicated, and made to cause control action with the versatile M/C 330 ultRelay. Indication can be absolute or deviation.

Available in four basic models:

M/C 330-1 Single setpoint, non-indicating

M/C 330-2 Single setpoint, indicating

M/C 330-3 Single setpoint, proportional control, indicating

M/C 330-4 Dual setpoint, proportional and alarm control, indicating

SPECIFICATIONS

Specifications and options similar to ultraLARM instruments described above except:

DIMENSIONS: 5.75″ H x 7.20″ W x 8.90″ D. Panel cutout 5.10″ H x 6.36″ W

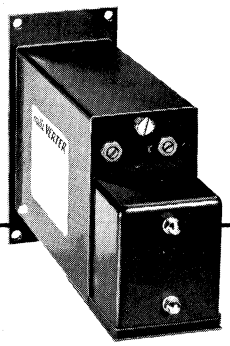
READOUTS, SCANNERS, CONVERTERS

ultraMONITOR™

MODEL 800 SEVEN-POINT TEMPERATURE OR MV INDICATOR

milliVERTER™

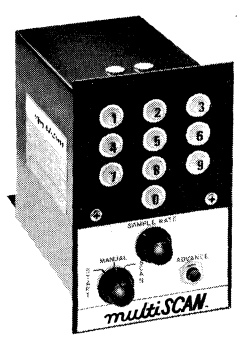
MODEL 1000 MILLIVOLT-TO-MILLIAMP CONVERTER-TRANSMITTER



SPECIFICATIONS

Thermocouple Inputs and Ranges, Standard:	TYPE J—Iron/Constantan 0 to 300°F, 0 to 900°F, 0 to 1600°F TYPE K—Chromel/Alumel 0 to 1000°F, 0 to 2000°F TYPE T—Copper/Constantan 0 to 300°F, 0 to 600°F Other ranges and T/C types available as options.	
ACCURACY:	±1.75% of full-scale reading	± 0.20% full scale
INPUT IMPEDANCE:	1,250,000 ohms min.	125,000 ohms min.
OPERATIONAL AMBIENT:	32° to 120°F	0° to 150°F
POWER REQUIREMENT:	117 VAC, 50/60 Hz, 3W (240 VAC optional)	117 VAC, 50/60 Hz, 3W (240 VAC optional)
SCALE LENGTH:	5.6"	not applicable
FAILSAFE:	not applicable	Upscale standard
OUTPUT:	not applicable	1-5ma into 0-4000 ohms 4-20ma into 0-1000 ohms 10-50ma into 0-400 ohms
OPTIONS:	Recorder connection and calibration adjustment, 0-1.5 VDC into 1000 ohms	Special output spans Current decrease with rising temperature Range change cards

MODEL 1100



multiSCAN™

Reliable automatic/manual multiplexing of 1 to 10 inputs to a common output

The Model 1100 Scanner utilizes reed-relay switching for high isolation between inputs (greater than 200 megohms) and solid-state "soft-make soft-break" circuits to restrict generation of transients.

Selected Specifications

CYCLE RATE:	Scans 10 points per second maximum, adjustable to 1 point per second or manually positioned (other rates available)
OPERATIONAL AMBIENT:	32° to 120°F
OPERATE POWER:	117 ± 10% VAC, 50/60 Hz, 3 watts 220 VAC, 50/60 Hz optional
SWITCHING MATRIX:	10-channel; SPST N.O./channel to common two-wire output (other switching modes available)
CONTACT RATING:	25 volt-amperes max.

Descriptive literature on request.

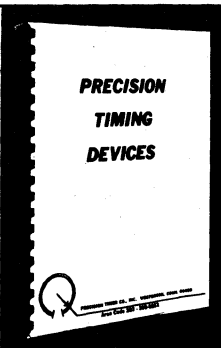
HUGE INVENTORY OF SHELF STOCK ITEMS

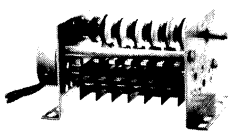
Precision Timer Co., Inc.
400 Wesley Ave. Westbrook, Conn. 06498



Send For This Special Edition Or If You Are In A Hurry – Call Us At Area Code 203 399-6253

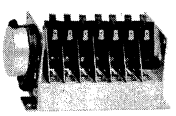
PROGRAM

Economy Program Timer



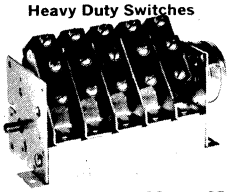
Choice of — 3 to 8 Poles, 239 Stock Speeds, 7 Switch Capacities.

Program Timer



Standard Stocked Units used in Vending Machines and 100s of other products. Tab Terminals — Field Replaceable Switches — Up to 20 Load Circuits.

H. D. Program Timer Heavy Duty Switches



Choice includes: 22 or 25 Amps (1 h.p.) Many, Many Types Shelf-Stocked, Plus Specials.

Low Cost Programmer

Standard or Special Models Ideal for Continuous or Intermittent Operations.

Panel Mount Programmer

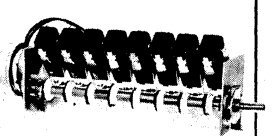
Manually Settable While Running or De-energized, Plus Completely Versatile Design.

DELAY AND INTERVAL

Pushbutton Delay Relay

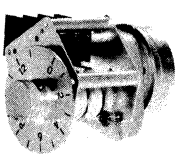
Your Choice of 100s, Standard Stock, Time Delays Plus Specials.

Multi-Pole Chassis Mount



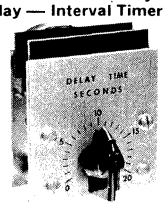
Reset Ganged Delay Relays 2 to 20 Poles.

Panel Mount Adjustable Delay Relay



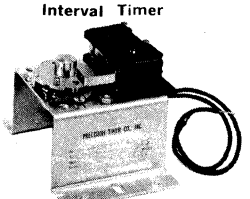
10 thru 25 Amps 1, 2 or 3 Pole 8 Time Ranges.

Precision Time Delay Relay — Interval Timer



Standard or Special — Times Down to Zero Exactly, Then Holds to Your Special Program.

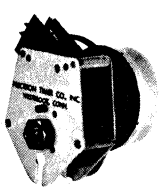
Time Delay Relay Interval Timer



Fully Adjustable — Employed to Delay Transfer of a Heavy Duty Action Switch.

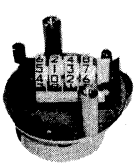
TOTALIZE

Pulse Accumulator



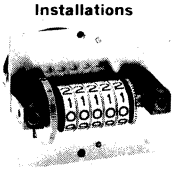
Produces Signal at End of Predetermined Pulse Countdown.

Hours Meter



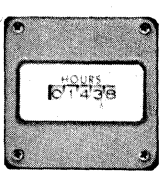
Standard Shelf Stock with Instant Pushbutton Reset and Convenient Behind Panel, Easy Installation.

Running Time Meter For Behind-Panel Installations



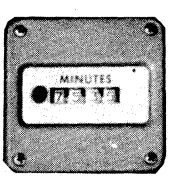
Resettable with Thumb-Wheel or Non-Resettable.

Running Time Meter



Low-Low Cost, Yet Accurate and Reliable. Standard Stock Shelf Units Very Popular.

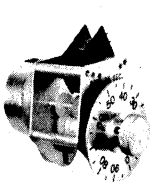
Pushbutton Reset



Fully Synchronous. Choose from: Square or Round Bezels — Instant Reset with Pushbutton for Extremely Fast Data Readings.

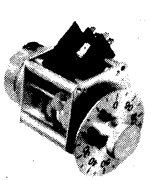
SPECIAL PURPOSE

Percentage Timer



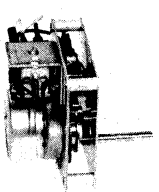
Produces Manually Selectable Output Pulse During Each Fixed Cycle.

Variable Pulse Generator



A Percentage Timer with One or Two Pair of Independent Programming Cams. An Ideal Photocopier Control.

Delay With Pulse Output

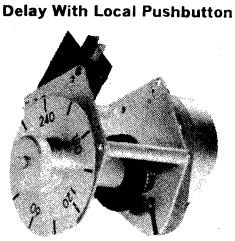


Special Purpose — 2 Pole Delay Relay, Yields Delay Plus Pulse.

Ultra-Reliable Starter Timer

Specially Built Starter Timer for Diesel-Electric Emergency Generators for Hospitals, Schools, Public Buildings.

Delay With Local Pushbutton



Manually Adjustable Delay Relay/Interval Timer for Local Pushbutton Operation.

COUNTERS / PRINTING COUNTERS / DATA PRINTERS / DIGITAL DISPLAYS

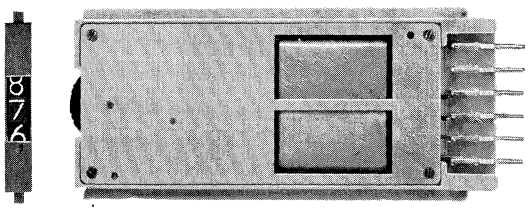
HOLD THE PRESSES!

$500.00

WILL NOW BUY YOU

A PRINTING DVM

MEASURING ONLY 8" X 3½" (HALF-RACK)
• DUAL SLOPE INTEGRATING • NIXIE READOUT
• 6 DIGIT PRINTING • 3 LINES PER SECOND



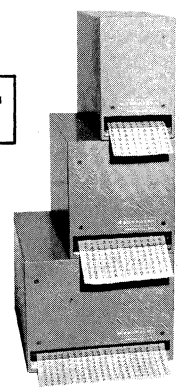
THE COUNT MODULE

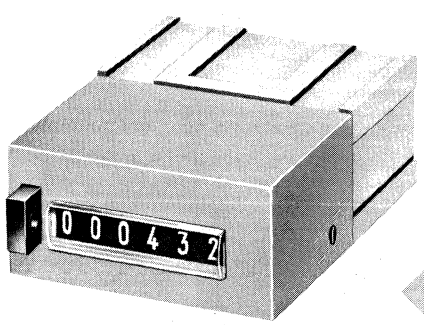
a basic tool for counting, controlling, displaying and printing

Pencil-thin, these single digit electromagnetic displays build into any kind of counting, registering or printing system . . . with any number of digits. The modular concept extends both to the mountings in the front and the circuitry in the rear. Two types: with 10 or 12 line readout or switch controls with zero and cascade capability.

MODUPRINT

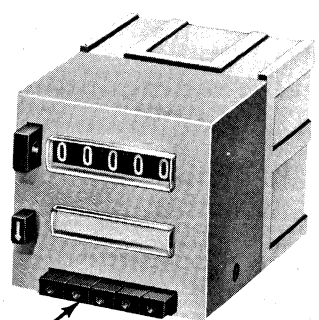
Four basic frames adaptable to your specific printer requirements. 6, 9, 14 or 20 digits. Maximum flexibility at minimum cost to print count, time, date, or data in any combination.





F104—TOTALIZING COUNTERS

Looking For Better Ones?



Pushbutton Preset

FE104—PREDETERMINING COUNTERS

These new counters are to the 25 x 50 mm. international standard and interchangeable with others without customer panel modification — but far more ruggedly constructed. And the preset versions are pushbutton preset — protecting against external damage and fool proofed. Of course, for all means of resetting and with a variety of diecast (not plastic) panels, or dovetail interlocking. To 60cps, to 6 digits AC or DC. Predetermining with manual, electrical or automatic reset. Other electrical impulse counters, 3-7 digits, AC or DC, push-button, key, knob, electrical or non reset, panel, base or stud mounting. **Write for Bulletins 139 and 140.**

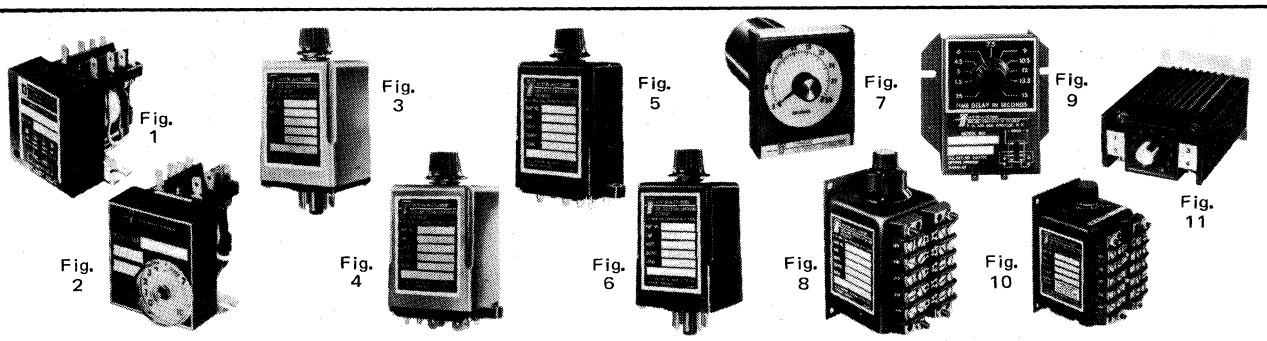
the broadest line of solid state timing devices

Syracuse Electronics transistorized series of timers (time delay relays) are of the fixed or adjustable type, designed for use in light or heavy industrial and commercial applications. Timers consist of solid state circuitry driving a self-contained relay, (except MTS – fully solid state).

Since the timer circuit eliminates cams, clutches and motors, there can be no mechanical wear, thus affording long dependable life and highly reliable operation. Many models are interchangeable with mechanical, pneumatic, thermal and other electronic timers.



MODEL	ENCLOSURE FIG. #	MODE OF OPERATION	MIN.-MAX. TIME DELAY RANGES (SECONDS)	REPEAT ACCURACY ±, %	OUTPUT RATING (AMPS)	CONTACT FORM	TYPE TERMINATION	APPROX. SIZE L" x W" x H"	BASIC UNIT PRICE

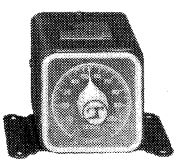
INDUSTRIAL SOLID STATE TIMERS

The Most Complete Choice Available

SERIES 888

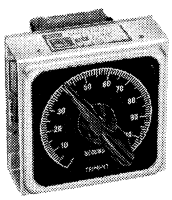


Highest quality solid state timers for industrial applications requiring the ultimate in reliability, quality and versatility. Repeat timing accuracy ±2%. Adjustable timing from 0.15 sec. to 15 min. Complete choice of timing logics, mounting styles, and input voltages.

SERIES 666

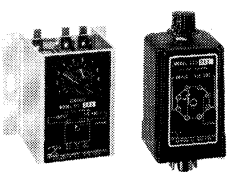
Moderately priced solid state timers in plug-in package. Timing logic is Delay-On-Pull-In, delay between power application and relay energizing. Repeat timing accuracy ±2%. Adjustable timing from 0.15 to 300 sec. Input voltage 115 VAC.

SERIES 444



Low cost solid state timers for wall or panel mounting. Repeat timing accuracy ±5%. Timing logic is Delay-On-Pull-In. Adjustable timing from 0.15 to 300 sec. Plug-in output relay. Input voltage 115 VAC, 28 VDC, or other.

SERIES 111 & 333



NEW! The only low cost solid state timers with positive electronic latching plus choice of mounting (plug-in or rear-chassis) and three different timing logics. Repeat timing accuracy ±3%. Adjustable timing from 0.5 to 180 sec. Input 115 VAC.

TRANSMAGNETICS INC.

Var. Gain Amplifier— Multiplying Modulator

Model 365, a miniature solid state multiplying modulator without hysteresis produces an ac gain proportional to a dc input. The device finds applications in flight control systems in varying loop gain or as a sine wave modulator:

Model 365 Specifications:

DC Input: 0 to ±10V into 50K ohms min.

AC Input: 0 to 7V RMS into 50K ohms min.

AC Output: Proportional to product of inputs.

Output is 2V RMS when inputs are at maximum above.

Phase: Constant to ±1° over 380 to 420Hz.

3 DB Bandwidth: 200 Hz to 100KHz

AC Linearity: 1% FS

DC Linearity: 1% FS

Null: 10MV RMS, 200 Hz to 10KHz

DC Power: ±15V

Size: .4H x 1.27 x 1.77

Operating Temperature: 0 to 70°C (available for −55 to +85°C)

Root Mean Squarer Wide Band

Series 742 provides a true r.m.s. output for signals from plus or minus dc to 20K Hz. The output voltage is linearly proportional to true r.m.s. and can be displayed on linear or Digital voltmeters.

Specifications Series 742:

Input: −10 to +10V peak into 10K ohms min.

Output: 0 to +10V, from 50 ohms max into 10K ohms min.

Conformity: 0.5% FSR

DC Power: ±15V

Size: .78H x 3.19 x 3.44

Models Available: 742CP5 for 0 to 70°C operating — 742MP5 for −55 to +85°C operating

AC to DC Converter Series A1200

Series A1200 convert a varying 400Hz signal to a proportional DC for applications in signal conditioning and compensation for line voltage variation. Models with full scale from 6 to 115 V RMS and wide bandwidth of 60 to 5K Hz are available.

Specifications Series A1200:

AC Input: 23 to 29 V RMS, 380 to 420 Hz into 100K ohms min.

Gain: 10V DC/28.6V RMS

Linearity: ½% FS

Ripple: 50MV RMS max.

DC Power: ±15V

Size: .78 x 2.53 x 3.19

Models Available: A1200CP2 for 0 to 70°C operating — A1200MP2 for −55 to +85°C operating

Frequency to DC Converter Series 567

These devices generate a dc voltage linearly proportional to the frequency of an ac signal for applications in signal conditioning, monitoring, and control systems for tachometers, alternators and other variable frequency sources. Models are available for full scale frequencies from 50 to 5KHz.

Specifications Series 567:

AC Input: Approximate sine wave of frequency 10 to 3000 Hz, voltage from .07 to 21V RMS into 10K ohms min.

DC Output: 0 to 5V proportional to frequency from 50 ohms max output impedance

Linearity: ¼% FS

Ripple: 25MV RMS max.

DC Power: ±15V

Size: .58H x 2.03 x 2.28

Models Available: 567CP4 for 0 to 70°C operating — 567MP4 for −55 to +85°C operating

Analog Square-Rooters— Wide Band

These compact diode type square rooters with 20KHz full power bandwidth are available for one or two quadrant inputs. The output amplitude is proportional to the square root of the input.

Model	748CP10	748MP10	747CP5	747MP5
Quadrant	ONE	ONE	TWO	TWO

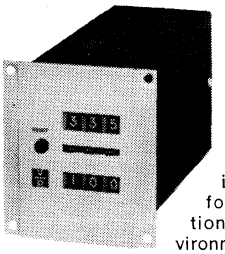
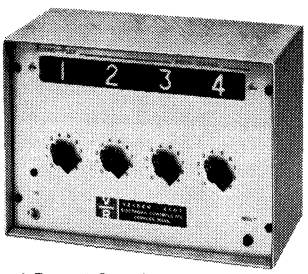
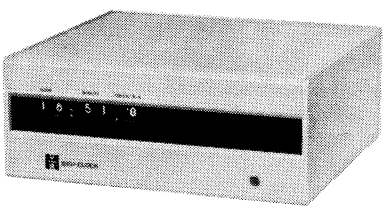
When it comes to counting, recording or controlling, come to Veeder-Root



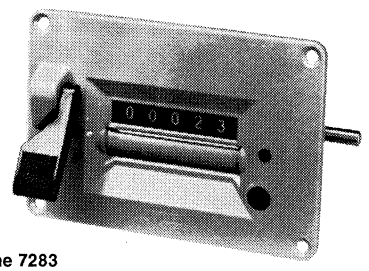
The 7102 Digi-Flex* Predetermining Counter: Electrically driven. Off-the-shelf. Both versatile and economical. Ideally suited for control applications in industrial environments.



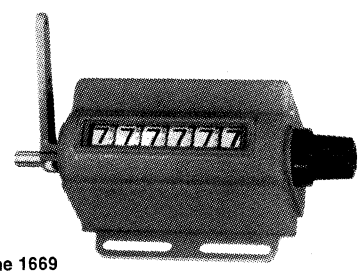
The 7122
Econo-Flex* Preset Counter:
One or two rows of presets. Reliable integrated circuitry. Operates from a selection of inputs. For critical control problem areas: coil winding, weighing, blending.



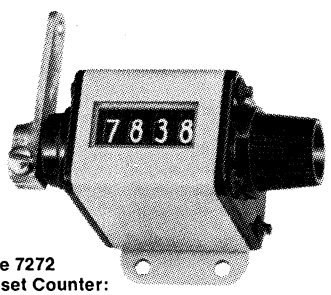
The 7108
Digi-Clock Time Display:
Offers a wide range of features for computer input. Self-contained desk unit or component of larger systems. Readout code: decimal or BCD.



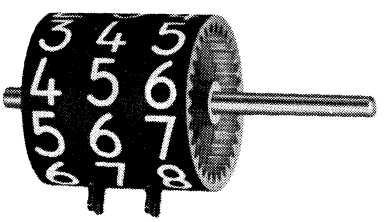
The 7283
Predetermining Counter:
Rapid reset counter with positive electrical knock-off. Features a positive interlock and base or panel mount. Recommended for industrial precision control.



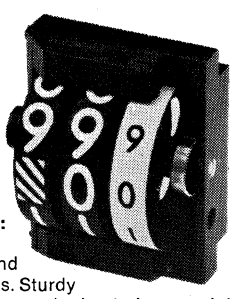
The 1669
Visicounter* Totalizer:
Ruggedly-built counter with distinct figures. Ideal for use on heavy equipment like power presses and industrial machines.



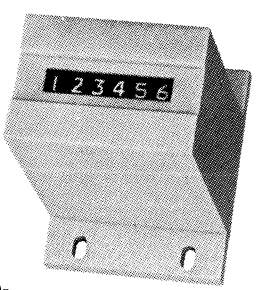
The 7272
Reset Counter:
For indoor and outdoor use where small size, accuracy, and legible figures are essential. Features acetal resin components and a corrosion-resistant case.



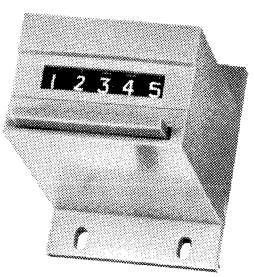
The 7170
Precision Instrument Odometer:
Light yet durable counter with modular wheel construction, providing flexible design opportunities. High speed 500 rpm. Meets applicable Mil Specs.



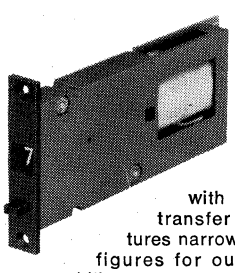
The 7162
Jewel Bearing:
Features individual wheel and pinion supports. Sturdy aluminum frame and wheels keep weight low. For use in servopneumatic altimeters. Exceptionally low torque 0.0002 oz-in.



The 7437
Electric Counter:
A low cost electric counter featuring a one piece frame construction for greater reliability and simplicity of design. Ideal for office machines or coin-operated equipment. Available with 5 or 6 figures and a variety of mounting configurations. AC or DC.



The 7438
Reset Electric Counter:
Offers the convenience of push-bar reset with the economy of rotary reset. Simple, one piece frame construction assures reliability. Ideal for test equipment, control equipment and office machines. Available with 5 figures and a variety of mountings. AC or DC.



The 1969
Veeder Decade* Totalizer:
Single wheel, electric counter with electric readout, transfer and reset. Features narrow width with large figures for outstanding readability.

*Trademark of Veeder-Root

Veeder-Root always comes through with the finest equipment you can buy.

In fact, our line of counters is so complete, it'll solve any application problems you may have.

For further information on our full line of mechanical, electrical and electronic totalizers and controls, write to: Veeder-Root, Hartford, Connecticut 06102.

SOLID STATE CONTROL RELAY

Designed for computer signal control of electrical equipment, power supplies, motors and similar high power devices in military and industrial systems demanding maximum reliability, these relays contain no moving parts and elminate the problems of shock and vibration effects, contact deterioration and slow response time of electromechanical devices. Operating on line frequencies of 2 cps to 10K cps turn-on time is typically 2 to 5 μsec with turn off at zero load current. One cycle surge current is 80 amps (60 cps) for the 6 and 7½ amp models or 240 amps for the 20 amp versions over an operating temperature range of −40 to 190°F.

DIGITAL MOTOR CONTROLLER

16 (22½°) OR 32 (11¼°) REVERSIBLE POSITIONS FROM I.C. LEVEL INPUTS

MODEL MC124 4 CYCLE REVERSIBLE.....**$85.50** (1-9) **$75.00** (10-24)

MODEL MC128 8 CYCLE REVERSIBLE.....**$95.00** (1-9) **$85.00** (10-24)

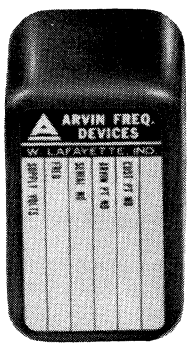
Will drive any 4 phase (2 split) stepper motor from 5 to 32 volts at 3 amps max. When used with the above motors, 16 or 32 positions can be obtained, eliminating the need for gear boxes and dynamic feedback loops in many servomechanism designs.

ZENRAD CONTROLS COMPANY (805) SANTA BARBARA, CALIF. 965-4996

ARVIN FREQUENCY DEVICES

ARVIN TCXO

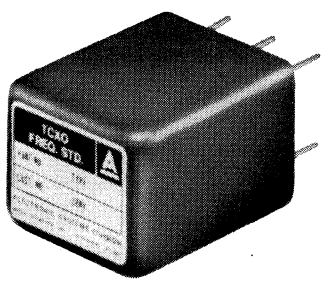
Arvin temperature compensated crystal oscillators provide precise frequency management without the use of ovens, permitting small size, light weight, instant warm-up, and low power drain. Sine, square, or pulse outputs are available. Units generating more than one frequency can be provided. All circuit values are computer optimized. Following are typical specifications. Let us know your exact requirements.



Frequency Range.....to 200 MHz
Frequency Stability.....±5 PP 10^8 depending upon freq. and temp.
Short Term Stability..less than 2 PP 10^9/sec., 2 PP 10^8/hr. and/24 hr.
Input Voltage.....±12 VDC ±5% is standard, others available
Power Output..1 MW RMS across 50 ohms output impedance
Power Input.....50 MW
Packaging.....MIL, NASA, or commercial

ARVIN TC/VCXO

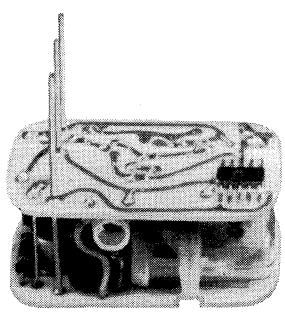
Arvin TC/VCXO's have all the advantages of Arvin TCXO's combined with a unique voltage control capability. This gives Arvin TC/VCXO's even greater flexibility without the need for external compensating circuitry or added power. Units generating one or more frequencies can be provided with sine, sawtooth, or pulse outputs. Following are typical specifications for Arvin TC/VCXO's. Send us your exact requirements.



Frequency Range.....to 50 MHz
Frequency Deviation...to ±200 PPM depending upon freq. and temp.
Deviation Sensitivity..to ± 20 PPM/volt
Deviation Rate.....to 10% of nominal oscillator frequency
Linearity.....to ± 1% of best straight line
Input Voltage....± 10 to ± 50 VDC
Packaging.....MIL, NASA, or commercial

OSCILLATOR R&D

Arvin Frequency Devices is equipped to design, develop, and manufacture in quantity a variety of oscillators and frequency control equipment. Our specialty is high reliability TCXO, VCXO, and TC/VCXO devices for miniaturized communications applications. We have built TCXOs for satellite, missile, airborne, and portable ground equipment applications. Arvin



Frequency Devices provide precise frequency management in the smallest possible package, some as small as one cubic inch, with low power drain and stabilities as high as 1 PP 10^7 in a range to 200 MHz. Let us help solve your frequency management problems. We welcome research and development contracts. Call us early in the design stage.

HIGH STABILITY OSCILLATOR
Series 165

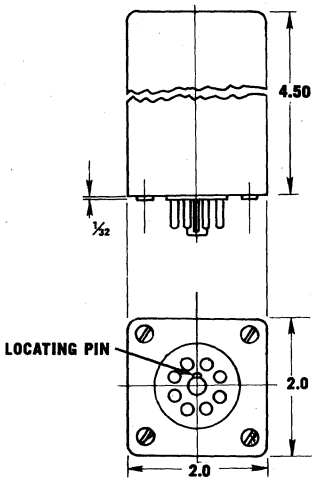
1MHz to 150MHz

FEATURES

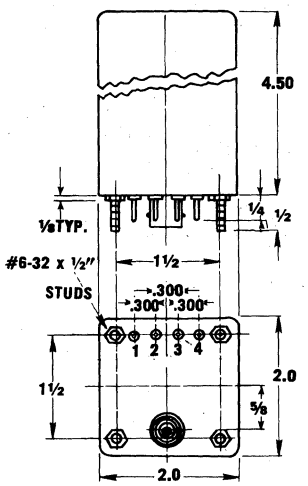
- All Units Operate On Frequency Without Multiplication
- Low Spurious Content
- Excellent Short Term Stability
- Low Harmonic Content
- Logic Compatibility

APPLICATIONS

- Frequency Source For Multiplier Chain
- Telemetry Main Carrier Source
- Integrated Circuit Clock
- Digital Scanning Clock
- Computer Time Base
- Reference Oscillator



Pin #1 — Common OSC
#2 —Plus Supply OSC
#5 — Oven Plus
#6 — Oven Common
#8 — Output



Pin #1 — Plus Supply OSC
#2 — Common OSC
#3 — Common Oven
#4 — Plus Supply Oven
— BNC - Output

RC VOLTAGE CONTROLLED OSCILLATOR Series 180

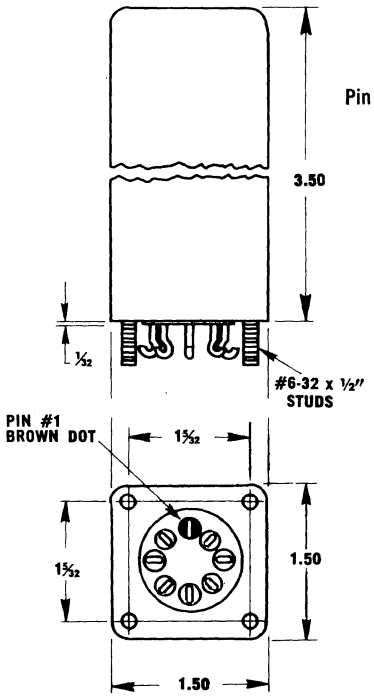
100Hz to 40KHz

FEATURES

- Excellent Stability
- Small Size
- Low Current Drain
- Choice of FM Deviation
- Wide Frequency Coverage
- IRIG Compatibility
- Logic Compatibility

APPLICATIONS

- IRIG Channels 1-16
- Low Frequency Telemetry
- Transducer to Frequency Conversion
- Sub Carrier Generation
- Phase Locking
- Pulse Modulation
- Signal Averaging



Pin #1 — Common
#2 — Plus Supply
#4 — Control Voltage
#8 — Output

LC VOLTAGE CONTROLLED OSCILLATOR Series 170

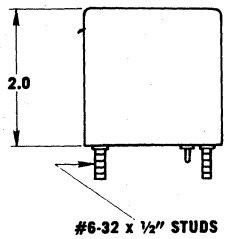
1MHz to 100MHz

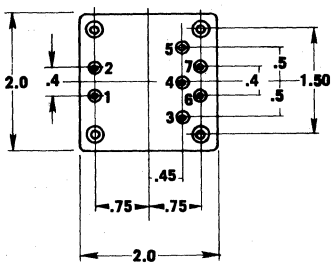
FEATURES

- Wide Deviation
- Low Jitter
- Logic Compatibility
- Excellent Stability
- Ovenized & Non-ovenized
- Low Power
- Small Size

APPLICATIONS

- Phase Locking System
- Telemetry
- Pulse Frequency Modulation
- Analog to Frequency Converters
- Transducer to Frequency Conversion
- Digital Phase Locking





Models LC176 & LC177

Pin #1 — Oven Plus
#2 — Oven Common
#3 — Plus Volts OSC
#4 — Control Voltage
#5 — Common OSC
#6 — Signal Output
#7 — Signal Ground

VOLTAGE CONTROLLED CRYSTAL OSCILLATOR Series 190

3MHz to 200MHz

FEATURES

- Wide Modulation Deviation
- Low Harmonic Content
- Low Spurious
- Good Short Term Stability
- Compatible With IC Logic

APPLICATIONS

- Frequency Modulation System
- Sub Carrier Generation
- Transducer Encoding System
- Transmitter Sources
- Phase Locking System

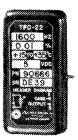
SPECIFY AUSTRON

Tuning-fork oscillators, tuning-fork filters and Sulzer crystal oscillators

TUNING FORK OSCILLATORS

TFO-1
(1⅝ x 1⅝ x 2⅜")



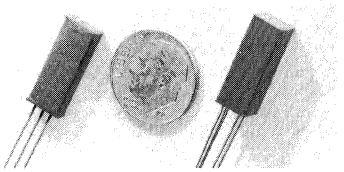
TFO-22
(1 x 2 x 0.5")

AUSTRON, INC. continues to supply a complete selection of tuning fork oscillators for industrial, military, inner and outer space, frequency control applications.

- Frequency Range — <1Hz to >50KHz
- Temperature Range — <−65°C to >+125°C.
- Frequency Tolerances — <±0.001% to >±1%.
- Outputs — Direct DTL or TTL compatibility. Sine, square, or pulse.

TFO-1 <1Hz to 50KHz
Multi-frequency-1,2,or 3Φ outputs.
TFO-22 <50Hz to 50KHz. Low cost. Printed circuit board mounting.

TUNING FORK FILTERS



TFF-38 Single Filter
.290 x .700 x .140"
<3 grams

TFF-42 Double Filter
.290 x .725 x .290"
<5 grams

AUSTRON tuning-fork filters are solving the need for small, hi-Q filters in the frequency range of 10 KHz to 50 KHz. Units are mechanically rugged and temperature stable.

- Frequency Range — <10 KHz to >50 KHz
- Frequency Tolerance — ±0.05%
- Insertion Loss — <−3dB
- Bandwidth — 6 dB — <0.005% to 0.2%
  40 dB — 6% nominal
- Frequency vs Temperature — <60% of bandwidth
- Maximum Spurious Response — >−25 dB
- Input Level — <10 μv to 5 v rms

SULZER CRYSTAL OSCILLATORS

MODEL 1120
(2¼ x 2⅛ x 4")

MODEL 1100
(1¼ x 1¾ x 3¼")

ACO-22
1 x 2 x 0.5"
Low Cost

TCXO-50
Temperature-Compensated
Crystal Oscillator 2 x 2 x 1"

The Sulzer Crystal Oscillators are manufactured in AUSTRON's Washington Division. They emphasize the best performance in low power consumption, long and short term stability, and minimum size.

Oven-controlled Crystal Oscillators

1000 — Long term stability to 1 x 10^{-8}/24 hours, −10°C to +55°C, 1 MHz output.

1100 — Long term stability to 1 x 10^{-9}/24 hours, −20°C to +65°C, 5 x 10^{-9} retrace after one hour, 5 MHz output, 4 watts maximum 2 watts average power input, 1¼ x 1¾ x 3¼ inches, 7 ounces.

1120 — Long term stability to 1 x 10^{-9}/24 hours, −20°C to +55°C, 5 x 10^{-9} retrace after one hour, 1 MHz output (special frequencies available), 4 watts maximum 2 watts average power input, 2.14 x 2.27 x 4 inches, 9 ounces. Electrical and mechanical replacement for older Sulzer Model 1 KLM series.

1140 — Long term stability to 1 x 10^{-9}/24 hours, −10°C to +65°C, 5 x 10^{-9} retrace after one hour, 1 MHz or 5 MHz output (special frequencies to 100 KHz available), 1⅞ x 1⅞ x 3½ inches.

1150 — 2 x 10^{-10}/day long term stability, 2 x 10^{-11}/°C average for −55°C to +60°C, 5 MHz, 4.5 watts maximum 2.5 watts average power input, 2½ x 3¼ x 5 inches.

1160 — 2 x 10^{-10}/day long term stability, 2 x 10^{-11}/°C average for −55°C to +60°C, 5 MHz, 3.5 watts maximum 1.5 watts average power input, 2 x 2 x 5⅜ inches.

Temperature-compensated Crystal Oscillators

ACO-22
Frequency Range — 100 KHz to 50 MHz
Accuracy — ±1 x 10^{-6}
Frequency vs Temperature 5 x 10^{-6}
Temperature Range — −5°C to +55°C
Input 5 v dc ±1%
Output — 1-4 v pk-pk into 10 K ohms

TCXO-50
Frequency Range — 1 MHz to 10 MHz
Frequency Tolerance — ±1 x 10^{-6}
Temperature Range 5°C to +55°C
Frequency vs Temperature — ±1 x 10^{-6}
Input 24 v dc ±10%
Output — 1-4 v pk-pk into 10 K ohms
Stabilization — <3 seconds

CRYSTAL OSCILLATORS INCORPORATING TEMPERATURE CONTROL

CCO-23

CCO-23 Series TYPE	FREQUENCY RANGE	STABILITY (After One Hour)			AGING CHARACTERISTICS		OUTPUT WAVE SHAPE	OUTPUT (rms) WITH LOAD (ohms)	OSCILLATOR VOLTAGE	OVEN VOLTAGE
		Short Term (10 sec)	Fixed Ambient (25°C ± 5°C)	Ambient Range (0° - 50°C)	24-hour Period (After 72 hours)	One Week (After 72 hours)				
CCO-23MD-7	1 MHz	5×10^{-10}	5×10^{-9}	2×10^{-8}	5×10^{-9}	2×10^{-8}	Sine	1 volt-1500	27 VDC	27 VDC
CCO-23MD-6H	1 MHz	3×10^{-10}	3×10^{-9}	$\pm 1 \times 10^{-8}$	3×10^{-9}	2×10^{-8}	Sine	1 volt-500	27 VDC	27 VDC
CCO-23LD-H	5 MHz	3×10^{-10}	3×10^{-9}	$\pm 1 \times 10^{-8}$	3×10^{-9}	2×10^{-8}	Sine	1 volt-1500	27 VDC	27 VDC

The CCO-23 series offers a choice of 3 ultra stable time base oscillators for premium performance. Special glass sealed quartz crystals are designed for high Q characteristics and are processed to assure low aging needed in sophisticated applications. All models incorporate full proportional temperature control ovens and solid state circuitry.

CCO-7

CCO-7 Series MODEL	FREQUENCY RANGE	STABILITY — AMBIENT		OUTPUT VOLTS rms
		25°C	0-60°C	
CCO-7R	10-14 kHz	5×10^{-7}	$\pm 2 \times 10^{-6}$	1.5
CCO-7R	14-35 kHz	3×10^{-7}	$\pm 5 \times 10^{-7}$	1.5
CCO-7R	35-198 kHz	2×10^{-7}	$\pm 4 \times 10^{-7}$	1.5
CCO-7R	198-300 kHz	1×10^{-7}	$\pm 1.5 \times 10^{-7}$	1.0
CCO-7M	.95-3.0 MHz	1×10^{-8}	$\pm 3 \times 10^{-8}$	1.0
CCO-7L	3-8 MHz	1×10^{-8}	$\pm 3 \times 10^{-8}$	0.5
CCO-7N	8-15 MHz	1×10^{-7}	$\pm 3 \times 10^{-7}$	1.5
CCO-7V	15-50 MHz	2×10^{-7}	$\pm 5 \times 10^{-7}$	0.5
CCO-7U	50-100 MHz	2×10^{-7}	$\pm 5 \times 10^{-7}$	0.5

Standard models in this series are supplied with glass sealed crystals for low long term aging. All models have solid state oscillators designed for operation on 27 VDC. Mercury thermostat ovens may be specified for 115 VAC or 27 VDC operation. Standard output is clipped sine wave with ratings as shown above based on 1500 ohm load conditions.

CCO-25

CCO-25 Series TYPE	FREQUENCY RANGE	STABILITY — AMBIENT		OUTPUT INTO 1500 OHMS	AGING/WK AFTER 72 HRS. Specify Aging Option	
		25°C	0-60°C		Standard	Special

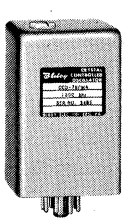
CCO-25ND	8-15 MHz	1×10^{-7}	$\pm 5 \times 10^{-7}$	1v	2×10^{-7}	5×10^{-8}
CCO-25VD	15-50 MHz	2×10^{-7}	$\pm 5 \times 10^{-7}$	.5v	3×10^{-7}	1×10^{-7}
CCO-25UD	50-100 MHz	2×10^{-7}	$\pm 5 \times 10^{-7}$	.5v	4×10^{-7}	1×10^{-7}

This series is designed with proportional temperature control to meet high stability performance requirements in a minimum size package for PC board mounting. Standard models have sine wave output and operate with 12 VDC (oscillator) and 24 VDC (oven) supply.



CCO-78

CCO-78 Series MODEL	FREQUENCY RANGE	STABILITY — AMBIENT		OUTPUT VOLTS rms
		25°C	0-60°C	
CCO-78R	10-14 kHz	5×10^{-7}	$\pm 2 \times 10^{-6}$	1.5
CCO-78R	14-35 kHz	3×10^{-7}	$\pm 5 \times 10^{-7}$	1.5
CCO-78R	35-60 kHz	2×10^{-7}	$\pm 4 \times 10^{-7}$	1.5
CCO-78R	60-198 kHz	2×10^{-7}	$\pm 4 \times 10^{-7}$	1.5
CCO-78R-2	198-500 kHz	1×10^{-7}	$\pm 1.5 \times 10^{-7}$	1.0
CCO-78M	.80-3.0 MHz	1×10^{-8}	$\pm 3 \times 10^{-8}$	1.0
CCO-78L	3.0-8.0 MHz	1×10^{-8}	$\pm 3 \times 10^{-8}$	.75
CCO-78N	8.0-15.0 MHz	5×10^{-8}	$\pm 8 \times 10^{-8}$	1.0
CCO-78V	15.0-50 MHz	1×10^{-7}	$\pm 2 \times 10^{-7}$	1.0
CCO-78U	50-100 MHz	2×10^{-7}	$\pm 4 \times 10^{-7}$	.75

Standard models in this series incorporate solid state proportional temperature control which may be specified for 115 VAC or 27 VDC operation with 5% regulation. Solid state oscillator circuitry is designed to operate on 27 VDC (1% regulation) supply with sine wave output ratings shown for 1500 ohm load conditions.

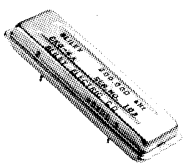
CRYSTAL OSCILLATORS WITHOUT TEMPERATURE CONTROL

TCCO Series

TCCO-26 Series RANGE 1-20 MHz	FREQUENCY STABILITY WITH TEMPERATURE DEVIATION	
TCCO-26	$\pm 1 \times 10^{-6}$	0-50°C
TCCO-26-1	$\pm 3 \times 10^{-7}$	0-50°C
TCCO-26-2	$\pm 2 \times 10^{-6}$	−20 to +70°C
TCCO-26-3	$\pm 4 \times 10^{-7}$	−20 to +70°C
TCCO-26-4	$\pm 1 \times 10^{-6}$	−40 to +70°C

FREQUENCY STABILITY WITH TIME		
24 Hour Period	5×10^{-8} Max. with Ambient Temp. 25°C	
After 72 Hours Continuous Operation	1×10^{-7}/wk.	1-10 MHz
	2×10^{-7}/wk.	10-20 MHz

TCCO is the Bliley acronym for TEMPERATURE COMPENSATED CRYSTAL OSCILLATORS designed to integrate the characteristics of high quality crystals with temperature compensated circuitry for improved frequency stability without temperature control. Typical performance characteristics are shown for the TCCO-26 series. Standard models operate on 12 VDC (2% regulation) at 15 mils maximum. Sine wave output is 1 volt rms into 1000 ohms or 2 volts peak to peak square wave on special order.

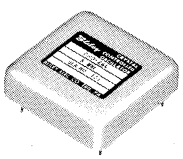


CKO Series

CKO Series — FREQUENCY TOLERANCE		
SPECIFY	DEVIATION	AMBIENT RANGE
A or B	±10 ppm	0° to 50°C
	±20 ppm	−40° to +70°C
STANDARD MODELS		
SPECIFY TYPE	FREQUENCY kHz	OUTPUT WAVEFORM
CKO-4A	200-5000	Logic
CKO-4B	200-5000	Square Wave
CKO-3	3000-15000	Sine Wave

OUTPUT RATING			
FREQUENCY RANGE kHz	OUTPUT VOLTAGES AND LOAD		
	Square Wave	Logic	Sine Wave
	1k ohm load	Output will drive most TTL and DTL integrated circuitry	1k ohm load
200 to 1000	3v p-p		—
1000 (+) to 5000	3.2v p-p		—
3000 to 6000	—	—	1.7v p-p
6000 (+) to 15000	—	—	1.4v p-p

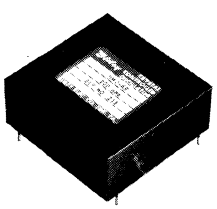
This low profile solid state crystal oscillator is designed to provide choice of LOGIC output for IC applications where space is limited. The koldweld sealed package operates on 5 VDC with output ratings as shown above. When specified, electrical trim adjustment is available to offset long term aging.



CMO-26 Series

CMO Series FREQUENCY RANGE	STABILITY (A) Specify (B)		OUTPUT RATINGS		
	0° to 50°C	−40° to +70°C	Logic	Square Wave	Sine Wave
				1k ohm load	1k ohm load
60 Hz - 4000 Hz	±.004%	±.01%	Output will drive most TTL and DTL integrated circuitry	2 volts p-p	
1 kHz - 50 kHz	±.003%	±.007%		2.4 volts p-p	
50 kHz - 5 MHz	±.001%	±.002%		3 volts p-p	
800 kHz - 20 MHz	±.001%	±.002%		3 volts p-p	1.5 volts p-p

The CMO series crystal oscillator offers choice of LOGIC output in a compact sealed module for PC board mounting. Standard units are designed for operation on 5 VDC (2% regulation) input with optional mechanical or electrical trim adjustment to offset long term aging.



BMO Series

BMO Series TYPE	FREQUENCY RANGE	TOLERANCE (A) 0° to 50°C	TOLERANCE (B) −40° to +70°C	OUTPUT VOLTS rms
BMO-6R-1	15-120 kHz	±.004%	±.01%	0.7
BMO-6R-1	90-150 kHz	±.008%	±.018%	0.7
BMO-6R-1	150-500 kHz	±.003%	±.007%	0.7
BMO-6R-1	400-800 kHz	±.008%	±.016%	0.7
BMO-6M	800-3000 kHz	±.001%	±.002%	0.7
BMO-5L-1	3-10 MHz	±.001%	±.002%	0.7
BMO-5N	10-15 MHz	±.001%	±.002%	0.5
BMO-5V-2	15-60 MHz	±.001%	±.002%	0.3
BMO-5U	60-100 MHz	±.0015%	±.003%	0.25

The BMO series oscillator combines a precision quartz crystal and solid state circuitry in an encapsulated module designed for mounting on PC boards. Output is approximately sine wave at voltages shown above for 1000 ohm load conditions. Input requirements are 12 VDC - 10 ma.

BLILEY CUSTOM ENGINEERED CRYSTAL FILTERS

Design Considerations

BANDWIDTH RANGES. Quartz crystal filters can be designed with a wide variety of characteristics and bandwidths depending on the frequency range. In narrow band filters the maximum bandwidth obtainable is controlled by the ratio of capacities of the particular crystal cut, and the mode of operation, which in turn is dictated by the frequency range of interest. The minimum bandwidth obtainable is controlled by the Q of the crystals used. Wide band filters make use of inductors to effectively spread the poles of the crystals, resulting in greatly increased bandwidths.

In the range from 100 kHz to 600 kHz crystal filters can be designed with bandwidths from .035% to 8% of center frequency as shown in Table 1. Bandwidths from .01% to 3% of center frequency are available with center frequencies in the 1700 kHz - 30 MHz range as indicated in Table 2.

TABLE 1 Range kHz	NARROW BAND FILTERS			WIDE BAND FILTERS		
	Bandwidth—6 db		Shape Factor	Bandwidth—6 db		Shape Factor
	Min. (%)	Max.	Min. (60/6 db)	Min. (%)	Max.	Min. (60/6 db)
100-250	.05	.5	1.5	1	8	2
200-400	.04	.4	1.5	1	7	2
300-600	.035	.35	1.5	1	6	2

TABLE 2 Range kHz	BANDWIDTH % at 6 db		SHAPE FACTOR 60/6 db
	Min.	Max.	Min.
1700-5000	.01	3.0	1.8
5000-10000	.02	2.0	1.8
10000-15000	.03	1.0	2.0
15000-30000	.05	0.5	2.0
20000-30000	.05	0.3	2.0

Table 3 lists the characteristics of typical symmetrical Bliley filters of proven design. Many other designs with special characteristics are available. However, their great variety does not lend to simple listing.

SHAPE FACTOR limitations (ratio of 60 db to 6 db points on symmetrical types) are primarily dictated by economics. Pass band ripple and phase linearity are also important in determining shape factor possibilities. If linear phase within the pass band is a major requirement, the Gaussian design must be used, and this greatly limits the selectivity shape factor.

PASS BAND RIPPLE requirements, when extremely small, dictate the use of the Butterworth design, and again selectivity for a given number of crystals is sacrificed. Shape factors as low as 1.5 to 1 at 6 db points are common if 1 db ripple can be tolerated.

CENTER FREQUENCY STABILITY of a crystal filter with temperature is essentially that of the crystals themselves. If, for example, AT cut crystals of the correct angle for a specific frequency range are used, center frequency tolerances of ±.004% over a temperature range of −55 to +105°C can be expected of the filter. The pass band width itself is not greatly affected with temperature if all crystals in a filter are held within tight angular tolerances of each other, because the crystals will drift in unison with temperature.

SINGLE SIDEBAND filters are available with a wide range of skirt selectivity, and carrier suppression of 30 db or more can readily be obtained over most of the frequency range.

COMB SET filters, either "spaced" or "contiguous" types, are available. A contiguous comb set is one in which the adjacent channel skirts cross at the 3 db points. Such sets usually require individual terminations when operated in parallel to prevent interchannel distortion, unless the Butterworth "Maximally flat passband" design approach is used. Such designs, however, do not always provide the greatest economy for a given shape factor. For the most economical filter design, the termination problem can be resolved by staggering the channels so that no adjacent channel shares the same termination; in other words, alternate or every third channel can be combined in parallel, and in this manner any number of such combinations can share the same termination.

Application Considerations

To obtain optimum performance from a crystal filter it is necessary to provide for matching impedances at the input and output terminals. An impedance mismatch will usually sacrifice loss, skirt selectivity, bandwidth or cutoff characteristics.

In the low frequency group extraneous circuit capacities usually have minor significance in their effect on a filter. In the high frequency group, external circuit capacities of 10 or 15 mmf can represent an appreciable part of the total tuning capacity inside the filter. For this reason crystal filters in the high frequency group are usually designed to work with an external capacity of 15 to 25 mmf which can be adjusted to compensate for stray capacities and tuned for minimum loss through the filter at mid-band frequency.

The ideal approach to crystal filter design and application presumes that the external impedances, seen by the filter, are known. The filter can then be designed for these values. By the use of special high Q transformers impedance transformations can be made to almost any desired external circuit level. This can be accomplished without imparing bandwidth, loss, skirt selectivity or sharp cutoff. While this method may result in slightly increased cost it is preferable to the use of external capacitor dividers or tapped coils which may reduce gain and, due to reflections, distort the true filter characteristic.

JK PRODUCTS

Frequency Control Devices

CRYSTALS, CRYSTAL FILTERS, PACKAGED TRANSISTOR OSCILLATORS, CRYSTAL AND COMPONENT OVENS, AND CRYSTAL-OVEN COMBINATIONS

JK offers a complete line of crystals with frequencies ranging from 1000 cycles to 200 MC. Precision crystals, providing changes as little as 1 x 10^{-10}, are regularly manufactured for use in frequency standards and similar ultra-stable devices. Low frequency crystals are available in evacuated glass envelopes, conventional metal holders and the new KOLDWELD metal enclosures. High frequency crystals, in both metal and glass holders, are manufactured at high volume rates for Government and commercial users. Military standard crystals offer the assurance of maximum quality by adherence to MIL SPECS and close supervision by a resident Government Inspector.

JK crystal filters are compact, rugged, hermetically sealed and stable. Frequency ranges from 1 kc to 40 MC are available to 150 MC.

Packaged transistor oscillators are offered in a wide line of precision, plug-in, crystal controlled signal sources from 10 cps to 75 MC. These oscillators are available with sine or square wave outputs. Stabilities range from 1 x 10^{-6} to 1 x 10^{-9} and better per day. Designs can be made to specifications for laboratory, vehicular and full military environmental performance. Each oscillator is aged in and its performance certified before being shipped.

Crystals and component ovens are compact, high temperature stability types carefully made to accommodate crystals and other precision devices. Single crystal, dual crystal and multiple crystal types are available. Many sizes and types are available including snap-action thermostats and proportionately controlled ovens giving the ultimate in quiet, precise operation with stabilities to ±.0025°C.

JK crystal-oven combinations, "THERMYSTALS," cover a wide range of packages for use where close temperature control of crystals is required. Frequency ranges for these crystal-oven combinations are 1 kc to 200 MC. Proportional control and snap-action thermostat control ovens are available in combination with precision, glass-enclosed, and metal-cased crystals with frequency stabilities from .0001% to .0000001%.

CTS Knights TCXO, always on frequency regardless of environment. From −40°C to +70°C, in outer space or down on earth, CTS Knights **Temperature Compensated Crystal Oscillators** are right on frequency with excellent stability (0.5ppm) over wide temperature ranges. With no warm up delay and minimal power requirements (50 Milliwatts) in a compact design CTS Knights TCXO's supply the stable signal source to fit your design requirements.

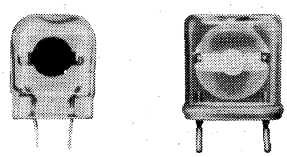
BULOVA QUARTZ CRYSTALS

- AT ● CT ● DT ● +5° (E and H Elements) GT ● MT ● NT ● PT ● SL
- Military Types ● General Communications ● Precision SSB
- Coldweld ● Glass Sealed ● Glass Bulb ● Metal Holders
- Military crystals meet latest MIL-C-3098 specifications
- Special shock and vibration mounts available



HIGH PRECISION GLASS-ENCAPSULATED CRYSTALS

Covering a frequency range of 5,000 Hz thru 150 MHz, Bulova has available in glass holders the Mil types HC-26/U and HC-27/U, as well as the standard vacuum tube types. A 3rd overtone 5 MHz crystal is available in the HC-27/U holder with Q's in excess of 1 million and stability of 1 pp 10^{10} for 24 hours.

FILTER AND OSCILLATOR CRYSTAL

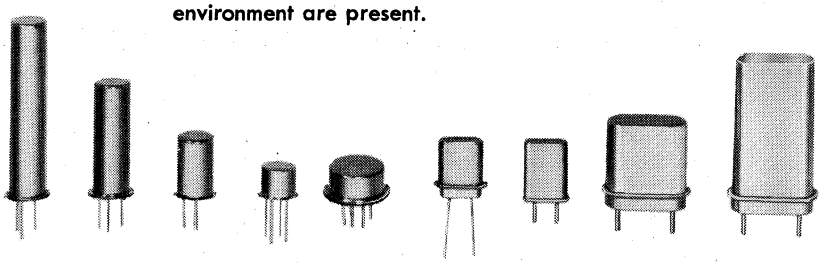
Bulova has designed a line of quartz crystals ranging in fundamental frequencies of 2,000 Hz thru 30 MHz—overtone frequencies to 150 MHz. Custom capability enables us to design to fit your most exacting requirements.

- Spurious attenuation as low as 80 db.
- Motional parameters of L, and C, held to within ±2%.

A COMPLETE LINE FOR ALL APPLICATIONS IN A FREQUENCY RANGE OF 2,000 Hz THRU 150 MHz

Commercial: Crystals for Aviation, Marine and CB communications equipment. Manufactured to the highest quality in standard type holders or modified to suit special designs.

Military: Bulova produces all the standard military "CR" types and is Q.P.L. on most of the current "CR" types. Designs crystals for new military applications where low power and extreme environment are present.



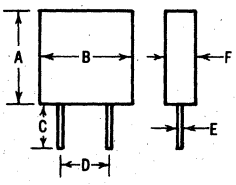
Coldweld Sealed Crystals—

Bulova has extended the developmental perimeter of coldweld types to provide a more miniaturized package with a broader frequency output. A support facility has been built capable of handling volume production. Series 100 coldweld holders consists of nine (9) configurations which include the four (4) main military types. The military crystals fit within the dimensional requirements of the military drawing.

Features:

- High Quality-High Reliability
- Tolerances as close as 3 ppm of nominal can be held on initial adjustment.
- Aging rates of 3 pp 10^8 per week are standard.
- Small package/broad frequency capability.

CRYSTAL HOLDERS



MIL TYPE	BULOVA TYPE	DIMENSIONS IN INCHES					
		A	B	C	D	E	F
HC-6/U	70	.765	.750	.238	.486	.050	.345

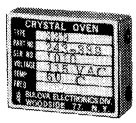
BULOVA TEMPERATURE CONTROLLERS/OVENS

A wiae selection of temperature control devices and enclosures . . . compact—highly versatile

Solid State Controllers:



339 Transistat

184 Transistat

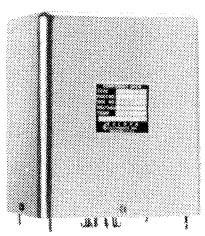
320 Conax

Available as AC Switches, DC Switches or Proportional Controllers, they are designed to handle power requirements of as little as .4 watt to 3KW. Package sizes of as small as .5 cubic inches are available; temperature control as close as .01°C, dependent on application.

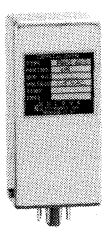
	Type 184-115 184-26	Type 339	Type 320-115* 320-26
Voltage	20VAC to 125VAC 60 to 400 cps	115VAC 400 cps	20VAC to 125VAC 60 to 400 cps
Peak Heater Current	1.5 amp. (Half Wave)	1 amp. cont. 1.5 amp. 50% Duty Cycle	1.5 amp. (Half Wave)
Set Temperature Range	Any Temperature, 5° intervals, −55°C to +125°C		
Temperature Stability Over Ambient	.1°C	.1°C	.75°C
R.F.I.	none	Mil I 26-600	none
Ambient Operating	−55°C to +125°C		
Vibration	Mil Std. 202 Method 204D		none
Shock	Mil Std. 202 Method 202		none
Size	.625 Dia. .437 Hgt.	1.390 x 1.075 .380 Hgt.	1.250 Sq. .380 Hgt.

*Commercial

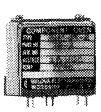
Crystal and Component Ovens:



341



613



BHC-18-2

Crystal ovens are available to hold from a single crystal to 15 crystals; component ovens are available up to 50 cubic inches. Many ovens are available with either bi-metal thermostats or solid state control.

	BHC-18 Series	BHC-613 Series	COM-341 Typical Large Cavity Oven
Accomod.:	1-15, HC-18 or HC-25 crystal holders	Single HC-6 crystal holder to small printed circuit board	Up to 50 cubic inches
Oper. Volt:	To 28 VDC or 115 VAC dependent on controller		
Temp. Set:	5° intervals +55°C to +100°C		
Controls Available:	Bi metal or solid state	Bi metal, solid state or mercury	
Stability:	Up to ±.5°C	Up to ±.01°C	Up to ±.1°C
Mounting:	Flange, bracket or stud	Flange, octal plug or stud	
Termination:	N/A	To 15 pins	To 20 pins

BULOVA CRYSTAL FILTERS

Computer Designed for Reliable Performance
Accurate — Narrow Band — 4KHz to 30MHz

The business of Crystal Filter design and production has been Bulova's business since 1955. It is another reason for our leadership in the broad area of frequency control and related precision products.

We are a design/production center to fulfill the most exacting system specifications. Combining many years of experience, an engineering team of many design disciplines and advanced computer techniques, we can produce 'state-of-the-art' filters in cost-controlled packages to military and commercial specifications.

COMPUTER OPTIMIZED FILTER DESIGNS

To provide optimized designs for individual system requirements, Bulova has a co-related library of computer programs. From pre-packaging tolerance analysis of individual components to the finished product spec'd to the customer's parameters, we can determine design "trade-off" quickly and economically.

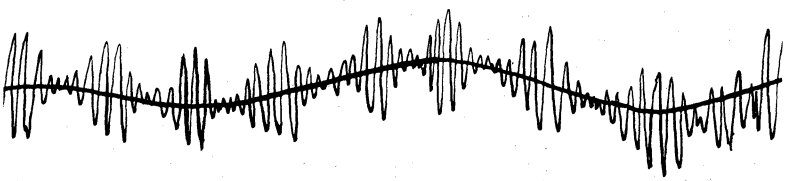
The prime parameters have been programmed to make available the following crystal filter types

1. **Butterworth Designs**
2. **Butterworth-Thompson Designs**
3. **Chebyshev Designs**
4. **Bessel Designs**
5. **Elyptic Designs**
6. **Lerner Designs**
7. **Gaussian (Transitional)**
8. **Image Parameter**

FULL PRODUCTION CAPABILITY

From crystal configuration to finished product, each segment of manufacture utilizes the most advanced and controlled production techniques. Geared to large volume requirements, Bulova's modern automated test facilities allows for a mass production output with no loss in quality—fully equipped environmental laboratory available for most testing. Short runs and engineering prototypes are handled in our pre-production shop.

TYPICAL FILTER APPLICATIONS FROM



4KHz — * — **30 MHz**

Band Pass	**Notch**
Band Elimination	**Time Delay**
Single Side Band	**Equalizer**
Narrow Band	**Lerner**
Wide Band	**Time Domain**
Linear Phase	
RF & IF	**Discriminators**

*For areas not specified above, consult our application engineering department.

CUSTOM DESIGNED TO THESE POSSIBLE PARAMETERS:

Band Widths	from 0.01% to 8% of Center frequency
Shape Factor:	1.08 Ratio for 60 db BW to 3 db BW
Ripple Factor	<0.5 db
Phase Linearity	<5%
Carrier Rejection	>70 db
Ringing	>40 db
Insertion Loss	<3 db
Attenuation	>100 db
Phase Matching	closer than 3° (Filter to Filter) over environmental requ.
Temperature Tolerances	<0.005% (depending upon frequency)
Max. Operating Temperature Range	−55°C to +125°C
Shock & Vibration	All applicable MIL specifications

BULOVA LC FILTERS

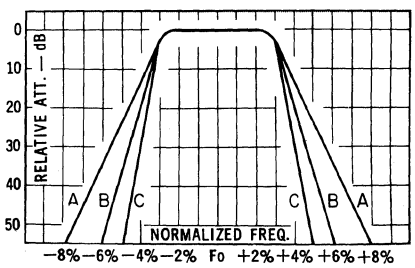
Computer Designed for Maximum Performance — DC to 50MHz

Pioneers in Time/frequency product design, Bulova has developed a diversified L C Filter product line that features ● Computer programmed performance characteristics ● Competitive pricing ● Custom product sophistication ● High-use, long-life reliability

A continuing effort in L C filter design for the selection and shaping of frequencies has culminated in the development of a unique series of filters, particularly engineered for spectrum analysers.

Filters With Excellent Shape Factor

High frequency filters with 45db/3db shape factors between 1.5/1 and 2.3/1. They are designed to operate between 100 ohm impedances and exhibit excellent temperature stability.



Comb Filters

Useful for such applications as spectrum analysis and available as standard items in contiguous banks from 10 Hz to 10 MHz.

IRIG BANDPASS FILTERS—Available from 400 Hz to 165 kHz with attenuation at ±7.5% of center frequency within 3 db in 21 channels. Eight other standard channels are available in frequency from 22 kHz to 165 kHz at ±15% 3 db points.

IRIG LOW PASS FILTERS—Low Pass and Linear Phase Low Pass filters are available in IRIG frequencies. The low pass are intended to attenuate the 2nd and higher harmonics of the incoming signal. Bulova's linear phase low pass filters attenuate the higher harmonics and provide minimum phase distortion and therefore low transient response. These filters are for 10k ohms terminating impedances.

TONE CHANNEL FILTERS—Bulova offers 18 standard tone filters ranging in channel frequencies from 424 Hz to 3315 Hz. They are available in both the narrower bandwidth receive and wider transmit telegraph tone channels.

DISCRIMINATOR TRANSFORMERS—Employing stable, high-Q components, Bulova Discriminator Transformers perform with an excellent stability and exceptional amplification and linearity.

BAND REJECT FILTERS—Some of the outstanding features of Bulova LC Band Reject Filters are their high discrimination and stability. This type of filter is available in a wide range of frequencies and shape factors . . . Bulova also specializes in LC and RC Notch Filters.

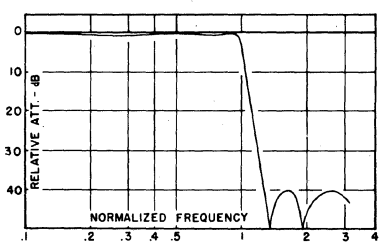
LUMPED CONSTANT DELAY LINES—Bulova custom designs Delay Lines to cover any practical impedance range. Keeping physical dimensions at a minimum, these networks feature low signal attenuation, excellent thermal stability, low pulse distortion and extended band width, achieving high delay-to-rise-time ratio.

MODULATORS—Modulators, covering a wide frequency range are also designed and manufactured to achieve maximum audio output features and high attenuation of undesired frequencies.

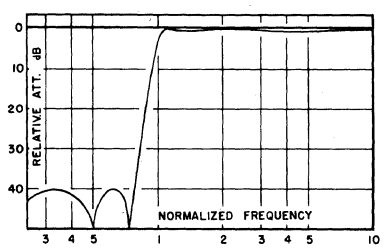
EQUALIZERS—Maintaining narrow tolerances, a wide selection of custom designed Amplitude and Phase (Delay) Equalizers have been developed to be used with transmission lines, amplifier networks etc. Bulova's engineering staff is always available to consult with you on design problems. Additional information on all networks is available upon request.

INTERSTAGE FILTERS—60 Hz to 20 kHz

Low Pass
Available up to 30 MHz



High Pass
Available in impedance from 50 ohms to 10 K ohms



Band Pass
Standard filters available with 600 ohm and 10 K ohm terminations. All have provision for terminating into grid circuit.

FORKS/OSCILLATORS/RESONATORS

A New, Low Cost Line Of Industrial/Commercial Tuning Fork Products

- Lightweight—Small Size
- Based upon 30 years of ATP Experience in Fork Design Capability
- For Industrial/Commercial Applications Where Price Is Critical

FORK RESONATORS AND FILTERS (encoders or decoders)

	TFB or TFA (Single Fork)	TTA (Dual Fork)
Center Frequency:	300 to 3000Hz	700 to 1500Hz
Frequency Stability:	±0.2% max.	±0.20% max.*
Operating Temperature:	−40°C to +60°C	−40°C to +60°C
Bandwidth: 3dB 6dB	0.3% 0.5%	0.35% 0.45%
Insertion Loss:	8dB max.	8dB max.
Ripple:	—	2dB max.
Impedance-In and Out:	50k to 200k ohms	50k to 200k ohms
In Moderate Quantities, priced as low as:	$5.00	$12.50 (considerably lower in large quantities)

STANDARD OSCILLATORS

	Type A6720	Type A6786
Frequency Range:	300 to 3000Hz	60 to 1500Hz
Frequency Accuracy:	±0.2% max.*	±0.2% max.*
Input Voltage:	10 to 16V DC	10 to 16V DC
Input Current:	1.0mA max.	12mA max.
Operating Temperature:	−40°C to +60°C	−40°C to +60°C
Output Voltage:	1.0V P-P into 5k ohms	1.0V P-P into 5k ohms
Wave Form:	Limited Sine	Square
In Moderate Quantities priced as low as:	$15.00	$30.00 (considerably lower in large quantities)

*.1% for narrow temperature ranges.
Countdown circuit, Type 6766, is available for dividing by 8.
Better frequency accuracies available.
Many other low cost versions available.

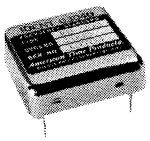
BULOVA FORK OSCILLATORS/RESONATORS

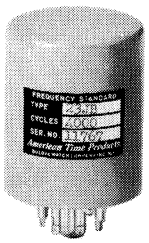
- From 1 Cps to 20 kHz (or lower)
- Accuracies up to ±.001%
- Unique capability to meet special custom requirements

Whatever your requirements for tuning forks and oscillators, Bulova has either the product available or the inherent capability to meet your need. Reliability, accuracy and size criteria can be quickly met, with appreciable savings in engineering time and production costs. Each product is founded on the same design experience that has made the ACCUTRON a by-word of precision and accuracy.

PRECISION OSCILLATORS

(Complete Standards)





Type	FS 200	FS 11	FS 27	FS 23 JB	FS 32

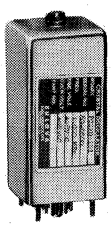
BULOVA CRYSTAL OSCILLATORS

Bulova offers a full line of crystal oscillators manufactured completely in-house from quartz to finished unit. Bulova provides a total capability from custom engineering to volume production, using the latest automatic test equipment and labor-saving production equipment.
Bulova's full line of crystal oscillators includes • miniature clock oscillators • high stability oscillators • temperature-compensated crystal oscillators (TCXO) • voltage-controlled crystal oscillators (VCXO) . . . using a full range of crystal cuts engineered and produced at Bulova. Units built to meet material, parts and environmental specifications of MIL-E-5400, MIL-E-4970 and MIL-E-16400 as required.

If one of Bulova's full line of crystal oscillators does not meet your requirements, we will modify one of our present models or design a unit to your specifications.

HIGH STABILITY CRYSTAL OSCILLATOR



PCOXO-101

The high frequency stability of these oscillators results from housing a high precision crystal and an oscillator circuit with AGC to maintain low constant crystal drive in a stable DC proportional control oven.

Features: Plug-in oscillator with stud mounting • Frequency trimming provided by a screwdriver adjustment.

MODEL	PCOXO-101	PCOXO-102	PCOXO-103	PCOXO-104
Frequency Range	1.0 or 5.0 MHz	1.0 or 5.0MHz	1.0, 3.0 or 5.0MHz	1.0, 3.0 or 5.0MHz
Ambient Range	−55°C to +70°C	−55°C to +70°C	−55°C to +70°C	−55°C to +70°C

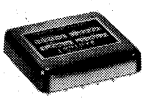
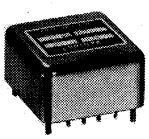
TEMPERATURE COMPENSATED CRYSTAL OSCILLATORS



TCXO-1



TCXO-5 & 30

Bulova temperature compensated crystal oscillators employ a computer selected and optimized variable capacitance diode and thermistor compensation network to maintain frequency stability over wide temperature ranges, without the use of an oven. They are designed for use in aerospace, military, and industrial applications where power, space and weight restrictions preclude the use of an oven for temperature stabilization.

Features: • No warmup time, due to elimination of oven • Low power consumption • Glass sealed crystal holder to minimize aging and ensure long life • Self-contained voltage regulator • All components derated for long life and high reliability • Hermetically sealed

MODEL	TCXO-1	TCXO-5	TCXO-30
Frequency Range	3MHz to 5MHz	3MHz to 5MHz	3MHz to 5MHz
Frequency Adjustment Range	±3PPM	±3PPM	±3PPM
Frequency Stability	±1PPM over Temp. Range of −40°C to +70°C	±0.5PPM over Temp. Range of −40°C to +75°C	±0.5PPM over Temp. Range of −55°C to +85°C
Aging Rate per week	$\pm 1PP10^8$	$\pm 1PP10^8$	$\pm 1PP10^8$
Power Input	18VDC ±2% at 150mw	12VDC ±10% at 50mw	12VDC ±10% at 50 mw

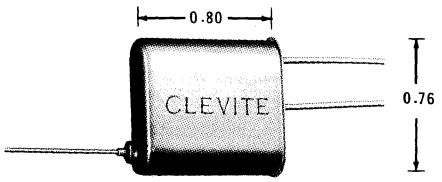
Clevite Quartz Filters

for the man with designs on something better.

Small, lightweight and rugged. Ideal for matching IC circuitry in communications receivers operating in the VHF and UHF frequency ranges as well as in telemetry, radar and aerospace systems.

Independent Mode Quartz Uni-Wafer Filter



Four-pole crystal filters with center frequencies of 10.7MHz, 15MHz 20MHz, and 30MHz. Except for termination, each filter is contained complete in a standard HC-6/U crystal can. Typical characteristics are: ripple 1db peak to valley and temperature stability ±.005 percent maximum from —40° to +85°C. Outstanding advantage is its small size (¾" x ¾" x ⅜"), light weight and good electrical isolation.

In addition, an independent mode filter gives higher spurious mode supression than a coupled mode filter. Special independent mode filters are also inexpensive to tool.

Independent Mode Uni-Wafer filters are smaller than standard quartz filters by a factor of at least three to one. They are characterized by fewer interconnections and higher selectivity per unit volume.

Specials are available as follows: 10.7MHz to 60MHz—bandwidths .02% to .3% of center frequency.

Independent Mode Quartz UW Filter

Model Number	Center Frequency (MHz)	Bandwidth 3dB (Min.) (kHz)	Bandwidth 40dB (Max.) (kHz)	Ultimate Attenuation (dB)	Impedance In & Out (ohms)
UW-2C10-10.7	10.7±1kHz[3]	2	10	55	470
UW-6C22-10.7	10.7±1kHz[3]	6	22	55	1200

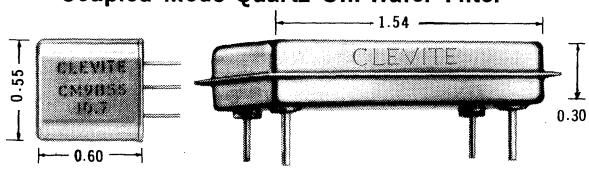
Coupled Mode Quartz Uni-Wafer Filter



Available in two-, four- and six-pole models with center frequencies ranging from 10.7MHz to 30MHz. These monolithic filters offer IC compatibility, low insertion loss and high stopband rejection. Standard two-pole models are provided in solderseal packages. Four- and six-pole filters are provided in coldweld packages.

They were developed using Clevite's original thin film approach to quartz filters. Arrays of resonators are achieved on a single quartz wafer. Spurious suppression is controlled by the trapped energy principle.

Performance of these computer designed filters is achieved by carefully controlled elastic coupling between metal plated regions.

Two-Pole Coupled Mode Quartz UW Filter

Model Number	Center Frequency (MHz)	Bandwidth 3dB(Min.) (kHz)	Bandwidth 30dB(Max.) (kHz)	Spurious Mode Rej. (dB)	Ripple Max. (dB)
CM9B55-10.7	10.7±1kHz	9	55	25	1.0
CM14B85-10.7	10.7±1kHz	14	85	25	1.0

CM14D35-30.0	30.0±2kHz	14	35	90	1.0
CM30D75-30.0	30.0±2kHz	30	75	80	1.5

Stability:
TIME ±.0007%/year
TEMP ±.005%

Operating Temp. Range:
—45°C to +85°C

	2-Pole Models	4-Pole Models	6-Pole Models
Insertion Loss	2dB	3dB	4dB
Ultimate Attenuation	50dB	80dB	100dB

IMPEDANCES: Terminating impedances will run between 500 ohms and 6000 ohms depending upon frequency and bandwidth. The 30kHz at 10.7MHz will be in the 6000 ohm range and the 9kHz at 30MHz will be in the 500 ohm range with all others in-between. Specific impedances will be determined at the time a design is finalized.

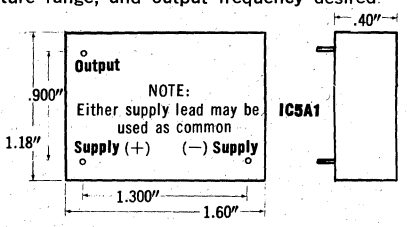
For more information, write for Bulletin 94028. Clevite Corporation, Piezoelectric Division, 232 Forbes Road, Bedford, Ohio 44146.

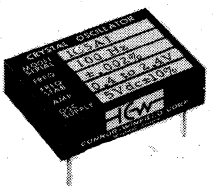
CLEVITE

CRYSTAL OSCILLATORS

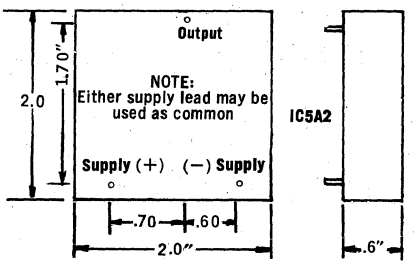
CRYSTAL CONTROLLED OSCILLATORS FOR IC SYSTEMS

These crystal oscillators are designed primarily for use with I.C. systems and are completely compatible with Series "930" as well as other I.C. devices. Priced equal to or lower than their larger equivalents, they provide low output frequencies with true crystal accuracy. Their operation is silent and the output frequency is not affected by mounting position or variation in "G" forces. A total of eight different Models provide five frequency accuracies and five temperature ranges as shown in the table below. The cost of a unit is determined by the frequency accuracy, temperature range, and output frequency desired.





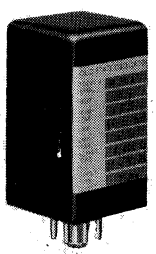
MODEL IC5A1



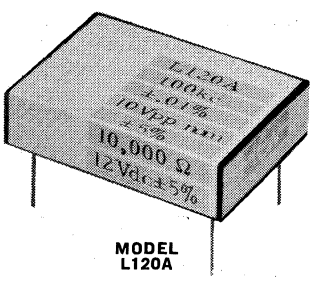
Square Wave Model	Sine Wave Model	Frequency Accuracy	Temperature Range	
			Degrees C	Degrees F
IC5A1	IC5A2	±.002%	+20 to +40	+68 to +104
IC5B1	IC5B2	±.005%	0 to +50	+32 to +122
IC5C1	IC5C2	±.005%	0 to +65	+32 to +149
IC5D1	IC5D2	±.01%	0 to +65	+32 to +149
IC5E1	IC5E2	±.01%	−25 to +70	−13 to +158
IC5F1	IC5F2	±.02%	−25 to +70	−13 to +158
IC5G1	IC5G2	±.02%	−55 to +70	−67 to +158
IC5H1	IC5H2	±.05%	−55 to +70	−67 to +158

Output Waveform:	Square Wave Duty Cycle 50% Rise Time <50ns	Sine Wave Distortion <5%
Frequencies Available:	1.0Hz to 500kHz	50Hz to 500kHz
Output Amplitude:	Logic Zero, <0.4V Logic One, >2.4V	3Vrms nominal into 10kΩ load
Supply Voltage:	5Vdc ±10%, 20ma to 100ma depending on frequency	
Termination:	Gold plated solder pins	

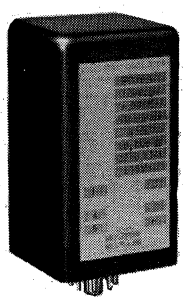
CRYSTAL CONTROLLED OSCILLATORS



MODEL P150A



MODEL L120A



MODEL P210A

Termination is indicated by Part No. prefix: P, Octal Plug; S, Solder Hooks; L, Gold Plated Pins.
Output signal 5Vrms nominal to 10,000 Ω load. Accessory power amplifiers are available up to 5 watts output. Typical supply voltage is 12VDC, but other voltages can be accommodated.

Model	Frequencies Available	Frequency Tol. over Temp. Range	Amplitude Stab. over Temp. Range	Temperature Range	Output Waveform	Size	Price Single Unit
P210N S210N	1Hz to 100kHz	±.001%	±2%	−55°C to +50°C oven stabilized	Square or Sine (specify)	2" x 2" x 3½"H	$128.00 to $283.00
P150T S150T	1Hz to 100kHz	±.002%	±2%	+20°C to +40°C	Square or Sine (specify)	1½" x 1½" x 2½"H	$113.00 to $233.00
P150N S150N	1Hz to 100kHz	±.005%	±5%	0°C to +50°C	Square or Sine (specify)	1½" x 1½" x 2½"H	$ 98.00 to $208.00
P150A S150A	1Hz to 100kHz	±.02%	±5%	−25°C to +85°C	Square or Sine (specify)	1½" x 1½" x 2½"H	$ 73.00 to $193.00
L120A	15kHz to 1MHz	±.005%	±5%	0°C to +50°C	Square, duty cycle 50%	1.6" x 1.2" x 0.4"	$ 58.00 to $ 73.00
L220B	200Hz to 500kHz	±.005%	±5%	0°C to +50°C	Sine, <5% distortion	2" x 2" x 0.6"	$98.00 to $183.00

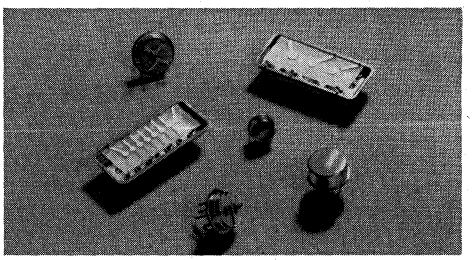
Damon... the form-factor specialists in crystal filters, oscillators, monolithics.

Whatever your signal-shaping needs . . . from a narrow band-reject "spike" to a broad band-pass . . . you can rely on the form-factor specialists at Damon. Computer assisted custom designs. Production quantities. Frequency selection from 10 KHz to 75 MHz. Bandwidths from 10 Hz to 400 KHz. Competitive pricing. You name it. Damon will deliver it — on schedule. Here are five examples typical of Damon's broad capability in frequency control devices:

Monolithic Crystal Filters

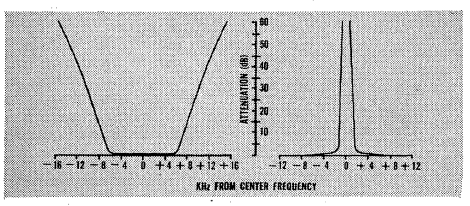
Damon Monolithic Filters utilize a single quartz plate for multiple resonators and the coupling medium between them. Advantages over conventional crystal filters include smaller size, superior stability, and lower cost. Available in a wide variety of computer-assisted designs from Chebyshev to Gaussian characteristics and from 2 to 8 poles.



Center Frequency .....3 - 30 MHz
3 dB Bandwidth .....0.3 - 30 KHz
No. of Coupled Resonators .....2 - 8
Insertion Loss .....1 - 6 dB
Ripple .....0.5 dB max
Terminations .....50 ohms to 20 kilohms
Size .....TO-5, TO-8, or Flat-Pack

Band-Pass/Reject Crystal Filters

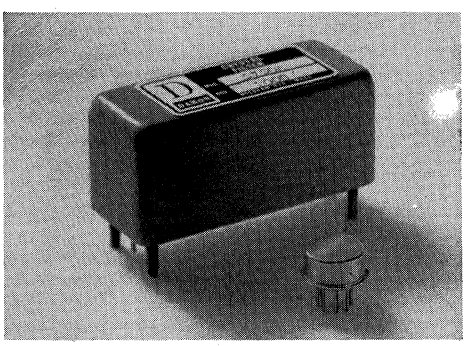
A wide variety of conventional crystal filters are produced at Damon Engineering. Standards designs such as Butterworth, Chebyshev, Gaussian, Bessel, and Legendre, as well as custom tailored designs are available.



RANGE OF PARAMETERS:
Center Frequency .....10 KHz - 75 MHz
Bandwidth ..... .01% - 3% of C. F.
Phase Linearity .....± 5%
Transient Overshoot .....40 dB down
Shape Factor .....down to 1.4:1
Differential Phase Shift .....±2°
Group Delay Uniformity .....±5%

Gaussian Crystal Filters

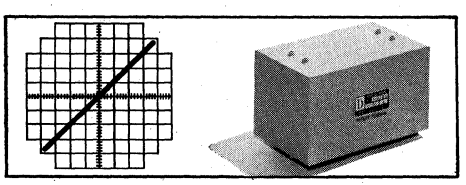
Gaussian Crystal Filters of either conventional or monolithic design. Useful in FM communications or radar systems where flat time delay is required. In a coherent pulsed radar, it can minimize return-pulse overshoot. Eliminates ringing problems in swept spectrum analysis. Available in 2 to 6 pole designs.



Center Frequency
Conventional .....100 KHz - 35 MHz
Monolithic .....3 - 30 MHz
3 dB Bandwidth .....100 Hz - 30 KHz
Shape Factor,
30 dB to 3 dB .....3:1 to 7:1
Ringing, Pulse or
Impulse .....25 - 40 dB down
No. of Poles
Conventional .....2 - 6
Monolithic .....2 - 4
Volume
Conventional .....1 - 6 cu. in.
Monolithic .....0.016 - 0.4 cu. in.

VCXO's — 50 KHz to 100 MHz

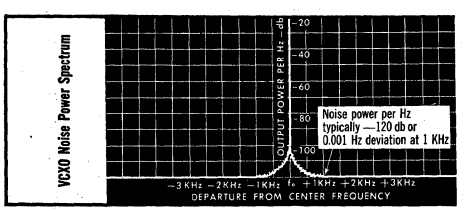
Damon VCXO's provide high stability over a broad range of center frequencies. An optional square wave or pulse output signal compatible with I. C. Logic Circuits is available.



Center Frequency .....50 KHz to 100 MHz
Deviation ..... .01% to 0.2% of Center Frequency
Linearity .....1% to 2% of Peak Deviation
Frequency Stability ....1% of Peak Deviation over 0° to 50°C temp. range

Low Noise VCXO's

Damon low noise miniaturized VCXO's are all solid state quartz crystal stable oscillators whose frequencies can be varied linearly by an external DC or AC modulating signal. Only a source of power and control signal are required . . . no auxiliary compensating circuitry.



TYPICAL CHARACTERISTICS:
Center Frequency .....10.000 MHz ±1 KHz
Deviation .....±10 KHz
Linearity .....±1%
Modulation Rate .....Flat to 4 KHz
Output Power .....>1 MW

CRYSTAL DISCRIMINATORS

Crystal discriminators offer high sensitivity and excellent linearity in addition to the same characteristic attributes of crystal filters: compact size, rugged construction, precise and stable performance.

ULTRA-STABLE CRYSTAL DISCRIMINATORS

Typical Specifications
Center Frequency: 10.0MC ± 50 Hz
−55°C to +70°C
Center frequency adjustable with external DC Bias.
Peak to peak bandwidth − 80 KHz
Linearity: ± 3% over ± 10KHz deviation
Sensitivity: 20 MV per 100 Hz deviation with 3.0V RMS open circuit input.
Source Impedance: 500 Ohms
Load Impedance: 100K Ohms
Oven Voltage: 28 VDC
Dimensions: 4″ x 2.5″ x 2″

AL-14 DISCRIMINATOR

Center Frequency: 11.5MC ± 1.5KC −40°C to 65°C
Peak to Peak BW: 50 KHz Minimum
Distortion (total harmonic): 3% max with 10 KHz deviation and 1 KHz modulation rate
Input: 350 MV across 390 Ohms
Output: 120 MV min across 100K Ohms

ZC-28U AND ZC-29L SYMMETRICAL SSB FILTERS

One filter gives upper and lower SSB operation by simply switching carrier crystal frequency.
Typical specifications
Center Frequency Range: 1 to 3 MHz
Passband: 3db min BW 2.75 KHz
Shape Factor: 60db/3db = 1.4 : 1 max
Carrier Suppression (either side): 25 db min +300 Hz or −300 Hz from 3db frequency
Unwanted sideband suppression: 60db min at +300 Hz or −300 Hz from carrier frequency
Passband Ripple: ± 1db max
Insertion Loss: 6db max
Nominal Impedance: 50 Ohms in and out
Dimensions: 3.13 x 1.44 x 1.77 inches

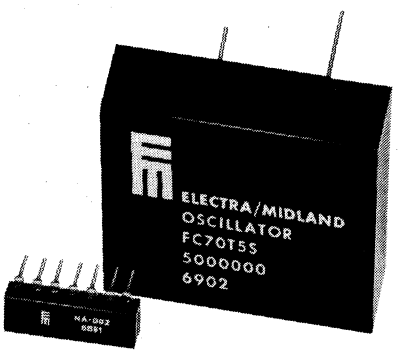
THICK FILM IF FM AMPLIFIER − NA005

This amplifier can be used with a crystal filter to provide complete "IF Strip" to include selectivity, amplification, limiting, and AGC for controlling RF Amplifier gain. It requires minimum power so is an excellent choice for mobile/portable FM communication application as 10.7 MHz. IF amplifier.

1. Voltage Gain:	**85 db**
2. Freq. Response:	**4 MHz. to 12 MHz.**
3. Input Power:	**4.2 VDC, 56 mw**
4. Output Impedance:	**500 ohms**
5. Input Impedance:	**500 ohms to 2k ohms**
6. AGC Out:	**.25 to 1.5 VDC**
7. Limiting:	**2V PP out for 75 μv input**
8. Package:	**Hermetic, .335″ D x 1″ L.**

TO ORDER, SPECIFY: NA005/Center Frequency/Input Impedance

CRYSTAL CONTROLLED CLOCK OSCILLATOR



This device is a crystal controlled fixed frequency Square Wave Oscillator for use as Master Clock in Digital Systems. It exhibits excellent rise/fall time characteristics, compatible with T^2L Logic. NOTE: It is available in Thick Film DIP, plastic or hermetically sealed, complete with crystal, or encapsulated P/C Mount.

ELECTRA/MIDLAND CORPORATION
MIDLAND DIVISION
3151 Fiberglas Road, Kansas City, Kansas 66115

ELECTRA/MIDLAND HAS A UNIQUE PROCESS FOR SEALING CRYSTALS SO THEY WILL LAST LONGER AND PERFORM BETTER FOR YOU.

Traditionally, crystals have been sealed by the old solder and flux method... a method with two major disadvantages. First, it is impossible to insure that no flux vapors enter the can and deposit on the crystal itself. This contamination contributes to high aging rates and poor frequency stability. Secondly, small balls of solder are often formed inside the solder-sealed enclosure in final processing. These can cause intermittent operation, or short-circuit the crystal unit to the can.

Recognizing this, Electra/Midland has developed an all new process using a resistance-welded seal.

We use a crystal can made of nickel and a crystal base with glass-to-metal seals. When the crystal has been mounted on the base and the base on the can, we connect one low resistance electrode to the can and a second one to the crystal base. In less than one second, electrically produced heat hermetically seals the crystal can.

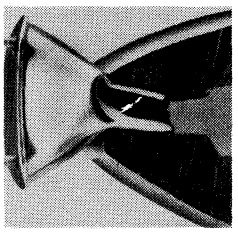
The weld is produced so quickly that virtually no heat reaches the quartz blank... thus allowing precision frequency settings with high consistency.

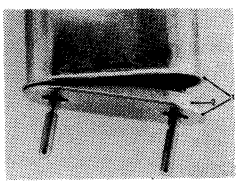
Crystals sealed by resistance-welding exhibit low aging rates because the seals are perfect to begin with, they are contaminant free, and because the weld will not deteriorate or fracture—thus air and moisture never reach the crystals to age them.

Some work has been done with cold-welds and glass fusing, but only Electra/Midland's resistance-weld process will produce crystals with a high reliability factor at solder seal prices.

This exclusive process is the result of extensive research by Electra/Midland engineers, designed to bring you the highest quality crystals at the lowest possible prices.

An hermetic seal that cannot be broken—even after extensive use—is formed.





Electra/Midland seals base to can with a single, continuous resistance weld.

The Type **HC-13** is a hermetically sealed, metal holder that accommodates crystals in the frequency range of 4 KC to 200 KC. Its size is determined by the very low frequency range in which it is used and its terminals are of the plug-in type.

The Type **HC-10** is a hermetically sealed, metal holder that is usually supplied for crystal Type CR-24, which operates in the frequency range of 15 MC to 50 MC. It is furnished with metal stud terminations which plug into a spring-clip holding device. This type of crystal holder is specified for crystal Type CR-24/U under the latest military specifications.

The Type **HC-27** is a glass holder in which the crystal is hermetically sealed under vacuum. Crystals in glass holders are utilized where higher reliability is required. Such crystals provide better aging stability and visual quality assurance. These crystals can be furnished in a frequency range from 1 to 150 MC. Also available with wire leads.

The Type **HC-26** is also a glass holder but in miniature size. It accommodates crystals in the frequency range of 5 to 150 MC. Also available with fixed pins.

The Type **HC-6** is a hermetically sealed, metal holder that accommodates crystals in the frequency range of 200 KC to 150 MC. It is used in most applications where adequate space is available and a plug-in unit is preferred. This type also available with wire leads.

The Type **ML-12** is a miniature, hermetically sealed, metal holder that accommodates crystals in the frequency range of 1 MC to 150 MC. It is intermediate in size between Type HC-18 and Type HC-6 and is used where a plug-in unit is preferred for ease in changing units. This type also available with wire leads.

The Type **HC-18** is a miniature, hermetically sealed, metal holder that accommodates crystals in the frequency range of 5 MC to 150 MC. Identical to the HC-25, it also is used where space is at a premium but is supplied with wire leads when soldered connections are preferred.

The Type **HC-25** is a miniature, hermetically sealed, metal holder that accommodates crystals in the frequency range of 5 MC to 150 MC. It is used where space is an important factor and a plug-in unit is preferred for ease in changing units.

THERMOSTATS

Snap Action - ERT-S1

Long life, inexpensive thermostats for commercial or military applications.

- ★ Snap Action of bi-metal disk and wiping action of switch contacts insures long contact life and minimum radiation interference.
- ★ Temperature is pre set and not adjustable.
- ★ A dust shield insures reliability.
- ★ Switch contacts are electrically isolated from thermostat case.
- ★ All thermostats are precisely tested for open and close temperatures.
- ★ Thermostats are guaranteed for 100,000 cycles with 10 amp resistive load.
- ★ Crystal and component ovens.

TYPICAL APPLICATIONS

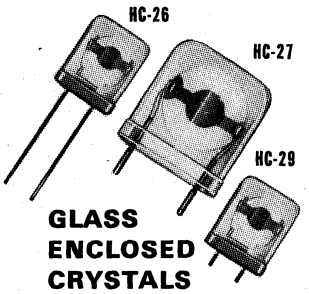
- ★ Temperature overload protectors for motors, relays, etc.
- ★ Household appliances such as electric blankets, heaters, dryers, freezers, refrigerators, etc.

TYPICAL TEMPERATURE SETTINGS		
Set Tolerance Norm Close	Set Tolerance Norm Open	Differential Range
± 5°F	± 10°F	10°F to 40°F

Temperature Range 140°F to 212°F

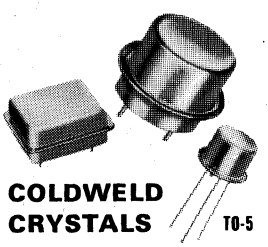
CRYSTALS

ERC produces crystals in all frequency ranges from 2 kHz to 180 mHz for telephone, computer, aircraft and radio communication industries. Our Quality Products List (QPL) currently includes low frequency, high frequency and glass enclosed crystals.



GLASS ENCLOSED CRYSTALS

supply the design engineer with the maximum in reliability and crystal Q. Minimum drive level requirements and reduction of contaminants due to improved sealing techniques, insures high stability and minimum aging. Besides improved reliability, glass provides better long term aging stability and visual quality analysis. As a high reliability replacement for the accepted HC-6/u, HC-18/u, HC-25/u holder, these units are directly interchangeable in existing equipment.



COLDWELD CRYSTALS

provide better long term aging stability with improved sealing techniques. These units are available in various sizes and configurations depending on frequency and mounting requirements. The coldweld technique eliminates possible contamination of the metal enclosure due to soldering fluxes and avoids adverse changes of high temperature effects due to heat transfer during sealing. Units will meet environmental conditions as specified by MIL-C-3098-E.

LC FILTERS

ERLC 1187 Low Pass

CENTER FREQUENCY: 80.0 mHz
.5 db PASS BAND: dc to 80.000 mHz
RIPPLE: .5 db peak to valley
STOP BAND: Attenuation 50 db min. at 111.455 mHz with a 60 db ultimate attenuation extending to 5 times the cut off frequency and a 30 db ultimate attenuation extending from 5 times the cut off frequency to 1 GHz
INPUT and OUTPUT IMPEDANCES: 50 ohms
INSERTION LOSS: .5 db
INPUT LEVEL: Up to 2 watts
TEMPERATURE RANGE: — 45° to +80°C
SIZE: 1 x 2¼ x 3

ERLC 1170 Bandpass

CENTER FREQUENCY: 37.5 kHz
LOWER 3 db BANDWIDTH: 30 kHz max.
UPPER 3 db BANDWIDTH: 45 kHz min.
30 db BANDWIDTH: 30 kHz max.
60 db BANDWIDTH: 60 kHz max.
INSERTION LOSS: Less than 3 db
RIPPLE: Less than 1 db
INPUT and OUTPUT IMPEDANCES: 10k ohms
INPUT VOLTAGE: 10 v
TEMPERATURE RANGE: — 20° to 65°C
(The rejection is at least 60 db from 0 to 200 kHz except on the skirts or in the passband and filter will not ring with 1 vrms, 1 kHz or sinewave)
SIZE: 1.490 x .590 x .790

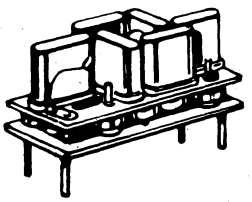
ERLC 1179 Band Suppression

CENTER FREQUENCY: 12.0 kHz
FREQUENCY RESPONSE: 1 kHz to 11 kHz within .5 db over the ambient range; 11.95 to 12.05 kHz down 50 db min. below response; 13 kHz to 2.5 mHz within .5 db @ +25°C within 1.0 db over the ambient range
INPUT and OUTPUT IMPEDANCES: 75 ohms
INSERTION LOSS: 3 db max. at the frequency of min. attenuation in the passband of 12.6 kHz to 2.5 mHz
POWER: 1 mw continuous
TEMPERTURE RANGE: 0° to +50°C
SIZE: 3¾ x 1⅛ x 7¾

ERLC 4000 Low Pass ACTIVE Filter

TYPICAL CUT OFF FREQUENCIES: 75, 300, 1280, 2400 Hz
MAXIMUM INPUT: 12v P to P
INPUT IMPEDANCE: 10k ohms min.
OUTPUT IMPEDANCE: 1.0 ohm
LOAD: 5k in parallel with 100 uuF
POWER SUPPLY: ± 15 vdc, ± 1.0 vdc, ± 6.0 ma max.
PASSBAND FLATNESS: ± .2 db from 0 to .7 Fc. +.2 db max. from .7 Fc to Fc — 1.0 db ± 5 db @ Fc
STOPBAND REJECTION: — 18.0 db min. @ 2.5 Fc — 36.0 db min. @ 5.0 Fc
PHASE SHIFT: @ +25°C, 248° ± 3° Fc from —30°C to +85°C, 248°, ± 4.5° @ Fc
GAIN: 1.0 ± 2% from 0 to .2 Fc
NOISE OUTPUT: 15 microvolts Rms max. from 10 Hz to 50 kHz
TEMPERATURE RANGE: — 30° to +85°C
SIZE: 1.12 x 1.12 x .60

CRYSTAL FILTERS



ERXF 17700 Linear Phase

CENTER FREQUENCY: 15 mHz
TEMPERATURE RANGE: — 40° to 70°C
LINEAR PHASE BANDWIDTH: 35 kHz min.
3 db BANDWIDTH: 80 kHz max.
40 db BANDWIDTH: 900 kHz max.
INSERTION LOSS: 3 db max.
PHASE SLOPE @ CENTER FREQUENCY: 5.6 msec.
SOURCE IMPEDANCE: 50 ohms
LOAD IMPEDANCE: 300 ohms
SIZE: 1.953 x .594 x .800

ERXF 18400 Spectral Purity

CENTER FREQUENCY: 60 kHz ± .6 Hz
3 db BANDWIDTH: 4 Hz ± 1 Hz
40 db BANDWIDTH: 1 kHz max.
ULTIMATE ATTENUATION: 40 db min.
INERTION LOSS: 4 db max.
INPUT and OUTPUT IMPEDANCE: 600 ohms
RIPPLE: .5 db max.
PROPORTIONAL CONTROL OVEN: 24 vdc, 12 watts max. 4 watts @ +25°C
TEMPERATURE RANGE: — 30°C to 60°C
SIZE: 4.5 x 2.5 x 1.75 max.

ERXF 11500 Airborn

CENTER FREQUENCY: 75.0 mHz
6 db BANDWIDTH: ± 12 kHz min.
40 db BANDWIDTH: ± 150 kHz max.
70 db BANDWIDTH: ± 400 kHz max.
RIPPLE: 3 db max.
ULTIMATE ATTENUATION: 70 db. min.
SPURIOUS ATTENUATION: 70 db min.
INSERTION LOSS: 6 db max.
SOURCE IMPEDANCE: 50 ohms
LOAD IMPEDANCE: 500 ohms
TEMPERATURE RANGE: — 55° to 90°C
SIZE: 1.0 x 2.187 x .750

ERXF 10800 Discriminator

CENTER FREQUENCY: 8.8 mHz
BANDWIDTH P to P: ± 20 kHz
LINEARITY: 9% over ± 20 kHz
SOURCE IMPEDANCE: 50 ohms
LOAD IMPEDANCE: 100k ohms
SENSITIVITY: ± 1 v at ± 20 kHz
TEMPERATURE: — 55°C to 110°C
SIZE: 1.75 x 1.25 x 0.50

OSCILLATORS..... TIME BASE OVENS....

TCXO

EROS 600—SL4

FREQUENCY: 5.0 mHz
STABILITY: ± 0.5 ppm, — 32° to 62°C
AGING: 1 ppm/year
ADJUSTMENT: Sufficient for 5 years aging
SHORT TERM STABILITY: Not more than 2 x 10^{-9} for a one second average aging period
VOLTAGE: +17 vdc ± .85v
POWER: Less than 100 mw
SPURIOUS: Non harmonics down 80 db harmonics down 30 db
OUTPUT: Sine wave, 1.5 v p to p into 470 ohms
SIZE: 3.635 x 1.938 x .750

EROS 600—SL23

FREQUENCY: 1.0 mHz
TEMPERATURE STABILITY: ± 2.5 x 10^{-6} over 0° to +50°C
AGING: 1 x 10^{-8} per day
SUPPLY VOLTAGE: +15 vdc ± 3% .5 watts max.
OUTPUT WAVEFORM: Sine wave, 20% max. distortion
OUTPUT VOLTAGE: TTL output
FREQUENCY ADJUSTMENT: Sufficient for 2 years aging
SIZE: 2 x 2 x .750

EROS 800—SL3

FREQUENCY: 12.8 mHz
FREQUENCY TOLERANCE:
± 1.5 x 10^{-6} over — 54° to — 29°C
± 0.5 x 10^{-6} over — 30° to +70°C
± 2 x 10^{-6} over +71° to +105°C
AGING: Less than 2 x 10^{-8} per week when measured @ +25°C
SHORT TERM DEVIATION: Less than 1 x 10^{-9} for 10 sec. average
WARM UP: 5 seconds to within 5 x 10^{-7}
INPUT: +12 vdc regulated or — 12 vdc and/or +5v with common ground .5 watts max.
OUTPUT: 1 vrms into 1k ohm ± 20% sine wave
HARMONIC DISTORTION: Does not exceed 3%
ADJUSTMENT: Sufficient for 10 years aging
ESTIMATED MTBF: 15,000 hours
WEIGHT: 6 oz. max.
HEADER: Miniature 7 pin solder
SIZE: 1.875 x 1.875 x 4.0

EROS 600—SL1

FREQUENCY: 40.755 mHz
SHORT TERM STABILITY: 10 Hz max. @ +25°C during any 10 sec. period
LONG TERM STABILITY: ± 125 Hz of nominal for min. operational period of 22.5 hrs.
POWER OUTPUT: 2 mw into 50 ohms, lv P to P min.
SPECTRAL PURITY:
Harmonics 20 db max.
Spurious 20 db max.
INPUT: 12 vdc ± lv, 20 ma max.
ADJUSTMENT: ± 125 Hz min. over 225 hrs min.
TEMPERATURE RANGE: — 54° to +90°C
WARM UP: 1 minute under std. conditions, 3 minutes under extreme conditions
WEIGHT: 3 oz. max.
SIZE: 2 x 1 x 1

VCXO

EROS 750—SL35

FREQUEICY: 12.0 mHz (settable to within ± 12 Hz)
DEVIATION : ± 10 kHz peak
SENSITIVITY: 10 kHz/v ± 10%
RATE: 300 to 4000 Hz ± 1db
LINEARITY: Within 1% of best straight line
MODULATION INPUT IMPEDANCE: 600 ohms ± 10% resistive
OUTPUT POWER: — 4 db adjustable ± 3db
LOAD IMPEDANCE: 50 ohms ± 5%
VOLTAGE: +19.5 ± 1%
HEATER POWER: 22-28v unregulated, 10 watts
WARM UP: ± 10 ppm of nom. freq. after 20 min. at 25°C
AGING:
3.5 ppm for the 1st 6 months
1.5 ppm for the 2nd 6 months
STABILITY: 10 ppm max. over — 32° to +80°C
SIZE: 2.5 x 2.0 x 1.75

EROS 400—SL38

FREQUENCY: 11.6 mHz
FREQUENCY DEVIATION RANGE: ± 5 kHz
FREQUENCY STABILITY: ± .005% 0° to 60°C
± .01% — 32°C to +80°C
AGING: ± .0025% per year
SHORT TERM STABILTY: 10^{-8} over 10 Msec.
DEVIATION RATE: dc to 3 kHz ± 1db
CONTROL VOLTAGE: +6 vdc
SENSITIVITY: — 1.5 kHz/v ± 10%
LINEARITY: Within 3% of best straight line from 0° to 60°C and within 5% — 32°C to +80°C
MODULATION INPUT IMPEDANCE: 50k ohm ± 10%
OUTPUT: +7 dbm ± 1 db
LOAD IMPEDANCE: 50 ohms
POWER REQUIREMENTS: +19.5 ± .5 vdc, 10 ma max.
ADJUSTMENT RANGE: ± .015%
SIZE: 2.25 x 2.25 x .75

EROS 400—SL3

CENTER FREQUENCY: 60 mHz
FREQUENCY DEVIATION: ± 100 kHz
ADJUSTMENT RANGE: ± 5 kHz
FREQUENCY STABLIITY:
± 1 ppm/day after 1 week warm up
± 10 ppm/day after 1 hour warm up
LINEARITY: ± 2%
DEVIATION RATE: dc — 100 kHz
CARRIER SECOND HARMONIC SUPPRESSION: 30 db
OUTPUT POWER: 0 dbm min. into 50 ohms ± 10%
OUTPUT LEVEL STABILITY: ± 1.5 db 0 to 65°C
MODULATION SENSITIVITY: Between 4 kHz/v and 20 kHz/v
SIZE: 2.5 x 3.5 x 1.5

EROS 700—SL20

FREQUENCY: 10.005 mHz ± .001% @ 27°C ± 1°
FREQUENCY DEVIATION: ± 10 kHz
VOLTAGE SENSITIVITY: 2.5 kHz/v from — 2.0 to +6.0 vdc
FM DISTORTION: Less than 2% of the level of any frequency between 300 Hz and 3 kHz deviated from a 7.5 kHz peak
INPUT IMPEDANCE: 10k ohms min.
STABILITY: Less than ± .002% from — 40° to +85°C
LONG TERM DRIFT: Less than .001% after 30 days
POWER SUPPLY: +18 v and 28 vdc
OUTPUT POWER: 7 mw ± 2 mw into 50 ohms
OUTPUT WAVEFORM: Sine, less than 15% distortion
WARM UP: 10 minutes max.
SIZE: 3.0 x 2.0 x 1.40

EROS 800—S5

FREQUENCY: 1 mHz or 5 mHz
FREQUENCY ADJUSTMENT: Sufficient for 5 years aging
AGING: 5 x 10^{-10}/day
CRYSTAL TYPE: High precision, glass enclosed
STABILITY: ± 2 x 10^{-10} per degree C from 20°C to 65°C
LINE VOLTAGE STABILITY: ± 1 x 10^{-9} for ± 5% change
OVEN SUPPLY: 28 vdc
WARM UP TIME: 1 x 10^{-8} after 1 hour
INPUT: 26 volt dc. 500 ma max.
OUTPUT VOLTAGE: 1 vrms into 500 ohms
OUTPUT WAVEFORM: Sine wave
OVEN: Proportional control
HEADER: Octal
SIZE: 2 x 2 x 4

EROS 800—S1

FREQUENCY: 1 MHz or 5 MHz
FREQUENCY ADJUSTMENT: Sufficient for 5 year aging
AGING: 1 x 10^{-9}/day
CRYSTAL TYPE: High precision, glass enclosed
STABILITY: ± 2 x 10^{-10} per degree C from 20°C to 65°C
LINE VOLTAGE STABILITY: ± 1 x 10^{-9} for ± 5% change
OVEN SUPPLY: 28 volt dc
WARM-UP TIME: 1 x 10^{-8} after 1 hr.
INPUT: 26 volt dc, 500 ma max.
OUTPUT VOLTAGE: 1 volt rms into 500 ohms
OUTPUT WAVEFORM: Sine Wave
OVEN: Proportional control
HEADER: Octal
SIZE: 2 x 2 x 4 h

EROS 800—S2

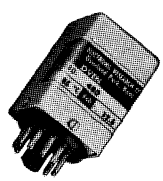
FREQUENCY: 1 MHz or 5 MHz
FREQUENCY ADJUSTMENT: Sufficient for 2 years aging
AGING: 3 x 10^{-9}/day
CRYSTAL TYPE: High precision, glass enclosed
STABILITY: ± 2 x 10^{-10} per degree C from 20°C to 65°C
LINE VOLTAGE STABILITY: ± 1 x 10^{-9} for ± 5% change
OVEN SUPPLY: 28 volt dc
WARM-UP TIME: 1 x 10^{-8} after 1 hr.
INPUT: 26 volt dc, 500 ma. max.
OUTPUT VOLTAGE: 1 volt rms into 500 ohms
OUTPUT WAVEFORM: Sine Wave
OVEN: Proportional control
HEADER: Octal
SIZE: 2 x 2 x 4 h

EROS 800—S3

FREQUENCY: 1 MHz, 3 MHz or or 5 MHz
FREQUENCY ADJUSTMENT: Sufficient for 5 years aging
AGING: 1 x 10^{-8}/day
CRYSTAL TYPE: High precision, glass enclosed
STABILITY: ± 5 x 10^{-10} per °C from — 20°C to 65°C
LINE VOLTAGE STABILITY: ± 5 x 10^{-9} for ± 5% change
OVEN SUPPLY: 28 volt dc
WARM-UP TIME: 1 x 10^{-8} after 1 hr.
INPUT: 28 volt dc 500 ma max.
OSCILLATOR VOLTAGE: 15 volt dc to 28 volt dc
OUTPUT VOLTAGE: 1 volt rms into 500 ohms
OUTPUT WAVEFORM: Sine wave
OVEN: Proportional control
HEADER: Octal
SIZE: 2 x 2 x 4 h

AC or DC—

ERC produces a complete line of component and crystal ovens with a history of over 3,000 designs and configurations that employ Solid State Temperature Control, Proportional Control, Snap-Action and Mercury Control. Proportional controlled units are available with external adjustments that set temperature to within 0.1°C over a possible 20°C temperature range for precision oscillator of solid state device application. All units are for either AC or DC applications.



ERO—710 Solid State Adjustable

CAVITY: One HC-6/u
HEADER: Octal
TEMPERATURE SETTING: 50°C to 95°C
SETTING TOLERANCE: ± 0.1°C
WARM-UP: 30 min. from — 30°C
VOLTAGE: 6 to 120 volt AC, 12 to 28 volt DC
POWER: 6 watts
SIZE: 1.437 x 1.875 x 3.437

ERO—480 Snap Action

CAVITY: Eight HC-25/u
HEADER: Octal
TEMPERATURE SETTING: 60°C, 75°C, 85°C are standard
SETTING TOLERANCE: ± 2.5°C at 25°C ambient
WARM-UP: 10 minutes at 25°C ambient
VOLTAGE: 6 thru 120 volts, AC or DC
POWER: 2.5 watts average
SIZE: 1.3125 x 1.3125 x 1.125

ERO—160 Solid State SCR

CAVITY: One HC-6/u
HEADER: Octal
TEMPERATURE SETTING: 60°C, 75°C, 85°C are standard
SETTING TOLERANCE: ± 2.5°C at 25°C ambient
WARM-UP: Within 0.1°C in 15 min. at 25°C ambient
VOLTAGE: 6 thru 120 volts AC
POWER: 2 watts average
SIZE: 1.5 OD x 2.75 seated

THOUSANDS OF FREQUENCIES

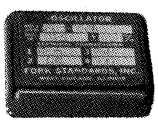
Precision Oscillators

Fork Standards tuning fork and crystal oscillators provide high-accuracy outputs at frequencies from sub-audio through RF. Case sizes range from miniature PC board-mount types to plug-in, oven-stabilized frequency standards. Both square wave and sine wave outputs are available.

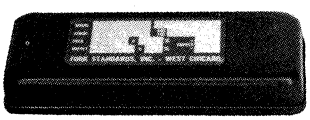
Tuning forks are limited to frequencies up to about 15 kHz, and are generally preferred for low-frequency applications because they require less frequency-division circuitry than an equivalent crystal unit. A low-frequency tuning fork oscillator is thus more compact, draws less current, and is usually less expensive and more reliable than a low frequency crystal unit. However, for highest accuracy or for higher frequencies, crystals are preferred.

The Fork Standards oscillators which are specified most often are described below. The data in the table, along with the accuracy versus temperature range and output waveform information on the following page, enables you to specify the exact oscillator you require.

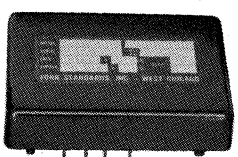
Model G, GQ
(base 1½" Sq.)



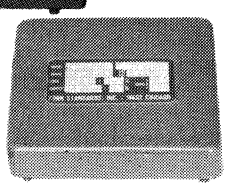
Model FO, FR
(base 1½" Sq.)



Model P, PQ
(base 1½" x 3½")



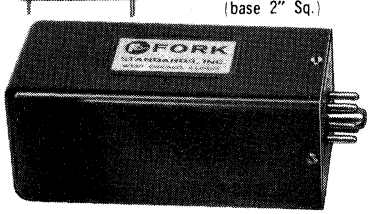
Model W, WQ
(base 2 7/16" x 2½")



Model R, RQ
(base 3 7/16" Sq.)

Model UQ
(base 1½" Sq.)

Model DQ
(base 2" Sq.)



MODEL G: Plug-in general purpose unit with very-low-frequency capability. Also available with studs and solder hooks.

MODEL FO: Very compact, designed for printed circuit board applications. Use where space is at a premium.

MODEL P: Larger printed circuit board unit than Model FO. Increased capabilities and slightly lower unit cost. Can be chassis mounted.

MODEL W: Similar to Model P, except case proportions changed to adapt to different board layout requirements.

MODEL R: Largest PC board mount model, with lowest case profile at sub-audio frequencies.

MODEL FR: Tuning fork resonator in F case. For use where user provides oscillator circuitry, or as a highly selective audio filter element.

MODEL GQ: General-purpose plug-in crystal oscillator, with output frequencies down to .125 Hz. Can be supplied with studs and solder hooks.

MODEL UQ: Smallest crystal unit, designed for PC board mount. PC pins hold unit to board. Vernier frequency adjustment available.

MODEL PQ: General-purpose flat case unit for PC board or chassis mounting. Larger case volume than UQ.

MODEL WQ: Similar in volume to Model PQ, but base proportioned differently and designed for PC board use only.

MODEL RQ: Largest board-mounted crystal model, with lowest profile in sub-audio frequency range.

MODEL DQ: Available with either snap-action or proportional control oven, plug-in or stud-mounted base with solder hooks. Accuracy to .0005% or better over extreme temperatures.

TUNING FORK OSCILLATORS

Model	Frequency Range	Output	Height	Price
G	2 Hz to 15 kHz	Square	2½"	$ 59 up
	.017 Hz to 2 Hz	Square	3½"	134 up
	100 Hz to 15 kHz	Sine	2½"	74 up

DQ	.125 Hz to 10 MHz	Either	4"	$134 up

CUSTOM OSCILLATORS

Fork Standards builds many oscillators to customer's specifications on special order. Non-standard output waveforms, multiple output frequencies, special cases and terminals are available with prompt delivery at competitive prices.

For an immediate quotation on your specific requirements call your local Fork Standards representative or the factory today.

Fork Standards, Inc. 213 Main Street, West Chicago, Illinois 60185 — (312) –231-3511

FROM FORK STANDARDS, INC.

Specifying a Fork Standards Oscillator:

A Fork Standards specification number completely describes the oscillator to which it refers. Conversely, a specification number may be determined whenever an oscillator requirement is completely defined. The parameters required are:

1. Frequency
2. Accuracy
3. Temperature Range
4. Output Waveform
5. Supply Voltage
6. Case Size
7. Mounting and Terminals

The first step is to determine the model that satisfies the output waveform requirement at the needed frequency from the table on the opposite page. Then select the proper accuracy/temperature code from the table at the right. For example:

G - 3C - 4K - BL - 12

- 12 = 12 VDC power supply
- BL = Square Wave Output for Micrologic drive
- 4K = 4 kHz Output Frequency
- 3C = .05% Accuracy, 0 - 65°C.
- G = Model G Case

Standard Output Waveforms

Most Fork Standards oscillators can be supplied with any of several output waveforms. The most popular of these (referenced to 12 VDC supply) are:

Square Wave:

B: 8 V p-p min. into 10 k ohm resistive load.

BN: Same as B except rise time under 1 μs and equal symmetry from binary divider.

BB: Same as BN except has two outputs, 180° out of phase.

BL: To drive micrologic. Specify manufacturer and type.

Sine Wave:

AA: 3 V rms into 10 k ohm resistive load. Harmonic distortion 1 to 10%, depending on frequency.

AT: Same as AA except transformer isolated output.

DT: 1 mW into 600 ohms, transformer isolated.

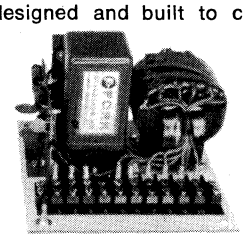
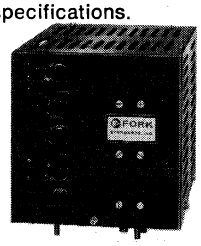
PRECISION FREQUENCY POWER INVERTERS AND FREQUENCY CHANGERS

Fork Standards manufactures an extensive line of DC to AC power inverters and AC to AC frequency changers, with output frequency accurately controlled by a Fork Standards tuning fork or crystal oscillator. The line includes both standard models, described briefly below, and custom types designed and built to customer specifications.





General Specifications:

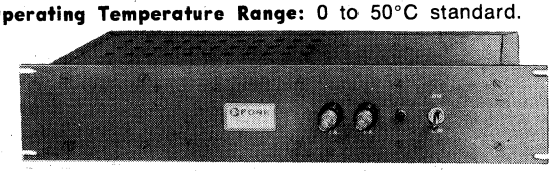
Power Output: 15, 50, 100, 250, or 500 VA.

Output Frequency: 50, 60, or 400 Hz standard; 25 to 10,000 Hz, square or sine wave, special.

Frequency Accuracy: to .01% (tuning fork); .0005% (crystal).

Input Voltage: 12 or 24 VDC (inverters); 115 or 230 VAC, 50 to 400 Hz (frequency changers).

Operating Temperature Range: 0 to 50°C standard.



OTHER PRODUCTS

Power Supply Modules

Plug-in or stud-mounted modular DC power supplies deliver regulated 5 or 12 VDC to power Fork Standards oscillators.

Synchronous Clock Motor Driver

Delivers 50, 60, 400 Hz or other required frequencies at accuracies to 1 ppm (30 seconds per year).

Frequency Dividers

Modular dividers provide one output cycle for a set number of input cycles. Standard models divide by 2, 3, 4, 5, 6, 8, 10, or 16; combination outputs are available. Special options include zero reset, gate control, and pulse output.

Solenoid/Totalizer Driver

Delivers one pulse per second (typical) to drive solenoid or totalizer. Output power to meet system requirements.

OSCILLATORS and FREQUENCY STANDARDS

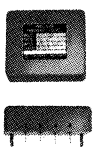
OVER 120 STANDARD MODELS IN OUR GIANT CATALOG

356100A

ULF Oscillators—Withstands extreme shock and vibration. Very flexible where a very low frequency is desired at a reasonable cost.

L-216

Audio and R.F. L-C Oscillators — shock proof, vibration proof and very stable.



L-217

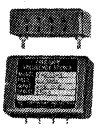
L-C Oscillators for printed circuit board mounting. Ideal where an AUDIO TONE or an RF signal is required. Used widely in test equipment.

61000

Adjustable Frequency Oscillators — Slug-tuned over ±10% of specified center frequency.

313100A

General Purpose Oscillator—Crystal controlled. For very low frequency, high stability requirements.



Y283-3

Crystal Oscillators—designed to direct-drive all popular types of micrologic. 25 nanosecond maximum rise and fall time.

28100 and Y-312

Crystal Oscillators for general application with excellent stability. 800 Hz to 600 MHz.

Y-367

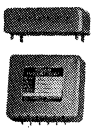
Crystal Oscillators for printed circuit mounting—3 kHz to 150 MHz.

T-224

Temperature Compensated Crystal Oscillators—High stability over wide temperature range. No Oven used. Features instant warm-up.

78000 and YH-277

Frequency Standard Medium stability — 3200 Hz to 100 MHz.



YH-320

Frequency Standard—Low noise, for printed circuit board mounting.

138000A

Frequency Standard—Very stable. Uses proportional type oven.

±1 part in 10^8

356000C

Frequency Standard—Ultra stable. Uses proportional type oven.

±1 part in 10^9

228200C

Multiple Channel Crystal Oscillator—Up to 20 output frequencies in the 5 MHz - 50 MHz Range (Rotary Switch Selection).

Model No.	Frequency (Fixed)	Accuracy over Temp. Range	Temperature Range	Minimum Output	Input	Size	Price 1-3 (each)
356100A R-C	.01 Hz to 400 Hz	±2%	−40°C to 70°C	Sine 1V RMS	28V D.C.	2″ x 2″ x 4″ H	$94.50 to $190.00
L-216 L-C	100 Hz to 1 MHz	±.5%	−40°C to +70°C	Sine 1.5V RMS	28V D.C.	1½″ D x 2 9/16″ H	$87.50
L-217 L-C	100 Hz to 1 MHz	±.5%	−40°C to +70°C	Sine 1.5V RMS	28V D.C.	2 9/16″ x 2 15/16″ x ⅞″ (P-C Mount)	$89.50
61000 L-C	400 Hz to 10 MHz ± 10% Adj.	±.5%	−30°C to +60°C	Sine 2.5V RMS	28V D.C.	1½″ D x 3 11/16″ H	$114.50
313100A Crystal	1 Hz to 3000 Hz	±.015%	−40°C to +70°C	Square 6V P to P	28V D.C.	2″ x 2″ x 4″ H	$290.00 & up
Y-283-3 Crystal	70 kHz to 9 MHz	±.005% or ±.025%	−55°C to +90°C	Square 0 to 6V P to drive micrologic	+3V D.C. to +6V D.C.	1 5/8″ x 2¼″ x ¾″ H	$199.00 to $209.00
28100 & Y-312 Crystal	800 Hz to 600 MHz	±.012% or ±.005%	−40°C to +70°C	Sine 1V RMS or 1 milliwatt	28V D.C.	1¼″ D x 2 9/16″ or 1½″ D x 3 5/16″ H maximum	$119.00 to $169.00
Y-367 Crystal	3000 Hz to 150 MHz	±.015% or ±.005%	−40°C to +70°C	Sine 1V RMS or 1 milliwatt	28V D.C. or +12V D.C.	2″ x 2″ x ¾″ H (P-C Mount)	$139.00 to $195.00
T-224 (TCXO) Crystal	3 MHz to 6 MHz	Up to ±.0001%	−40°C to +70°C or −32°C to +100°C	Distorted Sine 1V P to P	No Oven 17.5V D.C. 20Ma maximum	Approx. 1¼″ x 3¾″ x ¾″ H.	$585.00 to $985.00
78000 & YH-277 Crystal	3200 Hz to 100 MHz	±.0002% to ±.00001%	0°C to +50°C	Sine 1V RMS	28V D.C. & 6V A.C. or 28V D.C.	1¾″ D x 3⅜″ H	$197.00 to $287.00
YH-320 Crystal	100 kHz to 90 MHz LOW NOISE	Up to ±.00005%	0°C to +50°C	Sine 1 Milliwatt	28V D.C. for oscillator and proportional oven	2 9/16″ x 2 15/16″ x ⅞″ H (P-C Mount)	$370.00 to $399.00
138000A Crystal	16 kHz to 70 MHz LOW NOISE	±.000001% or ±.00001%	0°C to +50°C	Sine 1V RMS	28V D.C. & 6.3V A.C. or 115V A.C. or 28V D.C.	2″ D x 3½″ H	$394.00
356000C Crystal	1 MHz to 10 MHz LOW NOISE	$\pm 1 \times 10^{-9}$	20°C to +55°C	Sine 1V RMS	28V D.C. for oscillator & proportional oven	2¾″ x 2¾″ x 4⅝″ H	$770.00
228200C 1 to 20 Crystals	5 MHz to 50 MHz	±.0001%	0°C to +55°C	Sine 1V RMS	28V D.C. for oscillator & oven	2 9/16″ x 2 15/16″ x 3 1/16″ deep	$490.00 for 10 channels

VOLTAGE CONTROLLED OSCILLATORS

Through continuous research and specialization, Greenray Industries offers the most complete and advanced line of Frequency Standards and Oscillators in the industry.

Q-200

R-C Voltage Controlled Oscillator—Low frequency with ±20% frequency deviations. Less than 1 microsecond rise time.

P-200

L-C Voltage Controlled Oscillator—More stable than R-C types. Popular plug-in unit.

P-201

L-C Voltage Controlled Oscillator—Stabilities of ±.2%. Frequency deviations as great as ±10%.

P-202

L-C Voltage Controlled Oscillator—High frequency oscillator with ±20% frequency deviation.

PH-229 & PH-230

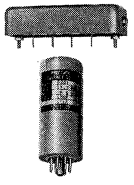
L-C Voltage Controlled Oscillator—Proportional oven units offer stabilities of ±.001% and frequency deviations to ±10%.

Model No. and Type	Center Frequency Range	Maximum Range of Frequency Swing	Stability over Temp. Range (at a fixed frequency)	Temperature Range	Output Wave Form and Minimum Voltage	Input	Size	Unit Price 1-3 (each)
Q-200 R-C VCO	20 Hz to 100 kHz	±10% or ±30%	±2% ±4%	0 to 50°C −40°C to +60°C	Pulse, Square or Sine	+28V D.C.	2" x 2" x 4" high	$275.00 to $375.00
P-200 L-C VCO	1 kHz to 99.99 kHz	±1% or ±4%	±.5% ±1%	0 to 50°C −40°C to +70°C	Sine 2V RMS	+28V D.C.	1¾" dia. x 3⅜" high	$489.00
P-201 L-C VCO	100 kHz to 19.99 MHz	±1%, ±5%, or ±10%	±.2% ±.5%	0 to 50°C −40°C to +70°C	Sine 2V RMS	+28V D.C.	1½" dia. x 3⅜" high	$389.00 to $485.00
P-202 L-C VCO	20 MHz to 200 MHz	±10% or ±20%	±.2% ±.5%	0 to 50°C −40°C to +70°C	Sine 1 Milliwatt into 50 ohms	+28V D.C.	2" x 2" x 4" high	$389.00
PH-229 L-C VCO	100 kHz to 20 MHz	±10%	±.01%/hr. ±.02%/day	0°C to +50°C	Sine 1 mw into 50 ohms	+28V D.C. for oscillator and proportional oven	2" x 2" x 4"	$525.00
PH-230 L-C VCO	100 kHz to 20 MHz	±2%	±.001%/hr. ±.01%/day	0°C to +50°C	Sine 1 mw into 50 ohms	+28V D.C. for oscillator and proportional oven	2" x 2" x 4"	$795.00
N-200 VCXO	4 kHz to 999.9 kHz	±.01%, ±.05% or ±.1%	±.015%	−20°C to +60°C	Sine 1V RMS	+28V D.C.	2" x 2" x 4" high	$525.00 to $675.00
N-201 VCXO	1 MHz to 60 MHz	±.01%, ±.05% ±.1%	±.005%	−20°C to +60°C	Sine 1V RMS	+28V D.C.	1½" dia. x 3⅜" high	$385.00 to $485.00
N-330 VCXO	50 kHz to 250 kHz	±.1%	±.01%/day	0 to +60°C	Square to drive T²L micrologic	+5V D.C.	2⅝" x 2 1⅝" x ⅞"	$425.00 to $475.00
N-331 VCXO	250.1 kHz to 5 MHz	±.1%	±.01%/day	0 to +60°C	Square to drive T²L micrologic	+5V D.C.	2⅝" x 2 1⅝" x ⅞"	$399.00 to $519.00
N-332 VCXO	5.1 MHz to 25 MHz	±.1%	±.01%/day	0 to +60°C	Square to drive T²L micrologic	+5V D.C.	2⅝" x 2 1⅝" x ⅞"	$385.00
NH-203A VCXO	1 MHz to 60 MHz LOW NOISE	±.01% or ±.05% or ±.1%	±.0001%	0 to 50°C	Sine 1 Milliwatt into 50 ohms	+28V D.C. for oscillator and proportional oven	2" x 2" x 4" high	$565.00 to $645.00
NH-314 VCXO	60.1 MHz to 300 MHz LOW NOISE	±.05%	±.0005%/day	0°C to +50°C	Sine 1 mw into 50 ohms	+28V D.C. for oscillator and proportional oven	2¾" x 2¾" x 4⅝"	$748.00 to $975.00
SH-219 Wide Band VCXO	500 kHz to 60 MHz LOW NOISE	±.25% or ±.5% or ±1%	±.001% ±.005%	0 to 50°C	Sine 1 Milliwatt into 50 ohms	+28V D.C. for oscillator and proportional oven	2¾" x 2¾" x 4⅝" high	$975.00 to $1450.00

Typical control voltage input: 2V RMS up to 15 kHz rate or ±3V D.C. for full modulation at 1000 ohm input impedance.—**Standard modifications available.**

N-200

Voltage Controlled Crystal Oscillator—Low frequency from 4 kHz to 999.9 kHz.



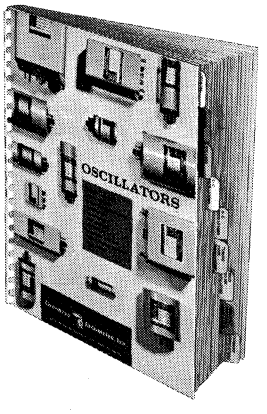
N-201

Voltage Controlled Crystal Oscillator—Nonoven unit available in flat pack or plug-in construction. Very popular.

NEW
N-330, N-331 & N-332

Voltage Controlled Crystal Oscillator—Designed to direct-drive all popular types of micrologic. 25 nanosecond maximum rise and fall time.

CALL OR WRITE FOR OUR COMPLETE CATALOG



NH-203A

Voltage Controlled Crystal Oscillator—Proportional oven unit for FM and phase locked loop applications.

NH-314

Voltage Controlled Crystal Oscillator—High frequency 60 MHz to 300 MHz.

SH-219

Wide Band Voltage Controlled Crystal Oscillator — Uses special techniques for ±1% frequency deviation.

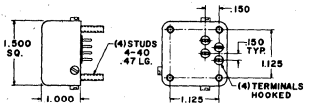
SPECIFICATIONS

Internal cavity temperature: 65°C ± 2°C setting tolerance.
Cavity temperature stability: ± .25°C over 0°C to + 50°C ambient range. ± .01°C at any fixed ambient (±.5°C).
Input voltage: AC Proportional, 117 VAC 50 to 60 Hz. DC Proportional, 28 VDC ± 5%.
Warm-up time: 15 minutes average from 0°C.
Header and mounting: 8 pin octal. Plug-in mounting. Cavity supplied with 7 pin miniature socket and mating plug. Unit available with solder lug headers and bolt down mounting. Input voltage cavity temperature modifications available—contact factory or area representative with your requirements.

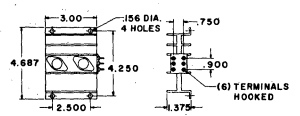
PROPORTIONAL TEMPERATURE CONTROLLERS

50 WATTS DC — **MODEL 3C2-50 LOW COST CONTROLLER**

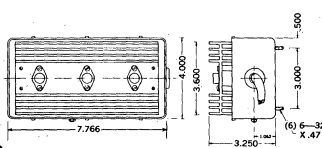


Input: 20 to 32 VDC. Will withstand overvoltage transient of 60 Volts peak for one second.
Output: 19 to 31 Volts pure DC into a 50 watt maximum resistive load.
Utilizes a thermistor sensor, which is supplied with the unit, that will control temperature to within ± .05°C.
Proportioning bandwidth: 3°C.
Set temperature (standard): Adjustable +40°C to +100°C with .5°C resolution.
Long term stability: < 1°C/6 months operation.
Price: 1 to 10 units, $65.00 each.

100 WATTS NOISLESS AC (No SCR's) — **MODEL 7C4-100**



Input: 100 to 130 VRMS, 47 Hz to 440 Hz. Will withstand overvoltage transient of 300 Volts peak for two seconds.
Output: 98 to 128 Volts pulsating DC (120 Hz ripple content) into a 100 watt maximum resistive load.
Utilizes a thermistor sensor, which is supplied with the unit, that will control temperature to within ± .05°C.
Proportioning bandwidth 3°C.
Set temperature (nominal): Adjustable +40°C to +90°C with .5°C resolution.
Long term stability: < .1°C/6 months operation.
This unit is available with three phase input (208 V).
Price: 1 to 10 units, $185.00 each.

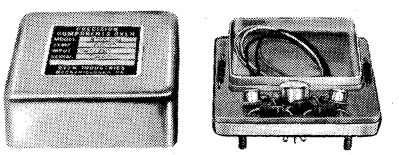


3KW 3 PHASE
MODEL 2ZC3—3000-3

Input: 100—130 VRMS, 3—Phase—WYE
Output: 95—125 VRMS, 3—Phase into a max. resistive load of 1 KW per phase
Type Of Control: Zero—voltage switching
Proportioning Bandwith: 1°C
Set Temperature: Adjustable +20°C to +60°C
Price: 1—3 units $210.00 each

PRINTED CIRCUIT MOUNT OVENS

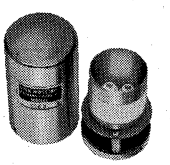
MODEL 3765-1



Cavity Size (ID)	Case Size (OD)	Model	Price 1-10 Units
1.900" sq. x .500" deep	2.562" x 2.937" x .875" thick	3765-1	$ 99.50 ea.
1.900" sq. x 1.000" deep	2.562" x 2.937" x 1.500" thick	3147-1	109.25 ea.
1.900" sq. x 2.000" deep	2.562" x 2.937" x 2.625" thick	3261	129.50 ea.

Cavity temperature: 65°C ± 2°C setting tolerance.
Cavity temperature stability: ± .008°C at any fixed ambient (±.5°C).
Input voltage: 28 VDC ± 1%.
Maximum Power: 10 watts, average power 3 watts.
Warm-up time: 30 minutes from — 20°C.
Cavity supplied with 6 #28 color coded teflon leads.
Header: 8 pin hooked.
Mounting: 4 studs.

AC PROPORTIONAL ZERO VOLTAGE SWITCH CRYSTAL OVEN



WILL ACCEPT 2 HC-6/U CRYSTALS

MODEL 5169

Cavity Size: (ID) .962 Dia. x 2.330
Case Size: (OD) 1.297 Dia. x 2.330
Cavity Temperature: Selectable from 55°C to 85°C ±2°C setting tolerance
Cavity Temperature Stability: .5°C over 0°C to within 15°C of Cavity set temperature. ±.15°C at any fixed ambient (±.5°C)
Input Voltage Range: 28—135 VAC ±10%
Max Power: 10 W
Warm-up Time: 15 mins. from 0°C
Header: 8 Pin Octal
Price: 1—3 units $105.00 each

NEED A SPECIAL OVEN?

Oven Industries specializes in the design & manufacture of components ovens to your exact specifications. We have complete in-plant facilities for all types of mechanical modifications and assemblies as well as testing facilities to assure proper electrical operation.

Oven Industries has worked closely with many customers where units must be designed to meet exacting military specifications.

May we offer you our services?

THIS NEW CATALOG SHOULD BE ON YOUR DESK

									100.0 MHz to 125.00 MHz	$16.00

Frequency Ranges given are per MIL-C-3098. CLARK numbers cover wider ranges in most types

Note 1: Setting tolerance ±.002% unless otherwise specified.

Note 2: Series indicates that crystal is operated in a series oscillator circuit without series capacitance (180° phase shift between crystal connections).

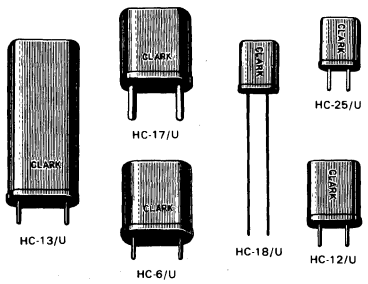
Note 3: ±.003% setting tolerance.

Note 4: ±.001% setting tolerance.

Note 5: Recommended for oven operation. Set at 75°C, ±2°C. (Clark oven type, CO-23.)

Note 6: Recommended for oven operation. Set at 85°C, ±2°C. (Clark oven type, CO-24.)

Note 7: Recommended for oven operation. Set at 75°C, ±2°C. (Clark oven type, CO-25.)



ORDERING INFORMATION

1. Select crystal desired from chart and order by Clark number and exact frequency desired. (or call Clark about special requirements).
2. Use prices shown. If money accompanies order, add 25¢ per crystal for postage, handling, and insurance.
3. Delivery: 2-3 weeks, ARO (for small quantities)

* DISCOUNTS AVAILABLE

Up to 80% on larger quantities. Inquire from our representative or the factory.

Call or write for our Catalog showing Crystals, Ovens and Circuits.

FREQUENCY STANDARDS & OSCILLATORS SHOWN ARE TYPICAL OF GIBBS ADVANCED PRODUCT DEVELOPMENT CAPABILITIES

- Full white room facilities controlled to NASA Spec. NPC-200-4, Class 100 per FED-STD-209...
- Environmental test chambers with full temperature, humidity and vibration test facilities...
- Frequency Standard Lab, monitored with WWVB, keeping rigid schedules of calibration...
- Full reliability documentation and I&T procedures available to all projects when requested...
- Resident government quality control representatives...
- NASA approved welding and soldering with on-site training school.
- Latest state of the art in Radiation Hardened Oscillators

Throw Gibbs the Challenge!

GIBBS Custom Builds Crystal Oscillators to Your Specifications

MODULAR DESIGN TECHNIQUES PROVIDE MAXIMUM FLEXIBILITY

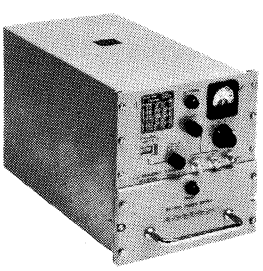
Gibbs' capabilities are by no means limited to the manufacture of stock items... All of these facilities are **available to you** for the development of equipment of highest reliability for the most specialized applications.

Whatever your particular application, it is likely that some combination of Gibbs stock modular designed oscillators will meet your requirements. Through this concept the oscillator is the frequency source and additional output circuits are simply plugged in to meet the specific requirements of the application. Such modular design makes high reliability oscillators available on short delivery at relatively modest cost. The models shown here are typical GIBBS Oscillators. We can tailor a unit to fit your requirements.

GIBBS ULTRA HIGH STABILITY FREQUENCY STANDARDS

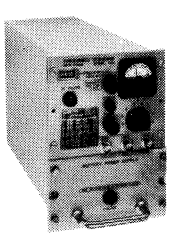
FOR LABORATORY STANDARDS, NAVIGATION SYSTEMS, TIME BASES

GIBBS MODEL 570



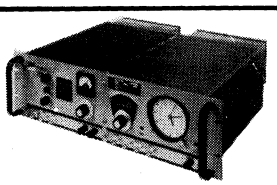
The ultimate in high stability Frequency Standards. **LONG TERM STABILITY:** 1 x 10^{-11} per day. **OUTPUT FREQ.:** 5 MHz, 1 MHz and 100 KHz. **POWER REQUIREMENTS:** 115 V ±10%, 60 Hz, 18 watts nominal. Automatically recharged internal battery maintains output frequency without interruption during transport or power failure. **DIMENSIONS:** 8¼" high; 8" wide; 16" deep.

GIBBS MODEL 568



A portable Frequency Standard of high stability manufactured to Mil-F-21584C (Ships) specs. Military designation AN/URQ-10. **FREQ. STABILITY:** 5 x 10^{-10} per day (long term); 5 x 10^{-12} rms average of 100 consecutive 1 second periods (short term). **OUTPUT FREQ.:** 5 MHz, 1 MHz and 100 KHz. **POWER REQUIREMENTS:** 115 V ±10%, 50 to 400 Hz; 12 watts, nominal. Automatically recharged battery maintains output frequency without interruption during transport or power failure. **DIMENSIONS:** 7 13/16" high, 5½" wide; 12½" deep.

GIBBS MODEL 572



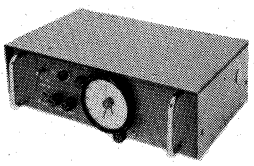
A rack mounted 5 MHz Frequency Standard combined with analog-type 24 hour clock with sweep second hand. **FREQ. STABILITY:** 5 x 10^{-10} per day. **OUTPUT FREQ.:** 5 MHz, 1 MHz, 100 KHz, 10 KHz, 1 KHz, 100 PPS and 1 PPS. **POWER REQUIREMENTS:** 115 V ±10%, 50 to 400 Hz; 28 watts, nominal. Automatically recharged battery maintains clock operation without interruption during power failures. **DIMENSIONS:** 5¼" panel, 19" rack; 15¼" deep behind panel; 16¾" overall depth.

MODEL 571

Same as MODEL 572 above except without clock but with redundant circuitry and outputs.

FREQUENCY STANDARD CLOCK

GIBBS MODEL 438



The Gibbs Model 438 Frequency Standard Clock is a completely transistorized, quartz crystal-controlled clock, timer, and frequency standard.

Some applications are: aircraft terminals and bases, air traffic control timing systems, time clock checks and updating, recorders laboratory standards, slave clocks, and seismographic use.

SUPPLY VOLTAGE:
110 VAC 60 Hz or 12 VDC battery @ 20 watts max.

FEATURES:

Time Indication: Front panel 24 hour clock with sweep second hand. All hands can be instantaneously reset to zero using a simple ¼ turn reset knob.

Mechanical Programmer: Cam operated contacts that close at 12 hours, 1 hour, and 1 minute intervals.

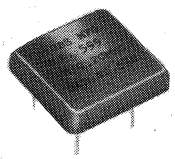
Accuracy: Better than 0.0001% with a drift rate of less than .0004% per year.

Auxiliary Power Output: 60 Hz square @ approx. 150 V PP into a 2K load.

GIBBS CRYSTAL OSCILLATORS

TYPICAL GIBBS CRYSTAL OSCILLATORS

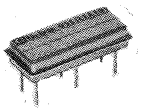
NEW FROM GIBBS

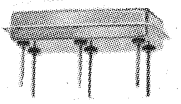


MODEL 599
L. 1½"
W. 1½"
H. .300" Max.

MODEL 599

Low Profile for Printed Circuit Board Mount. Temperature range from −55°C to 125°C. Choice of discrete frequencies from 2.5 MHz to 20 MHz. **SUPPLY VOLTAGE:** +5 VDC ±5% @ 30 MA. Max. **OUTPUT:** Any discrete frequency between 2.5 MHz and 30 MHz. ±0.1% Maximum frequency drift from −55 to 125°C. **WAVEFORM:** Logic (0) .5V Max., Logic (1) +2.7V Min., Rt and Ft = 5 Nanosec. Max., Load: TTL (Typical). **ENVIRONMENTAL:** Designed to withstand high impact shock and vibration. **TYPICAL USAGE:** Communications equipment or digital systems.



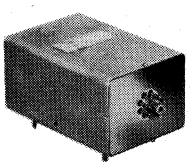


MODEL 606
Low Profile Coldweld Crystal Oscillator

MODEL 606
L. 1¾"
W. 1¼"
H. .370 Max.

Low cost, less than $40.00 in quantities of 10 to 24. Widest range frequencies available in miniature construction 2.5 to 30 MHz. Only .370 inches max. height for P. C. mount. Cold weld construction for positive hermetic seal and minimum contamination. **SUPPLY VOLTAGE:** +5 ±.5 VDC @ 75 mw max. **OUTPUT FREQUENCIES:** Any discrete frequency between 2.5 and 30 MHz aavilable. **FREQUENCY DRIFT TOLERANCE:** ±.005% maximum allowable deviation over the temperature range of −40 to +65°C, ±.01% from −55 to +125°C. **OUTPUT WAVEFORM:** Square wave, compatible with T²L integrated circuits. Unit designed for high shock, vibration, and humidity environment. **TYPICAL USAGE:** Communication equipment or digital systems.

MODEL 518



MODEL 518
L. 5¼",
W. 3¹³⁄₆₄",
H. 2³³⁄₆₄.

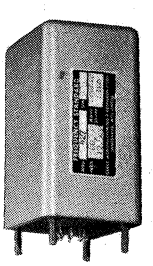
SUPPLY VOLTAGE: 115 VAC ±10% 50 to 400 Hz or DC input to customers' spec. **OUTPUT:** 30 Hz to high audio ±1 PPM calibration tolerance @ 25 ±5°C. Binarily related multiple outputs available. **STABILITY:** ±1 PPM/week after warmup. **TEMP. COEF. of FREQ.:** ±2 PPM 0 to 50°C. **FREQUENCY ADJ.:** ±25 PPM minimum. **WAVEFORM:** Sine, square or pulse to customers' spec. 5 VPP minimum squarewave into 5K load is standard. **APPLICATION:** Industrial, will withstand normal handling and limited shock and vibration unless ruggedized configuration is requested. Unit has been supplied to Mil-Std. 810 Application. **COMMENTS:** Very popular for lab use. Extensively used at 60 Hz output for facsimile equipment and inverter/converter power supplies.

MODEL 414: Superseded by Model 518. Same specifications as Model 518

BOTH MODELS AVAILABLE WITH PROPORTIONAL OR THERMOSTAT OVEN CONTROL.

MODEL 427

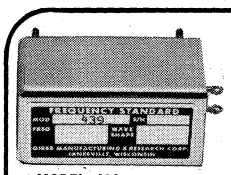
SUPPLY VOLTAGE: 28 ±2 VDC or 12 ±1 VDC. **OUTPUT:** 1 Hz to 100 KHz ±1 PPM calibration tolerance @ 25 ±5°C. *Binarily related multiple outputs available. **STABILITY:** ±1 PPM/day after warmup. **TEMP. COEF. of FREQ.:** ±5 PPM −20 to 75°C. **FREQ. ADJ.:** ±15 PPM minimum. **WAVEFORM:** Sine, square or pulse to customer spec., 5 VPP squarewave into 10K load is standard. **APPLICATION:** Industrial or Military. Very rugged, compact design for portable and mobile gear. **COMMENTS:** Extensively used @ 38.4 KHz and 1 Hz as accurate time base for mobile seismograph recording equipment. *Calibration, stability specs. apply for unit with oven control. Wider tolerances available at lower cost w/o oven.



MODEL 427
L. 4½",
W. 2",
H. 2".

THERMOSTAT OVEN CONTROL OR NO OVEN CONTROL.

MODEL 439



MODEL 439
L. 3",
W. 1⁵⁄₁₆",
H. 1⁵⁄₁₆".

SUPPLY VOLTAGE: 12 ±2 VDC or 27 ±3 VDC. **OUTPUT:** 1 KHz to 100 KHz ±20 PPM calibration tolerance @ 25 ±5°C. **STABILITY:** ±5 PPM/day under static ambient conditions. **TEMP. COEF. of FREQ.:** ±100 PPM −40 to +60°C. **FREQ. ADJ.:** None. **WAVEFORM:** Square, sine or pulse to customer spec. 8 VPP into 10K is standard. **APPLICATION:** Industrial or Military. **COMMENTS:** This unit has found wide industrial acceptance for replacement of unstable tuning forks at relatively low output frequencies. **NO OVEN CONTROL.**

GIBBS CRYSTAL OSCILLATORS

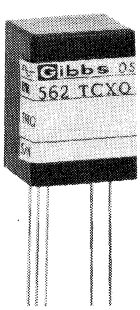
TEMPERATURE COMPENSATED

MODEL 520 TCXO

MODEL 520
L. 2″
W. 2″
H. .800″ Max.

SUPPLY VOLTAGE: Any discrete voltage between +20 and +30 VDC ±2% @ 650 mw typical. **OUTPUT FREQUENCIES:** Any discrete frequency between 1.0 and 10 MHz available. **FREQUENCY DRIFT TOLERANCE:** ±.0002% (2 PPM) maximum allowable frequency deviation over temperature range of −40 to 75°C, ±.0005% (5 PPM) over temperature range of −54 to 85°C. **LONG TERM AGING:** 2 PPM per year maximum. **FREQUENCY ADJUSTMENT:** Manual screwdrive adjust ±.0004% about the center frequency setable to resolutions of .05 PPM of desired frequency. **OUTPUT WAVEFORM:** Square wave, compatible with T²L integrated circuits. Other loads available upon request. **TERMINATIONS:** Glass to metal seal header or per customer request. **MOUNTING:** (4) 4-40 studs. Unit designed for high shock, vibration, and humidity environment. **TYPICAL USAGE:** Navigation or Communications Systems.

MODEL 562

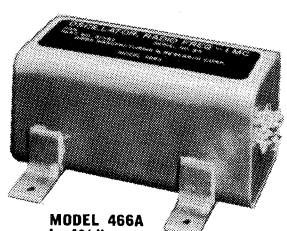


MODEL 562
L. 1⅛″ by
⅞″ square.
Typical

SUPPLY VOLTAGE: +5 VDC for Dividers, any discrete voltage between +12 and 35 VDC for T.C. networks. **OUTPUT:** 60 Hz to 4 MHz ±2 PPM calibration tolerance @ 25 ±5°C. **STABILITY:** ±.1 PPM/day under static ambient conditions. **TEMP. COEF. of FREQ.:** ±5 PPM from 0 to 50°C. **FREQ. ADJUST.:** ±5 PPM min. **WAVE FORM:** Logic squarewave, "1" state +4.5 min. "0" state ±5 V max. **APPLICATIONS:** Industrial — can be adapted for military use. **COMMENTS:** Unit can also be supplied without Temp. Compensation at reduced cost. Designed for use with IC's and mounts on PCB.

PROPORTIONAL OVEN CONTROLLED

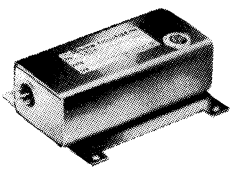
MODEL 466A



MODEL 466A
L. 4¾″,
2⅛″ square.

SUPPLY VOLTAGE: 28 ±3 VDC oven and oscillator. 3 watts average power after warmup. **OUTPUT:** 1 MHz precision ±.01 PPM calibration tolerance @ 25 ±5°C. **STABILITY:** ±.005 PPM/day under static ambient conditions. ±.05 PPM 0 to 50°C. **TEMP. COEF. of FREQ.:** ±.05 PPM from 0 to 50°C. **FREQ. ADJ.:** ±4 PPM minimum with external screwdriver. **WAVEFORM:** 1 VRMS Sinewave — 5K load. **APPLICATION:** Military, 100G shock, 20G vibration. **COMMENTS:** Originally designed for Minuteman Program. Unit has been adapted for less stringent commercial use.

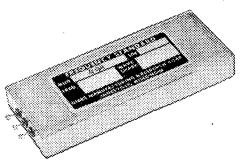
MODEL 537



MODEL 537
L. 3²⁹⁄₃₂″,
W. 3″,
H. 1¹⁷⁄₆₄″.

SUPPLY VOLTAGE: 12 ±1 VDC. **OUTPUT:** 3600 Hz to 250 KHz ±1 PPM calibration tolerance @ 25 ±5°C. **STABILITY:** ±0.5 PPM/day under static ambient conditions. **TEMP. COEF. of FREQ.:** ±5 or ±10 PPM from 0 to 50°C. **FREQ. ADJUST.:** ±10 PPM minimum. **WAVEFORM:** Square, 5 VPP minimum into 10K load. **APPLICATION:** Industrial or military. Meets requirements of Mil-E-16400. **COMMENTS:** Supplied @ 3600 Hz for Naval Facsimile Systems. Complete integrated circuitry.

MODEL 494

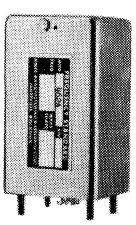


MODEL 494
L. 3⅝″,
W. 1¹³⁄₃₂″,
H. ½″.

SUPPLY VOLTAGE: 5 ±0.5 VDC or 12 ±0.1 VDC. **OUTPUT:** 500 KHz to 10 MHz ±.05 PPM calibration tolerance @ 25 ±5°C. **STABILITY:** .01 PPM/day under static ambient conditions. **TEMP. COEF. of FREQ.:** ±5 or ±10 PPM from −55 to +85°C. **FREQ. ADJ.:** 10 PPM minimum. **WAVEFORM:** 4 VPP minimum squarewave into 2.2K load. **APPLICATIONS:** Designed for Spaceborne use. **COMMENTS:** Originally designed as a "high rel" space unit. Now available for individual use. Incorporates stainless steel case with threaded inserts for PCB use. 5 VDC input and logic squarewave output. Unit is very popular for use with ICs.

VOLTAGE CONTROLLED

MODEL 462A



MODEL 462A
L. 3⁵⁄₁₆″,
W. 2″,
H. 1¹⁄₁₆″.

SUPPLY VOLTAGE: +20 VDC ±.05% @ 40 Ma. **FREQ. CONTROL VOLTAGE:** +1.5 to 3.5 VDC. **CONTROL VOLTAGE SENSITIVITY:** 1 CPS/Mv. **OUTPUT:** Frequency, Hi, 1101 KHz: C-1100 KHz: Lo-1099 KHz. **STABILITY & LINEARITY:** ±10 PPM/day ±2 PPM/hr. over any 5°C range between −40°C to +75°C. Voltage and waveforms-Sinewave, 0.25 VRMS into 2.2K load. Spurious frequencies outside the pass band — 55 db down. **APPLICATIONS:** Single side band radio receivers.

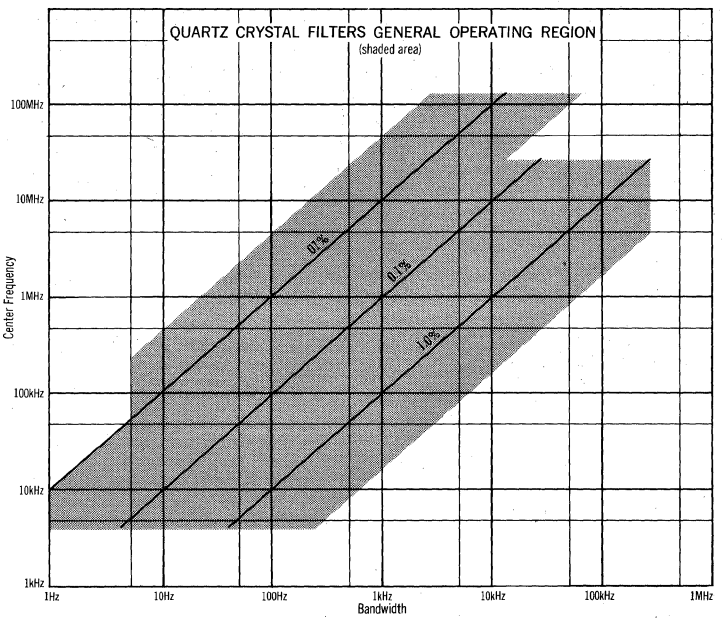
HUGHES

CRYSTAL FILTERS

As the nation's leading supplier of precision crystal filters, Hughes offers years of technical experience backed by the industry's most advanced production and test facilities. Thousands of Hughes crystal filters are currently in use in missiles, space vehicles, radar systems and communications equipment. Available in various frequencies, sizes and environmental standards, Hughes filter types include bandpass, single sideband, band rejection, contiguous comb doppler and thin-film monolithic.



Bandpass & Single Sideband Filters. Narrow passbands, steep shape factors and low insertion losses are characteristic of all Hughes bandpass and single sideband filters. General specifications include:

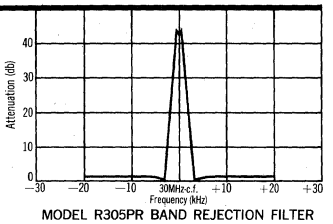
Center Frequency Range	10kHz to 100MHz
Fractional Bandwidth Range	0.002% to 6%
Shape Factor (60 db/3 db ratio)	As low as 1.15 to 1
Insertion Loss	Down to 0.1 db
Passband Ripple	Down to ±0.1 db

Note: Refer to the General Operating Regions Chart (right) to determine producible design combinations of bandwidth and center frequency.

Band Rejection Filters. For systems applications requiring rejection of discrete bands of incoming signals while passing certain other bands, Hughes band rejection filters display optimum selectivity and attenuation in the adjacent passbands. Rejection bandwidths up to 1.5% of center frequency can be supplied, with insertion losses under 1 db.

Model R 305 PR (typical)

Center Frequency	30MHz
Rejection Bandwidth (40 db)	1.1kHz min.
Rejection Bandwidth (1.5 db)	6kHz max.
Upper & Lower Pass Bandwidth	100kHz min.
Passband Insertion Loss	6 db max.
Passband Ripple	±0.5 db

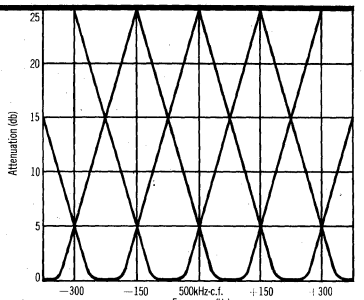


MODEL R305PR BAND REJECTION FILTER

Contiguous Comb Filters. Hughes crystal filter combs provide direct operation of large numbers of contiguous frequency channel filters from a single, low-power driver. Since no padding or isolation impedance is necessary, efficiency over non-contiguous types is greatly improved—up to 50% in many cases. Comb frequencies from 10kHz to 60MHz, or higher, can be made with bandwidths of several Hertz up to 100 Kilo Hertz. Where time domain response is important, Hughes filters can be used singly or in multiple banks without troublesome ringing or overshoot.

Model B503CS (typical)
64 Filters in Comb

Nominal Center Frequency of Comb	500kHz
2db Bandwidth ea. Channel	150Hz
30db Bandwidth ea. Channel	900Hz
Center-to-center Spacing of Channels	150Hz
Voltage Transfer Ratio of each Channel	1 nominal
Source Impedance	50 ohms
Load Impedance	20 K ohms
Nominal Output Voltage	2 volt rms
Ripple of the Filter Passband	0.5 db
Power Efficiency of Comb	33%
Noise Bandwidth each Channel	165Hz



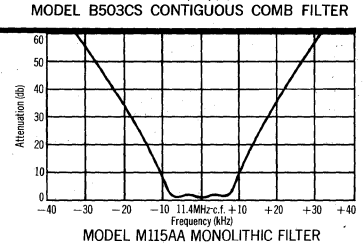
MODEL B503CS CONTIGUOUS COMB FILTER

Monolithic Filters. High reliability, excellent aging characteristics and reduced package size through the absence of discrete components are primary features of Hughes' thin-film, monolithic crystal filters. General specifications include:

Center Frequency Range	5 MHz to 25 MHz
Bandwidth Range	0.005 to 0.2% of C.F.
Shape Factor (60db/3db)	Down to 1.8 to 1

Model M115AA (typical)

Center Frequency	11.4 MHz
Bandwidth (3 db)	16kHz
Shape Factor (60db/3db)	4:1
Stop Band Attenuation	60 db
Ripple	1 db
Package (flat pack)	1.28″x.83″x.25″



MODEL M115AA MONOLITHIC FILTER

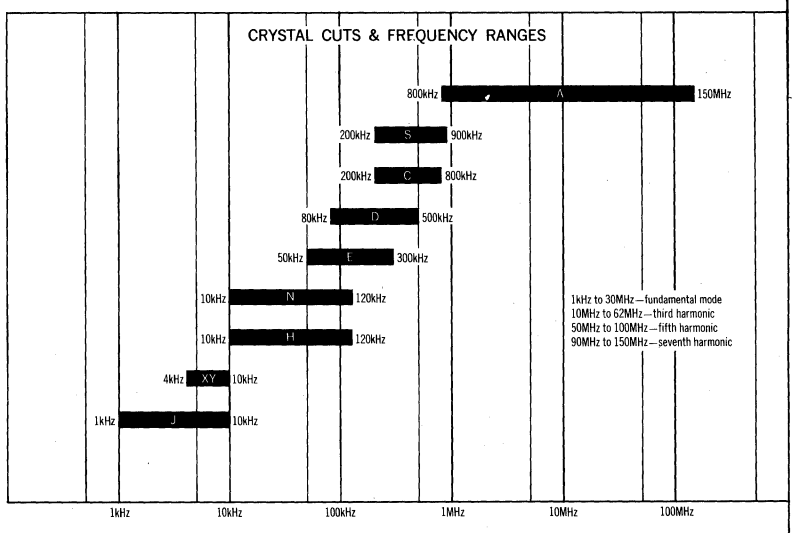
FREQUENCY CONTROL DEVICES

QUARTZ CRYSTALS

Hughes supplies a full range of low and high frequency quartz crystals from 1kHz to over 150MHz. Hughes utilizes nine different crystal cuts (see chart, right) to cover this broad frequency range and to assure minimum frequency drift. Both standard and custom units in prototype or production quantities can be supplied for a variety of precision, frequency control applications.

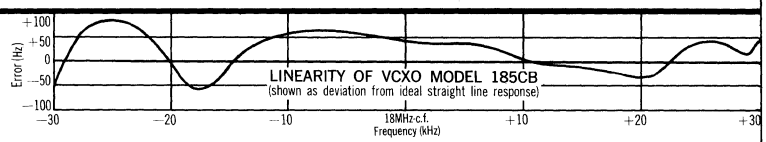
Military Standard Crystals. Manufactured to MIL-C-3098E, Hughes military standard quartz crystal units are offered in a full range of low and high frequencies.

Coldweld Sealed Crystals. For applications requiring exceptionally high reliability and long term frequency stability, Hughes employs the Coldweld process for hermetically sealing the crystal enclosure. Only pressure is used in welding the cover to the base, thereby eliminating all possibility of contamination from fluxes, sparking or heating. Hughes Coldweld quartz crystals are available in 200kHz to 150MHz frequencies and in TO-5, HC-6 or HC-18 Coldweld holders.



VOLTAGE CONTROLLED CRYSTAL OSCILLATORS

Hughes' VCXO's are noted for their exceptionally low frequency drift characteristics. Over a wide center frequency range, frequency deviation can be provided up to ±0.3% of center frequency. For most applications requiring high stability, temperature compensation can be added; for maximum stability, a proportionally controlled oven is used. Typical applications are FM generators, doppler radar systems, frequency synthesizers and AFC in communications systems.



General specifications include:

Center Freq. Range	15kHz to 150MHz
Frequency Deviation	up to ±0.3%
Jitter Stability	1Hz/sec. (typical)
Long Term Stability	±5 to ±20 ppm/wk.
Modulation Sensitivity	2kHz/V (typical)
Modulation Linearity	to ±0.2%
Modulation Rate	DC to 100kHz
Output Power	to 25 mw

Model 185CB (typical)

Center Frequency	18MHz
Frequency Deviation	±35kHz
Long Term Stability	±20 ppm/wk.
Jitter Stability	<2Hz/sec.
Temperature Range	−20° to +50°C
Modulation Sensitivity	2.3kHz/V
Modulation Linearity	±200Hz
Modulation Freq. Range	DC to 100kHz
Output Power	1mw

CRYSTAL OSCILLATORS

For stable generation of frequencies from very low audio to VHF, Hughes offers a series of transistorized oscillators utilizing Hughes high quality, precision crystals. Frequencies as low as 50 Hz with crystal stability are produced in TO-5, TO-8 and flat pack enclosures. A very high degree of stability at higher frequencies can be achieved with temperature compensation. Small volume and the absence of warm-up delay are characteristic of these TCXO's. For highest stability over a wide ambient range, a proportional temperature control with solid state circuitry provides oven stability. In combination with Hughes Coldweld crystals, extremely good short and long term stabilities can be realized. General specifications include:

Frequency Range
- 50Hz to 100kHz
- 10kHz to 30MHz (fundamental)
- 30MHz to 150MHz (overtones)

Frequency Stability
- ±1 pp 10^7/day (over temp. & volt. range)
- ±1 pp 10^8/day (const. amb. temp. & volt.)

Temperature Range	−55° to +80°C
Input Voltage (osc.)	12 VDC (typical)
Output Power	10 mw (typical)
Input Voltage (oven)	28 VDC, unreg. (standard)

Input Power (oven)
- 15 watts (warm-up)
- 2.5 watts (at 25°C, typical)
- 45 watts ("quick-heat")

Vibration	up to 30g, 10—2,000Hz
Shock	up to 50g, 11 ±1 m sec.

Hughes is the country's leading supplier of crystal filters and related frequency control devices. A partial list of major programs using these products includes BMEWS, LEM, Syncom, Surveyor, Mauler, Hawk, Minuteman, Talos, Phoenix and Standard missile. No frequency control problem is too difficult for Hughes. A staff of competent engineers backed by the industry's most advanced quality control and test facilities, stands ready to handle your toughest assignment. Call collect or contact your nearest Hughes representative for assistance.

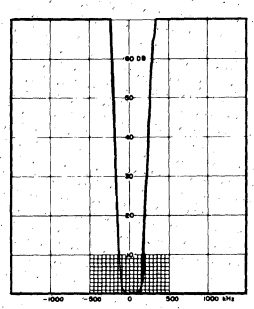
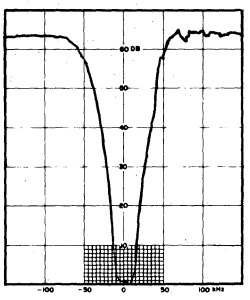
IXF® INTEGRATED CRYSTAL FILTERS

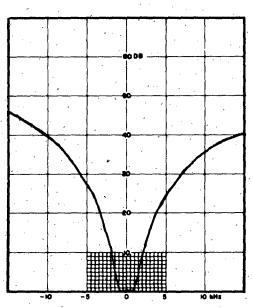
- We specialize in integrated crystal filters — both monolithics and tandem monolithics. From 2 MHz to 350 MHz.
- We pioneered the market — nationwide. Our IXF® integrated crystal filters have been available since February, 1966. We have more experience with monolithics and tandem monolithics than anyone else in the country.
- We pioneered the technology. We made the first VHF monolithic crystal filter. The first monolithics above 300 MHz. Developed high-performance tandem monolithics using modern filter design techniques.



f_{on} = 30 MHz
BW_3 = 240 kHz Min.
BW_{60} = 550 kHz Max.
Ultimate Attenuation = Greater than 90 db
Ripple = 2 db Max. 1 db Typical
Insertion Flat Loss = 10 db Max. 8 db Typical
Dimensions: 4.4 x 1 x 1
Termination Impedances: 50 Ohms

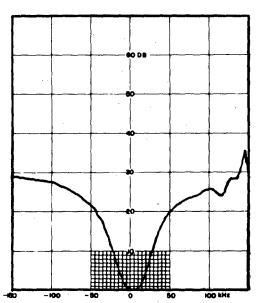
f_{on} = 125 MHz
BW_3 = 20 kHz Min.
BW_{50} = 120 kHz Max.
Ripple = 1 db Max.
Insertion Flat Loss = 6 db Max. 4.5 db Typical
Case Style: CSI (see below)
Termination Impedances: 50 Ohms





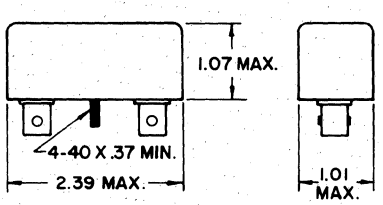
f_{on} = 6 MHz
BW_3 = 2 kHz Min.
BW_{40} = 30 kHz Max.
Ultimate Attenuation = Greater than 70 db
Insertion Flat Loss = 6 db Max.
Case Style: C (see below)
Termination Impedances: 1300 Ohms

f_{on} = 350 MHz
BW_3 = 25 kHz Min.
BW_{20} = 200 kHz Max.
Ripple = 1 db Max.
Insertion Flat Loss = 10 db Max. 7 db Typical
Case Style: VBA (See below)
Termination Impedances: 50 Ohms

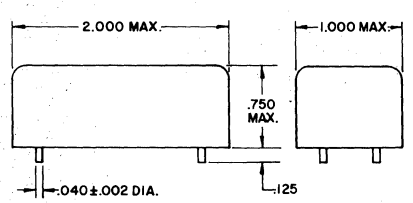


Specifications and response curves of typical custom model IXF integrated crystal filters are shown above.

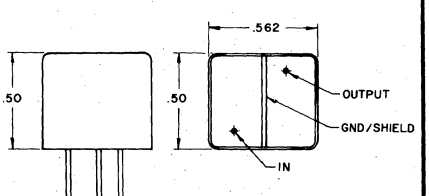
Shown below are some of the most popular standard packages. Types C and F are for monolithic units. Type SMA is for a monolithic unit including source and load matching circuitry. Type FPC is for tandem monolithic filters. Types VBA and CSI are for tandem monolithic filters, including source and load matching circuitry.



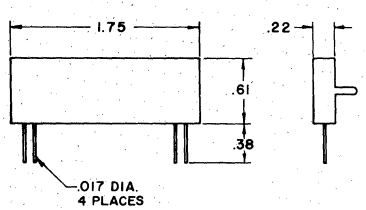
Case Style VBA



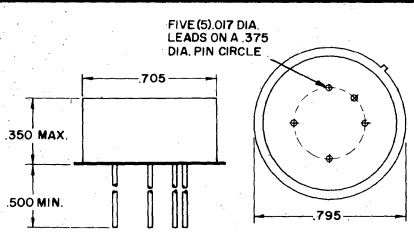
Case Style CSI



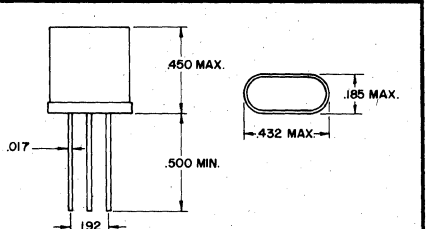
Case Style SMA



Case Style FPC



Case Style C



Case Style F

IXF® integrated crystal filters are ideally suited for receiver IF and front-end filtering. They are being widely used in new and unconventional applications requiring high performance, low cost filtering, such as spectrum cleanup in frequency synthesizers.

Custom models of IXF® Integrated Crystal Filters are available with a wide variety of performance characteristics and package configurations. Prototypes are available within 6 weeks. A number of standard models are available from stock.

COMLINE® INTEGRATED CRYSTAL FILTERS

- The broadest line of standard model 10.7 and 21.4 MHz crystal filters on the market. Over 20 different models. Two-pole to twelve-pole response. Popular bandwidths.
- The only standard line of integrated 10.7 MHz and 21.4 MHz crystal filters on the market. These tandem monolithic integrated crystal filters use no inductors or transformers. Don't use an old-fashioned filter in your new equipment designs. Take advantage of the reduced cost, small size and improved performance available only with a tandem monolithic integrated crystal filter.
- The smallest standard model 10.7 and 21.4 MHz crystal filters on the market. Upright mount or flatpack. Our flatpack 10.7 MHz filters are only 0.20 inches high.

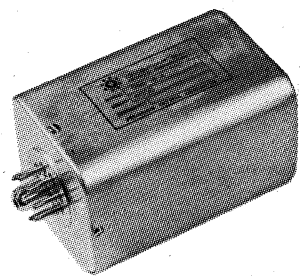
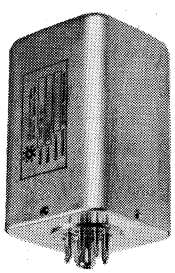
Ovenaire's Engineering and Manufacturing facilities offer a complete product line of precision crystal oscillators, crystal ovens and component ovens. The abbreviated specifications and illustrations below are typical of units in regular production at Ovenaire but do not reflect the limits to our capabilities. In addition to many standard designs, Ovenaire offers custom design and manufacturing services to provide an oscillator or oven to your exact specifications.

PRECISION CRYSTAL OSCILLATORS



PRECISION STANDARDS — DC PROPORTIONAL CONTROL

Frequency Range: 1 MHz to 20 MHz.
Output: Square or Sine Wave, Typically 2 to 10 mW.
Long Term Stability: From 5 x 10^{-8}/Day to 5 x 10^{-10}/Day.
Ambient Stability: From 5 x 10^{-9}/°C to 5 x 10^{-11}/°C.
Operating Temperature: Within the Range −55°C to +75°C.
Supply Voltage: +12 VDC to +28 VDC Range.

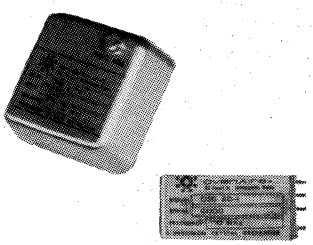


HIGH STABILITY OSCILLATORS — AC PROPORTIONAL CONTROL

Frequency Range: 1 MHz to 20 MHz.
Output: Square Wave or Sine Wave, Typically 2 to 10 mW.
Long Term Stability: From 1 x 10^{-7}/Day to 5 x 10^{-9}/Day.
Ambient Stability: From 1 x 10^{-8}/°C to 1 x 10^{-9}/°C.
Operating Temperature: Within the Range −30°C to +65°C.
Oven Supply: 115 VAC ±10% 50 Hz or 60 Hz.
Oscillator Supply: +9 VDC to 28 VDC Range.

TEMPERATURE COMPENSATED OSCILLATORS — TCXO

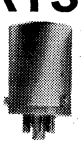
Frequency Range: 1 MHz to 15 MHz.
Output: Square Wave or Sine Wave, Typically 1 to 10 mW.
Long Term Stability: From 1 x 10^{-7}/Month to 5 x 10^{-7}/Month.
Ambient Stability: Up to ±2 x 10^{-7} depending on temperature range.
Operating Temperature: Within the Range −30°C to +75°C.
Supply Voltage: +9 VDC to +28 VDC Range.

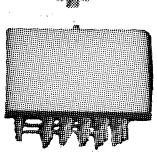


VOLTAGE CONTROLLED OSCILLATORS — VCXO

Ovenaire VCXO's are available for all classes of oscillators. From fine electrical trim on precision standards to wide swing VCXO. Available to customer requirements in 1 to 40 MHz with up to ±300 ppm swing.

CRYSTAL OVENS AND COMPONENT OVENS





Single crystal, dual crystal and multiple crystal ovens.
Component ovens for precise temperature control of electronic components.
Thermostat control, thermostat with circuitry control, solid state control and proportional control. Available in all standard voltages and temperatures.
A wide range of standard designs include many sizes, configurations, circuit options and mountings.

CRYSTAL CONTROLLED OSCILLATORS

Frequency Range: 25K Hz to 50M Hz

SERIES	ACCURACY	INPUT	OUTPUT	SIZE	TERMINALS
C65	±0.001% (−40°C to 85°C)	3 to 28VDC	Square Wave	1 13/32" x 1 13/32" x .4"	Solder Pins
C80	±0.005% (−55°C to 85°C)			2" x 2" x .4"	

Our units are ideally suited for use in ground, shipboard, airbirne, and satelite equipment.

We also have a versatile line of: • **TIME BASE GENERATORS** • **FREQUENCY DIVIDERS** • **TIMERS**

We have many models designed to meet your shock and vibration requirements of MILE-E-5400, MIL-E-5272, MIL-STD-67 and MIL-STD-202. Our application engineers would appreciate the opportunity of assisting you in selecting a model to meet your specific requirements.

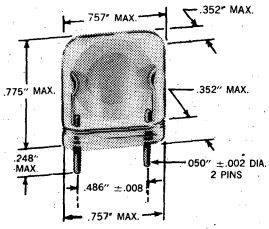
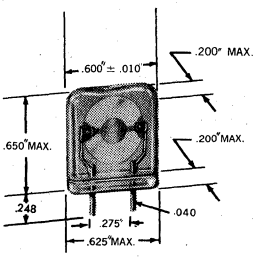
McCOY *The Leading Producer of QUALITY Quartz Crystals*



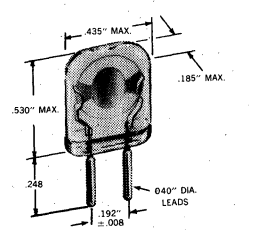
G-1

G-1 Holder (HC-27/U)
For wire leads, specify G-4
Metal equivalent is M-1 (HC-6/U)



G-31

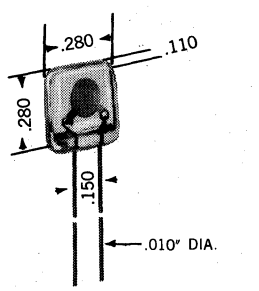
G-31 Holder
For wire leads, specify G-30



G-21

G-21 Holder
(HC-29/U)
For wire leads,
specify G-20 (HC-26/U)

Metal equivalents are HC-25/U (pins) and HC-18/U (wire leads)



MM

(Micro-Miniature)

High frequency crystals are offered at frequencies from 700 kc to 250 mc to customer specifications, in addition to the MIL-C-3098 specifications listed below.

HIGH FREQUENCY QUARTZ CRYSTAL SPECIFICATIONS

CRYSTAL UNITS LISTED IN ORDER OF LOW LIMIT OF FREQUENCY RANGE BY HOLDER SIZE

McCOY "The Real Name for QUALITY Crystal Components"

Low frequency crystals are offered over the frequency range of 700 cps to 800 kc, using a variety of angles to achieve the desired characteristics. Rigid manufacturing control assures the highest standard of quality, together with competitive pricing and on-time delivery.

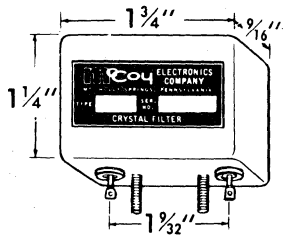
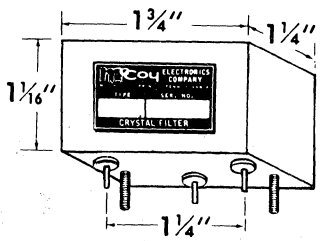
McCOY CRYSTAL FILTERS

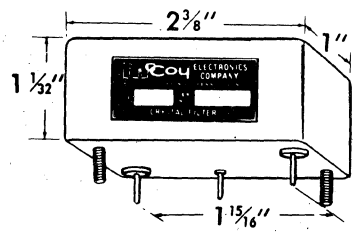
McCoy offers the most complete line of filters in the world!

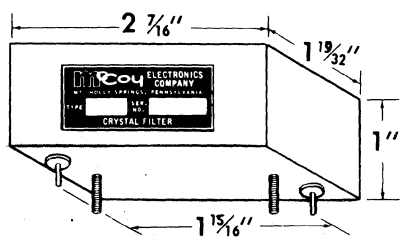
Filters are available from 5 kc to 125 mc

Typical Packages

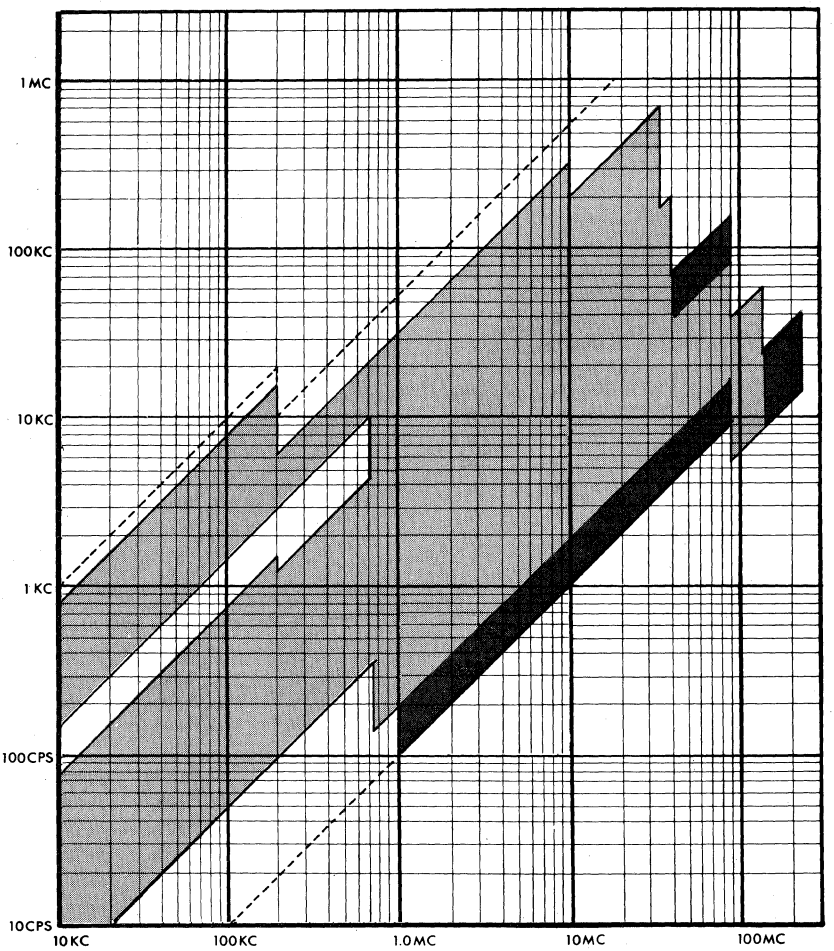








This logarithmic chart indicates the practical and theoretical possibilities in crystal filters. Read center frequency along X axis, bandwidth along Y axis. As a rule, filters selected near the middle of the "narrow and intermediate" band can be produced with the greatest variety of characteristics.



Crystal Discriminators

McCoy maintains a complete engineering staff for crystal discriminators, and offers units over the frequency range of 50 kc to 30 mc. Examples of the standard line are described below.

Center frequency: 10.7 mc adjustable ±300 cps (See Note 1)
Center frequency stability: ±.003% −10°C to +70°C
Peak to peak bandwidth: 30 kc (See Note 2)
Output sensitivity: 1 volt per kc with an input level 3.0 VRMS amplitude limited
Output linearity: 3% to ± 11 kc
Output symmetry: 5% ±11 kc to ±30 kc
Designed for high reliability applications
Package size: L. 1¾", W. 1¼", H. ½"

1. Available over frequency range of 8.5 mc to 30.0 mc. (Available with or without center frequency adjustment.) Size: L. 1¾", W. 1.0", H. ½".
2. Available in bandwidths up to 100 kc peak to peak and narrow to 5 kc peak to peak with corresponding sensitivity, linearity and stability variations.

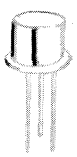
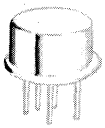
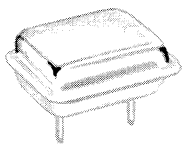
McCOY CLEANSEAL CRYSTALS



W-6



W-7



W-10

THE LATEST DEVELOPMENT FOR HIGH RELIABILITY PERFORMANCE

McCoy Cleanseal enclosures are now available in the low frequency range of 1 kc through 700 kc. Cleanseal techniques eliminate possible contamination of the metal enclosure due to soldering fluxes and also avoid the adverse effects of high heat imposed by the conventional soldering methods. Frequency stability and aging characteristics are improved by the Cleanseal method of encapsulation. Units listed will meet environmental conditions such as shock and vibration, as specified by MIL-C-3098D.

DESIGN AND TESTING...

McCoy engineers and technicians have worked with other industry leaders in developing the Cleanseal technique for production requirements. Extensive research, together with in-the-field testing, has proven the McCoy Cleanseal enclosures can withstand the rigorous environmental conditions of the space age with a minimum change in crystal parameters. This new construction technique permits after-seal leak rates of less than 1×10^{-8} atm. cc per second.

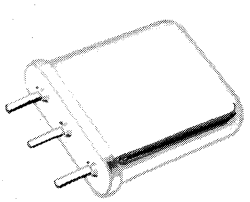
CRYSTAL OSCILLATORS • TCXO's • OVEN OSCILLATORS CRYSTAL AND COMPONENT OVENS

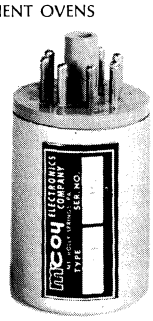
McCoy Electronics' standard line of crystal controlled oscillators covers the complete frequency range from 400 Hz to 150 MHz. The most advanced techniques in circuit design and packaging provide highly stable, miniature frequency standards.

McCoy's standard line of crystal controlled oscillators covers the frequency range from 400 Hz to 150 MHz. Crystal controlled frequencies below 10 KHz can be provided by utilizing integrated binary countdown techniques. For stability requirements more stringent than those provided by the crystal alone, McCoy offers oscillators with either temperature control or temperature compensation. The temperature control technique uses either snap-action thermostats or proportional ovens.



MINIATURE CRYSTAL OSCILLATOR

CRYSTAL AND COMPONENT OVENS



McCoy crystals and component ovens provide the temperature accuracy and frequency stability required for the majority of applications requiring control of temperature environment of crystals, small components and circuit assemblies.

McCoy Electronics has had wide experience in TCXO (Temperature Compensated Crystal Oscillator), Stabilities of ±0.5 PPM over −40°C to +70°C are achievable results without the use of an oven. The obvious advantage of drastically reduced power consumption, combined with immediate operation without warm-up, make the TCXO especially applicable to portable, airborne and space applications.

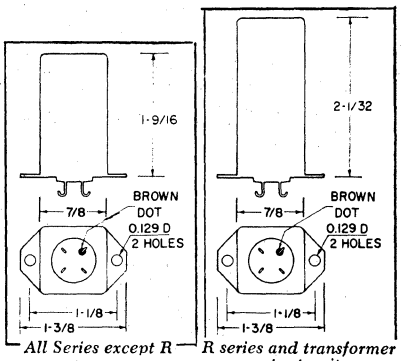
OSCILLATORS

FIXED OR SLIGHTLY VARIABLE FREQUENCY AND/OR AMPLITUDE

- Sine wave frequencies from 50 cps to 80 kc
- Temperature: —25 to +55°C
- Size: 7/8" sq. x 1-9/16" high
- For shock and vibration, specify R (2-1/32" high) or S (1-9/16" high)
- Each oscillator may be adjusted for your requirements of load, voltage output and input, etc.
- 600 ohm balanced output available
- Extremely low distortion units available



All Series except R — *R series and transformer output units*

ELECTRICAL SPECIFICATIONS

Series 101 and 102 are fixed frequency and amplitude units to be used as a signal source into a light load. These should be used where no field adjustments are required. Series 101 and 102 usually supplied with 4 pin solder hook terminals. If desired, specify NOVAL plug.

	Series 101	Series 101A	Series 102	Series 102A
Input Volts, DC	10.5-13.5	24-32	10.5-13.5	24-32
Input Current, ma.	10	10	10	10
Output Frequency	Fixed. Any frequency from 50 cycles to 80 KC			
Initial Frequency Accuracy per cent	± 2½	± 2½	± ½	± ½
Frequency Drift, maximum, per cent	± 2½	± 2½	± 1½	± 1½
Maximum Load, kilohms	10	20	10	20
Output Voltage, VRMS, minimum	1	2	1	2
Change in Amplitude, maximum db.	± 1	± ½	± 1	± ½
Distortion, maximum, per cent	1	1	1	1

Series 103 thru 105 are similar to Series 102 except adjustment of amplitude and frequency may be made with an external variable resistor. They may be used as signal source into a light load where exact voltage or frequency is required. Series 103 and 104 are supplied with 4 pin solder hook terminals and Series 105 oscillators are supplied with 7 pin solder hook terminals. If a plug-in unit is required, specify NOVAL plug.

	Series 103	Series 103A	Series 104	Series 104A	Series 105	Series 105A
Input Volts, DC	10.5-13.5	24-32	10.5-23.5	24-32	10.5-13.5	24-32
Input Current, ma.	10	10	10	10	10	10
Output Frequency	Variable ±3% around any specified frequency from 50 cy. to 80 KC		Fixed. Any frequency from 50 cy. to 80 KC.		Variable ±3% around any specified frequency from 50 cy. to 80 KC	
Initial Frequency Accuracy, per cent	0	0	± 1	± 1	0	0

Change in Amplitude, maximum db.	± 1	± ½	± 1	± ½	± 1	± ½
Distortion, maximum, per cent	1	1	1	1	1	1

Series 106 through 110 are for use into a lower impedance load. All require a 600 ohm resistive termination except Series 110 which requires a 220 ohm termination. Since these units are capable of a small power output, they are recommended for ground support use in temperatures from — 25 to + 50°C. Series 106 oscillators are supplied with 4 pin solder hook terminal and Series 107 through 110 are supplied with 7 pin solder hook terminals. If a plug-in unit is required, specify NOVAL plug.

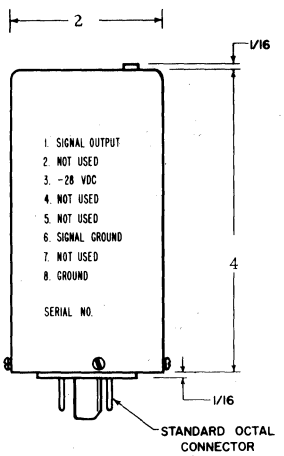
CRYSTAL OSCILLATORS 3.5 KHZ to 10 MHZ

- Modular Construction — Easily repairable in the field
- MIL-E-16400E, Class 4, with temperature to 60°C
- High Reliability; high MTBF; parts from MIL-STD-242
- Output drives 500 ohms

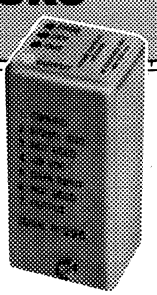
	Series 401	Series 401A	Series 402	Series 402A
Voltage Input	−28 ±2 volts	+28 ±2 volts	−28 ±2 volts	+28 ±2 volts
Current	25 ma., max.		25 ma., max.	
Frequency Stability	±.01%		±.01%	
Output Voltage	0 to 2.5 VRMS, adjustable		2.5 VRMS, min.	
Output Stability	1 db, total		1db, total	
Distortion	5%, max.		5%, max.	



SERIES 403A IS GATED CRYSTAL OSCILLATORS FOR COMMAND FUNCTIONS.

VOLTAGE CONTROLLED OSCILLATORS

SERIES 300



- Modular construction — easily repairable in the field
- MIL-E-16400E, Class 4, with temperature to 60°C
- High reliability; high MTBF; parts from MIL-STD-242
- Frequency stability 0.15% of frequency
- High deviation

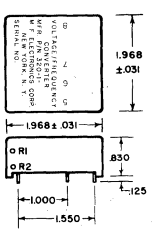
VOLTAGE TO FREQUENCY CONVERTERS

(WIDE BAND VCO)

Used to convert an analog voltage into digital form. May be applied to register to read digital output.

SERIES 320-1 full military unit meeting MIL-E-16400. Accuracy of conversion is (1% of reading +0.7% of full scale).

SERIES 320-2 for commercial application in the conversion from analog to digital. Range of frequencies is 0 to 50 kHz.



AC DATA VCO MODULATOR AND DEMODULATOR, SERIES 310 AND 410

The 310-1 and 410-1 comprise a modulator-demodulator pair which can be used for transmission of very low frequencies via standard voice channels. Frequency response is 1 Hz to 200 Hz. Carrier is nominal 2500 Hz. Quantity cost for the pair is $95.00. Useful in oceanagraphic, geodetic, seismographic applications, wherever transmission of low frequencies are involved. Detailed data sheets available.

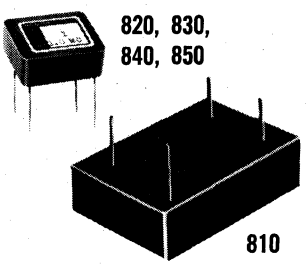
OFF THE SHELF DELIVERY!

ECONOMY INTEGRATED CIRCUIT OSCILLATORS

as low as $32.90 each in 10 quantity

Monitor's new 800 Series Integrated Circuit Oscillators make it uneconomical to buy crystals (even ours) and design your own oscillator. Why are they so economical? They were designed specifically for the less stringent temperature and stability requirements found in commercial and industrial EDP and digital control applications. But don't think the low price means lower quality. They feature the same high quality, workmanship and reliability as the 700 Series IC Oscillators shown below.



Who pioneered the Koldwell Crystal . . . MONITOR! Who was first with a complete line of integrated Circuit-Subminiature Oscillators . . . MONITOR! NOW — who is going to be first to break the Availability Barrier . . . you know it . . . MONITOR is! We say it's "STOCK IT TO ME TIME!" That's right — off the shelf, directly to you for the first time, complete crystal oscillators. Not just one or two but 34 of the most commonly manufactured frequencies. Naturally, we are not going to have all the items you need, but beside the crystal oscillators, we have thousands of crystals ready to go — in all shapes and sizes — give us a chance to show we mean business. Call us — tell us what you need and just say "STOCK IT TO ME!" (We've got some OVENS in stock, too . . .)

CRYSTAL FILTERS

As one of the nation's leading suppliers of high reliability crystals and subminiature integrated circuit oscillators, Monitor Products recently expanded their product line to include quartz crystal filters in the 20-1000 KHz region.

With the utilization of the computer in the realization and most importantly in the analysis of filter networks, Monitor is now able to provide a suitable tool to produce crystal filters for our customers.

A broad list of catalog items is not available, but Monitor will quote directly to your filter requirements.

Monitor has developed several prototype networks based on computer-aided design. The computer-graphic analysis of these networks is shown below. The figures are in themselves somewhat unique in that all of the pertinent characteristics of the network are available to the customer with a single graphic presentation.

While these are theoretical curves, it can be noted that they are not the common textbook variety, and the physical losses of both crystals and coils are included in the analysis. In the majority of these cases where a computer-graphic analysis is presented, the characteristics far exceed the specifications. If the design in any way appears borderline, element perturbations are made and a sensitivity projection indicated to justify or eliminate the design.

While Monitor is new in the filter field, we feel that the crystal is the heart of the device, and our capabilities in this area are well known. We cannot guarantee that we can produce every one of your requirements. However, we can guarantee that we will not lead you into production delays by a faulty and unrealistic design.

Please forward your production requirements to Monitor for our analysis and quotation.

HIGH RELIABILITY "KOLDWELD" CRYSTALS 10KHZ TO 170MHZ

The KOLDWELD process is the first major advance in crystal reliability and packaging in 20 years. The process eliminates contaminating solder, flux and heat from the sealing process and improves aging and reliability. Each crystal is manufactured under decontaminant conditions, then leak tested to 10^{-8} cc of helium per second prior to final QC testing. There's a Monitor crystal for all your high reliability frequency control applications. Monitor also manufactures a complete line of crystals to MIL-C-3098D.

CRYSTAL OSCILLATORS

PRECISION OVEN CONTROLLED OSCILLATORS

Motorola has pioneered the field in the design and manufacture of ultra-precision, oven controlled, crystal oscillators. Meeting both military and commercial standards, and designed for both mobile and laboratory use, they are ideally suited for the generation and control of precise frequency and time signals. Both standard and custom designs are offered.

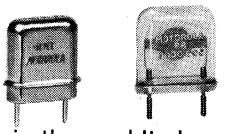
HIGH STABILITIES: To parts in 10^{-10} vs: environmental factors.
WIDE FREQUENCY RANGE: From 60 KHz to 20 MHz normal. Extended ranges available on special order.
FAST WARMUP: The industry's fastest. Meets all military requirements.
WIDE TEMPERATURE RANGE: From —55°C to + 125°C. Extended ranges available on special order.
LOW AGING: Less than 5 x 10^{-10}/day.
OTHER FEATURES: All silicon solid state design. Proportionally controlled ovens. Excellent spectral purity designs with output filters available.

TEMPERATURE COMPENSATED CRYSTAL OSCILLATORS

A complete line of TCXO oscillators is available for applications where compactness, minimal power drain, and instant operation is needed. Established designs are supported by high production rate capabilities.

FREQUENCY RANGE: 4 MHz to 30 MHz normal. Extended ranges available to order.
STABILITIES: 1.0, 2.0, 3.5, 5.0 and 10.0 PPM standard designs over temperature ranges extending from —30°C to +85°C. Others on special order.
OUTPUTS: Sine, square, and logic drivers.
OTHER FEATURES: All silicon solid state construction. Cold weld low aging rate crystals. Compact, space saving packaging.

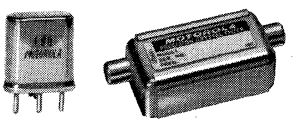
PRECISION CRYSTALS



Motorola is the world's largest manufacturer of precision grade high frequency crystals. High volume facilities at multiple plants.

FREQUENCY RANGE: 2.0 MHz to 60 MHz normal. Standard designs to 250 MHz available.
HOLDERS: Glass HC-27/U, HC-6/U, HC-25/U, and HC-18/U cold weld and solder seal.
LOW AGING: Rates as low as 1 x 10^{-6}/yr.
OTHER FEATURES: Gold plated electrodes exclusively. All manufacturing in Class 100 Clean Room facilities. Tight tolerance designs for TCXO and filter applications are standard.

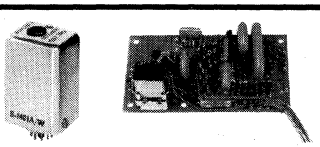
CRYSTAL FILTERS



Motorola has a wide range of designs employing both monolithic and discrete component techniques. Special designs readily produced on a production level basis.

DESIGNS: Band pass, band reject, symmetrical, asymmetrical, contiguous comb.
FREQUENCY RANGE: 1.0 MHz to 250 MHz.
SIZE: As small as ½" square.
TYPES: Monolithic and discrete designs.

TONE MODULES



Motorola offers a line of tone modules especially designed for selective switching, signalling and similar applications. Modules are operating devices based on Motorola's time proven contactless resonant reeds combined with solid state circuitry.

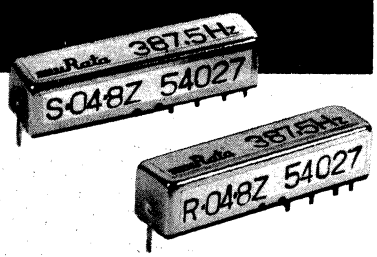
MOUNTING: Plug in custom circuit board modules.
CIRCUITRY: Solid state combined with contactless resonant reeds.
FREQUENCY RANGE: 67 Hz to 3000 Hz.
OTHER FEATURES: Highly selective, extremely stable, low operating power.

CUSTOM DESIGNS

Motorola now offers its extensive design and production facilities in the frequency components field to other OEM manufacturers in the electronics industry. Both standard designs and your custom designs are available, at multiple plant facilities, for production level deliveries. For further information address all inquiries to: Marketing Manager, at the above address.

LOW FREQUENCY FILTER ?

SPECIFY MURATA MICROFORK®
a unique piezoelectric tuning fork.



MICROFORK MODEL EFM

Microfork is a newly designed subminiaturized tuning fork.

This model is now widely used for bellboy system, selective calling, remote control and tone control of electronic music instruments, where compactness, ruggedness and economy are required.

Nickel plated brass case is mounted on a plastic base designed for printed circuit arrangement.

SPECIFICATION

Items	for Receiver EFM-R	for Sender EFM-S
Frequency	360~2900Hz	
Frequency Accuracy	360~ 999Hz ; ±0.5Hz 1000~2900Hz ; ±1.0Hz	
Input and output Impedance	300KΩ	
Insertion Loss*	10dB max.	
Temperature Coefficient of Frequency	3.5×10^{-5}/°C max.	
Allowable Temperature Range	−20~+60°C	

* Insertion Loss $=20\log\frac{E_1}{E_2}-6$(dB)

502.5	667.5	832.5	997.5	
517.5	682.5	847.5		

DESIGN CONSIDERATION

1. Maximum voltage of input is 10Vrms.
2. Microfork is not effected by magnetic field and is not mutually coupled even in close lay-out.
3. Microfork may oscillate in higher harmonics. In this case, you should use high pass capacitor (0.001~0.005 μF) at the output of Microfork, as shown in Fig. 3.
4. EFM-R is adjusted by the test circuit of Fig 1.
   But oscillating frequency by the self-oscillator circuit of Fig. 3 is lower about 0.2% than the adjusted frequency.

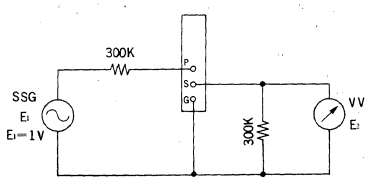

Fig. 1

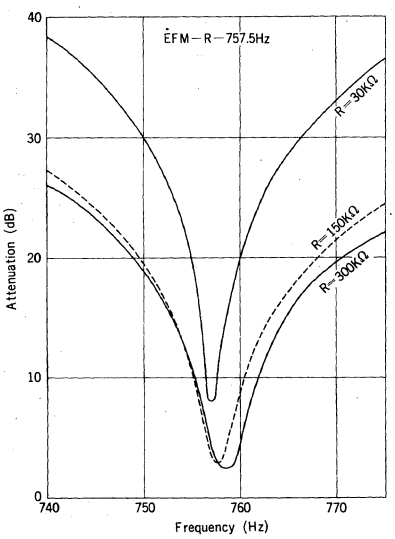

Fig. 2

So, EFM-S is adjusted by the test circuit of Fig. 3.

5. The input and output impedance of Microfork is 300 KΩ as shown in the specification.
   The band-width of Microfork is maximum when terminated by this valued resistance as shown in Fig. 1.
   When the resistance value is smaller, both band-width and resonant frequency decrease the more as shown in Fig. 2.

FREQUENCY CONTROL DEVICES

HERMETICALLY SEALED IN METAL

NE-6 Equivalent to Mil HC-6/U holder. Frequency range 185 Khz to 55 Mhz. Available with wire leads or large pins.

NE-12 Designed to fill size gap between HC-6/U and HC-18/U. Popular with filter manufacturers. Frequency range 3 Mhz to 55 Mhz.

NE-13 Equivalent to Mil HC-13/U holder. Frequency range 3.5 Khz to 250 Khz. Can be extended down to 2.0 Khz with taller versions. Available with wire leads.

NE-18 Equivalent to Mil HC-18/U holder. Available in frequency range 10 Mhz to 55 Mhz.

NE-25 Equivalent to Mil HC-25/U holder. Available in frequency range 10 Mhz to 55 Mhz.

VACUUM SEALED IN GLASS

T-3 Under .400" in diameter. Available in frequency range of 10 Khz to 200 Khz.

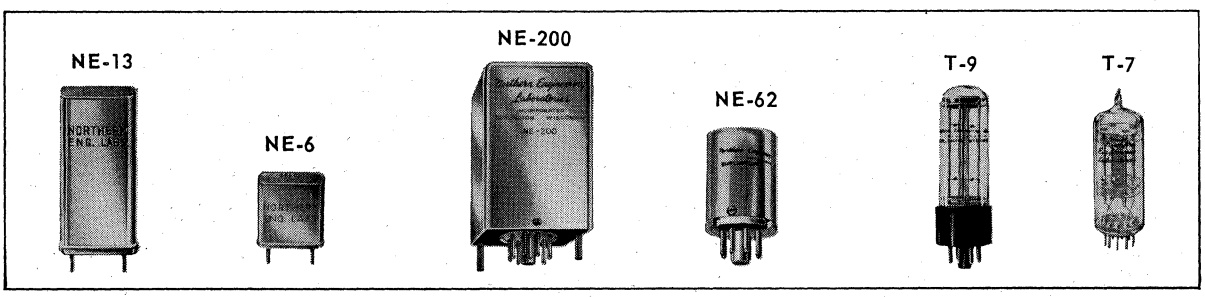
T-6 Equivalent to 6AU6 tube in size. Available in frequency range of 6 Khz to 400 Khz.

T-7 Equivalent to 12BH7 tube in size. Frequency range 2 Khz to 400 Khz. Especially popular at 100 KC for precision time base for frequency counters.

T-9 Equivalent in size to 6SN7 tube. Frequency range 800 hz to 200 Khz.

T-12 Equivalent to 6146 tube in size. Frequency range 75 Khz to 120 Khz, & 550 Khz to 1600 Khz.

Metal QUARTZ CRYSTALS Glass



Crystal OVENS Component

NE-62 Capable of holding two HC-6/U crystals, or other components of equivalent size. Popular for voltage reference diodes.

NE-71 For enclosing one T-7 crystal.

NE-132 Capable of holding two HC-13/U crystals, or other components of equivalent size. Popular for voltage reference diodes.

NE-200 With cavity size 2.75" high, 1.75" wide, by 1.375" deep, this oven is very popular for components. Can be adapted to accept plug in cards.

NE-461 Designed to hold one HC-6/U crystal where exceptional stability is required, without high cost of proportional control.

Many other types available as standard production models, or contact us with your special requirements.

Request Detailed 20 Page Catalog 367

Card OSCILLATORS Package

NE-100TO A stable unit capable of handling a wide variety of applications. Popular at 100 Khz, high or low impedance, sign wave output. Available with A.F.C. terminal. With or without temperature control.

NE-200TO A versatile package for one or two oscillators, or one oscillator and another board for other functions. With or without temperature control.

Hermetically sealed oscillator packages for severe environments. Can be provided with terminal for remote frequency trim. Card oscillators for either plug in or bolt - down mounting. Available with amplifiers and wave shaping circuits. Temperature compensated oscillators for improved performance without the power required for temperature control.

REEVES-HOFFMAN

Described are typical units of commonly used types. Descriptive data, including measured capabilities, furnished on request. If your need concerns types and parameters not shown, please contact our plant.

Available with special C_0, C_1, and L_1 for filter applications • temperature coefficients to your specifications • pre-aging to guarantee stability of high precision units • special designs for high shock and vibration. All units meet mil-3098 requirements. Special high precision units, with aging characteristics up to 2×10^{-11} per day, are available in standard frequencies of 1, 2.5 and 5 MHz.

SHEROLD FREQUENCY CONTROLS

CRYSTALS

PRECISION EXCEEDING MIL SPECIFICATIONS

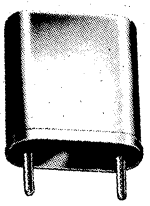
Advanced design crystals in all frequencies, for military and commercial users. Sherold's complete research, design and production facilities enable us to produce to the most exacting specifications in small quantities or high volume. Questions about selection, design, or special application are always welcome.

SC-100

Freq. Range } 4-125 MC

Subminiature hermetically-sealed plated unit. Smallest space requirements of any hermetic crystal available. Weight approximately 1/25 ounce. Shown actual size.

SC-6



Freq. Range } 190 KC-125 MC

Metal plated and hermetically sealed in military type HC-6/U holder. Very low resistance, low drift, rugged construction. Available in 25 military types. Shown here actual size.

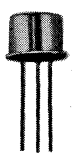
SC-106

Identical to SC-100 except designed for plug-in application with .040 diameter pin.

SC-8

Identical to SC-6 except for 2-inch tinned wire leads for soldered-in applications.

SC-15



SC-17

New popular TO-5 and "Flat Pack" Holders above give maximum feasibility for circuit board mounting.

CRYSTAL FILTERS; LC FILTERS; CRYSTAL DISCRIMINATORS

Miniaturized crystal filters designed for use where extreme selectivity and stability must be combined with minimum volume. Under one roof are facilities for designing and producing crystal filters as well as filter crystals. This assures fabrication of highly reliable crystal filters and discriminators. Sherold has also designed and is producing monolithic filters in volume.

SPECIFY SHEROLD FOR HIGH QUALITY...PROMPT DELIVERY

IF YOU'RE LOOKING FOR CUSTOM CRYSTAL OR TUNING FORK OSCILLATORS,

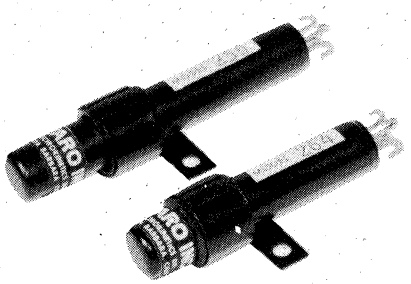
With us, "custom" is customary.

Sure, we have standard designs, but we start with these and adapt them to fit customer specifications exactly.

This kind of capability is nothing new to us. We're fortunate to have on our design-engineering staff people who helped originate ideas and concepts like Temperature Compensated Crystal Oscillators.

Today we make the broadest line of tuning fork oscillators in the industry, including Model 6205—the smallest, lightest unit on the market today.

In conventional crystal oscillators we offer sub-miniature units with wide temperature ranges, outputs compatible with integrated circuit loads, and frequency ranges of less than one Hertz to 100 MHz.

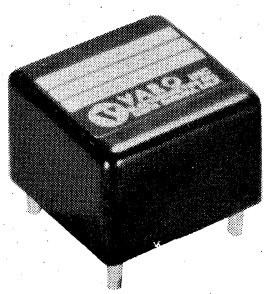


ELECTROMAGNETICALLY COUPLED TUNING FORK RESONATORS.

Designed for use in oscillator circuits where frequency stability requires use of a mechanical resonator. Will withstand severe mechanical shock without calibration change. Resilient mounting clips provide vibration isolation. Hermetically sealed in drawn, cold-rolled steel cans.

	Model 256		Model 264
Frequency:	360 Hz-800 Hz	800 Hz-2 KHz	1 KHz-4 KHz
Accuracy:	±.05%	Same	Same
Operating* Temperature:	−55°C-100°C	Same	Same
Size:	2 7/16" long 5/8" diameter	Same	1 15/16" long 9/16" diameter

*Closer tolerance over narrower temperature ranges available.



TUNING FORK OSCILLATOR FOR RUGGED ENVIRONMENT.

Produces stable output frequency where reliable low frequency signals, small size and low weight are essential. All solid state. For use in all military and aerospace environments. Performs function of frequency standard, time base generator, computer clock source, speed control reference source, program controller, or frequency coding.

Frequency: 800 Hz-4,000 Hz.

Output: 8 V minimum peak to peak at 12 vdc supply, to 10 K ohms, sine or square, with 10 microseconds maximum rise and fall time.

Physical Package: 1¼" x 1½" x 1½". Stud mounted. Hermetically sealed.

SUB-MINIATURE TUNING FORK OSCILLATOR.

Tiny eleven-gram package combines the advantages of ceramic transducers and modern integrated circuitry. Unit mounts by leads directly on printed circuit board. Tuning fork element is mounted in silicon-rubber which provides isolation from shock and vibration.

Frequency: 2 KHz to 40 KHz.

Output: Logic "0", < +0.5 volts
Logic "1", +4.0 ±0.5 volts

Waveshape: Square

Rise-Fall Time: Less than 5% of total period measured from 10% to 90% of maximum.

Physical Package: ⅞" square. Only 7/16" high when seated. Hermetically sealed.

Spectrum Technology Inc

BLDG. 240, SANTA BARBARA AIRPORT

GOLETA, CALIFORNIA 93017
(AREA CODE 805) 964-7791

YOU'RE LOOKING IN THE RIGHT PLACE.

Spectrum Technology, Inc. has acquired and is operating on a continuing basis the Varo Time and Frequency business. All Varo standard designs and models shown here and the Varo Time and Frequency custom design capability are now available from Spectrum Technology.

Our tuning fork resonators designed for space and missile environment have a MTBF of more than 400,000 operating hours.

If you have a systems application that requires custom tuning fork oscillators, crystal oscillators, mil spec oscillators, or tuning fork resonators, but you don't know who to talk to, now you do.

Us.

Spectrum Technology, Inc.

PRECISION OSCILLATOR.

Sub-miniature tuning fork oscillator. Combines advantages of ceramic transducers and modern integrated circuitry for high performance in a small package. Resonator element is mounted in silicon-rubber to provide isolation from shock and vibration.

Frequency: 1 KHz to 40 KHz without multipliers.

Output: 1 volt rms minimum to 10,000 ohm load, sine.

Physical Package: 2" x 2" x ½" seated height. Lead mounted directly to printed circuit board. Hermetically sealed.

TEMPERATURE COMPENSATED CRYSTAL OSCILLATORS.

Designed for applications where no warm-up time or oven power is available, and minimal size and weight are important to the user. Termistor-varactor compensation networks and Silicon IC active devices provide optimum performance. Excellent long-term stability results from use of glass-enclosed or cold weld quartz crystal.

MODEL 7000

Frequency: 10 KHz to 20 MHz

Accuracy: $\pm 1 \times 10^{-6}$ at +25°C

Stability: To $\pm 3 \times 10^{-7}$ at 0°C to 50°C

Physical Package: 2" x 2" x .63" May be mounted by its terminals on a printed circuit board. Hermetically sealed.

MODEL 7001

Frequency: 100 KHz to 20 MHz

Accuracy: $\pm 1 \times 10^{-6}$ at 25°C

Stability: To $\pm 3 \times 10^{-7}$ at 0°C to 50°C

Physical Package: 2" x 2" x .75" Mounted by terminals on PCB. Hermetically sealed.

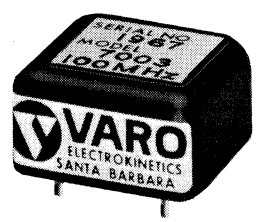
MODEL 7002

Frequency: 2.7 MHz to 20 MHz

Accuracy: $\pm 1 \times 10^{-6}$ at +25°C

Stability: To $\pm 3 \times 10^{-7}$ at 0°C to 50°C

Physical Package: 2" x 2" x ½" Can be mounted by terminals on PCB. Hermetically sealed.



SUB-MINIATURE CRYSTAL OSCILLATOR I.C. LOGIC CLOCK.

This tiny oscillator supplies a clocking signal for use in digital computer applications where space and power are limited. Simple design allows use of premium quality components to attain high reliability. Can be used in high shock, high vibration environments, including aircraft, shipboard, oceanographic, missile, or mobile.

Frequency: 3 MHz to 100 MHz

Accuracy: ±10 ppm at 25°C
±50 ppm, −55°C to +125°C

Stability: $\pm 1 \times 10^{-7}$/24 hours at 25°C

Physical Package: .88" x .88" x .45" Can be mounted on printed circuit board. Hermetically sealed.

TEDFORD CRYSTAL LABS., Inc.

Since 1930, Tedford has been a steadily growing supplier of quartz crystals to the electronic industry. Now, with our new air conditioned facility, humidity-controlled areas and modern equipment, our capabilities are unsurpassed for the design and manufacture of high-reliability crystals for commercial and military applications.

Tedford also supplies frequency control devices, filters and oscillators, shown in section 2700 of EEM.

Tedford manufactures low and high frequency quartz crystals in a range from 90 KHz to 210 MHz. Both standard and custom units in small or large quantities can be supplied for a variety of applications.

Dimensions of the holders below and the frequency ranges they can accommodate are indicated in the table to the right.

TOYOCOM FINEST PRODUCTS

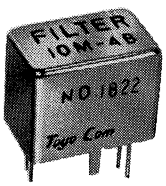
■ TOYO HCM FILTERS (high-frequency crystal mechanical filters)

The Toyo HCM Filter is a bandpass filter combining the fundamental and inharmonic thickness-shear vibration of the AT-cut crystal resonator. Miniaturized and feather-weight, this ultra compact high-frequency crystal mechanical filter can be applied to integrated circuit modules, and its excellent selectivity makes it ideal for use in miniaturized communications equipment.

FEATURES

● Sharp cut-off characteristic ● Wide temperature range (−20°C to +70°C or −60°C to +105°C) ● Excellent temperature characteristics ● Minimum insertion loss ● Durability ● Compactness and feather-weight ● Low cost

Model **Model**
10M-4A-1 · 10M-4B-1



SPECIFICATIONS:

Center Frequency: 10.7MHz
Ripple: ....less than 2dB
Attenuation Guaranteed: ....more than 80dB

Pass Bandwidth:	(*10M-4A-1)
...more than ±7.5KHz (6dB)	* ±15KHz (6dB)
Stop Band Discrimination:	
...less than ±15KHz (60dB)	* ±30KHz (60dB)
±20KHz (80dB)	* ±40KHz (80dB)
Insertion Loss:	
...less than 4dB	* 3dB
Nominal Impedances	
...3KΩ	* 5KΩ

■ TOYO QUARTZ

Top in Quality, Low Cost and Ready Supply!

TOYO QUARTZ, the product of TOYO's many years of experience in quartz crystal manufacture, comes in various types and sizes for easy adaptation by the customer to fit his requirements. Although manufactured primarily for use in electronic communications equipments, especially in oscillators, TOYO QUARTZ is also suitable for optical applications particularly since its optical characteristics are superior to those of natural crystal.

DELAY LINES

Andersen designs and develops many more different types of delay devices (including optical and microwave) than any other concern.

Andersen is the only firm producing delay devices for the entire range of frequencies. (DC through 5200 GHz.)

Andersen is the sole major manufacturer of delay devices specializing in signal processing systems.

Andersen supplies a substantially greater volume of delay equipment than any other source.

	TYPICAL APPLICATIONS	RANGE OF PARAMETER	NEWEST DEVELOPMENTS and UNIQUE CHARACTERISTICS
AUDIO	Sonar, voice equalization, ASW sensors.	1 msec to 1 sec delay, balance or unbal anced. Typical delay-bandwidth products up to 40. Impedances from 100 to 1000 ohms.	Delay-BW products up to 60 or more for fixed lines, and 15 or more for electrically variable lines. Extremely low attenuation for delay-BW of 40 max, e.g. 0.001 db per usec max. For higher delay-BW 0.01 db per usec max. Extremely low frequcy ripple, better than 1%. Phase response and group delay to better than 1% at 3 db response.
VIDEO	Radar-sonar signal processing, comb filters, correlation, cancelling, television broadcast, delay equalization, field storage, signal sycnchronization.	Lumped constant lines with delay-BW products of 40 to 60, delays from 1 nsec to milliseconds. Quartz lines with CF to 150 Mhz and delays to 4000 msec. Electrically variable delays of 0.1-100 usec with delay-BW product of 15.	High fidelity storage of one full field of TV signal. Variable delay of full 360° of chrominance. EVDL's with improved group delay and response characteristics meeting video color standards.
IF-RF	Non-dispersive: MTI, clutter cancellation, coherent integration, target simulation, range markers, codeds equence processing, transversal equalizers, receiver gain control versus time, time multiplexing correlation. Dispersive: Pulse expansion-compression systems, spectrum anal-y zers, panoramic receivers, doppler estimators.	CF to 150 Mhz, BW to 50% of CF. Delay 4000 usec in single unit, longer when used in cascade. Products always offered with unity. gain.	Short delays with low spurious, e.g., 1 usec delay, 48 db spurious at 60 Mhz. Wider BW, e.g., 65% at 60 Mhz CF. Flat amplitude response e.g., plus or minus 0.2 db 30% BW 60 Mhz CF. VSWR across BW e.g., 1.3 to 1 nom 50 ohms.
MICRO-WAVE	Non-dispersive: ECM, ECCM, radar processing and checkout systems, fusing, altimeters, transponders. Dispersive: High resolution pulse compression and similar wide band signal processing.	CF UHF through X-band, delay 200 nsec to 10 usec. BW to 500 Mhz. Pulse-compression ratios to 500 to 1.	10 db insertion loss at 500 Mhz, delays to 10 usec at X-band. Dispersive lines with 500 Mhz Bw, .5 usec dispersion. Transducer peak power capability to 50 watts, average power 2 watts.
DIGITAL	Deltics, delta modulators, spectrum analysis, matched filters, serial memories, scratch pad, refresh, buffer storage, A-D conversersion.	Wiresonic: CF to 2 Mhz, storage 20,000 bits per unit. Glass: CF to 20 Mhz, storage 4500 bits per unit. Quartz: CF to 40 Mhz, storage 30,000 bits per unit.	Dual channel, 35 Mhz memory in single small package. Low cost high capacity temperature compensated multi-line packages. Lowest cost per bit in comparison with ferrites and MOS. Highest bits per cubic inch. Lowest power dissipation per bit.
OPTICAL	Laser modulation, Q switches, mode lockers, beam deflectors, optical signal processing, cross and auto correlation, radar pulse compression-expansion matched filters, spectrum and Fourier analyzers, acousto optical continuously variable and multi-tapped delay lines.	CF 0.1 Mhz to 12 Ghz. BW octave or greater. Modulation to 4 Ghz. Time-BW products to 20,000 Mhz-useconds. Spectral ranges from UV to IR.	High efficiency, high power broad band transducers, IR modulation Stable, high rep rate Q switches, liquid cooling for high power, compact solid state designs.

ANDERSEN LABORATORIES, INC.

1280 BLUE HILLS AVENUE • BLOOMFIELD, CONN. 06002 • 203-242-0761

signal processing equipment

Andersen is also the leading producer of delay oriented signal processing systems for broadcast, computer and radar fields.

ALLEN AVIONICS, INC.
255 EAST SECOND STREET • MINEOLA, NEW YORK 11501 • 516-747-5450

LUMPED CONSTANT DELAY LINES

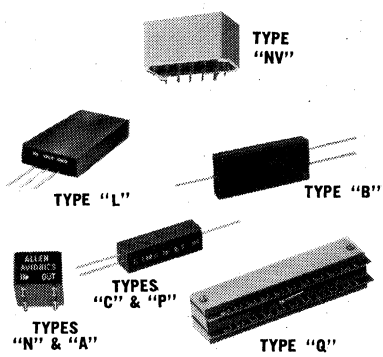
CUSTOM-BUILT

Allen Avionics, Inc. manufactures a wide variety of delay lines to customers' specifications. The following specifications encompass areas in which we normally work. If, however, your requirements fall outside of the following parameters, we would still be interested in hearing from you.

RANGE — Delay times from 3 nanoseconds through audio ranges are available.
TIME DELAY/RISE TIME RATIO — Time delay to rise time ratio to 300/1.
CONSTRUCTION — Units are hermetically sealed in metal cans with glass to metal terminals. Epoxy encapsulated units are also available.
SIZE — Sizes are available from ⅝ x ⅝ x .450 inches.
TOLERANCE — Normal tolerance on time delay is 5%. In most cases tolerances of 1% can be held.
TEMPERATURE — Most of our lines are manufactured to 50 parts/million/degree C from minus 55 degree C to 105 degree C.
SALT SPRAY & HUMIDITY — No problem is encountered here due to the complete seal and the utilization of special paints.
SHOCK & VIBRATION — Units are foamed in hermetically sealed cans which enables them to meet military specifications.
DELIVERY — Prototypes of special lines can often be delivered in a week or two.

Our engineering staff is always available to help with any delay line and application problems.

STOCKED DELAY LINES FROM 20 NANOSECONDS TO 1000 MICROSECONDS



TYPE	TIME DELAY	IMPED-ANCE	TIME DELAY TO RISE TIME RATIO	SIZE
N	20, 30, 40, 50, 60, 70, 80, 90, 100 ns.	100 Ω	3.5 to 1	⅝″ x ⅝″ x .450″

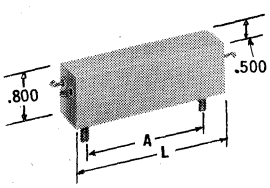
	0.5, 0.6, 0.7, 0.8, 0.9, 1.0 μs.	1000 Ω		
C	.4, .5, .6, .7, .8, .9, 1.0, 1.1, 1.2 μs.	1000 Ω	5 to 1	6/10″ x ½″ x 2″
P	.2, .3, .4, .5, .6, .8, 1.0, 1.2, 1.6, 2.0 μs.	500 Ω	5 to 1	6/10″ x ½″ x 2″
Q*	.2, .3, .4, .5, .6, .8 μs.	100 Ω	5 to 1	1⁵⁄₁₆″ x 4.9″ x .550″
	.1, .2, .3, .4, .5, .6, .8, 1.2 μs.	500 Ω		
	.2, .3, .4, .5, .6, .8, 1 μs.	1000 Ω		
NV	10 to 100 ns. in 10 ns. steps	100 Ω	5 to 1	.675″ x 1.30″ x .735″
B	5, 10, 15 μs.	1000 Ω	5 to 1	½″ x 1⅜″ x 3⅛″
L	25, 75, 200, 250 μs.	250 Ω	5 to 1	2½″ x 4½″ x .8″
	50, 150, 400, 500 μs.	500 Ω		
	100, 300, 800, 1000 μs.	1000 Ω		

* Since the Quick Line is a tapped module consisting of 10 sections, the tap increment of any module can be determined by dividing the module time delay by 10. Modules of the same impedance can be put together in groups of 1, 2, 3 and 4 to achieve different time delay and rise time combinations.

STANDARD MINIATURE DELAY LINES



L Dim. Inches	A Dim. ±.005
1.5	1.140
2.0	1.640
2.5	2.140
3.0	2.640
3.5	3.140
4.0	3.640

All delay lines are 100% tested for delay time, rise time, attenuation, and impedance before and after potting, and again before shipment.

Construction: Hermetically sealed in metal case and potted in epoxy resin.
Mounting: 4/40 studs.
Terminals: 4 glass headers.
Finish: Military Gray.
D.C. working voltage: 300.
D.C test voltage: 600.
Temperature: from −55 to 105°C .005%/°C.
Impedance tolerance: ±10%

SPIRADEL®* MINIATURE FIXED DELAY LINE

FOR IMMEDIATE DELIVERY!

SPIRADEL® is a small diameter, distributed constant fixed delay line, featuring higher delay to rise time ratio and excellent pulse fidelity. Its new shape offers greater package design versatility than most other delay lines available, and the entire unit is encapsulated for maximum environmental protection.

The SPIRADEL line covers a delay range of 100 to 1000 nanoseconds, and delays may be selected in 10 nanosecond increments within the range, although 50 nanosecond increments is standard. The standard impedance for all models is 325 ohms ±10%. Any impedance from 200 to 600 ohms is available on special order. Standard delay tolerance is 5%, although tighter tolerances can be held on special order.

SPIRADEL units are designed for operation from —55°C up to +105°C.

Bandwidth is from DC to the frequency f = .35/rise time.

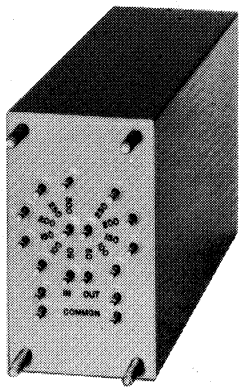
TV LINE EQUALIZER

TYPE AV-535



THE ALLEN AVIONIC'S AV-535 EQUALIZER IS DESIGNED TO COMPENSATE FOR LOSSES IN RG-11/U (75 OHM) CABLE AND ITS EQUIVALENTS. THE UNIT IS CAPABLE OF EQUALIZING 50 TO 300 FEET IN 50 FOOT INCREMENTS.

Terminals on mounting surface are so arranged to provide for simplified strapping for compensation of different cable lengths. All units are foamed and hermetically sealed in steel cans.

IMPEDANCE: 75 ohms ±2 ohms to 8 megs.

ATTENUATION OF CABLE PLUS EQUALIZER: 3 db.

Attenuation of equalizer alone is as shown in the following table:

Feet	0.1 mc	2 mc	4 mc	8 mc
50	2.97 db	2.86 db	2.79 db	2.67 db
100	2.93	2.68	2.53	2.27
150	2.90	2.51	2.28	1.88
200	2.86	2.35	2.03	1.52
250	2.82	2.19	1.82	1.21
300	2.78	2.02	1.58	0.86

TOLERANCE: ±.07 db.

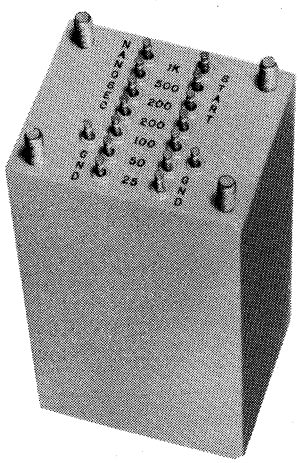
SIZE: 2 x 3½ x 5 inches (not including mounting stud length).

MOUNTING CENTERS: 1½ x 3 inches.

STUD SIZE: 8/32 x 1/2 inch long.

PULSE & VIDEO DELAY LINE

TYPE AV-397



These delay lines are designed to be used with any 75 ohm system for either pulse or video delay. Although intended primarily for equalizing the delays in various lengths of coaxial cable, the line can be used wherever any delay from .025 μs. to 2.075 μs. is needed. The delay is changed by adding individual lines of various delays to give the desired total delay.

Each type AV-397 delay line consists of seven individual delay lines each having its own input and output terminals. Each of these seven lines may be used individually or collectively. By connecting the output of one to the input of another, 83 different time delays are available in .025 μs. steps from .025 μs. to 2.075 μs. The delay of each individual line is marked between its input and output terminals. The total time delay is the sum of the delays of the individual lines that are connected.

Distortion with a normal TV type pulse is well under 2% and not normally visable. Using the full delay of 2.075 μs., the response to video is down by 3 db at 5 megacycles.

MAXIMUM DELAY: 2.075 microseconds ±3% variable in .025 microsecond steps from .025 microseconds to 2.075 microseconds.

TIME DELAY OF INDIVIDUAL LINES: 1, .5, .2, .2, .1, .05, .025 microseconds.

RISE TIME FOR ENTIRE LINE: .06 microseconds maximum.

FREQUENCY RESPONSE: 3 db down at 5 megacycles for 2.075 microseconds delay.

DISTORTION: 2% maximum with .2 microsecond input pulse.

IMPEDANCE: 75 ohms ±5%.

DC WORKING VOLTS: 300.

TEMPERATURE COEFFICIENT: 50 parts/million/C° from −55°C to 105°C.

ATTENUATION: 7% maximum for 2.075 microsecond delay.

MECHANICAL: Hermetically sealed in a steel can 2″ x 2½″ x 5½″, painted gray with black identification markings, and using 10/32 x 1/2 inch studs spaced on 1½″ x 2″ centers for mounting.

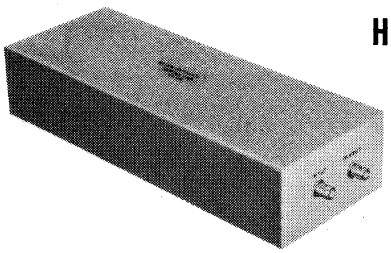
LUMPED CONSTANT DELAY LINES



HIGHEST $\frac{\text{TIME DELAY}}{\text{RISE TIME}}$ RATIO EVER BUILT!

These Delay Lines have the highest ratio of time delay to rise time that has ever been built in a Lumped Constant Line. Unlike other types of high ratio lines, the Lumped Constant Delay Line has a passband from D.C. to its cutoff frequency and maintains a constant delay over these frequencies. These lines are also unique in that they offer relatively low insertion loss.

This group of lines is characterized by tight time delay tolerances, low pulse distortion, excellent phase linearity and good temperature stability.

For laboratory use, any time delays from 10 microseconds to 100 microseconds can be built into variable decade instruments with ratios of over 100/1. These units could have a resolution of up to 1/5000 of the total delay.

Series "HF" HIGH FREQUENCY

The HF Series in most cases will serve as more than adequate electrical replacement for coaxial cable. The inconvenience of handling and storing cable will thus be eliminated. Standard impedances of 50 and 75 ohms are available. Units are normally supplied with BNC connectors. Tapped lines and time delays other than those shown below can be supplied.

Series "VHR"

The "VHR" Series have a characteristic impedance of 50 ohms. While the units listed are standards, we can manufacture the "VHR" Lines to your exact delay specifications.

These units are hermetically sealed in a metal can 3½ x 6½ x 16 inches, with four ¼ x 20 studs on the 6½ x 16 inch surface.

Two BNC connectors are located on the 3½ x 6½ inch surface for input and output connections. Variable Decade Delay Units can be manufactured for laboratory use from the "VHR" Lines.

DELAY LINE SYNTHESIZERS

A primary use is to experimentally determine the exact requirements of a delay line in order to avoid over-specifying. A safety factor of 50%, caused by not knowing the exact required rise time, results in approximately 280% increase in cost, size and weight. In addition, the added components reduce the reliability to ⅓ of the original.

Any delay output of the Synthesizer is the summation of individual lines. It is not the result of a tapped line. This feature is an important factor in eliminating undesirable reflections in the output pulse.

The rise time control filter (Fig. 1) is especially designed to give a flat response to a pulse input with the only effect being a change in rise time. The filter may be used alone in any other application where it is desired to slow the rise time of a pulse by a known amount while still maintaining symmetrical wave form without ringing.

When a line with almost no ripple or distortion is required, the rise time control may be used with only a slight decrease in rise time to obtain the pulse pictured in Fig. 2.

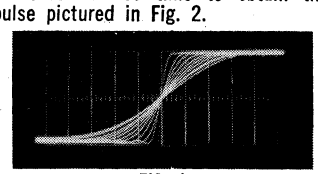

FIG. 1
Output of rise time control

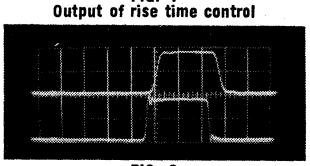

FIG. 2
Effect of rise time control on distortion

Model 73-11

The Model 73-11 Synthesizer can be used in any breadboard circuit where a time delay of up to 11 microseconds is required. The 50 ohm input allows for direct impedance match to the output of most pulse generators.

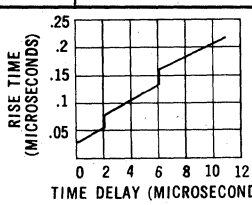
The basic delay line finds general use in the lab in such applications as delaying the sync on sampling scopes so that the output of delay lines may be observed, or in any application where the internal delay of the scope is not sufficient.

The filter may be used alone to control the rise time of pulse generators which are too fast for the application at hand.

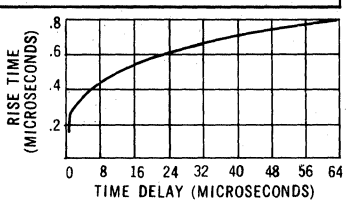
Model 500-63

The Model 500-63 Synthesizer can be used in any breadboard circuit where a time delay up to 63.5 microseconds is required. The 500 ohm input allows for direct impedance match to transistor circuits.

	Model 73-11	Model 500-63
Time Delay:	From .025 microseconds to 11.075 microseconds in .025 microsecond increments.	From .5 microseconds to 63.5 microseconds in .5 microsecond increments.
Rise Time of Delay Lines:	@ maximum delay: .22 μs. See graph.	@ maximum delay: .8 μs. See graph.
Impedance:	50 or 73 ohm input or output — switch controlled.	500 ohms
Rise Time Control:	Rise time 0.01 microseconds to 1.1 microseconds in .01 microsecond increments.	Rise time .1 microseconds to 11 microseconds in .1 microsecond increments.
Rise Time Control Tolerance:	5%	10%



Rise time at different delays for basic delay line.



Independent control of time delay and rise time is available to experimentally determine required time delay and rise time for minimum size, weight, cost and for maximum reliability.

VARIABLE DELAY LINE — MODEL 500-31.5

Model 500-31.5 is a switch variable time delay unit consisting of 6 individual delay lines. The time delays of these individual lines are so arranged that by switching in one or more lines 63 different delays can be obtained. These delay times range from .5 microseconds to 31.5 microseconds in .5 microsecond steps. Since the delayed output pulse is always the addition of individual lines, it is free of distortions that are caused by reflections from tapped lines. At total delay, the unit has a time delay to rise time ratio of greater than 48 to 1. Because the unit has an input and output impedance of 500 ohms, it is well matched to the impedance of most transistor circuits. The wide range of time delays coupled with the high time delay to rise time ratio and the impedance make for an extremely useful test instrument.

VARIABLE DELAY LINE — MODEL 75-2

Model 75-2 consists of seven delay lines each having its own switch. The time delay is changed by switching one or more individual lines in series. The delayed output is always the summation of individual delay lines and not the result of a tapped line. This feature is an important factor in eliminating undesirable reflections in the output pulse. The passive networks are capable of any of 83 different time delays ranging from .025 microseconds to 2.075 microseconds in .025 microsecond increments. The delay line finds general use in the laboratory in such applications as delaying the sync on sampling scopes so that the output of delay lines may be observed. Two RG11/U connectors serve as the input and output.

	MODEL 500-31.5	MODEL 75-2

LUMPED CONSTANT DECADE DELAY LINES

TYPE "D"

Type "D" Variable Decade Delay Units are engineered to provide variable time delays with absolute stability for accurate triggering and excellent reproduction of the input pulse. These lumped constant delay lines are completely passive. All models have a minimum of 1000 to 1 resolution and consist of three or more decade switches. Any delay output of Type "D" decade delay unit is the summation of individual lines. It is not the result of a tapped line. This feature is an important factor in eliminating undesirable reflections in the output pulse. Accuracy at any delay exceeding 1% of the unit's total delay is within 3%. These units have a characteristic impedance of 500 ohms in and out. While the units listed are standard, other delays and impedances can be manufactured to specifications.

SERIES "S" & "LV"

SWITCH VARIABLE

These units are composed of 4 individual delay lines having a common ground. The switch is so arranged that (except for position one which has no time delay) it connects one or more of the delay lines in series across the input and output terminals. Therefore, the delayed output is always the summation of individual delay lines and not the result of a tapped line. This feature is an important factor in eliminating undesirable reflections in the output pulse.

All units in this series can have their time delays varied to any multiple of 1/10 of the total delay.

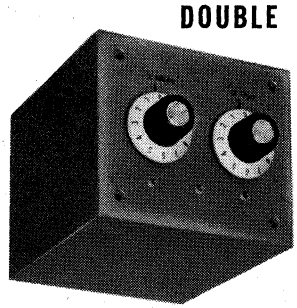
Units are supplied in gray steel cans, 2 x 3½ x 5 inches. Four 8/32 inserts and four terminals (1 input, 1 output and 2 grounds) are on the 2 x 3½ inch surface. The switch knob is located on the opposite surface.

Distortion with .02 μsec. input: 10% maximum.

All units have variable time delays in any multiple of 1/10 of the total delay.

	Impedance	Time Delay @ Maximum Setting (microseconds)	Maximum Attenuation	Notes
S Series	75 ohms	.3, .6, .9, 1.2	5%	Time delay to rise time ratio at maximum delay: 10 to 1 minimum. D.C.W.V.: 300.
	500 ohms	.6, .9, 1.2, 1.8, 2.4, 3, 4.5, 6.0	10%	
LV Series	250 ohms	200	50%	Time delay to rise time ratio at maximum delay: 5 to 1 minimum. D.C.W.V.: 100
	500 ohms	400, 500		
	1000 ohms	100, 300, 1000		

DOUBLE SWITCH VARIABLE AUDIO DELAY LINES



"LDV"

Where increased resolution is desired over that of the "LV" Series, the "LDV" Series is recommended. These lines are composed of 8 individual delay units — four to a switch. They employ the same summation principle as that used in the "LV" Series. Units are supplied in gray steel cans, 4⅝" x 3 15/16" x 4⅞". Four 10/32 inserts and three terminals (1 input, 1 output and 1 ground) are on the 4⅝" x 3 15/16" surface. The switch knob is located on the same surface.

Time Delay Microseconds	Impedance Ohms	Resolution Microseconds	Bandwidth Kilocycles
LDV 0-550	500	5	3.2
LDV 0-1100	1000	10	1.6

PRECISION, RUGGEDNESS, RELIABILITY

These four series of military grade delay lines are encapsulated in an epoxy casting resin, which is poured under vacuum and cured to a solid, void-free block of high-temperature plastic. All components and wires are solidly supported against shock and vibration and completely protected from moisture and salt spray. All four series meet the requirements of MIL-STD-202B..

The remarkable performance and stability of these very compact delay lines is due to the extraordinary care taken in the design and manufacturing processes. Phase characteristics are individually adjusted for optimum pulse performance, to give fast-rising, noise-free output pulses with minimum overshoot and distortion. A complete system of inspections and tests at every stage of construction and assembly assures the utmost in quality and reliability.

SERIES L AND SERIES N

Delay Tolerance: 2%
Delay Temp. Coeff.: 0.003%/°C to 0.01%/°C
Test Voltage: 800 vDC
Working Voltage: 400 vDC max
Pulse Voltage: 400 v peak max
Temperature Range: −65°C to 125°C
Connections: 22 gauge pins, 3/16" long

Designed to plug into printed wiring boards for dip-soldering into place, these high-performance units are readily adaptable to other types of circuit construction, since the 22 gauge pins may be easily formed to fit lugs or terminal posts. The pins are laid out on the standard 0.1" printed circuit grid.

Careful control of the attenuation characteristic and the provision of special phase-compensating circuits result in superlative pulse performance. The tables give the cut-off frequencies of the delay lines which are available in each series. Part Numbers: Give series, impedance, and delay; e.g., N-1000-40.

BLILEY GLASS DELAY LINES FOR DIGITAL STORAGE

Digital glass memories have recently found wide application as an ultrasonic storage device in computers and associated digital processing equipment. Bliley ultrasonic digital delay lines meet this requirement with bit rates as high as 30M bits/sec and access times as low as one microsecond. Although digital lines operate at one-half the period of the center frequency, the recommended bit rate is approximately two-thirds of the center frequency.

Digital lines operate in the RZ or return to zero mode which is the least demanding on external circuitry. Additional circuitry is required for NRZ operation to obtain increased storage capacity or BIPOLAR operation for increased signal to noise ratio. Most digital lines utilize low temperature coefficient glass as the delay medium to obtain good delay time stability with temperature change as indicated in Figure 1.

Attenuation depends upon delay time, operating frequency, required signal to noise ratio, terminating impedance, input and output admittance conditions and pulse shape. The most efficient operation of a digital line is achieved at its point of minimum attenuation (center frequency) although it may operate satisfactorily at any point throughout its 3 db bank pass. To reduce loss level, ceramic transducers are used up to 20 MHz and quartz transducers from 20 MHz to 30 MHz.

Typical digital response characteristics are shown in Table I, and Table II indicates the present design range parameters for glass lines.

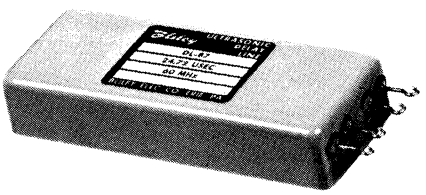

FIG. 1

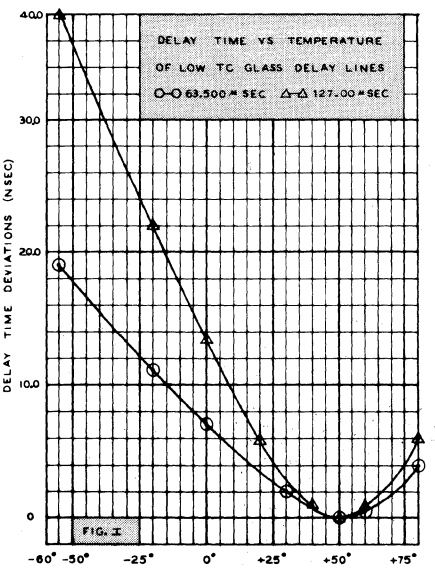

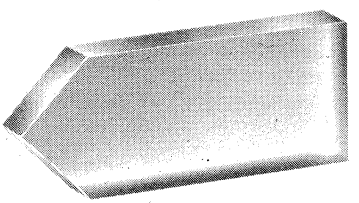

TABLE I. TYPICAL DIGITAL CHARACTERISTICS

Delay Time (μsec)	Pulse Width (nsec)	Atten. (max.) (db)	S/N (min.) (db)	Term. Imp. (ohms)	Max. Delay Change Temp. 10-80°C (nsec)

Bliley is equipped to manufacture a broad range of custom-designed delay lines. Our experienced staff will welcome an opportunity to analyze your specifications and prepare quotations for your requirement. Literature will be sent promptly upon request.

BLILEY ULTRASONIC DELAY LINES FOR RF APPLICATIONS

Ultrasonic delay lines are widely used in conventional RF systems such as video pulse integrators and moving target indicators in radar applications. This type of ultrasonic delay line is available over the range from 1 microsecond to 4500 microseconds.

In general, low TC glass is used for the short delay time range, with frequency temperature characteristics as shown in Figure 1. Long lines, which use fused quartz as the delay medium, have a temperature coefficient of minus 75 ppm per degree C.

Long delay lines may be specified with carrier frequencies in the range from 10 MHz to 40 MHz. Spurious signal attenuation shown in Table III applies only to frequency range 25-40 MHz. Best attenuation of spurious signals is achieved in medium delay time ranges and at higher carrier frequencies. Dependent upon loss level requirements, bandwidth may be estimated from 50% to 65% of carrier frequency. Loss and bandwidth characteristics are interdependent and are controlled by choice of terminations, carrier frequency and transducer capacity as shown in Table IV.

TABLE III. LONG DELAY LINES

Delay Time Range (μsec)	30-400	200-700	300-1400	500-1600	600-2000	1400-2700	600-3300	1300-4500

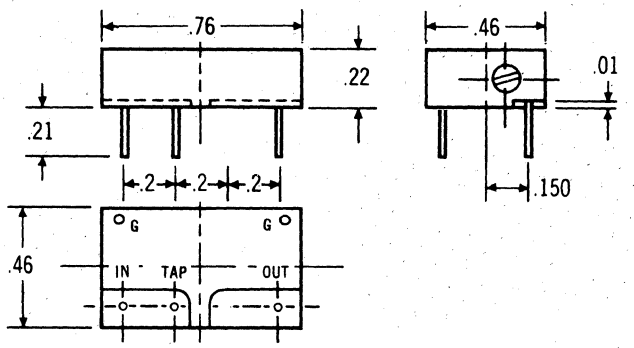
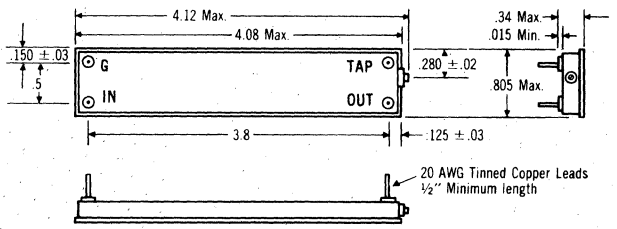
DUAL-IN-LINE VARIABLE DELAY LINES

DV Series



BEL introduces the first variable delay line compatible with IC Dual-In-Line packaging featuring: • Hermetic Seal-O-Ring construction • Precious metal contacts • Resolution — MIN 2% (for high reliability performance)

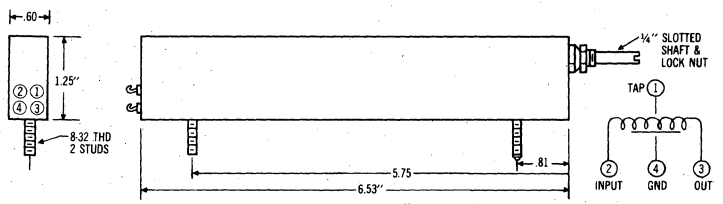
NV Series



VARIABLES

These precision hermetically sealed variables are available in a wide range of delays and impedances. Both may be provided with various mounting and terminal configurations to suit most applications.

CV Series
LV Series



VARIABLES

These precision hermetically sealed variables are available in a wide range of delays and impedances. Both may be provided with various mounting and terminal configurations to suit most applications.

DUAL-IN-LINE DELAY LINES

- Delays from 1-1000 nanoseconds.
- Band Width to 60 mhz.
- Impedance 50 to 1000 ohms.
- Resistive Terminations if desired.
- Tapped Delay Lines available.
- Several separate lines in one case.
- Contact Bel Engineering for special applications.

The following conditions and specifications hold on all the units above:

input drive source:	50ma @ 12 volts
output termination:	3300 ohms
dynamic signal to noise:	3/1 min.
single pulse signal/noise:	10/1 min.
delay adj. (except EX and EL):	±2us min.

to order, specify: MD5000BP1

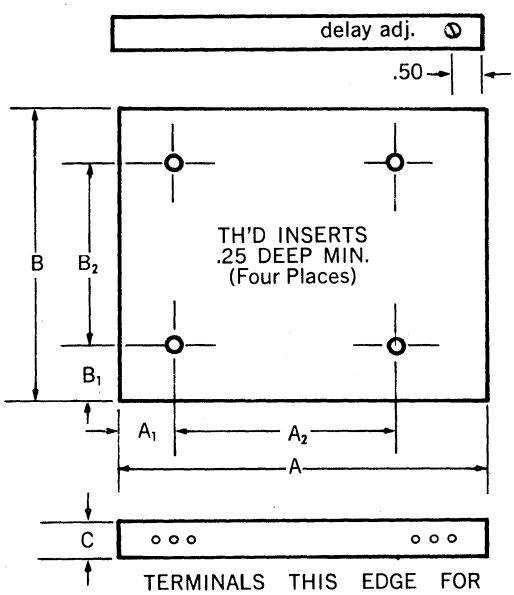
- MD — model: VS, EX, SG, MD, IN, LR or EL
- 5000 — delay in microseconds
- B — recording mode: RZ, NRZ, or Bi-Polar
- P1 — bit rate in mHz

Low Temp. Coeff. (Less than 1 ppm/°C 10 to 40°C) and Delay Adj. (±2 μs min.) available in Model EL. with reduced preformance. Lower cost, less attenuation and higher frequency response for ±20 ppm/°C max. temp. coeff. in other models.

Memories available for all models including low power versions operating from a single +5 VDC supply. Others employ Differential Preamplifiers having greater than 60DB common mode rejection. One TTL model for all lines, many DTL and RTL versions also available.

CUSTOMED PACKAGES FOR ANY REQUIREMENT

SYSTEMS APPLICATION & DESIGN ENGINEERING ALWAYS AVAILABLE.



TERMINALS THIS EDGE FOR ALL MODELS EXCEPT EX AND VS, WHICH HAVE TERMINALS ON MOUNTING SURFACE.

#4-40 THREAD FOR EX, VS AND SG MODELS, OTHERS EMPLOY #6-32 UNLESS REQUESTED OTHERWISE.

COLUMBIA COMPONENTS

Q-LINES · VARILINES · MINILINES · MAGNETIC-CORE DELAY CABLE

Q-LINES® Lumped-Constant Delay Lines (LCDL) with High Figure of Merit

Unique design and latest packaging techniques make CCC's Q-Lines ideal for a wide range of applications. Specifications for standard units include:

"Q" Factor: Delay-to-rise-time ratios (Q) of up to 100:1.

Packing Factor: Delay lines used in industry today have packing factors ranging from 1 to 2. Columbia offers Q-Lines with packing factors as high as 10.

Attenuation: Extremely low signal attenuation is a built-in feature of all Q-Lines. Actual attenuation ranges from .01 to 0.2 db/μsec.

Thermal Stability: Nominal temperature coefficient of delay of 50 ppm/°C, with lower temperature coefficients available.

Spurious Response: Transients and noise average 5% of signal amplitude, with lower levels available.

Impedance Range: Standard Q-Lines cover the range of 100 to 200 ohms. Special designs are available with impedances from 50 to 10,000 ohms.

Delay Tolerance: Standard tolerance is +5%. Closer delay tolerances may be furnished on special order.

Temperature Range: Standard Q-Lines meet all military environmental tests from −55°C to +125°C.

Construction and Finish: All Q-Lines are potted in hermetically sealed cases. Cases are electro-tinned per MIL specifications and are finished with gray lacquer.

Mounting and Terminals: Standard Q-Lines are supplied with 2- or 4-stud mounting. Terminals are compression-seal, solder types.

Standard Q-Lines

VARILINES® Mechanically-Variable Delay Lines (MVDL)

For use in the laboratory or in military equipment, Columbia's Series VB and VC Varilines offer the designer a rugged component with no compromise in reliability. All units are produced with precision windings, precious metals and precise assembly techniques.

Features

Resolution: In excess of 0.001 μsec.

Attenuation: Less than 1.0 db.

Dielectric Strength: 300 VDC.

Temperature Coefficient: 200 ppm/°C.

Rotation: A minimum of ten turns provides continuous variation of delay from zero to maximum specified for the model.

Case Dimensions: 6 17/32" x 5/8" x 1 1/4" (Series VB)
7 1/4" x 1" x 1 5/8" (Series VC)

The Series VA Variline is a precision variable delay line trimmer specifically designed for printed circuit applications. Offered in a case 0.750" wide and 0.300" high, with lengths from 1.5" up to 4.0", the VA Series is available with delays from 0 to 15 nanoseconds up to 0 to 250 nanoseconds. Rise times of 5 nanoseconds to 42 nanoseconds are offered, together with impedances from 50 to 500 ohms.

See CCC Data Sheet #DL-1-368.

State-of-the-art Delay Lines for every application

MINILINES® Miniature & Subminiature Distributed-Constant Delay Lines (DCDL)

Series MM Miniature Minilines and Series MS Subminiature Minilines are economically-priced distributed-constant delay lines featuring low-profile envelopes. They are ideal for printed circuit cards and other applications involving high packaging densities. Both Series are encapsulated in high-temperature epoxy and meet or exceed all applicable portions of MIL-D-23859A.

Features

Distortion: ±10%

Dielectric Strength: 100 VDC

Attenuation: 0.5 db max.

Operating Temperature: —55°C to +125°C

Series MM

MAGNETIC-CORE DELAY CABLE

Columbia Magnetic-Core Delay Cables were developed to provide economical and versatile low-loss high-impedance delay elements. The outstanding feature of this patented design is the continuous, uniform, flexible, low-loss magnetic core which effectively increases the impedance and the unit delay of the cable. At the same time, its unique construction reduces transmission losses drastically so that in pulse work extremely fast rise times can be obtained.

All Magnetic-Core Delay Cables can be supplied in calibrated lengths with mechanical terminations, ready for installation. Standard delay accuracy is ±5%, but not less than ±0.025 μsec. Closer tolerances, particularly on types HH-1500A and HH-2000, can be maintained if desired. When required, one end of the delay line can be internally shorted or left open-circuited. Operating temperature for all Magnetic-Core Delay Cables is —40°C to +85°C.

TYPE	IMPEDANCE (ohms)	DELAY (μsec/ft.)	B-WIDTH (Mhz)*	INSERT. LOSS (db/μsec)	O.D.
HH-1500A RG-266/U	1500	0.08	15	0.2	0.40″
HH-1600	1700	1.0	6	0.4	0.28″
HH-2000 RG-176/U	2400	0.11	15	0.25	0.40″
HH-2500	3000	0.6	8	0.3	0.28″
HH-4000	3900	1.0	6	0.2	0.32″

* Bandwidth (3 db down) based on 1 μsec delay.

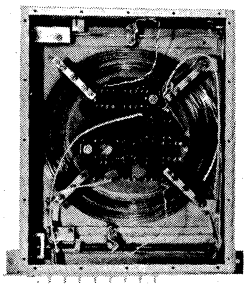
DELAY LINES

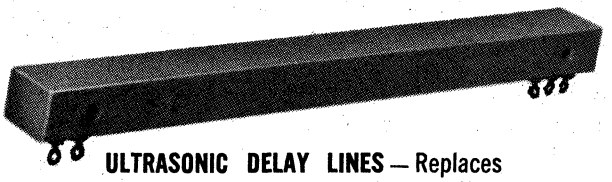
WITH OR WITHOUT CIRCUITRY

MAGNETOSTRICTIVE ★ LUMPED CONSTANT ★ ULTRASONIC ★ DISTRIBUTED CONSTANT ★ DISPERSIVE STRIP

MAGNETOSTRICTIVE DELAY LINES — Fixed and variable delays to 10,000 microseconds. Variable lines in either flat disc or thin cylinder types. Fixed — FMS Series; Variable — VM Series.

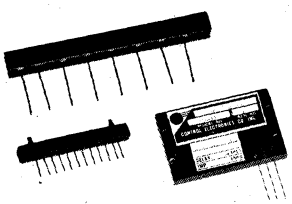


FIXED MAGNETOSTRICTIVE DELAY LINE — Up to 10,000 bits of data for memory storage. Circuitry compatible with all microcircuit logic. Choice of data format: RZ, NRZ or Bipolar.

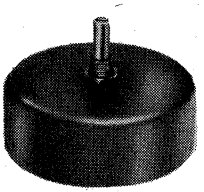


ULTRASONIC DELAY LINES — Replaces most quartz or glass lines. Offers superior performance, lower attenuation and smaller size at less cost. Frequencies to 30 MHz. Delays to 200 usec and greater.

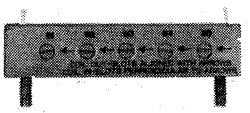
LUMPED CONSTANT DELAY LINES — Many shapes available including miniature types with pin connectors for PC Boards, connector fingers for plug-in units...multi-tapped units...terminal-ended units, etc. Delays from 0.05 usec to 500 usec for standard units. Delay to risetime ratios up to 100:1. Temperature stability to 50 ppm/C°.



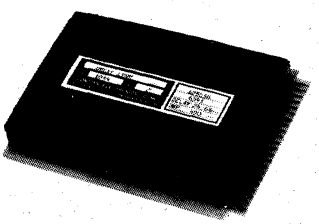
COMPACT FIXED DELAY LINES FOR PC BOARDS — Extremely high density packaging. Typical Unit: 25:1 delay-to-rise-time ratio in a volume of 2 cubic inches.



VARIABLE DELAY LINE Resolution of 1 part in 120. Delay up to 10 usec. 1" x 3½".

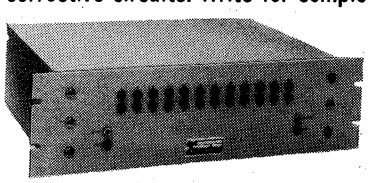


UNIQUE BINARY CODED SECTIONAL DELAY LINE — Uses miniature transfer switches. Also available with terminals for remote switching.



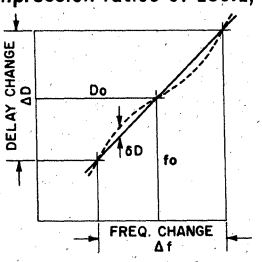
IFF MULTI-TAP DELAY LINES Standard IFF delay lines with taps every 1.45 usec. High density packaging available for airborne transponder use.

AUDIO, HIGH FREQUENCY & DISTRIBUTED CONSTANT DELAY LINES — With unusual circuits, extreme delays, high frequency application, rapid rise times, conforming waveform circuits and corrective circuits. Write for complete details.



AUDIO DELAY CABINET — Relay rack mounted cabinet houses 25 millisecond delay with taps at every ms. Units can be cascaded for longer delays.

DISPERSIVE STRIP DELAY LINES — Delay varies with frequency. A prime application is in Pulse Compression Radar Systems, eliminating large, expensive filter components. Compression ratios of 150:1, typical.



ΔD · Δf = COMPRESSION RATIO OR DISPERSION FACTOR

Δf / fo = BANDWIDTH %

fo = MIDBAND FREQUENCY

Do = MIDBAND DELAY

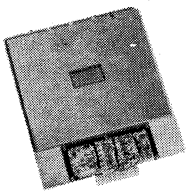
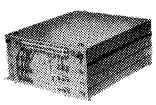
DELAY LINE COMPUTER MEMORIES DELCOMS



THE DELAY LINE COMPUTER MEMORY (DELCOM) offers the **Lowest Price Per Bit** of any high speed memory device. Computer Devices Corp. offers convenient standard packages for all practical storage capacities from 10 bits to 20,000 bits in single delay line units as well as multi delay line units* with massive storage capacities. All Delcoms are compatible with DTL and T²L logic. Normal power requirements are +12 and −12 VDC and +5 VDC. However, Delcoms are tailored to your bit rate, delay, input-output logic and power requirements.



MODEL SERIES	MAXIMUM STORAGE (BITS)	MAXIMUM (Hz) BIT RATE	SIZE INCHES

- Random Access
- Binary coded address
- Average access time 512 μsec
- Integrated circuits throughout
- Storage modularly expandable without limit
- Immune to primary power failure
- Visual display available

STORAGE

One basic unit stores either 1024 — 12 bit words expandable in 2 bit steps per module or 2048 — 6 bit words expandable in 1 bit steps per module.

Other models with capacity of up to 16,384 words of any length.

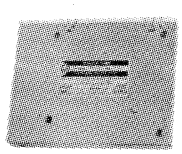
- Low Frequency Stable Oscillators
- Correlation Delay Lines
- Radar Range Calibrators and Simulators
- Teletype Buffers

DIGITAL DELAY LINES FOR DIGITAL AND CW APPLICATIONS

MAGNETOSTRICTIVE DELAY LINES are extremely stable with temperature, with stabilities of up to .5 PPM/°C achievable. Although primarily used in digital applications at bit rates of up to 1 MHz RZ or 2 MHz NRz, they also delay CW signals with center frequencies from 200 KHz to 1 MHz with a bandwidth of 20%. Insertion loss is about 60 db.



MODEL	DELAY (μsec)	SIZE (INCHES)
ML 545	up to 23 μsec	1 x 5 x .375
MT 767	1,000	3.5 x 4.0 x .46
MT 762	2,000	4.0 x 5.0 x .50
MT 763	4,000	6.0 x 7.0 x .50
MT 764	8,000	9.5 x 10.5 x .75
MT 765	16,000	10.5 x 11.5 x .56

MULTIPLE OUTPUT DELAY LINES

Multi-tap Delay Lines are supplied with as many tap points as desired and are useful as word generators and correlators.

MODEL	TOTAL DELAY μsec	NO. OF TAPS	TAP SPACING μsec	SIZE
ML718	15	12	1.25	1.75 x 8 x .50
ML790	16	16	1.0	1.75 x 8 x .50
ML791	20.3	14	1.45	1.75 x 8 x .50
ML883	28	24	1.0	3 x 9.37 x .50

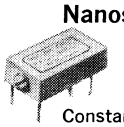
VARIABLE DELAY LINES

THIN LINE VARIABLE
Nanosecond Range



Compatible with Dual-In-Line packaging with .25" overall thickness. Sealed in plastic case. Lumped Constant parameters. Temperature coefficient less than 50 PPM/°C. .020" P.C. mounting pins.

MODEL	DELAY RANGE	RISE TIME OR FREQ. RESP.	IMPEDANCE OHMS	SIZE INCHES
V1570-1	0 - 10 Nsec	2 Nsec	100	.25 x .75 x 1.5
V1570-2	0 - 20	4	100	.25 x .75 x 1.5
V1570-3	0 - 40	8	100	.25 x .75 x 1.5
V1570-4	0 - 80	16	100	.25 x .75 x 1.5
V1570-5	0 - 160	32	200	.25 x .75 x 1.5
V1570-6	0 - 320	64	200	.25 x .75 x 1.5

MINIATURE DISTRIBUTED VARIABLE Nanosecond Range

Hermetically sealed in a metal case. Distributed parameter with temperature coefficient of less than 150 PPM/°C. .030" P.C. mounting pins.

DV900-11	0 - 20 Nsec	7 Nsec	1000	.31 x .62 x 1.75
DV900-12	0 - 20	7	500	.31 x .62 x 1.75

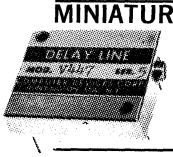
DV1446	0 - 100	20	2000	.3 x .62 x 3.50

MINIATURE LUMPED VARIABLE
Nanosecond Range



Hermetically sealed in a metal case. Lumped constant parameter. Temperature coefficient less than 50 PPM/°C. .030" P.C. mounting pins.

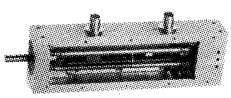
V447-1	0 - 55 Nsec	15 Nsec	150	.31 x 1 x 1.25
V447-2	0 - 100	20	50	.31 x 1 x 1.25
V447-3	0 - 150	25	150	.31 x 1 x 2.45
V447-4	0 - 250	30	50	.31 x 1 x 2.45
V447-5	0 - 300	30	150	.31 x 1 x 3.45
V447-6	0 - 500	60	50	.31 x 1 x 3.45

MICROSECOND RANGE VARIABLE

Hermetically sealed in a metal case. Lumped or distributed constant parameters for longer delays and special applications.

V172	0 - .55 μsec	.08 μsec	1000	.5 x 1.5 x 4.5
V703	0 - .95	.07	500	.75 x 1.87 x 7
DV219	0 - 1.0	.11	1000	.62 x 1.25 x 6.5
V443	0 - 3.0	.25	200	.62 x 2 x 4.5

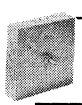
NOVEL INFINITE RESOLUTION



with input and output impedance of equal value. Voltage standing wave ratio less than ½ db to 45 MHz.

DV575-1	2 - 25 Nsec	70 MHz	200	1 x 1.25 x 5.37
DV575-2	2 - 50	70	100	1 x 1.25 x 5.37
DV575-3	2 - 50	70	200	1 x 1.25 x 5.37
DV575-4	2 - 50	70	93	1 x 1.25 x 5.37
DV575-5	2 - 25	70	50	1 x 1.25 x 5.37
DV575-6	2 - 50	70	93	1 x 1.25 x 5.37

ONE TURN VARIABLE



Lumped parameter multi position switch provides resolution of 100:1.

V168-1	0 - .2 μsec	.015 μsec	100	4 x 4 x 1.25
V168-2	0 - 1.5	.08	1000	4 x 4 x 1.25
V168-3	0 - 3.0	.15	1000	4 x 4 x 1.25

INFINITE RESOLUTION VARIABLE

provides absolutely stepless delay change to high frequency signals. Ideal phase shifter.

DV1556-1	2 - 33 Nsec	28 to 32 MHz	93	.5 x 1 x 3.5
DV1556-2	2 - 40 Nsec	26 to 30 MHz	93	.5 x 1 x 3.5

MAGNETOSTRICTIVE DIGITAL VARIABLE

For delay of radar pulses or digital data. These units utilize the magnetostrictive delay line and are supplied with electronics to faithfully reconstruct the delayed input data.

MV994	2 - 18 μsec	2 MHz	300/3000	1 x 5 x .5
MV781	2 - 30	2	300/3000	1 x 9 x .5
MV785-1	0 - 1 Msec	2	100	19 x 17 x 3.5
MV785-2	0 - 10 Msec	2	100	19 x 17 x 5.25
MV785-3	0 - 100 Msec	2	100	19 x 17 x 10.5

LOW FREQUENCY ANALOG VARIABLE DELAYS

Decade switched. Lumped parameter. Temperature stability less than 40 PPM/°C, VSWR less than ±½ db; phase linearity ±¼ %.

AV175	0 - .15 Msec	to 30 KHz	500	9 x 3 x 6
AV287	0 - .50	20	1000	19 x 3.5 x 12
AV206	0 - 1.0	20	600	19 x 3.5 x 12
AV731	0 - 5.0	5	1000	19 x 5.25 x 15
AV211	0 - 10.0	2.5	600	19 x 5.25 x 15

ANALOG DELAYS WITH DIGITAL TECHNIQUES

can provide delays in excess of 1 second to analog signals as high as 1 MHz.

AV1561-1	0 - 25 Msec	to 30 KHz	100	19 x 5.25 x 17
AV1561-2	0 - 50	30	100	19 x 7.0 x 17
AV1561-3	0 - 100	30	100	19 x 7.0 x 17

COMPUTER DEVICES CORP. specializes in the design and production of variable delay devices and will custom design units to meet your specific requirements. If the Delay Lines in this partial listing do not fill your need, please call.

This condensed catalogue information is only meant to serve as a guide. Before finalizing on a design it is most prudent to utilize the experience, ingenuity and up-to-date information of our Engineering Staff. Expert guidance, which can save you hours of searching, is as close to you as your telephone —

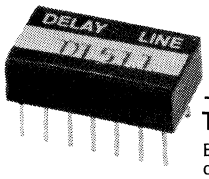
COMPUTER DEVICES CORP.

FIXED AND TAPPED DELAY LINES

THINLINE—NANOSECOND SUB-MINIATURE LINES

.21 inch thickness and pin arrangement makes these lines compatible with dual-in-line packaging. Encapsulated in plastic.



MODEL	IMPEDANCE OHMS	DELAY	RISE TIME OR FREQ. RESP.	SIZE INCHES
D1521-1	Available in 50, 93 and 100 ohms	50 Nsec	20 Nsec	.21 x .39 x .7
D1521-4		25	10	
D1521-7		10	4	
D152-10		5	2	
D1551-1	200	100 Nsec	10 Nsec	.21 x 1.0 x 1.5
D1551-2		150	15	
D1551-3		200	20	
D1551-4		250	25	
D1551-5		300	30	

TAPPED DELAYS

Each line provides 10 tap delays spaced at equal intervals.

D1511-1	100	10 Nsec	3 Nsec	.21 x .39 x .7
D1511-2		20	6	
D1511-4		40	13	
D1511-6		60	20	
D1511-8		80	26	
D1511-10		100	33	

MANY TAPS PER LINE

50 taps	D1543	100	150 Nsec	13 Nsec	.25 x .8 x 5.2
50 taps	D1544	100	300	20	.25 x 1.0 x 5.3
30 taps	D1545	100	90	8	.25 x .8 x 3.2

MINIATURE LUMPED CONSTANT

Hermetically sealed in a metal container. Delay tolerance ±5%.

Temperature stability less than 50 PPM/°C. P.C. Mounting.

D647- — — 0	Available in 93, 330, 500 and 1000 ohms	.05 μsec
D647- — — 1		.10
D647- — — 2		.25
D647- — — 3		.50
D647- — — 4		.75
D647- — — 5		1.00
D647- — — 6		1.45
D647- — — 7		2.90
D647- — — 8		4.35

Available with 3 delay to rise time ratios in 3 case sizes
4:1 .30 x 1.0 x 1.25
8:1 .30 x 1.0 x 2.45
12:1 .30 x 1.0 x 3.45

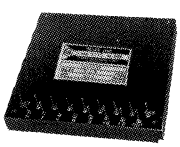
INEXPENSIVE DISTRIBUTED CONSTANT DELAYS

Plastic encapsulated units with a temperature coefficient of 150 PPM/°C. P.C. Mounting. Many other models available including the nanosecond range.

DD679- — — 1	Available in 330, 500 and 1000 ohms	.1 μsec
DD679- — — 2		.2
DD679- — — 3		.3
DD679- — — 4		.4
DD679- — — 5		.5
DD679- — — 6		.6
DD679- — — 7		.7
DD679- — — 8		.8
DD679- — — 9		.9
DD679- — — 10		1.00

Available with delay to rise time ratios of: In 2 case sizes
5:1 .37 x .5 x 4.5
10:1 .37 x 1.0 x 4.5

ATC TRANSPONDER AND BEACON CODING DELAY LINES



Standard 1.45 μsec tap spacings plus other special delay points are provided. Hermetically sealed steel cased, plastic encapsulated and PC mounted units are offered.

D1560	400	10.15 μsec	.33 μsec	.55 x 2.25 x 3.62
D1365	180	20.3	.5	.87 x 3.5 x 3.5
D1000	330	20.3	.5	.35 x 2 x 4
D120	180	25.0	.55	.75 x 5 x 4.37
D298A	500	25.3	.6	1.62 x 2.87 x 4.25
D637	180	20.3	.3	2.37 x 2.75 x 3.18
D1190	400	20.3	.4	.63 x 4 x 5
D1191	500	24.65	.5	.63 x 4 x 5
D1210	500	8.0	.5	.5 x 1 x 4

LONG DELAYS OF LOW FREQUENCY

Fixed and multi-tapped delays with high accuracy and flat response VSWR ±½ db; phase linearity ±¼%.

DA921	2000	420 μsec	100 KHz	14 x 2 x 1
DA563	1000	500	30	7 x 2.5 x 2
DA301	600	1,000	20	19 x 3.5 x 9
DA261	500	5,000	5	19 x 5.25 x 10
DA607	500	20,000	3.5	19 x 7 x 15
DA177	1000	100,000	.2	19 x 21 x 12

ANALOG DELAYS WITH DIGITAL TECHNIQUES can provide delays in excess of 1 second to analog signals as high as 1 MHz.

MDA2300-1	50	25,000 μsec	30 KHz	19 x 3.5 x 17
MDA2300-2	50	50,000	30	19 x 5.25 x 17
MDA2300-3	50	100,000	30	19 x 21 x 17

MANY OTHER MODELS AND SPECIALTY Delay Lines are available. If exactly what you want is not listed, please call.

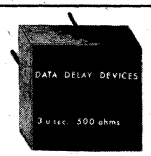
SHORT FORM CATALOGUE

DATA DELAY DEVICES

253 CROOKS AVE., CLIFTON, N. J. 07011 Tel. (201) 772-1106

Delay Lines

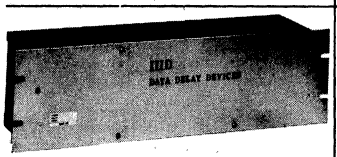


3D-100 SERIES

This miniature, completely potted unit is adaptable for printed circuit board applications. Time-Delay: 0-5 us. Rise-Time: 15%, 10%, 5%, & 3% of time-delay. Impedance: up to 4000 OHMS. Frequency Response: 10 MHz. Attenuation: less than 0.1 db/us. Temp. Coefficient: 0.1%/°c.

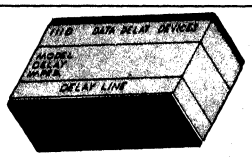
DISTRIBUTED TYPE

This delay line is ideally suitable for applications in digital computers, and other circuit applications requiring low attenuation, fast Rise-Time & Excellent pulse-form fidelity. Time Delay: 0-1 us. Rise-Time: 0.06 us. Impedance: 300 to 2000 OHMS. Attenuation: 1 db/us approx.



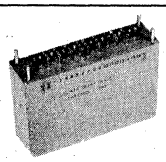
CABLE DELAY LINE

These units are extremely usefull for phase-shifting, phase-array, phase-comparison applications at very high frequencies. They are completely shielded against Radio Frequencies Interference. They feature: Time Delay 0-1 us; Delay Tolerance: ± 1%. Impedance: 50, 75, 90, OHMS. Attenuation: 16 db approx. at 10MHz. VSWR: 1.05. Frequency Range: greater than 100MHz. Mounting: flush or rack mounted panel.



ELECTRICALLY VARIABLE

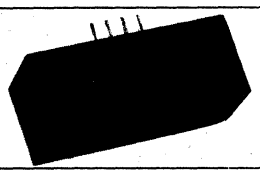
These Electrically variable delay lines can be made to be current or voltage variable. They exhibit a truely infinite resolution of time delay. They are ideally suitable for remote control applications. Time Delay variation: up to 50 us. Tracking accuracy: ± 5% or better. Impedance: 200 to 2000 OHMS. Operating Temperature: -65°c to +85°c. Frequency Range: 1MHz for current variable, 10MHz for voltage variable.



SPECIALS: SONAR, RADAR, TRANSPONDER

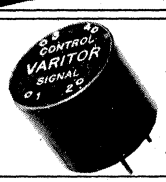
We specialize in custom design delay lines. These delay lines find usage in specific equipments and systems such as: SONAR, TRANSPONDER, RADAR, etc. These units meet in full or exceed all the military requirements and environmental conditions. Our Engineering know-how and our past experience in this field assures you the highest quality and reliability in our products. In addition we provide the shortest delivery time.

Filters-Inductors



LOW-PASS & HIGH-PASS

These filters are designed to meet or exceed the requirements of MIL-f-18327. The compactness, light weight and built-in reliability affords an added advantage to modern equipments design criteria. The units are housed in an hermetically sealed protective case with plug-in terminals adaptable to printed circuit board connections. It features: Insertion loss: .5 db. Attenuation: -0.5 db over the pass band, 60 db skirt for fo/ fl = 1.3. Frequency Range: 1 to 30 KHz. Impedance: 600 and 1000 OHMS unbalanced: Size: 3.187 X 0.565 X 1.250. (81 X 14 X 32mm)



VARITOR

This is a current variable inductor. It is an extremely simple, reliable, non-mechanical device used in Sweep Generators, Spectrum Analayzers, Telemetry equipments. It offers indunctance variation: 7/1 over its nominal value. Tracking accuracy: ± 3% or better. Inductance linearity ± 2%. Size: 3/4 O.D. X 5/8. (19mm O.D. X 16mm)

TOROIDS

These inductors provide the highest "Q" obtainable in the frequency range of 0.1 KHz to 1 MHz. They are completely potted, small in size, low in cost and extremely stable over temperature variation. Matched units for inductance are available. The specifications of these units are the following: Inductance range: 50UHY to 36HY. Accuracy: ± 1% (± .25% available). "Q" factor: greater than 250. Temperature Coefficient: ± 18 PPM/°c from -55°c to +85°c. Multiple taps are available upon request.

We are ready to give your requirements (large or small) our conscientious, personal, and scientific consideration, which is guaranteed to please all our customers.

ESC ELECTRONICS CORP.

World's Leading Producer of Delay Lines

TO MIL-D-23859 USUALLY IN STOCK

STANDARD LUMPED CONSTANT DELAY LINES

- Delay Tolerance ± 5%
- Attenuation:
  1 μsec. or less — 1 db Max.
  2.5 and 5.0 μsec —3 db Max.
  10, 25 and 50 μsec. — 6 db Max.
- Temperature Stability — .00005 μsec/μsec/°C
- Operating Temperature Range —55°C to +125°C
- Output Pulse Distortion ± 10% Max.

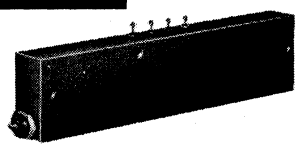
MINIATURE VARIABLE DELAY NETWORKS



The Series 700 of Miniature Variable Delay Networks has been designed and created by ESC to meet the increasing demand for variable delay lines suitable for printed board mounting.

- Operation: continuously variable shaft rotation of 4½ turns from zero to maximum delay.
- High impedance tap (variable)
- Outside dimensions: 4½" x 1½" x ½"
- Operating temperature —55°C to 125°C
- Resolution: better than 1/1000 of maximum delay
- External termination (not supplied)
- Can be operated above ground potential
- O Ring shaft seal.

MODEL NO.	TIME DELAY*	IMPEDANCE	PULSE RISE TIME**

708	.65 usec.	93 ohms	.10 usec. (max.)
Pulse Attenuation —1.0 db (max.) all units DC Working Volts — 500 volts (max.)			

*Minimum delay at max. position.
**Pulse rise time at termination of delay line.
Mechanical and electrical modifications available on special order.

COMPUTER LINES APPLICATIONS

A series of miniature delay lines featuring multiple taps and adjustability of delay. All at 93Ω, they are epoxy molded, designed for P.C. board mounting with a maximum height of .370". Overall delays of 100, 125, 250, and 500 nsec. Ask for specification RX1189.

GEOPHYSICAL APPLICATIONS

Part Number 81-27 Total time delay of 28 msec. tapped at 1.0 msec. intervals. Amplitude response flat within ±.25 db from 15 cps to 250 cps. Phase response linear with ±.075% over the same frequency range. Impedance is 5000Ω and attenuation less than 6.0 db. Size 6" x 10" x 14".

Part Number 81-43 Total time delay of 50 msec, impedance is 5000. Atten. vs. frequency: —3 db at 800 cps; within ±1 db from 100 to 600 cps. Insertion loss is 8 db.

SONAR APPLICATIONS

Part Number 81-41 Total time delay of 2.9 msec. tapped at 100 μsec intervals. Tap tolerance of 20 μsecs over temperature range of 0° to 65°C and dynamic range of 0.10 to 10 volts with $\cos^2$ input pulse. Impedance is 1000Ω and attenuation less than 6.0 db. Hermetically sealed metal case, 3.5" x 4.5" x 11.5".

IN STOCK

MINIATURE TRIMMER DELAY LINE

SERIES 800 "TRIMLINE"™

The Series 800 Trimmer delay line is designed for circuits requiring precision delay adjustments and is particularly suitable for printed board mounting. Sealed in an alkyd resin case, and with precious metal contacts, the "Trimline" will meet or exceed most equipment specifications.

- Attenuation: less than .5 db
- Resolution: less than 1 nsec.
- External termination (not supplied)
- Dielectric Strength: 300 VDC
- Operating temperature: —55°C to +125°C
- O Ring shaft seal
- High impedance tap (variable)
- Width: .75" max.
- Height: .35" max.

MODEL	DELAY* (nsec)	CHAR. IMPEDANCE (ohms)	APPROXIMATE TD/TR RATIO	"A" DIM	APPROX. # OF REVOLUTIONS

ATC TRANSPONDER AND BEACON DECODING NETWORKS

Although the pulse interval is standardized, other parameters such as impedance, rise time, tolerances, and size are subject to the system designer's discretion. Our long experience in this field can help you choose an economically satisfactory solution without compromising system performance. Some representatives lines are described below.

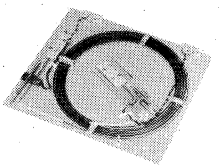
MODEL	TIME DELAY (μsec)	RISE TIME (μsecs)	IMPEDANCE (ohms)	ATTENUATION (db)	SIZE (Inches)	
37-97	1.45	.03	500	1.0	0.5x2.0x6.0	Single interval delay, low distortion, fast-rise-time.
52-77	24.65	.47	470	4.0	1x2x4.25	High density packaging. Hermetically sealed in metal case.
53-92	24.65	.47	470	2.5	.38x4.0x4.0	Molded in silicone rubber on printed card. Mates with edge connector.
53-42	27.0	.55	180	2.0	1.7x2.2x7.12	Precision tapped, low attenuation meets extreme environmental conditions.
53-84	24.65	.30	180	2.5	2.19x4x6	Low attenuation, fast rise time.
53-63	20.4	.2	470	2.0	3.88x5.12x6.6	Delay/Rise Time is 100/1; precision tapped, temperature coefficient < 20ppm/°C.

ESC ELECTRONICS CORP. 534 BERGEN BOULEVARD • PALISADES PARK, N. J. WINDSOR 7-0400

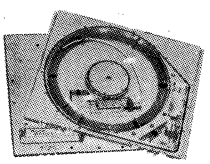
DELAY LINES... MEMORY SYSTEMS

...AVAILABLE AS COMPONENTS...

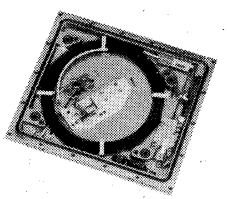
LOW COST COMMERCIAL delay lines offer the lowest price per bit of any high-speed fast-access memory device. Tailor made lines can be mounted on customer pc boards with input and output transducers matched to available circuits. Delays from a few microseconds to 15 milliseconds are available



HERMETICALLY SEALED lines are recommended for critical commercial and industrial applications requiring reliable operation in uncontrolled environments. Bit rates to 4 mc using NRZ techniques and 2 mc using RZ or bipolar recording are available.

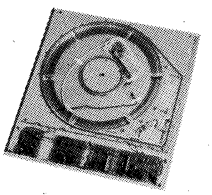


FULL MIL SPEC units are qualified to aircraft (MIL-E-5400), shipboard (MIL-E-16400) and aerospace specifications offering continuous operation under severe shock and vibration over wide temperature ranges (—55°C to +125°C). Tapped lines and wide adjustment lines are available

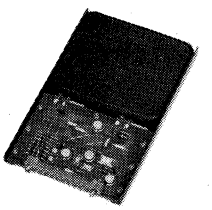


...WITH INTERFACE ELECTRONICS...

DISCRETE COMPONENT electronics can be mounted within delay line case or using conventional printed circuit board construction. Circuits include input gating, line drivers, linear read amplifiers, NRZ or bipolar detectors and re-timing flip flops

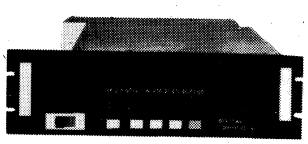


INTEGRATED CIRCUITS permit exceptional volumetric efficiency, (more than 150 bits per cubic inch) at low cost and with complete compatibility with various IC manufacturers. Lines can be synchronized to external clock or provided with internal crystal oscillator

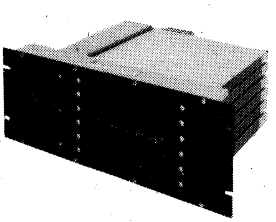


SPECIAL SUBSYSTEMS can be provided. Typical is 4-line 33-msec, 84,000-bit recirculating buffer for raster scan display applications. Special interface cards adjust logic levels to any NPN, PNP, or integrated circuit interface. Storage costs as low as ½¢ per bit.

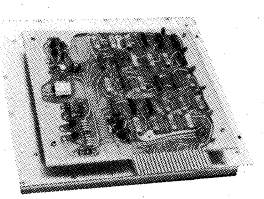
...OR IN COMPLETE MEMORY AND INFORMATION PROCESSING SYSTEMS...



KEYBOARD-COMMUNICATIONS BUFFERS are available to provide paper tape to magnetic tape buffering, keyboard buffering, or buffering to teletype or telephone data links. Basic system stores 4096 characters, can be expanded to 128,000 characters. I/o rates of up to 4800 baud can be provided.



SPECIAL DELAY SYSTEMS are available such as the illustrated Audio Delay Unit which delays audio or FM data up to 100 ms with excellent linearity and less than 5% distortion. A frequency response of ±1 db, 20 Hz to 20 kHz and a dynamic range of 40 db are other features.



LIMITED MESSAGE BUFFER SYSTEMS are available for buffering small remote terminal devices. Storage is up to 4,000 characters, input/output rates are compatible with telephone or teletype lines. Options include floating battery power supplies, direct interfacing to communication lines, non-destructive readout, and selective edit.

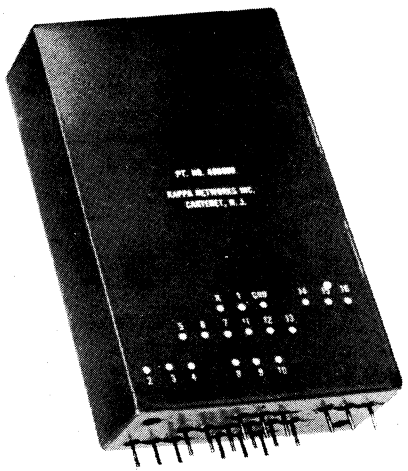
When you want high efficiency delay lines specify Kappa Super-η*



*SUPER-η LINES embody a new design principle providing the highest efficiency yet obtainable in lumped constant delay lines. Use of network synthesis techniques rather than conventional m-derived methods results in sharply improved delay line efficiency. Compared to ordinary lines of any given delay, KAPPA SUPER-η lines provide linear performance over a much greater band width. In addition these newly developed lines offer such outstanding advantages as: greater inherent reliability, smaller package size, and appreciable cost reduction.

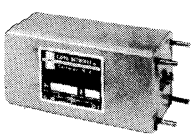
SUPER-η LINES FOR VIDEO SYSTEMS

Impedance:	75 ohms (unless otherwise specified)
Amplitude Response:	better than 0.1 db. flatness to 10 MHZ or higher
Ripple:	within ± .05 db to 10 MHZ or higher
Group Delay:	linear within ± 1% or ± 1 nsec, whichever is greater.
Group Delay Ripple:	within ± 2½% to 14 MHZ
K factor:	better than .25% for T or 2T sin² pulse for both American and European systems
Cross talk:	less than 46 db.

UPDATE YOUR VIDEO BROADCAST EQUIPMENT WITH KAPPA SUPER-η DELAY LINES!

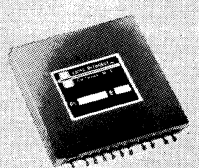
Specify KAPPA for the most complete line of electro-magnetic delay lines...

STANDARD LUMPED CONSTANT DELAY LINES
SERIES LC



Delay: 50 Nanoseconds to 1 second
Bandwidth: DC to 250 MHZ
Rise Time: As low as 2 Nanoseconds
Impedance: 25 ohms to 50 K ohms

TRANSPONDER LINES
SERIES C

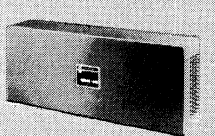


Tap Spacing: 1.45 μsec, or as required
Tap Tolerance: ± .05, or as required
Delay-to-Rise-Time Ratio: 100 max.
Temperature Stability: 50 ppm °C or less

LOW DISTORTION LINES
SERIES D

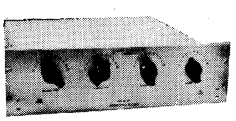
Distortion at Output: 2% max.
Distortion at Taps: Less than 5% at any tap
Distortion Limit: As low as 0.1% if required
Delay Range: up to 100 usec.

PRECISION AUDIO DELAY LINES
SERIES A



Delay Range: from 500 μsec to 1 sec.
Bandwidth: 70 KHZ (max.)
Delay Linearity: nominally within ± 0.25%; available to within ± 0.05%

PRECISION DECADE DELAY UNITS
SERIES DK



Variable delays available between input and output terminals in decade steps. Each decade has eleven (11) switch contacts and ten (10) delay increments so that the dial values overlap.

ULTRA MINIATURE DELAY LINES
SERIES T

Delay Range: to 200 nsec.
Delay/Rise Time: 10 max.
Attenuation: .2 db max.
Fully encapsulated

STANDARD DISTRIBUTED CONSTANT DELAY LINES
SERIES DC

Delay Range: to 3 μsec.
Standard Tolerance: ± 5% on Delay
Delay-to-Rise-Time Ratio: 11 max.
Distortion: ± 5% (typical), ± 10% max.

DELAY TRIMMERS: TINY TRIM® SERIES

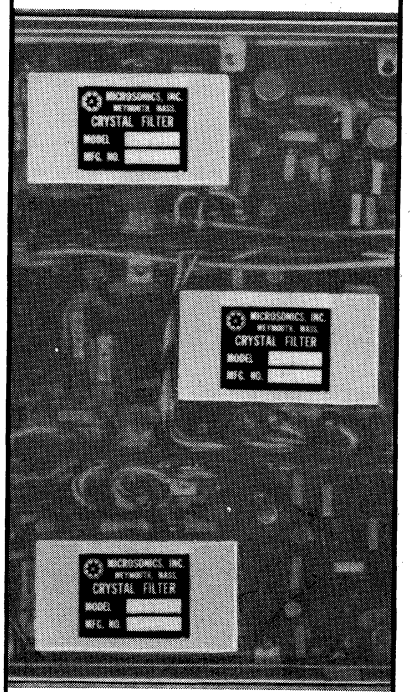
CRYSTAL FILTERS



Microsonics, Inc. has designed and developed phase tracking crystal filters, in which the phase between filters will track within close tolerances, over wide temperature ranges, without temperature control. Any one of the standard multi-pole filters such as Butterworth, Tchebycheff, Bessel, etc. may be obtained with phase tracking requirements. In the event of tight tracking requirements, the filters are produced in matched sets according to the customer's requirements.

The set of 3 filters shown above have been produced in production quantities and the specifications are shown below.

SPECIFICATIONS

Center frequencies: .....5MC ±150 cps
Bandwidth 3db: ....1KC ±100 cps
Shape-factor 60/3db: 5:1
Ultimate rejection: .....70db min.
Initial phase off-set: .....1°
Phase tracking across the 3db bandwidth: .....5° max.
Operating temperature: −35°C to +75°C

RISE TIME: 10% TO 90%	.15 Td MAX.
IMPEDANCE	1000Ω±10%
ATTENUATION	$\sqrt{Td}$ db MAX.
SPURIOUS RESPONSE	15% MAX.
DC WORKING VOLTAGE	600 MAX.
TEMPERATURE RANGE (OPERATING)	—55°C TO 105°C

CONFORMS TO MIL-T-27A CLASS 2R

SPECIAL DELAY LINES The delay lines listed above are only a small sample of the large variety of both lumped and distributed constant delay lines manufactured by Nytronics.

Lines from a fraction of a microsecond delay to several hundred microseconds, at impedances from 50 ohms to several thousand ohms, and with bandwidths up to 25 MC are within the scope of Nytronics engineering and production facilities.

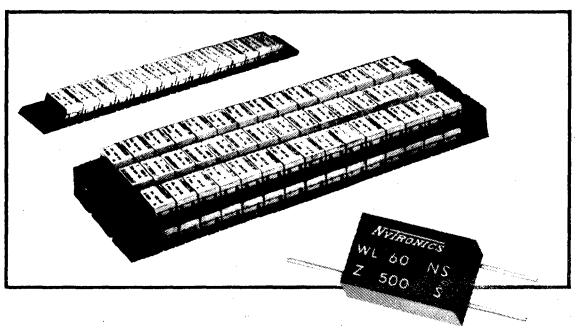
Wee Line

Unique sectional construction utilizing individual pre-designed Pulse Delay elements.

48 hour delivery not 8 weeks.

No tooling expenses.



The **WEE LINE** offers a unique sectionalized delay line that reduces delivery for prototype delay lines from weeks to days and eliminates expensive tooling and design efforts. Consisting of pre-designed LC sections called Wee Bits, a discrete value of delay time is offered. The aggregate number of Wee Bits determines the total delay time and is a function of delay to rise time ratio. The Wee Line assembly is made of selected Wee Bits mounted on printed circuit boards that conform to MIL-P-13949B, stacked or single layer and permits increment of delay to be tapped without disturbing uniform pulse shape. Wee Bit size 0.401" long by 0.625" wide by 0.230" height and are epoxy molded to meet environmental conditions of MIL-C-15305C. Temperature range —55°C to 125°C. 300 VDC working voltage. Delay time available per Wee Bit from 10 nanoseconds to 100 nanoseconds in 10 nanoseconds increments. Wee Bits also stocked with 200 nanoseconds delay. This unique Wee Line sectionalized delay line concept allows reducton of approximately 40% in number of sections ordinarily required*, flexibility of design, and line tapping. Individual Wee Bits only may be purchased for assembly on customer's circuits. Wee Lines also available in shielded case.

*Compared to constant K

LEADING ELECTRICAL PARTICULARS

Delay Tolerance:	±5%
Risetime Tolerance:	±20%
Noise:	1 to 10%, less than 3% for most types
Ripple:	1 to 10%, less than 3% for most types
Attenuation:	0.2 db/usec. to 1.0 db/usec. most types 0.2 db/usec.
Temp. Coefe.:	150 (10)^6 us/us —°C
Impedance:	500 ohms ±5%
Operating Voltage:	300 Volts D.C.

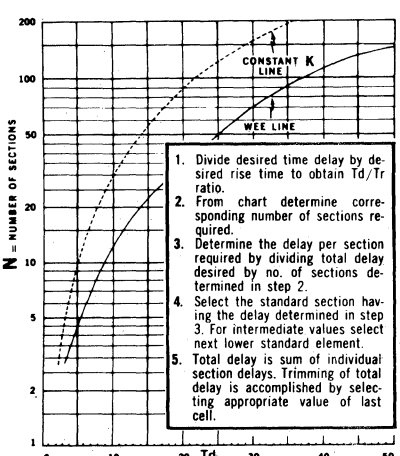
Tr MEASURED AT 10% & 90% and Td MEASURED AT 50% POINTS OF INPUT AND OUTPUT PULSES. Individual Sections furnished in ±5% Tolerance (or ±1NS, whichever is greater) and must be tested in accordance with Nytronics, Inc. DSI 394.

LEADING MECHANICAL PARTICULARS (for 15 section delay line)

Length of 15 cells	6.125"
Length of 15 cells plus P.C. mounting board	7.141"
Width of cells plus P.C. mounting board	0.750"
Height of cells plus P.C. mounting board	0.330"

Basic cell size: Length — 0.401"
Width — 0.625"
Height — 0.230"

Temperature range and operating environmental conditions are covered by MIL-C-15305B.



$$Tr\ eff. = \sqrt{Tr^2_{OUT} - Tr^2_{IN}}$$

IF $Tr_{OUT} \geq 10x\ Tr_{IN}$, $Tr\ eff. = Tr_{OUT}$

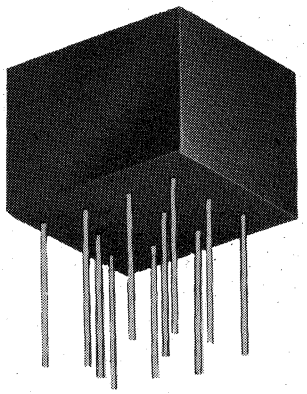
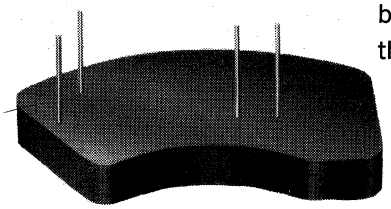
RCL *electromagnetic delay lines*

. . . LUMPED CONSTANT
. . . DISTRIBUTED CONSTANT
. . . VARIABLE

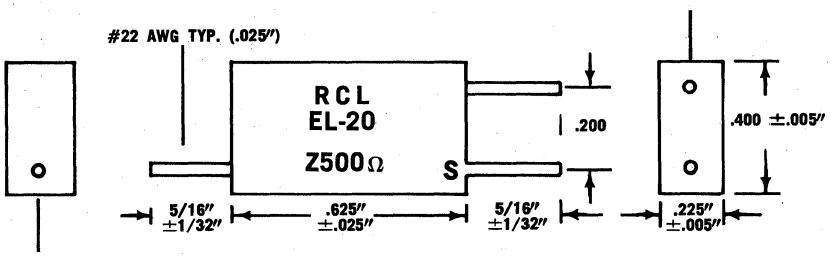




In the past delay lines have generally been custom designed units. For prototypes and research and development work, this is extremely complicated. RCL's Series DLM has created modules with fixed delay times. RCL has available 15 different values between 10 and 200 nano-seconds as standard stock items. Each module is one section. The number of sections depends on the ratio delay time/rise time. According to the requested ratio, delay time/rise time, the necessary number of modules is computed by a curve. By division of the total delay time by the number of modules, approximate value of the necessary modules are available. The single modules can be connected to each other on a printed circuit board. Taping is possible at the connecting points between the different modules.

DELIVERY FROM STOCK

Typical Series Designed for Commercial Computer Use:



STANDARD DELAY TIMES	
DELAY TIME	**TYPE**
10 Nanoseconds	EL 10
20 Nanoseconds	EL 20
25 Nanoseconds	EL 25

SPECIAL FEATURES

- High density package without loss of bandwidth or rise time
- "M" Series provides 75% reduction over conventional unit size
- Temperature Range: −55°C to 125°C with low temperature coefficient
- Lead spacings designed for 0.1" circuit board grids
- Designed to allow low cost production
- Dimensions — .30 x .30 maximum cross-section, 2.5" maximum length

SPECIAL DELAY LINES

Vidcor Company offers at low cost, custom designed lines to your requirements in addition to the typical size shown. Custom delay lines have been made in various external configurations consistent with customer requirements.

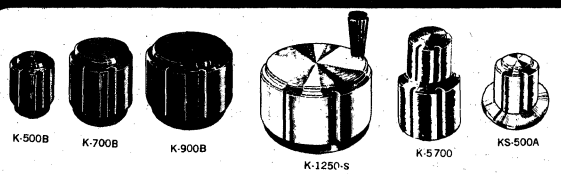
ALUMINUM KNOBS • CERAMIC TERMINAL STRIPS



ALUMINUM INSTRUMENT KNOBS

STANDARD ANODIZED KNOBS FOR ¼" SHAFTS

Modern, decorative knobs of fabricated aluminum. Offers one-piece construction and superior styling at moderate price.

Model	O.D.	Finish*	One-99	100-249	250-499	500-999
K-500	.500"	A, B, G	.45	.41	.39	.36
K-700	.750"	A, B, G	.50	.45	.43	.40
K-900	.937"	A, B, G	.55	.50	.47	.44

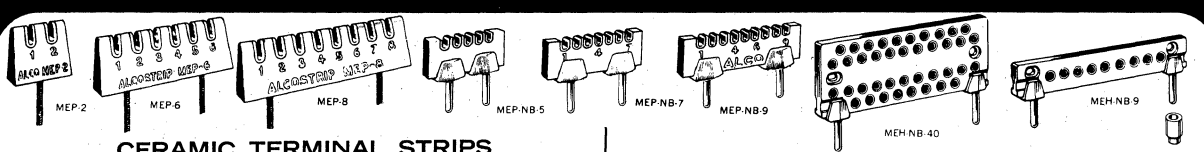
*Specify color: add suffix **A** for natural aluminum anodizing; add **B** for black anodizing; add **G** for gold anodizing.

**Specify colors: Add suffix AB for Natural Aluminum body with Black top; Add BA for Black anodized body with Natural top. °For ⅛" Shafts.



CERAMIC TERMINAL STRIPS

Ceramic-base terminal strips with fired silver, copperplated and tinned terminals to facilitate high-temperature soldering of components and leads. Features permanent bond between metal and ceramic. Standard 2-56 threaded studs are extra long for cutting to any required dimension. Board ht. 0.590" from base. Depth of slots, 0.197". Dielectric Strength: more than 10 seconds at 1500 VDC between terminals. Insulated Resistance: over 1000 megohms at 500 VDC megger. Dip Solder Test: no exfoliation at 250°C for 5 seconds.

STANDARD TYPES WITH THREAD MOUNTING

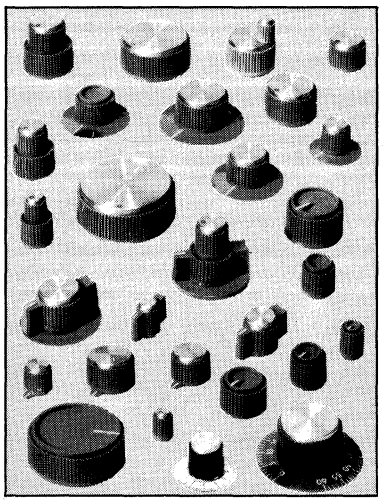
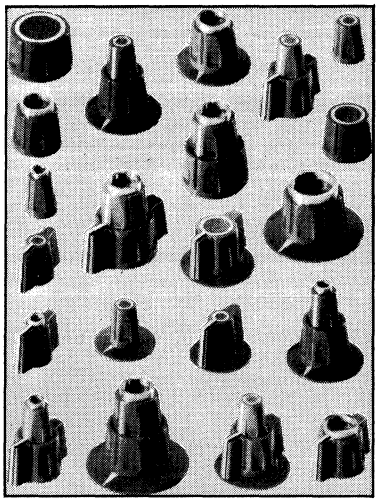
BUCKEYE



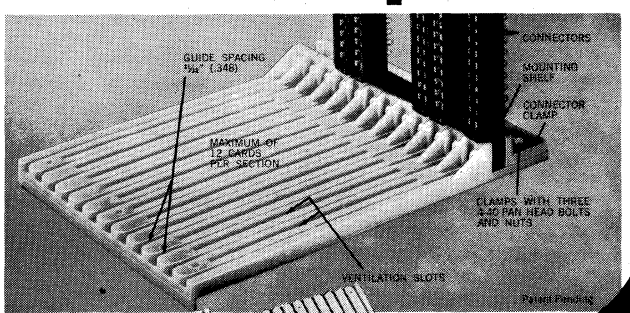
KNOBS

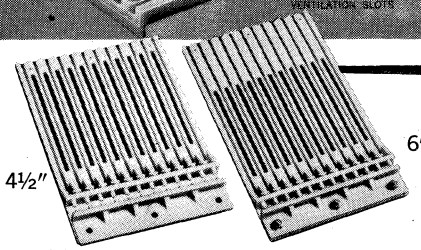


Your instrumentation can now be greatly enhanced by the use of a harmonizing style of the uniquely designed Buckeye Matching Instrument Knobs. They're available in six attractive styles in four stock colors, and in six basic sizes.

This "MATCHING INSTRUMENT LINE" features single-round, concentric, bar and half bar, spinners, pointers and skirted knobs with numerous variations. Molded of Cycolac, Buckeye knobs are noted for their toughness, rigidity, dimensional stability, high gloss and resistance of stain, weather and heat. They are fitted with metal bushings and 2 set screws. All caps are spun aluminum and are corrosion protected by anodizing.

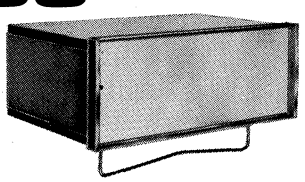
bord-pak®





CIRCUIT BOARD GUIDES are a time and labor saving innovation for packaging integrated modular circuitry. The Cycolac guide is molded into a single section with 12 tracks, spaced 11/32" apart with ventilation slots for safe maximum density circuit card packaging. The mounting shelf and clamp design assures quick and positive alignment of connectors with only three bolts. Guides are available to accept either 4½" or 6" length etched or printed circuit boards. Module spacing and design other than standard is available on quantity orders.

cases

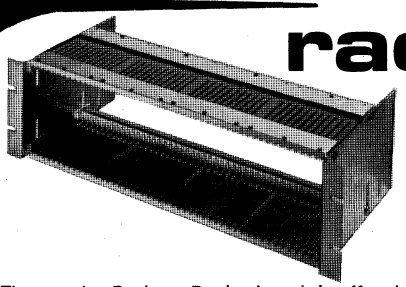


Bord-pak cases are designed in three popular functional sizes to facilitate economical assembly of standard 4½" circuit guides.

The recessed satin anodized front panel and polished aluminum frame trim harmonizes with the "over-tone" gray pebble grain finish to give extra attractiveness to any finished packaged assembly. Bottom is provided with safety snap elevating bail and nylon feet. Internally the cases are designed to incorporate two, four or six Bord-pak sets.

The overall sizes range from 5 5/16" wide x 5 5/16" high x 11 3/8" deep to 15 7/16" wide x 5 5/16" high x 11 3/8" deep.

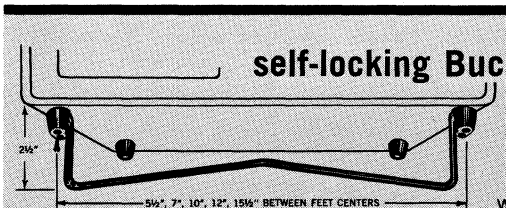
racks



The popular Buckeye Bord-pak rack is offered in four functional sizes — for 1, 2, 3 or 4 Bord-pak circuit guide sets — and to accommodate circuit board modules of either the 4½" or 6" size. The racks are sturdily designed of rigid aluminum support bars and flanged end plates to either stack or facilitate an economical assembly of your own choice of stationary multiple-rack electronic systems.

The overall sizes range from 5⅞" high x 5" deep x 6" wide to 8⅝" high x 5¼" deep x 19" wide.

self-locking Buckeye Instrument bail



A safe, positive-locking bail to elevate — and that eliminates collapse — of your bench instruments. Offered in five standard sizes (custom sizes in quantity) in bright chrome finished 3/16" rod, nylon feet and necessary mounting screws. Folds away completely for level bench work.

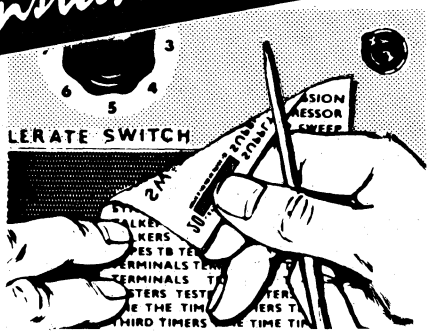
instant lettering®

THE REVOLUTIONARY METHOD FOR MARKING ELECTRONIC EQUIPMENT

JUST RUB and it's PRINTED!

Sharp • Clean • Fast • Not a Decal • No Water • No Tapes



INSTANT LETTERING® marking kits bring you all the necessary elements for completely marking electronic equipment, prototypes, drawings, etc. in this fast new easy-to-use form. There's even a new drafting symbol kit for better more readable schematics.

Words, letters, numerals, switch patterns, arcs, drafting symbols, etc. are printed on a special transparent carrier film. Rubbing over one of these elements with a ballpoint pen releases it from the carrier film and adheres it to your working surface.

INSTANT LETTERING® words and symbols transfer to almost any surface including glass, plastic, even painted and bare metals. Now you can quickly mark all panels, even especially calibrated two-color nomenclatures, pilot light jewels, sub-assemblies, circuit boards, etc. Reproduction quality **INSTANT LETTERING®** transfers are clean and sharp, leave no background haze or film, make prototypes look like finished production equipment and give all equipment and drawings a professional look.

instant lettering DRY TRANSFER MARKING KITS

TITLES for ELECTRONIC EQUIPMENT

NEW, REVISED; Now 20% more titles in a new easy-to-read typeface. Researched to give up to 95% of all electronic marking. For labeling, marking, titling all electronic control panels, drawings, prototypes, etc.

No. 9581—Complete Set (black) **$4.95**
No. 9591—Complete Set (white) **$4.95**
REFILL SETS—12 sheets per set
No. 9601—Alphabets (black) **$2.50**
No. 9611—Alphabets (white) **$2.50**
No. 9621—Numerals (black) **$2.50**
No. 9631—Numerals (white) **$2.50**

TERMINAL & CHASSIS MARKING KIT

All the necessary letters, letter combinations and numerals for marking chassis, printed circuit and terminal boards, rotating components, etc.

No. 966—Black **$4.95**
No. 967—White **$4.95**

DATAMARK KITS

Low cost dry transfer marking kits designed to provide useful preset words, symbols and alphabets for specific uses.

K58B—Audio, TV & Hi-Fi (black) **$1.25**
K58W—Audio, TV & Hi-Fi (white) **$1.25**
K59B—Amateur Radio & CB (black) **$1.25**
K59W—Amateur Radio & CB (white) **$1.25**
K60B—Experimenter, Home & Intercom (black) **$1.25**
K60W—Experimenter, Home & Intercom (white) **$1.25**
K61B—Test & Industrial Equipment (black) **$1.25**
K61W—Test & Industrial Equipment (white) **$1.25**
K62—Marks & Switch Patterns **$1.25**
K63—Alphabets & Numerals (⅛") **$1.25**
K64—Alphabets & Numerals (¼") **$1.25**
K65—Alphabets & Numerals (½") **$1.25**

METER & DIAL MARKING KIT

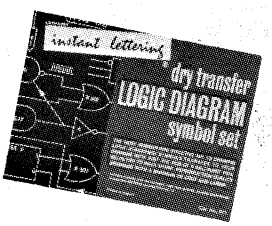
Arcs, dial patterns, lines, wedges, graduation lines, switch symbols alphabets and numerals in black, white and red for marking standard and special rotary tap switches, potentiometers and prototype and specially calibrated meter dials. Colors provide contrast on scales and switches, simplifying usage of complex instruments.

No. 968—Complete Set **$4.95**
REFILL SHEETS—set of four identical sheets
No. 968R—(specify sheet number) **$2.00**

ELECTRONIC SYMBOL DRAFTING SET

The quick way to more readable schematics. Contains 40 sheets of electronic symbols plus letters and numerals. Symbols designed to conform with MIL-STD-15-1A. Sheets have heat resistant adhesive for perfect reproduction in any blue- or white-printer. Also included is a complete guide to drawing with dry transfer symbols.

No. 970—Complete Set **$15.95**
REFILL SHEETS—set of four identical sheets
No. 970R—(specify sheet number) **$2.00**



LOGIC DIAGRAM SYMBOL SET

NEW! The most modern and effective aid to drawing logic diagrams. Symbols transfer to your drawing in seconds. All you need do is add the connecting leads. Heat resistant adhesive allows perfect reproduction even in diazo and other high speed printers. Symbols conform fully to MIL-STD-806B and ASA-Y32.14.

No. 971—Complete Set **$3.50**
REFILL SHEETS—set of four identical sheets
No. 971R—(specify sheet number) **$2.00**

instant lettering STANDARD SHEETS

Full 10" x 15" sheets of alphabets and numerals available in over 50 different typefaces in sizes ranging from 8 pt. to 3 in. display letters and in 6 colors. Also available are arrows, math symbols, chart symbols, line and dot rules, etc. Free sample and complete type chart available upon request.

instant lettering HEAT RESISTANT SHEETS

Heat resistant letters allow your drawings to be reproduced with perfect results every time. Letters will not flake, peel or fray in any blue- or white-printer. Razor sharp letters are printed with a highly opaque ink so you get perfect results every time. Write for complete details.

instant lettering SPECIAL SHEETS

Sheets made to your own specifications can include logos, drawings, symbols, preset words — anything that you use repeatedly. Hundreds of lettering and marking problems that were impossible or too expensive become practical with "Instant Lettering". Tell us your problem and let us suggest a "dry transfer" solution.

instant lettering DATAKOAT

Clear Protective Coating

Specially designed to protect "Instant Lettering" transfers from abrasion and weathering. Datakoat is water-clear and dries quickly.

Protective Coating Kit contains a 1 oz. bottle of Datakoat with applicator brush in cap and a 1 oz. bottle of thinner.

No. 04176 ..... **$1.00**

Spray Coatings are the handy aerosol can form of Datakoat (16 oz. cans).

No. 04177 (Glossy) **$2.95**
No. 04178 (Matte) **$2.95**

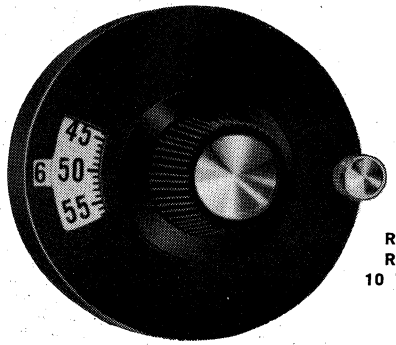
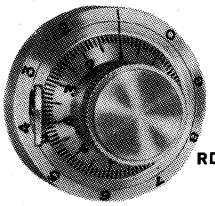
IRC® REVODEX® COUNTING DIALS

TRW INC.

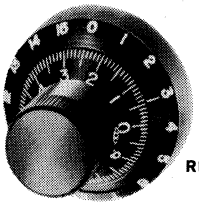


RD-1
RD-6
10 Turns

1" and 1⅞" REVODEX Dials Eliminate Reading Errors and are Available in Both Clear or Black Anodized.



RD-400 Series
10 Turns



RDK-400 Series
15 Turns

Accurate Reproducible Readings: To one part in a thousand. Settings can be estimated to fractions of a thousandth.

See exact settings quickly and clearly . . . significant digits are conveniently grouped at one spot. Reading errors are eliminated. REVODEX dials are particularly suited to IRC 3, 5, 10 and 15 turn precision potentiometers.

Locking Device: Standard on 1⅞", optional on 1" dials. Finger-tip action positively locks or unlocks the dial. Locks can be set without shifting the dial reading.

Easy Reading: Even when mounted above eye level. 1⅞" sizes give a direct reading with 3 numbers grouped for fool-proof reading. On the 1" size, an angular surface provides greater area to obtain maximum numeral size. For greatest ease of reading, numbers are rearranged to a primary and secondary scale presentation.

Full Range: 000 to 999 to indicate full ten turns. 000 to 1599 to indicate full fifteen turns.

Zero Backlash: Knobs are set-screwed directly to potentiometer shaft and the non-rotating base is tight to the panel in the RD-400 series. This feature thereby eliminates dial backlash.

Sturdy Construction: Life tested for one quarter million cycles with no signs of appreciable wear.

Easy Mounting: Mounting plate of 1⅞" dial fits under potentiometer mounting nut. Knob is secured to shaft with set screw. Body of 1" dial mounts directly on potentiometer bushing and knob attaches to shaft. No special panel holes required.

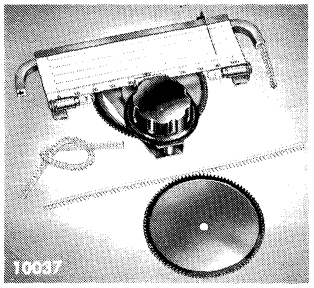
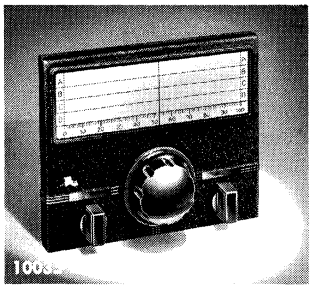
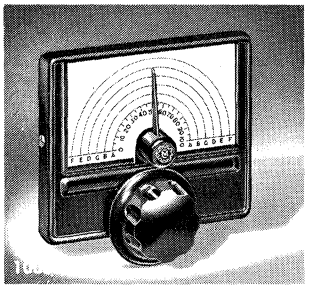
JAMES MILLEN MFG. CO., INC.

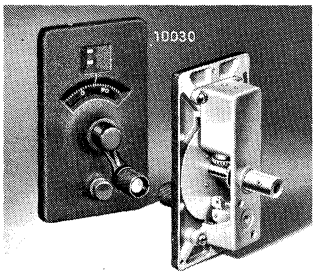
MAIN OFFICE AND FACTORY

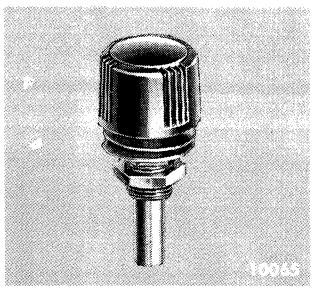
MALDEN, MASSACHUSETTS, U.S.A.

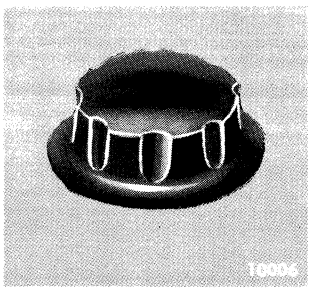


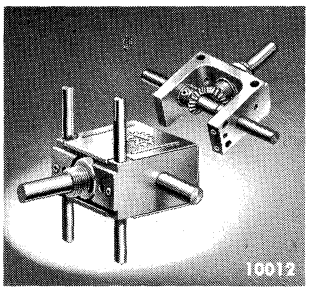


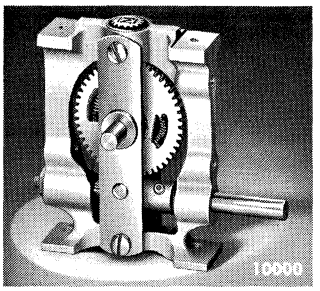


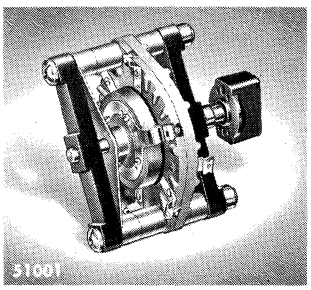


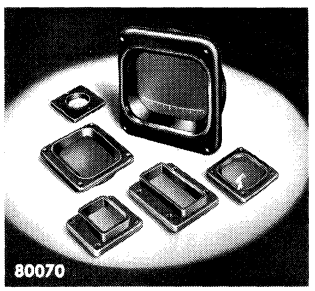


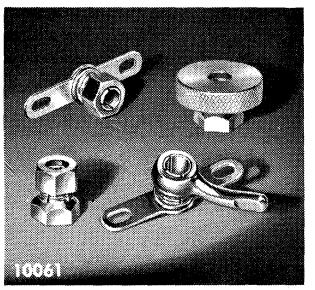


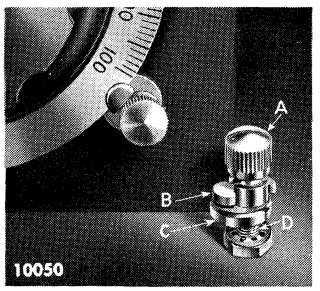












"Designed for Application"® DIALS AND COMPONENTS

NO-STRING DIAL

No. 10037 — No-string illuminated slide rule dial. The pointer is driven by a flexible but non-elastic molded gear driven rack which rides in a multi-slot extruded aluminum channel. This girder-like channel provides rigidity. Reduction 11:1. Scale length 6½ inches. Supplied with bezel.

FRONT OF PANEL DIALS

Compact mechanical design. Easy to mount. Self-contained mechanisms, thus eliminating back of panel interference. Flat black art metal.
No. 10035 — Illuminated panel dial has 12 to 1 ratio; size 8-3/16" x 6-17/32". Provision for mounting and marking auxiliary controls such as switches, potentiometers, etc. provided.
No. 10039 — Small panel dial has 8 to 1 ratio; size 4" x 3-9/32".
No. 10039-D — Small panel dial with positive loaded gear drive. 20 to 1 ratio; size 4" x 3-9/32". For ten turn devices.
No. 10039-E — Small panel dial with positive loaded gear drive. 10 to 1 ratio; size 4" x 3-9/32". For five turn devices.

COUNTER DIALS

No. 10030 — Extremely sturdy instrument type indication. Control shaft has 1 to 1 ratio. Veeder type counter is direct reading in 99 revolutions.
No. 10030-E — Same as No. 10030 except that the crank handle on the No. 10030 has been replaced by a fluted knob.

KNOBS

A006 — Fluted black phenolic knob with brass insert for ⅛" shaft.
10006 — 2¾" black phenolic knob with brass insert for ¼" shaft.
10016 — ¾" black phenolic knob with brass insert for ¼" shaft.
10016-A — ¾" fluted knob with nickel plated brass pointer.

BEZELS FOR CATHODE RAY TUBES

No. 80071 — Buterate bezel for 1 in. tube such as 1CP1. 2⅜" x 2⅜".
No. 80072 — Phenolic bezel for 2 in. tube such as 2BP1. 2⅝" x 2⅝".
No. 80073 — Phenolic bezel for 3 in. tube such as 3RP1. 3⅝" x 3⅝".
No. 80075 — Phenolic bezel for 5 in. tube such as 5UP1. 6⅛" x 6⅛".
No. 80173-B — Bezel for rectangular tube such as 3XP1. 2½" x 3¼".

HIGH VOLTAGE R-F SWITCH

No. 51001 — High voltage r-f switch designed for high frequency requirements. The No. 51001 features high voltage breakdown, and a non-arc tracking and arc resistant molded frame. Both collector and switched contacts break contact. Heavy duty silver contacts, and insulated mount.

DRIVES

RIGHT ANGLE DRIVES

No. A012 — Miniature right angle drive for ⅛" shafts. 1 to 1 ratio.
No. 10012 — Standard size right angle drive for ¼" shafts. 1 to 1 ratio.
No. 10012-T — Thru-sleeve right angle drive for ¼" shafts. 1 to 1 ratio.

WORM DRIVE UNITS

Cast aluminum frame may be panel or base mounted. Spring loaded split gears to minimize back lash.
No. 10000-A — 16 to 1 ratio.
No. 10000-B — 48 to 1 ratio.
No. 10000-C — 12 to 1 ratio.
No. 10000-D — 36 to 1 ratio.

GEAR DRIVE

No. 10000-12 — Spring loaded split gears to minimize back lash. 2 to 1.

FRICTION DRIVE

No. 10065 — Friction drive for 0.025" to 0.032" thick disc dials.

SHAFT LOCKS

No. 10060 — Shaft lock for ¼" shaft. ⅜"-32 bushing with 7/16" hex nut.
No. 10061 — Lock for conversion of "plain" ¼" shaft to "locking type."
No. 10062 — Thumb screw shaft lock for ¼" shaft. ⅜"-32 bushing.
No. 10063 — Lever operated shaft lock for ¼" shaft. ⅜"-32 bushing.

DIAL LOCKS

No. A050 — Miniature dial lock. Compact, easy to mount, positive in action.
No. 10050 — Rotation of knob A depresses finger B locking dial against C.
No. 10050-A — Lock with index mounting to prevent rotation of assembly.
No. 10053 — Sub panel dial lock. Nickel plated brass.

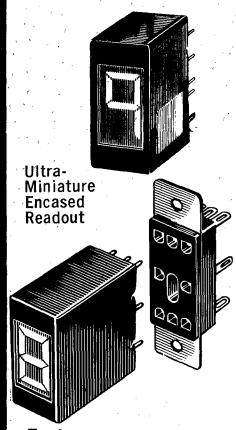
READOUT INDICATORS

NEW 5V. MINIATURE ENCASED READOUTS



Ultra-Miniature Encased Readout

New 7-segment incandescent readout has a bright display that is clearly read under all ambient lighting conditions. Contrast is further emphasized and glare is minimized because of its "built-in" red filter. The flat, single-plane display allows true wide-angle viewing without distortion. Large character size (.325" x .600") relative to case size (.552" x 1.18"). This compact unit permits multiple installation in a minimum of space. No moving parts. Makes use of high temperature materials housed in a one-piece metal case. Lamps are closely fitted into a compartmented block with short leads virtually eliminating vibration problems. Lamps are separately lit to form any numeral as desired by use of an external decoder/driver. High reliability is achieved through the use of long life #683 T-1 subminiature lamps with a life expectancy of 100,000 hours. Entire readout is easily removed by simply unplugging it from the 8-prong socket.

Features
- Long Life
- Miniature T-1 Lamps
- Metal Enclosure
- Popular 5V
- Plug-in
- Large Numerals
- Lowest Cost

Typical Applications
- Digital Voltmeters
- Frequency Meter
- Calculator
- Digital Clocks
- Computers
- Airborne Instruments
- Control Panels
- Test/Checkout Systems

SPECIFICATIONS

Characters:	0 to 9 and some alpha
Lamps:	#683, 5V @ 60 ma
Case:	Metal, Black Matte
Terminal Pins:	Nickel Plated Brass

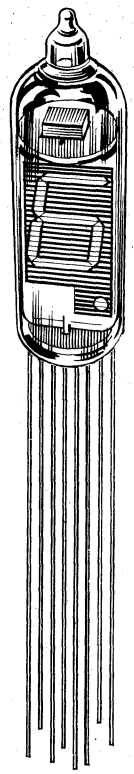
ELFIN® NEON INDICATORS

HAVE MANY ADVANTAGES



SINGLE PLANE . . . closely interlinked segments insure uniform clarity and easy readability.

BRIGHTER DISPLAY . . . the **ELFIN** design has a brighter neon glow, with no flashover from unlighted stacked filaments.

WIDER ANGLE VIEWING . . . ignited electrodes are all up front to provide widest viewing angle.

SMALLEST IN SIZE . . . only 0.453" in diameter resulting in a 4-digit display within a 2" space requirement. 1½" high.

NUMERIC AND OTHER CHARACTERS . . . same indicator used to display 0-9 numerals, + and − symbols, some alpha and a decimal point.

LONG OPERATION LIFE . . . **ELFIN** neon displays possess prolonged life span, thereby making them most reliable.

LOW POWER REQUIREMENT . . . exceptional low cathode current of 400 μa per segment makes it ideal for IC circuits.

ELFIN, the smallest of all neon readouts has been developed for equipment where space is a premium such as airplane displays, digital voltmeters, desk electronic calculators and other applications.

ELFIN consists of uniform cathode segments and a common anode mounted with a small glass envelope. Numeric and many other characters are formed by applying DC voltage to appropriate combination of cathode segments.

ELFIN characters appear as bright continuous neon glow easily read under high ambient light conditions.

Model	Description	One-99	100-999	1000 Over

RK & RKF SERIES

RKP SERIES

MS MOSAIC

MSM MOSAIC

READOUT INDICATORS

RK Series — precision machined from 1-piece aluminum which also serves as a heat sink for the bulbs. Front and rear tapped holes for mounting on a panel or on RKA-2-8 brackets. The RK-FLV violet filter is available to reduce reflected lighting effects resulting in a better contrast.

Unique in-line design provides clear displays without focusing problems thereby allowing equally clear viewing from any angle. Compact size assures a neat fit in a limited space. Long life bulbs — 20,000 to 50,000 hrs. Engraved acrylic plates are of a non-yellowing quality are mounted in a tightly-packed stack and edge-lit.

RKP Series—plug-in readout indicators are designed for ease of use.

RKF Series—has a larger 1-piece aluminum body with 1" high numerals, along with 2 long-life bulbs per numeral for increased brightness.

SPECIFICATIONS

Numerals: 0 to 9 and a period
Numeral Size: .55" high (RK, RKP)
1.0" high (RKF)
Standard Voltages: 6, 14, 24 volts
Bulbs Used (T-1-¾): #2181 (6.3V), 2182 (14V), A-24 (24V)
Current Drain: 6.3V @ 200 ma., 14V @ 80 ma., 24V @ 50 ma. (RK, RKP)
6.3V @ 400 ma., 14V @ 160 ma., 24V @ 100 ma. (RKF)
Body Size: 2.56 x .78 x .83" (RK, RKP)
3.30 x 1.18 x 1.18" (RKF)
Bracket: Holds 2 to 8 readouts. (RK, RKP)

MS Series Mosaic — 0-9 and some alphabet is displayed through diode-matrix (not supplied). Decimal points used as colon. High illumination. Figures 25/32" high. 20,000 hr. bulb life. Body size: .827" w. x 1.73" h. x 1.69" d. Available 6 or 14V

MSM Series Mosaic (Miniature) — as above, except smaller. Lamps are 5v 60 ma. Body size: .433" w. x 1.15" h. x 1.18" d. Figures .472" high, 100,000 hr. bulb life.

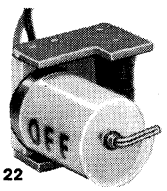
ELECTROMAGNETIC INDICATORS

ALLARD INSTRUMENT CORP.

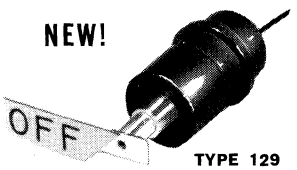
Designed for compact instrument and control panels, Allard miniature electromagnetic indicators provide positive visual signaling, are not subject to burnout, assure high readability in strong incident light. One-piece balanced rotor for dependable performance under shock and vibration. Models for momentary or latching operation, from DC or rectified AC. All models can be supplied to meet particular requirements for operating voltage, type of display and mounting, to commercial or MIL specifications.



Type 122

Tiny indicator with open structure. Mounting screw holes on bottom of block. 2 position only. May be illuminated through the translucent drum. Less than ½" along each axis.

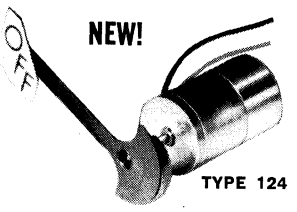
NEW!



TYPE 129

Shorter version of the Type 104 and just as powerful. For CW or CCW rotation using demountable flag arms. Rotational angles to 60°. Works in any position. 7/16" diam. x ¾" long.

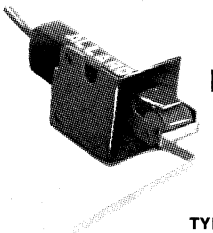
NEW!



TYPE 124

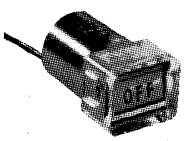
Miniaturized version of Type 104 with rotation up to 45°. Available with CW or CCW rotation. For use with plug-on (demountable) flags. Operates in any position. Case size — ⅜" O.D. x .575" long.

NEW!



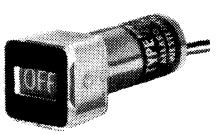
TYPE 219

Relatively inexpensive version of our old Type 101. Can display legends on the drum face or rotate a flag arm CW or CCW. Two position momentary or latching operation. Indicator drum is .300" wide x .300" diam. Total length is 1⅝".



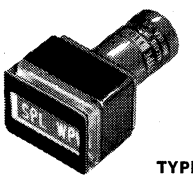
TYPE 120

Tiny broad faced indicator available in 2- or 3-position momentary or 2-position latching indication. Capped or sealed. Shows colors or legends. Head is 9/16" wide by 7/16" high. Body ½" dia. Overall length 15/16".



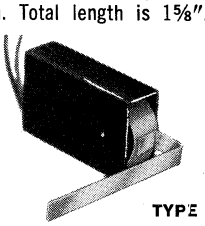
TYPE 108

Small indicator for 2- or 3-position momentary or 2 position latching (memory) indications. Plastic head can pipe external light to indicating face. Colors or legends as required. 1⅛" long, ⅜" dia., 7/16" square head.



TYPE 110

Extended face indicator, permits display of complete words or multiple symbols. For 2- or 3-position momentary, or 2-position latching indication. Plastic capped for dust and moisture protection, or hermetically sealed. Length 1¾", head 1" by ¾".



TYPE 109

Two or three position slim indicator for narrow locations. Can supply power to rotate a flag arm up to 60° or can display a legend directly on rotor face. CW or CCW for two position operation. .270" x .562" x 1".

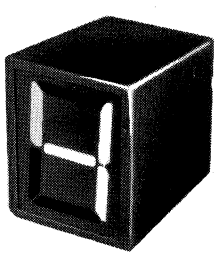
ELECTROMECHANICAL READOUTS

High Visibility!
Inherent Memory!



Other sizes available

Digital Type 202

Compact digital indicating modules for instrument, data presentation and other display systems. Seven electromagnetic indicating segments can be operated in any desired combination by low power DC signals. Momentary or latching types. Windings available from 1 to 30 V.. 1 15/16" h. by 1 7/16" w. by 2¼" d. Digit size 1½" h. by 1" w. Operating time less than 0.03 sec.

Type 1218

Complete readout display operating as remote repeater of cash register readings. Contains readouts, encoding matrices, pulsing and cycling circuitry and its own power supply. Use of latching (memory) type readouts makes average power consumption negligible. Packaged for all-weather, outdoor use. Uses 4 Type 218 readouts, 4" high.

Other sizes available

For literature or quotations on electromagnetic instruments and controls, call or write -

*Preferred type (for long life, readability and size).

NOTES

1. The minimum supply voltage should be +170 Vdc, however, the use of the highest voltage available with an appropriate series resistor is recommended to provide: 1) greater tolerance of B+ & Rp; 2) more uniform brightness; 3) more constant current operation; 4) improved operation with temperature and 5) improved life.
2. Special NIXIE tubes such as regular life wide angle types and weldable or tin dipped flying lead types are also available.
3. Special character NIXIE tubes such as + and — tubes, tubes with alphabet characters, and symbols (μ, mV) are also available.

The B-5750 and B-5850 series NIXIE tubes are high quality, low cost, side viewing indicator tubes, which display the numerals 0-9 and either of two internal decimal points.

The B-5750 NIXIE tube draws less current than the B-5850 series and is designed for DC and strobed/Time sharing applications. Mounting centers of 0.540 center to center can be obtained with this tube.

The B-5855 NIXIE tube is designed specifically for strobed/time sharing applications. This tube features all glass construction, a lower seated height than the B-5750 series, and 0.520 center to center mounting.

The B-5859 NIXIE tube is the same as the B-5855 except it is designed for both DC and strobed/time sharing applications.

The B-5750 and B-5850 series NIXIE tubes are available in a short lead version for use with the SK-207 socket. To order the short lead tube suffix the tube designation number with an S (i.e.; B-5750S, B-5855S).

The B-5440 is a low cost, long life NIXIE tube which also features a narrow tube width for 0.80" center-to-center spacing and a short seated height for minimal instrument panel dimensions.

The B-5441 is identical to the B-5440 except it has two decimal points (right and left of the numeral) inside the tube which are independently operable.

A "+" "—" NIXIE tube is also available (B-5442).

The B-5445 is identical to the B-5440 except it mounts upside down (stem up).

The B-5440A is identical to the B-5440 except it is stem tubulated and has a seated height of only 1.500" max. (tubulation is .064" max.). A "keep alive" is also available for consistently rapid ionization.

Bulletin 1104 & 1116 for details.

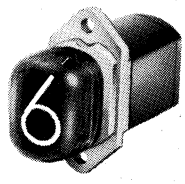
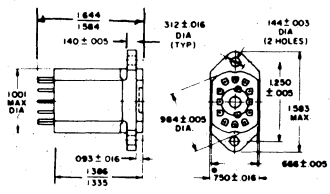
NIXIE TUBE DECODER/DRIVERS, DECADE COUNTING UNITS



BIP-8804 SERIES
FOLLOW APPLICATIONS
BIP-8806 SERIES
WITH MEMORY



* A DRAFT OF UP TO 0°30' PER SIDE INCREASING THE PACKAGE WIDTH AT THE PLUG END TO .775 MAX IS STANDARD

OUTLINE DRAWING

The BIP-8804 and BIP-8806 series integrated circuit decoder/drivers accept 4-line positive logic 8-4-2-1 BCD input from DTL and TTL circuitry, and provide decimal readout on integrally mounted NIXIE® tubes.

The BIP-8804 series modules are non-latching in that they require a continuously available BCD information input.

The BIP-8806 series modules have memory capability; they do not require a continuously available BCD information input.

The BIP-8804-1 and BIP-8806-1 modules drive a standard rectangular "0-9" NIXIE tube type 8422 (B-5991). The BIP-8804-2 and BIP-8806-2 modules drive the B-59956 standard rectangular NIXIE tube "0-9 with a decimal point". The NIXIE tube is supplied as part of the module and prices include both the module and the tube.

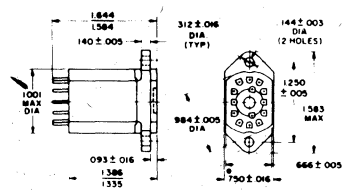
BIP-8821 UNIT
WITH PRESET INPUT



* A DRAFT OF UP TO 0°30' PER SIDE INCREASING THE PACKAGE WIDTH AT THE PLUG END TO .775 MAX IS STANDARD

OUTLINE DRAWING

The BIP-8820 and BIP-8821 Modules are 20 MH_Z Decade Counters with NIXIE tube readout. A decimal point control line is provided for the decimal point located on the left side of the numerals in the B-59956 NIXIE tube when the decimal point model is required.

Memory and control circuits are not provided for the decimal point line.

Both decade counters are positive logic TTL compatible modules which change state during the negative going edge of the clock pulse. A master reset input is also available on the modules to reset the counter to zero.

The BIP-8820 provides 4 line, parallel BCD outputs of the count for use in external coincidence detection circuits and other logic. The BIP-8821 can be set to any predetermined number by 4-line parallel BCD inputs at the data input terminals when the strobe input goes to the low state. When the strobe is in the high state, the counter is unaffected by data on the input lines.

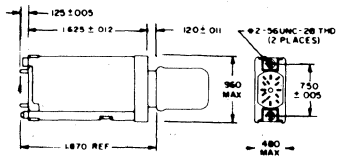
BIP-9800 SERIES
DECODER/DRIVERS



OUTLINE DRAWING

The BIP-9800 series modules are miniature integrated circuit decoder/drivers intended for military mobile or airborne applications. They drive the B-4998 NIXIE tube which displays a 0.3" high number or character. The modules accept 4-line, positive logic 8-4-2-1 BCD input from DTL and TTL circuitry. The BIP-9801 modules are approximately .85 inches shorter than the BIP-9802 and BIP-9806 modules shown in the outline drawing.

The modules feature the use of integrated circuits for decoding and driving, and are potted in anodized sheet aluminum enclosures which can be mounted on 0.5" centers. A tantalum decoupling capacitor is used to bypass 5V power supply transients while a 2% metal glaze anode resistor is used to optimize performance.

The individual characteristics of each module are described below. • BIP-9801-1 Miniature (4998) NIXIE tube decoder/driver • BIP-9801-2 Miniature +, — NIXIE tube decoder/driver • BIP-9802-1 Same electrically as BIP-9801-1 except features blanking, dimming and temperature range to +125°C • BIP-9806-1 Same as BIP-9802-1 except features memory.

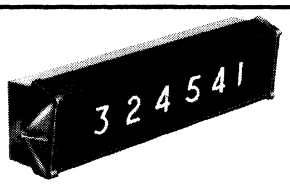
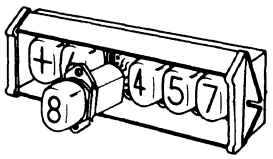
NIXIE TUBE BEZELS, SPECIAL PURPOSE DISPLAY SYSTEMS, COMPLETE HYBRID CAPABILITY

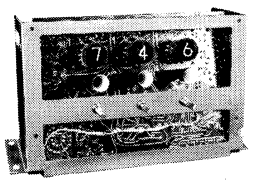




NIXIE tube bezel assemblies offer an efficient, attractive, and economical means of packaging NIXIE tubes, driver modules and sockets for multi-digit displays. The bezels enhance the appearance of equipment, provide optimum readability and save production labor as well as electrical and mechanical design time.

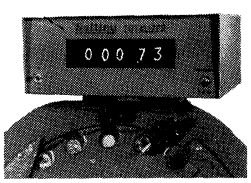
Assemblies are available for use with all size NIXIE tubes. They are available in various configurations which include complete packages with mounted driver modules, colons, decimal points and tubes, or partial assemblies with mounted sockets only. Amber Polaroid filters which provide maximum contrast and readability in high ambient light are standard with all assemblies. Special configurations can usually be supplied within several weeks at attractive prices. Request Bulletin 1137.

For the past ten years Burroughs has been building special purpose display systems to fulfill requirements of customers who wish to save design and development costs by using our highly-skilled experienced design group. Members of our engineering staff and a large production area are committed to the design, development and production of these systems. Listed below is a descriptive sampling of systems built for large equipment and systems manufacturers.



The electronic control and display unit shown is produced by Burroughs for Xerox Corporation for their 2400 copier/duplicator.

This compact Burroughs unit controls the number of copies being made and features a numerical display indicating both the number of copies made and the accumulated total. The unit stops the machine automatically when the proper number of copies has been made. Simultaneously, it computes the amount to be billed to the user on a sliding scale. The display portion of the unit incorporates Burroughs NIXIE indicator tubes, type B-5092.

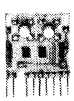


The Coin Totalizer System shown operates as an adjunct to the Sattley Coin Sorter/Counter to display total dollars and cents. The Sattley Coin Counter is an electromechanical device which separates any mix of change (pennies, nickels, dimes, quarters, and half dollars) and distributes them by denomination into separate bins. As the coins drop into these bins, a switch-closure pulse is generated on one of five input lines of the coin totalizer. The pulses are processed into an accumulator so that the total dollar value of the coins processed is continuously available. The time savings and reduction in errors provided by the totalizer are of obvious value to banks, toll collectors, vending machine operators and other groups who regularly handle large volumes of coins.

The Hexidecimal Display Unit, produced by Burroughs for the Foxboro Company, has the capability to display the numerals 0 through 9 and the letters A through F. This four place display utilizes B-5971 alphanumeric NIXIE tubes. The unit is used by the Foxboro Company on computer interface for a large scale process control system. The process is read out in four letter-number designations.

Each place in the display is supplied with five input logic lines: 8, 8, 4, 2, 1. This logic is decoded to drive the proper segments of the tube. The power supply is the only common connection between the four places of the display. A high voltage power supply for the NIXIE tube is incorporated in this self-contained unit. The Hexidecimal display unit is connected to the Foxboro system through a 36 contact receptacle and plug.

Burroughs maintains a modern, well equipped 5000 square foot engineering facility devoted exclusively to microcircuitry and staffed by engineers whose educational backgrounds include physics, electronic engineering, metallurgy, chemical engineering and mechanical engineering. These highly trained people represent more than 50 years of semiconductor and thick film experience. This facility is backed up by a 40,000 sq. ft. production facility and a 12,000 sq. ft. clean room. Circuits are available in both hermetic and non-hermetic package in all common configurations contain screened resistors and conductors, capacitors and discrete IC or MSI chips. They offer small size for maximum packaging density, low cost, IC compatibility, high power and high voltage capability.



HYBRID CAPABILITY

CONDUCTIVE INKS
Pd/Au, Pd/Ag, PT/Au

RESISTORS
Range of resistance .....5ohms to 5 megohms
Temperature Coefficient .....to ±50 ppm/°C
Tolerance .....to 0.5% trimmed, 15% as fired
Power Capability .....25W/in² (room temperature)
Temperature range .....−65° to +125°C

CAPACITORS
Attached chip ceramic capacitors are used, however capacitors can also be fabricated on the substrate to required specifications. Typical values range from 10 to 1000 pf.

ACTIVE DEVICES
Discrete Semiconductors, Transistors, Integrated Circuit Chips and MSI. Many active devices are stocked. Our semiconductor facility can produce custom devices when design requires it and design time is available.

SCREEN FABRICATION
In-House

SUBSTRATE SIZES
from .35 in. x .35 in. min. to 2 in. x 2 in. max.

SUBSTRATE MATERIAL
Alumina 96%

MOUNTING TECHNIQUES
Reflow solder machine attaches flat leads, round wire leads, chips, connectors, pins and special purpose formed leads.

ENCLOSURES
Polyurethane (conformed coating)
Flatpacks (hermetic)
Epoxy shells

ENVIRONMENTAL TEST CAPABILITY
Shock
Centrifuge
Temperature — High and Low
Altitude
Humidity — Steady state or programmed
Salt Spray

CIRCUIT PRODUCTION CAPABILITY
Prototype units in 4-6 weeks
Production units 6-9 weeks
Total production capability 100,000 circuits per week.

FURNACES
3 in., 5 in., and 12 in. furnaces available

BONDERS
Multiple thermocompression, ball bonders and ultrasonic bonders are used for wire attachment.

PRECISION CRT DISPLAYS and DISPLAY SYSTEM MODULES

PRECISION X-Y CRT DISPLAYS FOR FILM RECORDING AND FILM READING

	PD900	PD1100	PD1200
CRT Diameter	5 inches	5 inches	5 inches
Resolvable Elements/Diameter	1700	2100	3400

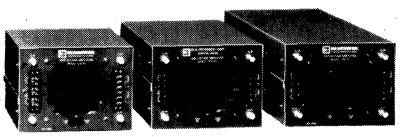
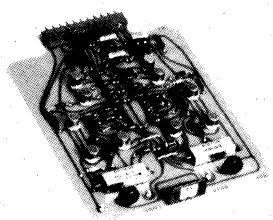
Settling Time	10 usec	12 usec	20 usec
Small Signal Bandwidth	1 mhz	1 mhz	1 mhz

±35 VOLT DEFLECTION AMPLIFIERS



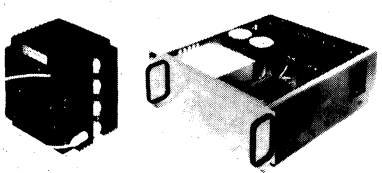
The models DA223, DA224 and DA225 are dc-coupled, all-silicon, solid-state modular packages capable of supplying up to ±2.0, ±4.0 and ±6.0 amperes of deflection current respectively to each axis of a directly-coupled deflection yoke. A unique method of damping optimizes the amplifier for the particular yoke being used by means of an adjustable potentiometer. The amplifiers also feature extremely fast settling time and high bandwidth. The user has the choice of operating the amplifiers Class A for achieving nonlinearities of ±0.02% maximum or Class AB for minimum power consumption.

MODULAR CRT BUILDING BLOCK COMPONENTS



Individual, compatible plug-in circuits such as: DF2050 Dynamic Focus Generator; DF347 Dynamic Focus Amplifier; LC1784/1785 Precision Linearity Correction Circuit; LC916/918 Linearity Correction Circuit; VA2076 Video Amplifier (10 mhz); VA2075 Gamma-Corrected Video Amplifier (10 mhz); VA2077 Video Amplifier (30 mhz); SG1190 Sawtooth Generator; PP529 Phosphor Protection Circuit; DA341 Deflection Amplifier (±200 ma); DA1340 Deflection Amplifier (±0.75 amperes); EDA800 Electrostatic Deflection Amplifier (350 volts plate-to-plate positive or negative); EDA1504 Electrostatic Deflection Amplifier (500 volts plate-to-plate positive or negative); FR1882 Static Focus Regulator; BA1714 Blanking Amplifier. All Beta circuitry features silicon semiconductors and temperature stable metal-film resistors throughout.

HIGH & LOW VOLTAGE CRT POWER SUPPLIES



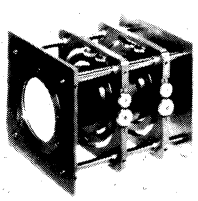
SERIES HV provides regulated high voltage outputs for CRT electrodes — anode, focus grid, G2 and filament.

Model No.	Anode Output Range
HV8	1-8 kv
HV20	5-20 kv
HV30	15-30 kv

SERIES PAK provides regulated low voltage outputs for Beta modules — ±35 volts, ± 20 volts, G1 and filament.

Model No.	±35 volt (deflection) Output
PAK7	7 amperes
PAK16	16 amperes

PRECISION TUBE AND COIL MOUNTS



Flexible combinations of standard assemblies for the precision mounting and alignment of CRT's, yokes and coils: CRTM Basic CRT Mount includes removable bezel, rods and neck end clamps; DSTM Dual Gun Recording Storage Tube Mount, includes rods and neck clamps both ends; MCM Micropositioner Coil Mount allows 6 independent motions and positive lock; FYM Fixed Yoke Mount for application where micropositioning is not required; FYMS Fixed Yoke Mount for servo-type mounted yokes; CCM Centering and/or Alignment Coil Mount; MS983 Magnetic Shield Enclosure.

Beta Instrument Corp. 377 ELLIOT ST., NEWTON UPPER FALLS MASSACHUSETTS / TEL. 617 • 969-6510

DiGiCATOR®

the wholly integrated, complete line of

Numeric Readouts and Decoder/Drivers

7 SEGMENT DISPLAY READOUTS

- Compact Design
- Incandescent Lighted
- Replaceable Lamps
- Wide-angle Viewing
- High Brightness
- High Contrast
- Low Voltage
- Low Current
- Long-life Lamps
- Light Weight
- Character Heights 5/16" to 1"
- Immediate Delivery

BCD TO 7 LINE DECODER DRIVERS

- Advanced Technology
- Drive Capacity up to 15 v / 80 ma per lamp
- High Reliability
- Compact Size
- Lamp Supply Separate From Logic Supply Circuit
- Lamp Voltage Adjustable Without Affecting Decoder Logic
- Wide Selection
- Compatible With All TTL, DTL, and RTL Integrated Logic Systems
- Special Units Available for Interfacing With Other Types of Logic
- Immediate Delivery

Including the new DiGiCATOR® "Save-Mates"

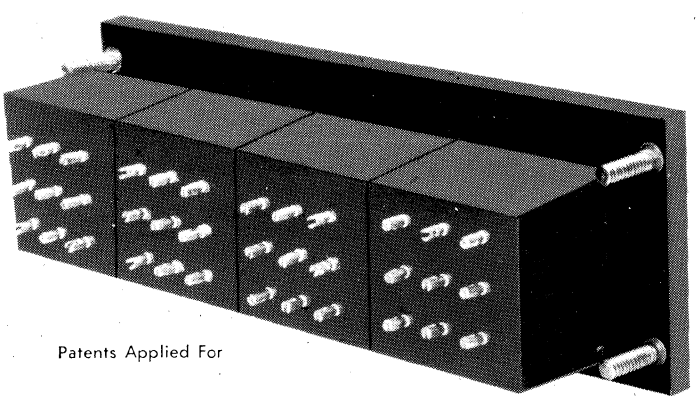
SAVE SPACE – SAVE TIME – SAVE COST

THINLINE READOUT SERIES 20
MOUNTS FROM THE FRONT—ONLY ¼" PROFILE

Character height 1 inch • Wide-angle readability to 35 feet • High brightness in combination with exceptional lamp life. 5 or 12 volt lamps • Delivered as a complete assembly to your specifications, including integral bezel, screen, mounting studs — and lamps!

AND THE ULTRA-COMPACT
MODEL 5720 DECODER/DRIVER

Plug-in package mates with the Series 20 Readout • Monolithic IC unit has integral high-current lamp drivers • Compatible with all TTL, DTL, and RTL logic systems • Lamp supply circuit separate from logic supply • Eliminates all but logic and power supply connections!



Patents Applied For

SIMPLE TO SPECIFY • SIMPLE TO PURCHASE • EASY TO DESIGN IN • EASY TO INSTALL • COMPETITIVELY PRICED

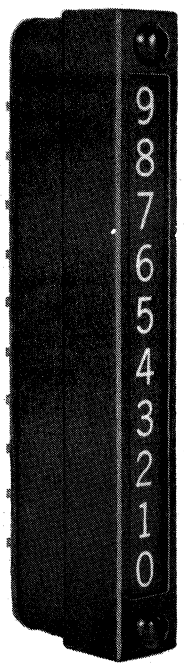
display devices

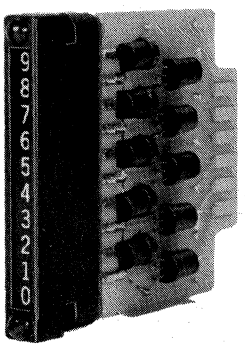
DIGISTRIP front relampable DIGITAL DISPLAYS

For a wide range of console and instrument display applications. Can be mounted horizontally or vertically, directly on p.c. boards, or ganged for high-density readout.

All Digistrip models are available with standard 0-9 legend, or with custom read-out information.



Digistrip II
3″ legend area.



Digistrip I with high-gain transistor drivers on integral printed circuit board.

Digistrip I
1½″ legend area.

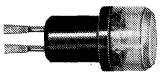
MINIATURE T-1 INDICATOR LIGHTS

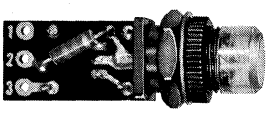
Designed to provide the brightest light in the least space. Available off-the-shelf, or designed to your application.



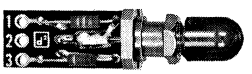
QUICK-LENS
Front-relampable miniature indicator light with built in light reflector for maximum brightness, even in high ambient light.

MINI-LENS
Front relampable, micro-miniature indicator light, featuring minimum panel spacing. Can be RFI shielded. Threaded body can mount directly to panel.

FLUSH-LENS
For panel mounting without protrusion. Available with RFI shield. Unit is relampable from rear of panel. No solder connections required.

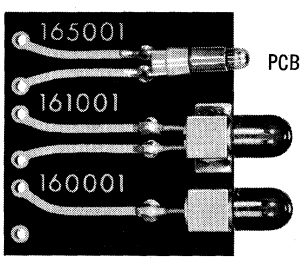


TRANS-LENS



TDML

Each front relampable, with high-gain transistor driver on compact, integral p.c. board. Minimum depth behind panel. Both available in "bare board" configuration for customer to install own components. Trans-Lens is transistor-driven version of Quick-Lens; TDML is transistor-driven version of Mini-Lens.



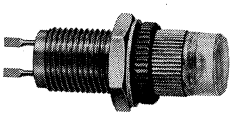
PCB LIGHT

P.C. BOARD INDICATORS

SINGLE-SIDED BOARDS
DOUBLE-SIDED BOARDS
} TEST LENS

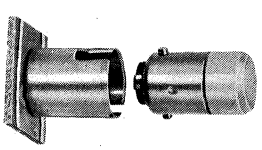
T-1 UNBASED | **T-1¾ BI-PIN**

Basic sockets for custom designed lamp holders or p.c. board mounting used as lighting chassis for back lighted display.



TWIST-LENS

Quick-change lens, available in clear or colors. Waterproof and RFI shielded units available. Uses T-1¾ Bi-Pin base lamp for high brightness.



ADAPTER LENS AND SOCKET

Midget T-1¾ flanged base lamp adaptor used with T-3¼ printed circuit mounted socket. Furnished with or without integral color filter.

ALSO AVAILABLE: Custom back lighted panel assemblies and DF991 (Dead Front) legend screens.

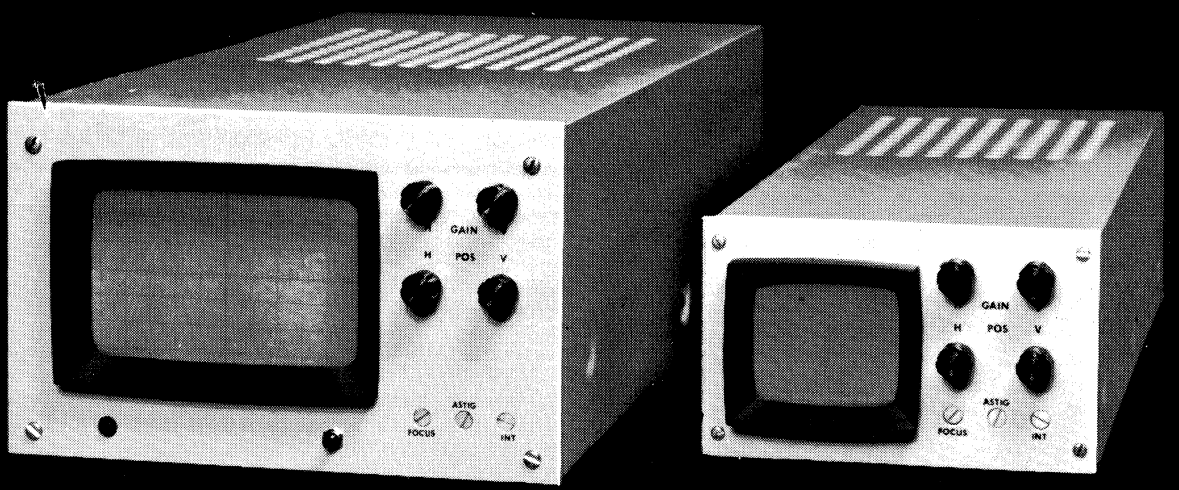
CRT DISPLAY



Series 8620
Panel size: 5¼" x 8½"

Series 8600
Panel size: 3½" x 5¾"

- 66 standard models available.
- Design permits great latitude of special modifications.
- Front panel easily removable for custom installation.
- Available as X-Y indicator or with multi-range sweep.

OPTIONAL FEATURES

Screwdriver controls

DC-coupled Z axis

10 mv/div sensitivity

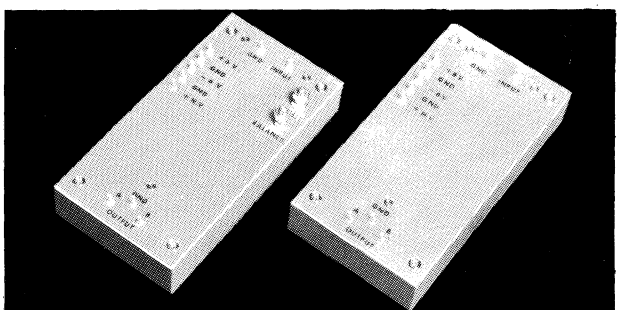
Multi-range sweeps — 11-position front panel selector switch (0.5 μs/div to 200 ms/div)

Multi-range input attenuators — front panel selector switch

Graticule illumination

SPECIFICATIONS

CRT	Type 8600 3" rectangular	Type 8620 5" rectangular
Screen size	4 x 5 cm	6 x 10 cm
Bandwidth, Y axis	1 MHz	2½ MHz
Bandwidth, X axis	1 MHz	1 MHz
Sensitivity	100 mv/div	100 mv/div



HYDRIVE AMPLIFIERS

High level, DC to 2.5 MHz
- **For CRT deflection**
- **For grey scale modulation**
- **For extending output capabilities of signal generators, IC's, etc.**

Size: 1" x 3" x 5¾". Four threaded inserts for mounting on your chassis.

Linear Hydrive Amplifiers

Model	Input (single ended)	Differential Output	Bandwidth	Operating Voltages Required
802	1 volt	60 volts p-p	2½ MHz	+6v, −6v, 40 to 60 vdc
803	1 volt	100 volts p-p	1½ MHz	+6v, −6v, 60 to 85 vdc
804	1 volt	150 volts p-p	1 MHz	+6v, −6v, 85 to 110 vdc
805	1 volt	200 volts p-p	½ MHz	+6v, −6v, 110 to 150 vdc

Switching Hydrive Amplifiers

Model	Input	Output	Tr & Tf	Operating Voltages Required
822	0/2 volt	0/30 volts	50 ns	+6v, −6v, 30 vdc
823	0/2 volt	0/60 volts	100 ns	+6v, −6v, 60 vdc

Price: $88 each.

Amplifiers can be built to meet special requirements. Inquiries invited.

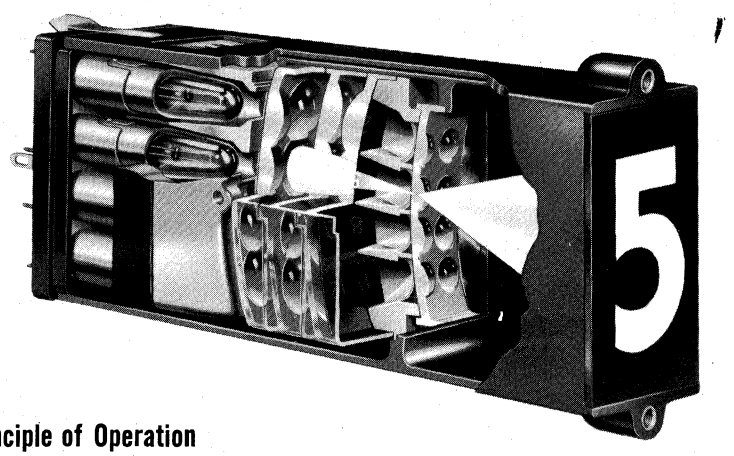
The world's broadest line of rear projection readouts

Industrial Electronic Engineers, Inc.

7720 Lemona Avenue, Van Nuys, Calif. 91405 • Phone (213) 787-0311 • TWX 910-495-1707

REAR PROJECTION READOUTS—MODELS TO MEET EVERY APPLICATION

- SINGLE-PLANE PRESENTATION for crispness, not visual "hash."
- BOLD, BRIGHT DISPLAYS for high readability at wide angles, long distances, in brightest light. (Character brightness up to 90 foot-lamberts.)
- FROM 11 TO 48 MESSAGE POSITIONS per readout. May be displayed individually or in combination.
- NO MOVING PARTS for unlimited unit life; easily replaceable lamps provide up to 100,000 hours of operation per lamp.
- LOW VOLTAGE OPERATION.



Principle of Operation

Cut-away of IEE Series 10 readout shows basic principles of IEE's patented rear-projection, single-plane operation. Photographic film containing individual messages is mounted in front of lamp assembly. As one or more of these lamps is lighted, the corresponding message is projected on the front viewing screen by a set of lenses. Because the presentation is entirely single-plane, only the message being displayed is visible; the other messages are totally invisible.

- INFINITE DISPLAY VERSATILITY. IEE readouts permit you to display anything that can be put on film:

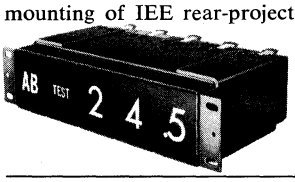
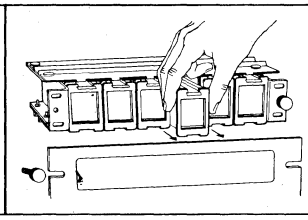
STATUS INDICATOR

ASSEMBLIES — Various assemblies are available for in-line mounting of IEE rear-projection readouts. These are supplied with a continuous viewing screen and are stocked in widths to accept up to 8 readouts. Others available on order.





Front Panel Accessibility Most IEE Rear Projection Readouts are front panel plug-ins, providing easy accessibility. Most models have quick disconnect lamp assemblies which permit fast, easy lamp replacement.

IEE Subminiature Incandescent Lamps are available for all IEE Rear Projection Readouts. See page 1798.

Nimo™ Display Tubes

Discrete and 4-decade models available now.
6 decade model in development.

Single plane digital displays unsurpassed for brightness and clarity. Numbers, letters and words are projected onto a fluorescent screen from a 10-gun CRT. Sharp images easily viewed in direct sunlight. Exceptionally wide viewing angle. Extremely low power consumption. Small grid control swing. Available *now* in quantity in standard single decade and four decade models; a six decade Nimo™ is on the way.

Discrete

Four Decade

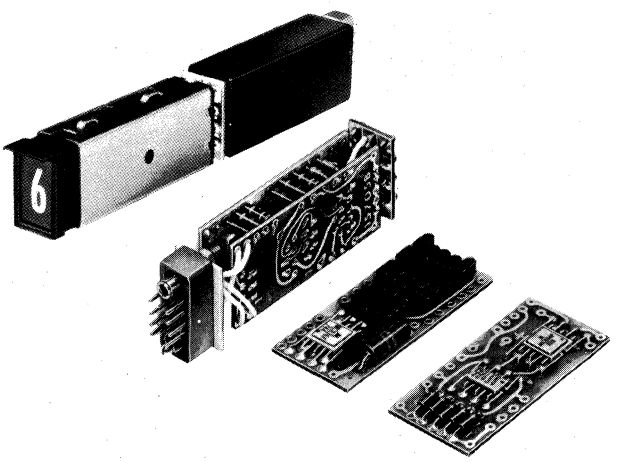
Six Decade

IC DRIVER/DECODERS

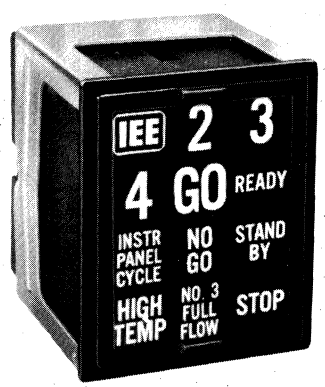
New, smaller IC models for converting binary to decimal

Small, compact units for driving incandescent lamps in rear projection readouts. Utilize the latest integrated circuit techniques. Fully compatible with modern integrated circuits. Can drive lamps up to 250 ma. and 28 volts DC. Require no reset function. Other features include internal data storage for pulsed operation, low power consumption (typically 600 mw), high noise immunity (1.0 volts), same logic voltage (Vee) as used with IC's, and high reliability.

All models incorporated forbidden code rejection which eliminates ambiguous displays. Standard 8-4-2-1 BCD code accepted, equivalent decimal output provided.

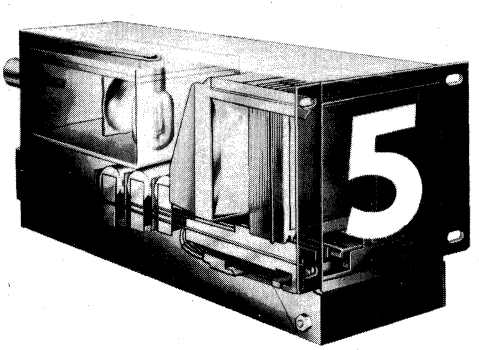


STATUS INDICATOR DISPLAY



Backlighted, simultaneous message indicator replaces 12 individual lights. Displays up to 12 messages in a single plane; individually, in any combination, or all 12 simultaneously. Installs vertically or horizontally; no external screws required. Operates with any T-3¼" bayonet-base lamp of 6 to 28 volts; straight decimal input; one lamp per message position.

BINA-VIEW®

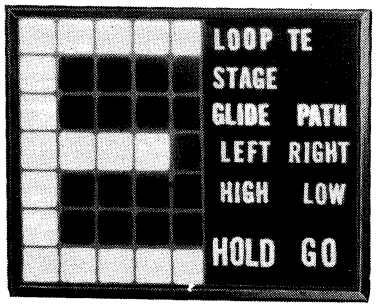


The Bina-View readout is a binary input (up to six bits), self-decoding readout. Decoding is entirely self-contained. Its 64-message capacity permits additional display of colors, symbols, words. Floating decimal points available. Provides automatic memory, retains the last message displayed after signal and set-pulse power have been removed. Contact closures can be provided.

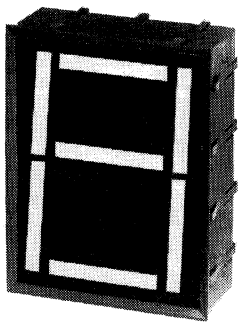
INFO-LITE

THE BUILDING BLOCK APPROACH TO

INFORMATION DISPLAYS • READOUTS • LIGHTED INDICATORS



NOW, a new modular approach to Lighted Information Displays that provides the design flexibility and attractive appearance usually associated with expensive custom units. INFO–LITE allows you to choose the Size, Shape, Color, Legend and Intensity combination that will meet your requirements · All INFO–LITE units are made from four basic light modules which have lighted area sizes of 3/8 x 3/8, 3/8 x 3/4, 3/8 x 1-1/8 and 3/8 x 1½ · Colored filters, special legends and masks are added as required · Light sources are standard, flange based T 1¾ lamps · INFO–LITE assemblies are easily panel mounted and may be removed from the front for rapid servicing. Solid state "Encode" & "Decode" driver modules can be supplied intergrally with INFO–LITE Displays.



FEATURES

- MODULAR CONSTRUCTION
- WIDE VARIETY OF STANDARD SERIES UNITS
- MANY COMBINATIONS AVAILABLE FOR SPECIAL DISPLAYS
- FREEDOM IN LEGEND, COLOR, SIZE, SHAPE AND INTENSITY SELECTION
- ATTRACTIVE CUSTOM BUILT APPEARANCE
- STANDARD LAMPS USED AND CAN BE SERVICED FROM FRONT
- SIMPLE, CLIP MOUNTING
- STANDARD 3/8" GRID CONSTRUCTION
- LOW COST

APPLICATIONS

- ANNUNCIATOR PANELS
- NUMERIC & ALPHA/NUMERIC READOUTS
- SYSTEMS CONDITION INDICATORS
- DIGITAL INDICATORS (0-9 OR BCD)
- PATTERN/CODE DISPLAYS

Patent Pending

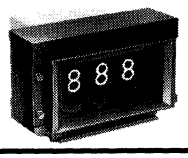
INTEGRATED CIRCUIT ELECTRONICS, INC.

DECODE DISPLAY COUNT AND MEMORY MODULES AVAILABLE AS A COMPLETE ASSEMBLY FROM 2 - 10 DECADES INCLUDING DISPLAY TUBES, LOGIC MODULES, BEZEL, FILTER, HOUSING & INTERCONNECTING MOTHER BOARD.

NOW AVAILABLE FROM STOCK



$69.50* (100 Qty. Price)
*3 digit version shown units available from 2 - 10 decades

FEATURING: Plug in logic modules and tubes. BCD output from storage or counting stages. Decimal point standard in each decade. Dependable TTL Logic. Side view cold cathode display tube. All input/output on rear connector. Symbolic tube available with + − x y z ~ symbol. Optional high voltage one level logic. Compact attractive styling; no visible mounting screws.

Model C-103 Count/Display Assembly

INPUT REQUIREMENTS

Count Input (Count advances on transition from Logic 1 to Logic 0).
Width of input count Pulse ≥ 50NS

Rate 0 to 15 MHz

Logic 1 Requirements		Logic 0 Requirements	
Voltage (Maximum)	5.5 vdc	Voltage (Maximum)	0.8 vdc
(Minimum)	2.2 vdc		
(Recommended)	4.0 to 4.5 vdc	(Recommended)	0.4 vdc
Current (Nominal)	160 μa dc	Current (Nominal)	3.6 ma dc

Reset
Width of Input Pulse ≥ 50NS
Logic 0 applied allows counter to count. Logic 1 applied resets counter to 0.

Logic 1 Requirements		Logic 0 Requirements	
Voltage (Maximum)	5.5 vdc	Voltage (Maximum)	0.8 vdc
(Minimum)	2.2 vdc		
(Recommended)	4.0 to 4.5 vdc		
Current (Nominal)	80 μa dc	Current (Nominal)	1.8 ma dc

Carry
Common internal connection with the 8 weighted bit of the BCD output. Supply current is 200 μa at Logic 1. Sink current is 8 ma at Logic 0.
BCD Output

Logic 1		Logic 0	
Voltage (Maximum)	5.5 vdc	Voltage (Maximum)	0.6 vdc
(Minimum)	2.2 vdc		
Current: Supply	200 μa dc	Current: Sink	8.0 ma dc

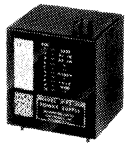
POWER REQUIREMENTS: Ebb, Ib, Vcc — Same as for D103
Icc — 49 ma (with Vcc = 5 v.d.c.)

Model CS-103 Count/Display with Memory Assembly

Same as C-103 except for the following terminal connections — 8 - key slot, 9 - hold* and ICC equals 79 ma.

- **Display Hold:** Logic "0" applied holds the count on the display readout tube while the input changes. Logic "1" updates the display.

DATECON MODEL PS-200



The DATECON Model PS-200 is specifically designed to power the Integrated Circuit line of Counter/Display and Decode/Display modules and assemblies. It provides an unregulated +200 volts DC at 50 milliamps for readout tubes and regulated +5.5 volts at 1 ampere for the circuit requirements. Sufficient current capability to drive 15 decades of decode/displays. This low cost compact unit measures only 3 9/16" x 3 1/16" x 4 3/8" and is protected against momentary short circuits and overload conditions. This unit is ideally suited when using DATECON displays as well as those of competitive manufacturers. $49.95. (Quantity — 1 to 9.)

Model D-103 Decode/Display Assembly

INPUT REQUIREMENTS

Logic "0" Voltage (Vcc = 4.75):
Maximum ..... .8 v.d.c.
Minimum ..... 0 v.d.c.
Recommended ..... .4 v.d.c.

3—Ground	8—Key Slot
4—BCD 4 output	9—Display Hold
5—BCD 2 output	10—Decimal point when included
B—BCD 8 input	D—BCD 2 input
C—BCD 4 input	K—BCD 1 input

MECHANICAL CHARACTERISTICS
Connector: Amphenol 225-21021-101 or equivalent.
Weight: 75 grams.
Temperature: Same as for D-103.

POWER REQUIREMENTS
Ebb, Ib, Vcc, same as for D-103.
Icc .....49 ma (with Vcc = 5 v.d.c.)

Display Hold: Logic "0" applied holds the count on the display readout tube while the input changes. Logic "1" updates the display.

HOW TO ORDER BEZEL ASSEMBLIES

When modules are ordered for an assembly, the model number changes as follows: (A three in the last digit of the model number denotes an assembly.).

The number of decades desired is shown by a suffix after the model number, that is, for a 4-decade Decode/Display, the model number is D-103-4. If a special symbol is desired, its placement should be indicated.

To determine price—simply add the cost of modules with a 103 suffix to the cost of the Bezel Assembly. For example: To determine the price of 100 3 digit counters (CS-103's) with Bezel (300 decade total)—the price of each decade is $38.50 or $115.50 for the three decades, plus $12.00 for the Bezel Assembly—for a total price of $127.50.

Decade	1 - 24	25 - 49	50 - 99	100 - 499	500 - 999
2	$15.00	$13.50	$12.00	$10.50	$ 9.00
3	17.00	15.00	13.00	12.00	11.00
4	18.50	16.50	14.50	13.00	12.00
5	20.00	18.00	16.00	14.00	13.00
6	22.50	20.00	18.00	16.00	15.00
7	25.00	22.50	20.00	18.00	17.00
8	27.50	24.00	21.00	19.00	18.00
9	30.00	25.50	22.50	20.00	19.00
10	32.50	27.50	25.00	22.50	20.00

DISPLAY MODULE PRICES

DECODE/DISPLAY MODULES	QUANTITY 1-24	25-99	100-999
D-102 Decode/display module without tube	24.00	18.50	16.50
D-103 Decode/display module with tube (used for Assemblies)	27.50	21.50	19.50
COUNT/DISPLAY MODULES			
C-102 Count/display module without tube	37.00	31.50	30.50
C-103 Count/display module with tube (used for assemblies)	40.50	34.50	33.50
COUNTER/MEMORY MODULES

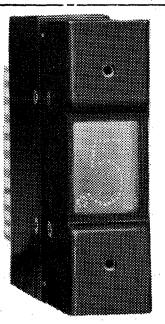
DS-103 Display/memory module with tube (used for Assemblies)	40.00	32.50	28.50

NOTE: To these module prices add the cost of a bezel assembly shown at left.

INTEGRATED CIRCUIT ELECTRONICS, INC. • 237 RIVERVIEW AVE., NEWTON, MASS. 02154/(617) 891-4311

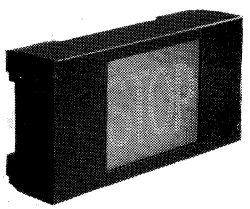
THE INTER-MARKET RANGE OF "KGM" READ-OUTS is available in many models with character height from ½" to 6". These readouts utilize incandescent lamps in voltages from 6 to 28 volts. Two types are available the first of which secures an image from engraved acrylic plates and the other is a 7-bar segmented type which permits the display of many letters in addition to all digits and a decimal point. **DECODER/DRIVES, BCD COUNTERS and DECODER/DRIVERS WITH MEMORY** are available which connect to the user's circuit using a standard connector.



FEATURES
- ...Maximum flexibility for special characters or symbols
- ...Easily mounted in multiple units
- ...May be mounted from front or rear
- ...Highly resistant to shock and vibration
- ...Low voltage operation
- ...Delivery from stock

PRICES: Readouts from $6.00 in 100 lots, Decoder/Drivers from $26.00 in 100 lots.

INTER-MARKET has a complete range of **KGM LEGEND DISPLAY INDICATORS** available for many applications such as elevator cabs, annunciators, vote recorders, drive-in check cashing units, television studio displays, visual recorders on scales, submarine and aeroplane status indicators, hymn indicators, mimic diagrams, etc. Each unit is tailored to the customers needs with no charge for special legends. Size varies in different models from 2⅞" x 1" to two large sizes 1½" x 12" and 4" x 6". Up to 48 messages can be secured from one **KGM LEGEND DISPLAY** in a variety of colors as required.



FEATURES
- ...Special messages can be supplied without engineering cost and changes can be made easily
- ...Operation on low voltage source
- ...Highly resistant to shock and vibration
- ...Front or rear mounting available
- ...Units available for dusty and explosive atmospheres
- ...Units available for high humidity and marine applications

PRICES: Prices depend on specification but range from $15.00 to $100.00 in 100 lots.

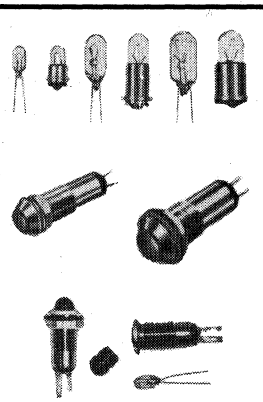
- NUMERICAL READOUTS • THUMBWHEEL SWITCHES
- LEGEND DISPLAYS • SUBMINIATURE LAMPS
- INDICATOR LIGHTS

The **RODAN** series of **SUBMINIATURE LAMPS** includes a wide variety of T-1, T-1¼ and T-1¾ lamps with both flanged base and wire terminals to meet the requirements of many users such as manufacturers of instruments, indicators, office equipment, computers and aircraft equipment. In addition to standard subminiature lamps INTER-MARKET can work with you to design subminiature lamps for special purposes.

RODAN INDICATOR LIGHTS are available in three sizes with replaceable and non-replaceable plastic caps in white, yellow, green, blue and red colors.



FEATURES

Subminiature Lamps
...performance equal to or better than industry standards

Indicator Lights
- ...Quick delivery and low cost
- ...Durable machined metal housings
- ...Long life — 40,000 to 200,000 hours
- ...Solder terminals

PRICES

The **INTER-MARKET** range of **STOLEC PRINTED CIRCUIT THUMBWHEEL SWITCHES** are low cost units which have been specifically designed for applications where adverse environmental conditions are not usually met. They are available in 10, 12, 16, 20 and 24 position decimal outputs and 10 position BCD and BCD with complements versions. They are manufactured from high quality materials to insure long operational life. They extend the use of thumbwheel switches for many applications where MIL Spec switches are too expensive covering a wide variety of instrument and industrial control applications.

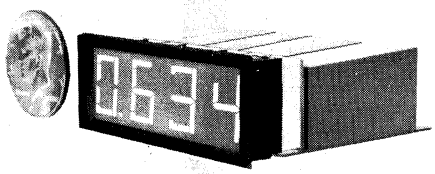
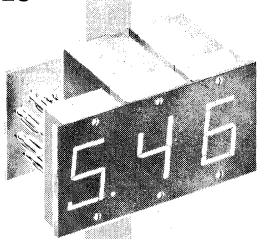
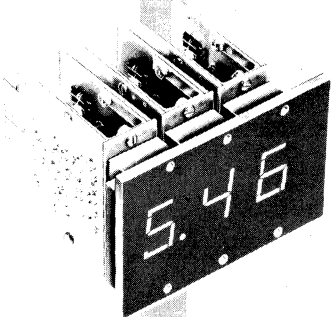
DIGITAL DISPLAY MODULES



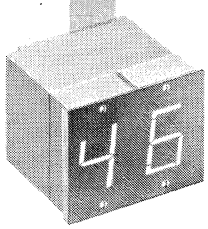
NQS SERIES



NQM SERIES



NQZ SERIES



NQT SERIES

- IN-PLANE, EASY-TO-READ NUMERALS
- 1″ AND .6″ HIGH CHARACTERS
- INPUT LEVELS COMPATIBLE WITH I.C. LOGIC
- NEON OR INCANDESCENT LAMPS
- BCD OR DECIMAL CODES

The NQ Series Digital Display modules employ numeric characters consisting of seven properly shaped segments which are illuminated by aged and selected high-brightness neon or incandescent lamps. The integral decoder-drivers translate 4 or 8 line BCD or 10 line decimal codes into the correct segment illumination.

The BCD decoders have a logical "one" level of 2.5v. and low signal current requirements, allowing them to be driven by I.C. or standard logic. All units are normally furnished mounted on a common panel in the exact configuration desired by the customer thus eliminating the need for bezels, brackets, filters, sockets, mounting hardware or additional assembly time. Decimal points, plus-minus signs, colons, etc. are optionally available.

Brief Specifications:
NQS . . . Available in three models; two 1″ high character and one .6″ high character. Employs I.C. decoder and discrete drivers for neon or incandescent lamps. Display faces, with or without lamps and decoder-drivers available. Economically priced at under $16.00 per decade in 1000 lots.

NQM . . . A miniature version available in 4 line, positive logic. 1.97″ high, 2″ deep and 1.06″ wide, 1″ high character. Sells for as little as $25. per decade in production quantities.

NQZ . . . 3″ High, 4″ deep, 1.25″ wide, 1″ high character. Available in positive or negative logic, special codes and fail-safe versions.

NQT . . . The "Two-fer" — A miniature version utilizing multiplexing techniques to achieve a two digit display driven by one decoder-driver. Priced as low as $19. per decade in production quantities, the NQTR measures 1.97″ high, 2″ deep and 2.250″ wide.

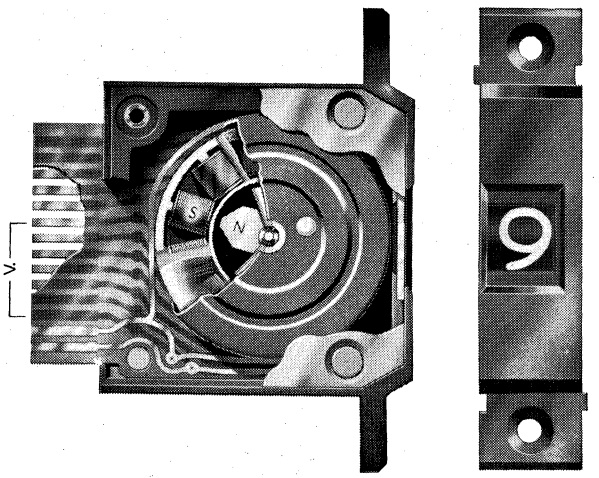
Magneline® DIGITAL INDICATORS...

GENERAL PRINCIPLE:

MAGNELINE® Indicators operate by pulsed D.C. signals. A pulse through a coil creates a magnetic field and a permanent magnet, to which a numbered drum is attached, rotates to align itself with the field. The magnet and drum move silently, smoothly, and always by the most direct course. There is no stepping action or mechanical drive.

When the magnet is aligned with the field, it is held in position by attraction of the magnet to a pole piece in the coil. It will remain there, independent of any external light or power, until a different coil is pulsed. This is MAGNELINE's inherent memory; it means that data remains on display as long as needed without any use of external power.



All MAGNELINE® Indicators have inherent memory. They also have other extremely important features. They are easy to read in normal or brilliant ambient light, they may be mounted in a variety of ways to make best use of panel space, and they are very reliable. Of these, reliability is most important to the systems engineer. These indicators have no internal make or break contacts and the only moving part is the light weight magnet and drum assembly which rotates on a jewel bearing. MAGNELINE® test units have been run through 30 million cycles without failure or appreciable wear.

DIGIT SIZE:

MAGNELINE® digits or symbols are silk screened on a contrasting, dull finish background. They are as easy to read as the figures shown here.

16000 SERIES
9/16" high x 7/16" wide

15000 SERIES
9/32" high x 1/4" wide

14000 SERIES
9/32" high x 1/4" wide

12000 SERIES
7/32" high x 11/64" wide

MOUNTING METHODS:

Front mount units form their own bezel. Rear or bracket mounts are used when vertical panel space is limited.

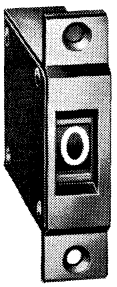
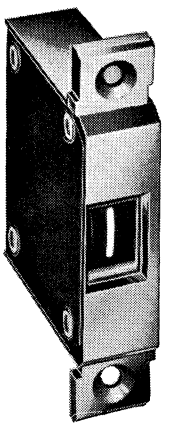
...THE INDICATORS WITH INHERENT MEMORY

Average physical and electrical characteristics:



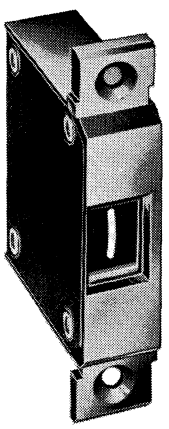
12000 SERIES

PANEL SPACE (per unit)	25/64" wide x 1 9/16" high (25/64" x 1" if bracket mounted)
NUMBER OF CHARACTERS	up to 10
NUMBER OF LEADS	5, plus a common and 2 light leads
WATTS	3
PULSE TIME	500 milliseconds (min.) 600 msec. (max.)
DUTY CYCLE	25% (pulsing same coil)



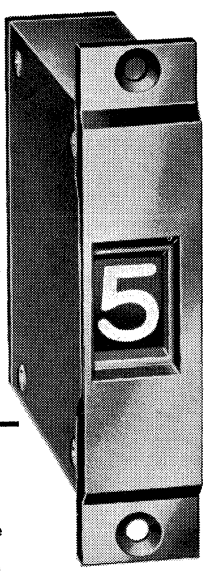
14000 SERIES

PANEL SPACE (per unit)	½" wide x 2¼" high (½" x 1½" without mounting ears)
NUMBER OF CHARACTERS	up to 11
NUMBER OF LEADS	11, plus a common and 2 light leads
WATTS	2 nominal, depending on voltage and duty cycle
PULSE TIME	500 milliseconds (min.) 600 msec. (max.)
DUTY CYCLE	50% (25% when pulsing same coil)



15000 SERIES

PANEL SPACE (per unit)	½" wide x 2¼" high (½" x 1½" without mounting ears)
NUMBER OF CHARACTERS	up to 10
NUMBER OF LEADS	5, plus a common and 2 light leads
WATTS	1.5 nominal, depending on voltage and duty cycle
PULSE TIME	500 milliseconds (min.) 600 msec. (max.)
DUTY CYCLE	50% (25% when pulsing same coil)



16000 SERIES

PANEL SPACE (per unit)	7/8" wide x 3¾" high (7/8" x 2 15/16" without mounting ears)
NUMBER OF CHARACTERS	up to 12
NUMBER OF LEADS	12, plus a common and 2 light leads
WATTS	4 nominal, depending on voltage and duty cycle
PULSE TIME	650 milliseconds (min.) 750 msec. (max.)
DUTY CYCLE	50% (25% if pulsing same coil)

Manufactured under one or more of the following U.S. Patents: 2,943,313, 3,009,140, 3,118,138, 3,201,785, 3,260,871. Other patents pending.

All MAGNELINE® Indicators are available in 6, 12, 24 or 28 volts (as specified) and the standard operating temperature range is from —20 deg. C to +71 deg. C., provision for wire leads. Options, at extra cost, include special voltage, special characters, trim-spacer strips, internal lighting, and dummy models with fixed digit or black window.

Pinlite® / MINIATURE READOUT DEVICES AND ENCODERS

Pinlite® multi-filament lamps can be made in virtually any shape, making possible a very extensive range of applications. Acceptance for these lamps in various forms has rocketed forward since their development less than four years ago. Specific applications of these microminiature assemblies created the birth of the Midgi-Lite® and Alpha-Lite. Also, a line of drivers and encoders known as Midgi-Coder, compatible with Midgi-Lites, is now available. Models compatible with other Pinlite® multi-filament lamps are being developed.

MIDGI-LITE®. . . a microminiature, modular, multi-filament digital readout display. Each unit contains a complete digit . . . 4 models with height of characters from 3/16" to 1/2"

A 7-light-bar filament (each filament individually controlled within a single lamp), low voltage, direct reading lamp with terminations available as follows: standard microminiature connectors, or integral cabling.

FEATURES:

1. Excellent readability
   a) Light bars, (incandescent filament), are all on same plane, thus providing wide angle of viewing.
   b) Brightness, (up to 10,000 ft. lamberts), is adjustable to maintain proper brightness/contrast ratio under varying ambient conditions including sunlight.
   c) Proper stroke thickness maintained.
   d) The coiled tungsten helix of only a few thousandths of an inch diameter allows for sharpness of contrast for reading at both short and long distances, even under extreme variations of ambient light conditions.
2. Excellent volume/character height ratio
   a) The complete assembly is a 7-filament incandescent lamp — no waste space — no extra components or connections.
3. Small size
   a) 6 digits occupy as little as 7/32" x 1" of panel space.
4. Low Power
   a) Complete 7 bar segment from as low as 50 milliwatts.
   b) Larger sizes up to 1/2 Watt.
5. Reliability
   a) Life expectancy from 20,000 to 100,000 hours, depending on the model number.
6. Display speed
   a) Superior to all read-outs using incandescent lamps.
   b) As low as 10 milliseconds.

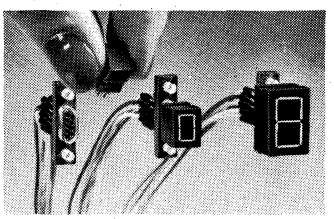

Photo shows 03-15 Midgi-Lite being plugged into a micro-miniature connector (our part No. CF-9H) and the comparative sizes of the 04-30 and 08-60 Midgi-Lites.

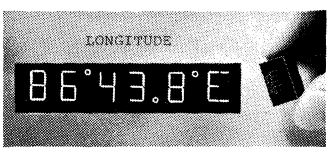
Availability	Stock	Stock	Stock	Stock

‡Widths for decimal points are as follows: .075" for models 03-15, 04-30; .100" for models 06-40 and 08-60. Height, depth, voltage and current remain the same as their digital counterparts.

*Plus/Minus
**Decimal Point



Model M6-30, new low cost, microminiature readout with character height of 5/16". Low power (8ma/segment at 3V) with long life of 100,000 hrs./segment. Can be plugged into connector or wired directly into printed circuit logic. Commercial unit, in large quantities, $12.95.

Prices from $40.00 each (quantities — 1 to 9, model 04-30). Write for our 1969 catalog for complete information and prices.

ALPHA-LITE . . . a microminiature, modular, multi-filament alpha-numeric readout display

Each unit is capable of displaying the entire alphabet and a complete digit in a space smaller than a 3/8" cube. Alpha-Lite is a direct reading, low voltage, 16-segment light-bar arrangement with shock and vibration characteristics that are ideal for aero-space applications.

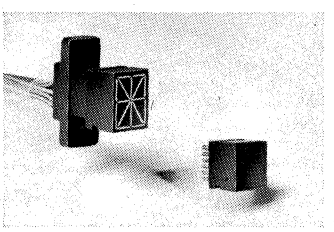
FEATURES

- Alpha-numeric (letters, digits, symbols)
- Miniature (world's smallest alpha-numeric)
- Long Life — in excess of 50,000 hours
- Wide Viewing Angle — light bars (incandescent filament) are all on same plane, thus providing wide viewing angle
- Modular — can be matched with Midgi-Lites of same height
- Contrast ratio excellent
- Brightness — variable, with high degree of readability even in sunshine
- Modular plug-in arrangement allows for mixed use with modular Midgi-Lites and plug-in Pinlites.

SPECIFICATIONS

	MODEL 43	MODEL 64
• Voltage	3.0	4.0
• Milliamps/seg.	8	16
• Character height	¼"	5/16"
• Overall dimensions		
height (a)	.375	.465
width (b)	.335	.375
depth (c)	.312	.312

Available from stock — new M series prices, from $64.00 (1-9 quantity).



The plug-in Model 64 Alpha-Lite shows all 16 segments lighted. Power is transmitted through the microminiature Alpha-Lite connector. The Model 43 Alpha-Lite with plug-in termination is shown at right.

MIDGI-CODER-LITE . . . 7 Segment Display with Integral Decoding

PINLITES INC., offers a major advancement in size reduction of digital readout systems. The basic MIDGI-LITE "M" Series is a seven segment, direct viewing incandescent tungsten filament (light bar) display. The use of tungsten filaments allows voltage control for brightness level. The light bars have a design life of 100,000 hours per segment, or 11 years of continuous data display.

For decoding 8-4-2-1 BCD to seven segment presentation, a separate encoder package is normally required. With the introduction of the MIDGI-CODER-LITE, Model M6-1C, PINLITES INC. has eliminated the separate decoder package. All translation from 8-4-2-1 BCD code to seven segment display can now be done within the readout head; with a total combined depth of only 3/16".

UNIQUE DESIGN FEATURES:

1. The World's smallest decoder/display system.
2. Lowest power requirements: Combined decoder/display requires less than ½ watt.
3. Display head is a ceramic, metal, glass hermetic package designed for severe shock and vibration environments.
4. 250 Ft. Lambert brightness per segment.
5. 100,000 hour design ilfe on filaments.
6. Six of the Coder-Lites can be stacked in less than one square inch; digital character height is 3/16".
7. Military specification performance: MIL-E-5400 Class II.

Write or call Bruce A. Bundy, Sales Manager, for full details regarding input logic, function, coding, truth tables.

Price $51.00 in fifty quantities.

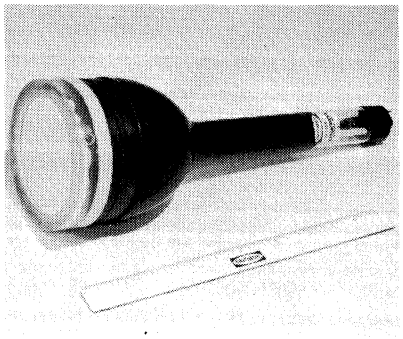
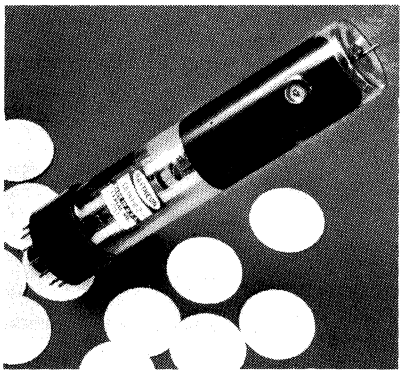
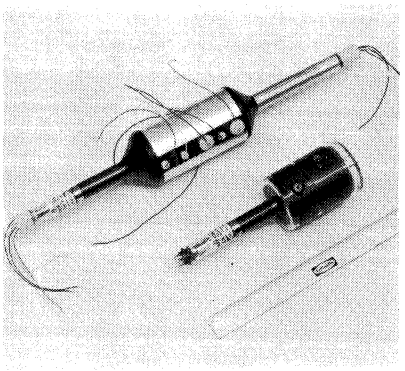
Data Display Devices from Raytheon



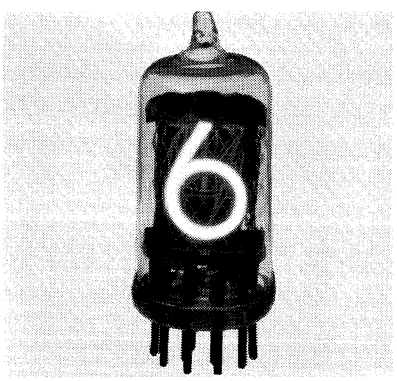
New Projectoray* CRT brings large-size displays with up to 1,000 line resolution, whether they're systems with TV type formats or any type of CRT display from radar to oscilloscope to alphanumerics. Projectoray offers high brightness, long life — lasting hundreds of hours — at 15 foot-lambert light on a 3′ x 4′ screen of unity gain. Projectoray uses a clear face-plate material that rapidly conducts heat **away** from the phosphor and an efficient heat exchanger. Refractive optical lens design allows variable throw distance for large or small theaters. **Write for Projectoray data sheets.**



Symbolray* Monoscope can generate almost any presentation you can think of — from ASCII to custom data displays and even hieroglyphics. We can meet your requirements with only an inexpensive change in target font design. A more economical method of generating displays than using circuit cards, Symbolray monoscopes cost less than $100 in quantities of 1,000. Only 2″ x 12″, Symbolray uses electrostatic deflection and focus. Full messages can be displayed when Symbolray method is used with buffer memory techniques. Monoscope is currently available with 64 and 96 character matrices. **Write for Bulletin SP-1178.**



Recording Storage Tubes. These two new designs utilize miniaturized guns and necks to provide high deflection and focus sensitivity, resulting in savings in coil and power supply weight and size. They provide Kiloline resolution, long storage, and fast erase capability. Raytheon's line of electrical-output storage tubes feature high resolution and nondestructive reading. Information can be written and stored by sequential techniques or by random-access writing. Complete, gradual, or selective erasure is possible. High output tubes using electron multiplier and completely packaged (magnetics and shielding cemented to tube) designs are available. **Write for Bulletin SP-1079B.**

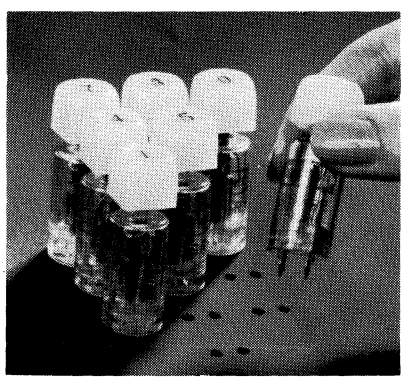


Datavue* Indicator Tubes — made in the U. S. A. — at lowest prices. For example: our CK 8754 costs less than $3.95 in 1,000 lot quantities.

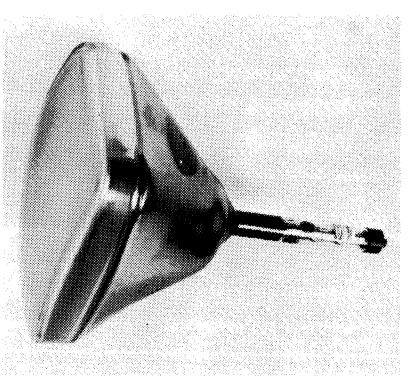
Raytheon offers a complete line of side- and end-view indicator tubes in a wide range of alphanumerics, decimals, and special characters. Turn-around service on all custom designs is fast and reliable.

All Datavue Indicator Tubes are EIA rated, produced for 200,000 hours of operation, highly dependable tubes with high brightness, in-line characters. **Write for Bulletin SP-1114.**

* Trademark of Raytheon Company



New Keyboard Switches — an original Raytheon design — are low cost yet extremely reliable. Just a feather-light (2½-oz.) touch activates the switch, which is designed for switching at logic levels. Life expectancy of the dry reed type is more than 10 million cycles. Bounce is less than 500 microseconds. Switches cost less than $1.00 in production quantities. **Write for data sheets.**



Dataray* Cathode Ray Tubes. Raytheon makes a wide range of CRTs — including special types — in screen sizes from 7″ to 24″. Electrostatic, magnetic, and combination deflection types are available for writing alphanumeric characters while raster scanning. All standard phosphors are available and specific design requirements can be met. **Write, describing your application, for data and assistance.**

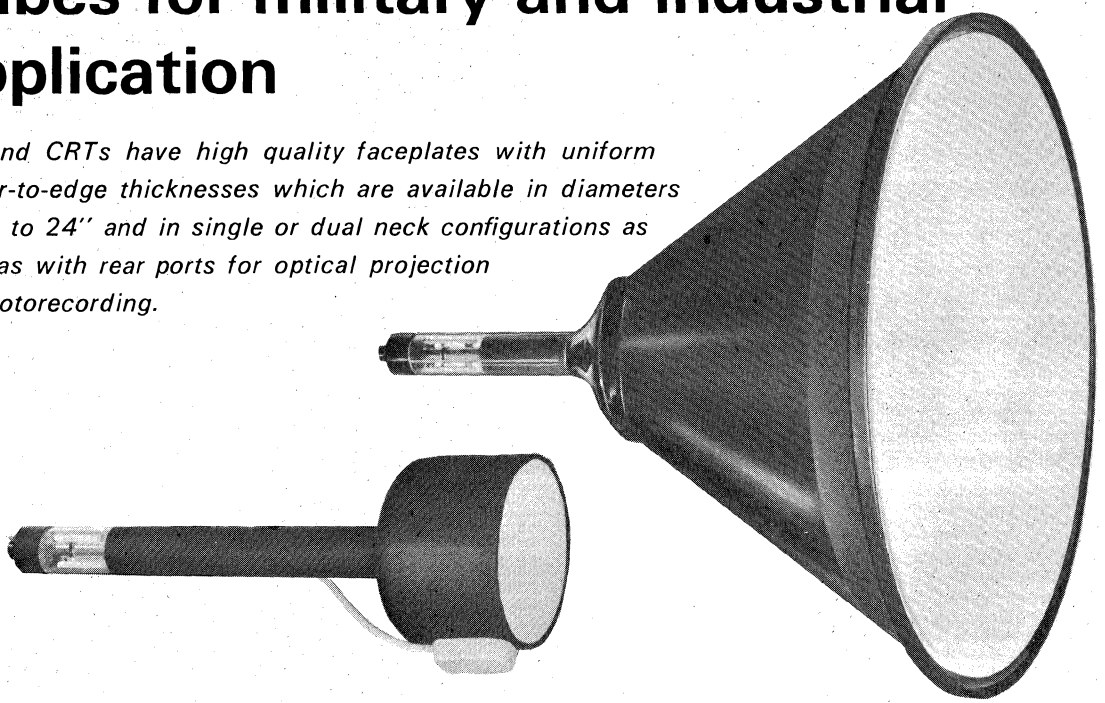
For data sheets, application notes, price information, call your Raytheon regional sales office. Or write: Raytheon Company, Industrial Components Operation, 465 Centre Street, Quincy, Massachusetts 02169.

RAYTHEON

Industrial Components Operation — A reliable source for Circuit Modules / Control Knobs / Display Devices / Filters / Hybrid Thick-Film Circuits / Industrial Tubes / Optoelectronic Devices / Panel Hardware

Rauland Precision Cathode Ray Tubes for military and industrial application

Rauland CRTs have high quality faceplates with uniform center-to-edge thicknesses which are available in diameters of 1" to 24" and in single or dual neck configurations as well as with rear ports for optical projection or photorecording.



REPRESENTATIVE RAULAND CRTs

Applications include: Precision computer display for combined presentation of analog and alphanumeric information . . . light pen interactive displays . . . high definition monitors . . . bright avionic displays . . . flying spot scanner . . . photorecording . . . enroute air traffic control.

Other features include: deflection angles from 42° to 70° (other angles available on request) . . . electrostatic or magnetic character generation design variations . . . resolution up to 2500 TV lines . . . available in a wide variety of special phosphors . . . optional laminated safety panels for all designs . . . R.F.I. shielding, anti-reflective and other special coatings . . . ruggedized, low weight construction allows easy mounting.

Tube Description	Deflection Angle	Faceplate Diameter (Inches)	Overall Length (Inches)	Resolution (TV Lines)
7" Rear Projection R-6331	52°	7.000	13.635	545

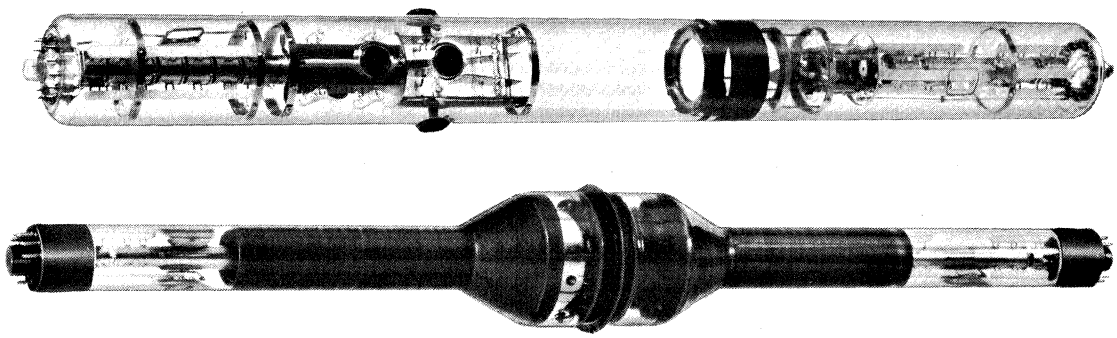
Rauland Scan Converter Storage Tubes



Offering a variety of designs for industrial, scientific and military applications, Rauland Scan Converter Storage Tubes feature electron bombardment induced conductivity (EBIC) targets as well as both electrostatic and magnetic focusing/deflection. Resolutions to 1600 TV lines and frequency responses of some designs are in the nanosecond region.

Special features include:

Rauland R-6317 has storage time variable from seconds to minutes and is less than 17" long . . . Tube R-6297 is 13" long . . . Both R-6288 and R-6294A are ideal for demanding operational environments.

REPRESENTATIVE RAULAND SCAN CONVERTER STORAGE TUBES

Tube Description	Deflection	Application
R-6288	Write beam: distributed electrostatic element Read beam: electrostatic	Ultra fast single transient phenomena such as found in high speed chemistry and nuclear physics.
R-6294A	Write beam: electrostatic Read beam: electrostatic	Special applications requiring medium frequency range response.
R-6297	Write beam: magnetic Read beam: magnetic	Air borne and other space-limited environments.
R-6317	Write beam: magnetic Read beam: magnetic	Special purpose. High resolution.

Rauland Image Intensifier Tubes

Rauland Image Intensifier Tubes are available with visible and near infrared spectral response. Other models are used for X-ray imaging in industrial and medical applications. Neutron and gamma-ray sensitive designs are also available.

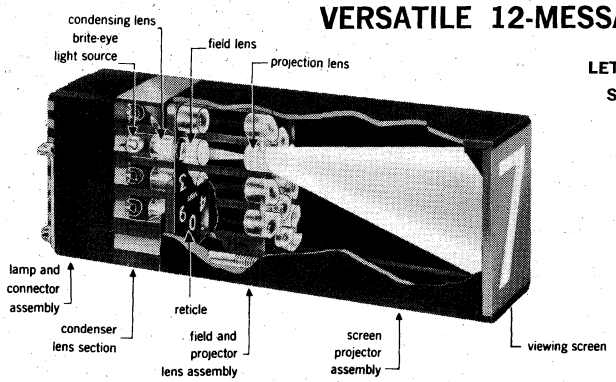
shelly REAR PROJECTION READOUTS...



VERSATILE 12-MESSAGE READOUTS CONFORMING TO MIL-R-39027

(READOUTS: INCANDESCENT)

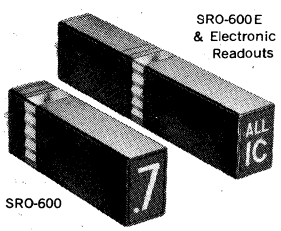
LETTERS, NUMERALS, SYMBOLS OR SIX-LINE MESSAGES TO IMAGE SIZE OF 0.700" HIGH. REMOVABLE FROM PANEL FRONT WITHOUT TOOLS.

Shelly projection-type readouts are precision, completely modular devices consisting of 12 parallel, miniature optical projectors which display 12 different filmed messages on a single-plane viewing screen. Any combination of characters or words can be projected from custom designed photographic film reticles. To create compound messages, up to six lamps may be energized simultaneously. Modular construction permits rapid "in field" change of lamps, color filters or film message reticles. To solve high density packaging problems, Shelly Readouts can include built-in solid-state lamp drivers, binary to visual decoders, or binary to visual decoders with memory. The simplicity of the Shelly Readout assures high reliability in environmental extremes. They meet all applicable requirements of MIL-R-39027.

EASY LAMP REPLACEMENT WITHOUT TOOLS!

MIX OR MATCH COMMON FEATURES

Front removable, plug-in modules * Electronic versions all Integrated Circuit (IC) * Image height 0.700" * 12 numeral, word or symbol messages * Lamp or reticle changes without tools * Intermix message colors * Vertical, horizontal or matrix mounting * Natural or blue Polacoat screens

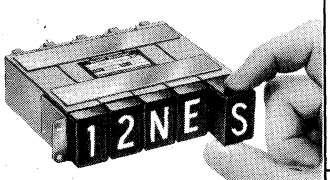


SRO-600E & Electronic Readouts

SRO-600

DECIMAL INPUT TO VISUAL DISPLAY — MODELS SRO-600 & SRO-600E

Advanced viewing screen and projector system design affords greater viewing area than conventional readouts . . . 10% larger images and 30% smaller housing. Both standard length SRO-600 and extra length SRO-600E, for use with electronic readouts, accept decimal input and provide 12 different visual displays . . . letters, numerals, symbols, characters or up to six line messages with excellent contrast. Standard based or unbased lamps are available from most sources, minimizing special stocking or procuring of lamps . . . available from 3 to 28 volts. RFI and weather-proof bezels, as well as finishing types, available from stock. Printed circuit connector mates with connector in housing for greater shock and vibration resistance than conventional types. Optional type available with "solder-on" terminals. Terminal arrangements: 24 common terminals or 12 lamp terminals and common or split common. Stainless steel individual housings are welded together providing wide mounting versatility and excellent rigidity. Aluminum housings available for applications where light weight is essential. Special tabs fabricated to customer requirements, as are spacing groups for clarification for message meanings. Lamp and film reticle replacement is easily accomplished without tools. Individual message colors available.

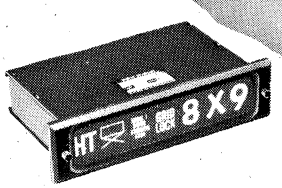


BINARY INPUT TO VISUAL DECIMAL DISPLAY — ALL IC — SERIES BDR-100 & BDR-100HV

Converts 8-4-2-1 binary input signals to visual decimal displays. All IC hex-inverter flat paks enable packaging entire module assembly into plug-in 1.12"H x 0.745"W x 5.17" long . . . only 1.67" longer than standard SRO-600 readout! Front panel removal feature offers fast, easy access to electronic circuitry, as well as lamps and reticles. Configurations accept and decode any one of the following: 10 binary signals to visual decimal display; 10 binary signals to visual decimal display, plus two additional direct wired displays; 12 binary signals to visual decimal display. Logic levels 0 to 0.8 volts "0" and greater than +2 volts for "1." BDR-100 uses 6-volt based type T-1 lamps; BDR-100HV accepts 10, 12, 18 or 28 volt T-1 based lamps. High performance and high reliability assured through all IC circuitry which incorporates all necessary drivers, gates and complementary function generators to decode 8-4-2-1 codes to visual decimal display. T^2L input logic compatible with DTL logic. Tolerance to wide temperature range . . . free air operation 0°C to +70°C; storage range −55°C to +85°C. Fully enclosed modular readouts provide excellent protection for lamps and electronic circuitry. Fast and easy access to module simplifies field inspection or lamp maintenance . . . without tools. Individual or multiple message colors.

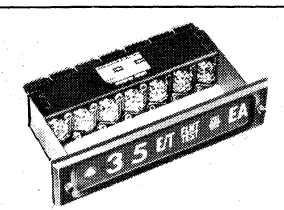
BINARY INPUT TO VISUAL DECIMAL DISPLAY WITH MEMORY — ALL IC — SERIES MBR-100 & MBR-100HV

Binary input to decimal display with memory for readout of binary input data normally too fast for high accuracy. Unit employs SRO-600 type precision 12 message readout projection system and lamp assembly module . . . also retains fast front removal feature. The all IC binary to decimal converter and compatible memory, contain all the drivers, gates and complementary function generators required to decode and store 10-digit or 12-digit binary input information. Unit accepts four line parallel binary coded decimal information and displays decimal messages upon application of an external +3 volt enable pulse of 2 μsec or more; this is due to DC coupling which responds to the whole pulse rather than the leading or trailing edge. Display will be held indefinitely, or until another enable pulse is applied. Display versatility increased through application of a constant 3 volt signal level which causes the readout to follow the input, similar to the BDR-100. Designed for use with 6 volt positive logic source, the "0" logic level requires 0 to +0.8 volts; "1" logic level greater than +2 volts. Floating commons permit using the decoder with negative logic. Configurations accept and decode any one of the following: 10 binary signals; 10 binary signals plus two additional direct wired displays; 12 binary signals



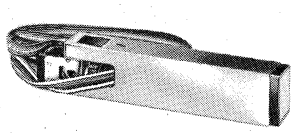
DRIVER AUGMENTED READOUT — SERIES DAR-100

Decimal inputs as low as 0.3 mA will produce crisp images up to 0.700" high with excellent contrast, when driven by 12 silicon planar epitaxial transistor lamp drivers. The readout is comprised of a precision 12 message readout of the SRO-600 type, plus individual lamp drivers for each optical system projector lamp. The DAR-100 is available in both standard 1.12"H x 0.745"W x 3.5" long modules, as well as the 5.17" long model, compatible with the electronic readouts contained in this "Mix or Match" group. The readout will project numerals, symbols or up to six line words . . . singly or in combination since each lamp is individually controlled. The entire display may be colored, or individual messages may be colored through use of color chips in the projection system. Lamps of the miniature long-life T-1- type are used, with ratings of 5 to 28 volts . . . based or unbased for simplified stocking or procuring. The readout incorporates a highly shock and vibration resistant printed circuit connector which is keyed for easy front panel installation or removal, as are the other plug-in modules in this grouping. Other similarities include high impact resistant housing and a choice of blue or white Polacoat screens . . . blue raises the white color display temperature approximately 800°K.



ECONOMY DECIMAL INPUT TO VISUAL DISPLAY — MODEL SRO-300

Economy rear projection readouts display images up to 0.700" high. Up to 12 readouts may be arranged in a single assembly employing a common viewing screen. This technique offers substantial cost savings over more costly individual modular housings and plug-in terminal/connector blocks. Readouts display 12 numerals, words or symbols . . . singly or in combination . . . black and white or in color. From one to twelve modules and common viewing screen are supplied completely assembled and ready for installation and operation. The common mounting bracket requires only four screws to secure the entire assembly into position, thus simplifying and speeding installation. Fast direct wiring to equipment harness is accomplished with well separated, plainly marked and pre-tinned integral terminals mounted on the rear of each module. Removal of two screws permits access to readout for quick lamp maintenance, as well as field inspection, changing of message reticles or film chips in each projector system. Long-life T-1 type miniature lamps, either standard based or unbased are used, thus minimizing special stocking or procuring of lamps; lamp voltages from 3 to 28 volts may be used in the SRO-300. A special bracket permits focusing two readouts on a single image area, for 24 message capability.



12 MESSAGE REAR PROJECTION READOUT/SWITCH — MODEL ROS-500

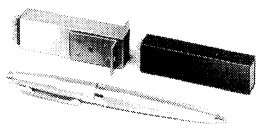
This decimal input to visual display readout/switch consists of 12 parallel miniature optical projectors, similar to the SRO-600. Up to six optical systems can be energized simultaneously to produce complex messages. Any message that can be put on film can be projected to an image height of 0.700" . . . black and white or in color . . . singly or in combination. This unit combines the advantages of the rear projection readout with a pushbutton switch assembly. Units can be fitted with 2DPT or 4PDT momentary or alternate action switch assemblies for full pushbutton switch operation. The switch assembly is actuated by pressing the face of the readout. Switches are available with silver or gold contacts, with resistive ratings of 125 or 250 vac at 5 amps. and 30 vdc at 1 amp. respectively. Total weight is less than 5 ounces, with measurements of 1"W x 1.25"H x 5.25" long, completely assembled. Modular design of this unit permits grouping in intimate contact in any horizontal or vertical arrangement, as well as matrix configurations comprised of any number of units. Housings are welded together for maximum strength. Mounting brackets may be provided at any position desired. The versatile readout/switch module uses long-life, miniature T-1 lamps, in either based or unbased types, offering simplified stocking.

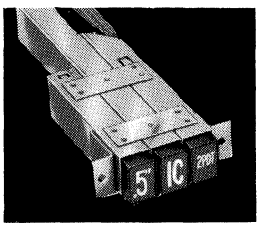
SHELLY ASSOCIATES, INC., 111 Eucalyptus Drive, El Segundo, California 90246 (213) 322-2374 — TWX 910-348-6683

shelly REAR PROJECTION READOUTS/INDICATOR LIGHTS

MIX OR MATCH COMMON FEATURES

Front removable, plug-in modules * Electronic versions all Integrated Circuit (IC) * Image height 0.450" * Natural or blue Polacoat screens * Field maintenance without tools * Message or background colors * Vertical, horizontal or matrix mounting.





ULTRA-MINIATURE DECIMAL INPUT TO 12 MESSAGE VISUAL DISPLAY — MODEL SRO-90

The smallest and most versatile 12 message rear projection readout ever developed. It displays intricate messages and diagrams no other rear projection miniature readout can produce . . . a design dictated by quality, rather than cost. The precision optical system will project anything that can be put on film . . . image size up to 0.450"H . . . 12 numeral, symbol or up to four line messages with excellent focus and corner-to-corner contrast . . . 20% more image area in 20% less space than any other readout available. Smaller than a roll of pennies, this readout offers all the features available in the larger readouts in a 0.650"H x 0.460"W x 2.68" long plug-in module . . . the smallest size possible, compatible with standard T-1/MS 24367; standard lamps minimize problems normally associated with stocking or procuring of special lamps. Field maintenance may be performed from the front panel, without tools. Lamp voltages from 3 to 28 volts. Individual or common grounding for greater message control or complex signalling. Total weight, including housing, only 1½ ounce. Options are drip-proof, RFI and conventional bezels. Modular construction permits mounting vertically, horizontally, or in matrix configurations; housings are welded together for maximum strength. Gold pin terminals mate with terminal blocks held captive in each housing. Message or background colors available. Extra length version compatible with electronic readouts.

ULTRA-MINIATURE BINARY INPUT TO 12 MESSAGE VISUAL DISPLAY — ALL IC — MODEL BDR-90

This plug-in module employs IC's, containing all drivers, gates and complementary function generators required to convert 8-4-2-1 codes, from 10-digit binary inputs, to visual decimal displays. The 12 message readout provides two supplemental wired positions, which may be turned on as needed for simultaneous display of background colors, + or −, left or right decimal, or other symbol, word or numeral messages . . . anything that can be put on film. Combined with the smallest precision optical system ever developed, this front removable module provides images up to 0.450" high. As the smallest completely self-contained readout and binary converter, the BDR-90 opens a new era in high density packaging. Over-all size is 0.450"W x 0.650"H x 5.500" long, from the front of the module to the end of the housing terminals. Modular design permits vertical, horizontal or matrix mounting, with either vertical or horizontal messages. Flat pak IC's use T²L input logic, which is compatible with DTL logic. Logic "0" input, 0 to +0.5 volts; logic "1" input, greater than +2 volts. High reliability, high performance IC's permit operation over a wide temperature range . . . 0°C to +70°C; storage range −55°C to +85°C. Long-life, standard T-1 lamps (MS 24367) are used for simplified stocking and procurement. Fully enclosed housing assures protection for electronic circuitry and projector systems.

12 MESSAGE REAR PROJECTION READOUT/SWITCH — MODEL ROS-90

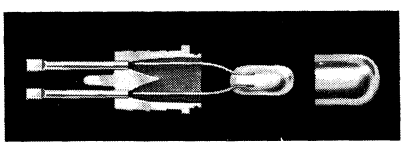
The ROS-90 combines the advantages of a standard SRO-90 rear projection readout with a switch. The standard 12 message readout is simply plugged into movable 2PDT switches for momentary or alternate operation. The switches are operated by pressing the screen of the readout. The switch can be programmed with related equipment for 1 to 12 count readout or to perform similar functions. The complete assembly is packaged in a stainless steel housing that is equipped with a wide variety of mounting tabs for quick and easy mounting. Switch assemblies may be mounted vertically, horizontally or in matrix configurations. The complete assembly measures 0.510"W x 0.710"H x 3.750" long, with total weight of less than 2 ounces each. ROS-90 assemblies are supplied with a 12 inch harness for easy wiring.

MICROMINIATURE INDICATOR LAMPS — Conform to MS 90308

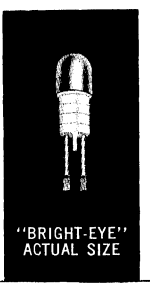
MIX OR MATCH COMMON FEATURES

Produce light intensity greater than lamps five times their size * Relampable from front panel without tools * Mount on 0.225" centers * Guide housing makes lamp replacement easy * Housings lock into position with snap-in action * Wide range of lamps and voltages.

NEW HOUSING GUIDES LAMP LEADS TO CONTACTS



Funnel-shaped passages guide lamp leads to electrical contacts . . . speeds installation . . . no chance for misalignment or bent leads!



"BRIGHT-EYE" ACTUAL SIZE

OPTIONAL CAP STYLES

Specify ball, lens or square caps from 30 combinations of color and type . . . or Digi-caps, square caps in 10 color/type combinations embossed to order with high contrast letters, numerals or symbols. Ideal for decimal or binary count.

Standard "Bright-Eye"

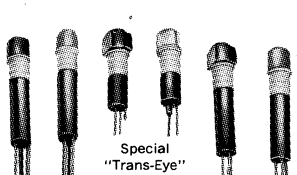
"Bright-Eye" with High Temperature, Epoxy Heat Barrier

"BRIGHT-EYE" MICROMINIATURE INDICATOR LAMPS — Panel Mount

Smallest front relampable indicator light available.

The panel mounted "Bright-Eye" P series is specifically designed for installations that require excellent visual indications, combined with high density packaging, to monitor important operating functions. Lightweight, of less than ½ gram each, including lamp, makes the "Bright-Eye" ideal in applications where weight is a critical factor. The unique lamp and housing combination offers many advantages not available in any other microminiature indicator light . . . funnel-shaped passage guides permit use of axial lead lamps . . . axial lamps provide highest illumination intensity available in this class lamp . . . replacement lamps slip in or out without tools . . . small diameter housing body permits mounting indicators on 0.225" centers . . . indicator housings snap into position and lock without additional hardware . . . lens caps snap off or on for easy access to lamps from the front panel . . . indicators available with a choice of 14 lamp ratings from 1.5 to 28 volts and life expectancies from 10,000 to 60,000 hours. Easy access solder terminals are provided on the rear of each housing for simplified and fast installations. Terminals are gold plated for corrosion resistance and sure flow of solder. Special "Bright-Eye" configurations are now available with high temperature, epoxy heat barrier which prevents transmission of soldering iron or solder gun heat into the body of the housing, thereby making the housing virtually impervious to damage that could occur from heat.

Standard "Trans-Eye"



Special "Trans-Eye" "Configurations

"TRANS-EYE" MICROMINIATURE TRANSISTORIZED INDICATOR LAMPS

High intensity indications from signal levels too low to illuminate conventional indicators.

The "Trans-Eye" indicator is designed for compatible "Mix or Match," with panel mounted "Bright-Eye" indicators . . . units are physically identical, except the "Trans-Eye" is ⅛ to ¼" longer. Electrically, the "Trans-Eye" incorporates a transistor in the housing which will "turn-on" the indicator when a signal as low as 0.3 mA is applied. This capability is ideal for bright front panel indications when extremely low signal levels are being used. Long operating life and dependable indications are assured through the use of silicon NPN or PNP planar transistors . . . the "Trans-Eye" also has a high temperature characteristic which makes the unit reliable in a wide range of environmental applications. Configurations are also available incorporating a built-in resistor. Lamps are available in ratings from 5 to 28 volts with life expectancies from 10,000 to 60,000 hours.

SPECIALIZED "TRANS-EYE" CONFIGURATIONS

Specialized physical and electrical configurations have been developed to meet a wide range of customer specifications. Shelly's staff will be happy to consult or quote on "Trans-Eye" indicators for any specialized application. Consult the factory or your nearest field engineering representative.

"Brite-Eye"

"BRIGHT-EYE" MICROMINIATURE INDICATOR LAMPS — Circuit Board Mount

The "Bright-Eye" C series is designed for use with printed circuit boards, where it is important that the state or condition of the board, or operation, be monitored rapidly. The high intensity illumination and microminiature size of the C series make it an ideal indicator for use in multiple rows, or bays of cards, as well as any other application where space is limited beyond the mounting surface. The C series "Bright-Eye" incorporates standard "Bright-Eye" features . . . it may also use any of the optional cap styles.

"GLO-EYE" MICROMINIATURE NEON INDICATORS

The Glo-Eye microminiature neon indicator series provides bright indications in the presence of 115VAC power. The indicator consists of an "easy-lamp" housing, a wire terminal neon lamp type USASI A1K, and a snap-on cap in 12 type/style/colors. The housing also contains an integral resistor for varying life expectancies. The Glo-Eye housing fits a 0.191" hole for compatibility with the Brite-Eye and Trans-Eye. Over-all flange dimension of 0.225" permits mounting the units on 0.225" centers for high density packaging applications.

SHELLY ASSOCIATES, INC., 111 Eucalyptus Drive, El Segundo, California 90246 (213) 322-2374 — TWX 910-348-6683

AMPLIFIERS AVAILABLE FOR BENRUS CRT DISPLAYS

5" high frequency displays:
"A" channel:
5 to 25 MHz frequency response, sensitivity 50 to 1.2 mv/div.
"B" channel:
frequency response 5 to 15 MHz, sensitivity 125 to 1.7 mv/div.

3" high frequency displays:
"A" channel:
frequency response 5 to 20 MHz, sensitivity 75 to 2.5 mv/div.
"B" channel:
frequency response 5 to 20 MHz, sensitivity 90 to 3.0 mv/div.

5" low frequency displays:
"A" channel:
frequency response .25 to 5 MHz, sensitivity 40 to 1 mv/div.
"B" channel:
frequency response .25 to 5 MHz, sensitivity 140 to 1.8 mv/div.

3" low frequency displays:
"A" channel:
frequency response .25 to 5 MHz, sensitivity 120 to 1.5 mv/div.
"B" channel:
frequency response .25 to 5 MHz, sensitivity 140 to 2 mv/div.

Request Catalog #802 for complete data.

SWEEPS AVAILABLE FOR BENRUS CRT DISPLAYS

Either channel may be swept, in which case sweep circuitry is ordered in place of an amplifier for that channel. Sweeps can be provided in the following speed ranges:

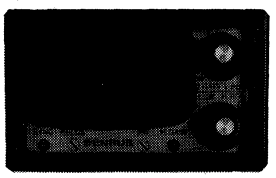
NORMAL RANGE speed/div	EXPANDED RANGE speed/div
50 ns - 250 ns	10 ns - 250 ns
100 ns - 500 ns	20 ns - 500 ns
200 ns - 1 μs	40 ns - 1 μs
500 ns - 2.5 μs	100 ns - 2.5 μs
1 μs - 5 μs	200 ns - 5 μs
2 μs - 10 μs	400 ns - 10 μs
5 μs - 25 μs	1 μs - 25 μs
10 μs - 50 μs	2 μs - 50 μs
20 μs - 100 μs	4 μs - 100 μs
50 μs - 250 μs	10 μs - 250 μs
100 μs - 500 μs	20 μs - 500 μs
200 μs - 1 ms	40 μs - 1 ms
500 μs - 2.5 ms	100 μs - 2.5 ms
1 ms - 5 ms	200 μs - 5 ms
2 ms - 10 ms	400 μs - 10 ms
5 ms - 25 ms	1 ms - 25 ms
10 ms - 50 ms	2 ms - 50 ms
20 ms - 100 ms	4 ms - 100 ms
50 ms - 250 ms	10 ms - 250 ms
100 ms - 500 ms	20 ms - 500 ms

Request Catalog #802 for complete data.

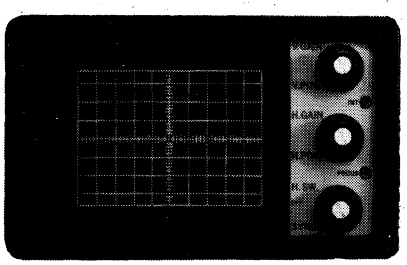
BENRUS SOLID STATE, PANEL MOUNTING

MONITOR OSCILLOSCOPES

DC to 500 KHz



3" Type RA840B



5" Type RA850

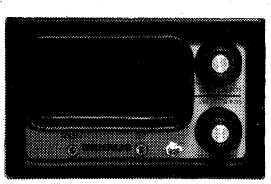
These instruments are ideal for applications where economical, stable, dependable monitors are needed. They are compact, light in weight, low in heat dissipation, require only AC line power. Units with on-off blanking and grey scale modulation are available. Up to three 3" models can be mounted on a standard 3½" panel; two 5" models on a standard 5¼" panel. **Conform with MIL SPEC environmental requirements.**

While designed primarily for panel mounting, the units are fully cased and may be safely operated on the bench.

Plug-in Flexibility — A full line of plug-in vertical and horizontal amplifiers, trigger and sweep circuits are available, and may be used interchangeably on either the Type RA840B or the Type RA850 scopes. The range includes X and Y amplifier channels from DC to 500 KHz with 10 mv/cm to 2 v/cm sensitivity, free-running sweep circuits with sweep frequency rates from 0.2 Hz to 10 KHz, and triggered sweeps with speeds from 1 sec/cm to 10 μsec/cm.

BENRUS SOLID STATE, LOW COST, COMPACT

X-Y INDICATOR



3" Type RA840C

- **Bandwidth: DC to 200 KHz (3 db).**
- **Sensitivity: 1 v/cm to 10 v/cm.**
- **Rise time: 1.5 μs.**
- **DC coupled blanking provided.**
- **Compact — behind panel depth less than 10½".**
- **Identical X and Y amplifier characteristics.**
- **Complete — ready to operate.**

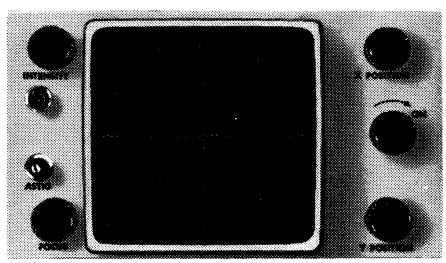
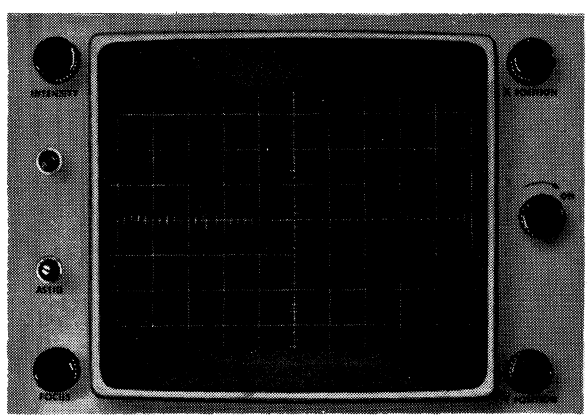
Better Readout for your System Design with Benrus

Bandwidths to 25 MHz
Sensitivities to 1 mv/div
Meet MIL SPEC Environmental Requirements

CRT DISPLAYS





1. You select panel height.

Units mount on standard 3½", 5¼", 7" rack panels.

2. You select amplifier characteristics.

Many bandwidths and sensitivities are available, for either or both channels, as noted on next page.

3. You select sweep, if desired.

Either "A" or "B" channel may be swept; choice of 40 speed ranges, as noted on next page.

To the combination of your choice you may now add, if desired, any of many optional features. The result is a standard, off-the-line instrument, custom-assembled to meet your exact requirements.

For optimum panel-mounting efficiency, the units have been designed to exact modular dimensions. Thus, 1 to 3 of the 3½" units mount horizontally in a 3½" rack; up to 5 of the same units may be mounted vertically in a 5¼" rack. Similarly, 2 of the 5¼" units mount horizontally in a 5¼" rack; 3 may be mounted vertically in a 7" rack. Hardware is available for fast and rigid assembly of any combination of units for custom rack mounting without hole cutting or drilling.

The CRT Displays have integral power supplies and are fully self contained. Complete description, specifications, and ordering information are given in Catalog #802. Ask your rep for a copy, or write direct.

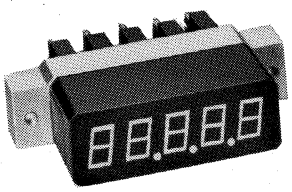
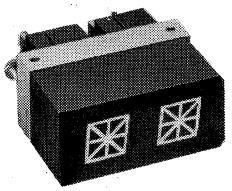
TUNG-SOL DIGITAL AND ALPHANUMERIC READOUTS

INCANDESCENT TYPES



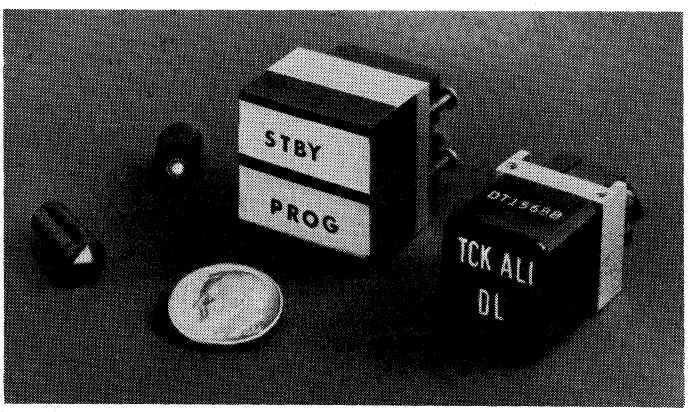
7 SEGMENTS—Display 0 through 9, plus 13 letters. Character size: .32" high, .19" wide, .05" slope. Spacing: Integrated—.3125" c. to c. Stacked—.500 c. to c.



16 SEGMENTS — Full alphanumeric display. Character size: .32" high, .33" wide, .05" slope. Spacing: Integrated—.625" c. to c. Stacked—.807" c. to c.

STACKED—Digits as well as lamp blocks are individually replaceable, for each digit. 70 ma and 20 ma lamp blocks are interchangeable.

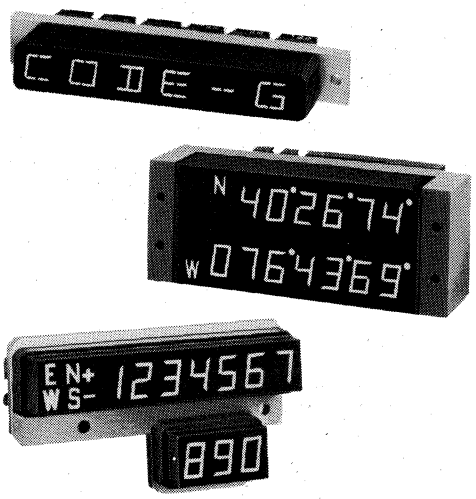
INTEGRATED—Monolithic construction requires less width per character. Permits precise alignment of digits in line and in plane. Individual lamp blocks are replaceable.



STATUS INDICATORS—Fixed messages, or symbols, to customers specifications. Supplied in types readable when off or completely blank. All have the clarity and high visibility characteristic of all Tung-Sol readouts.

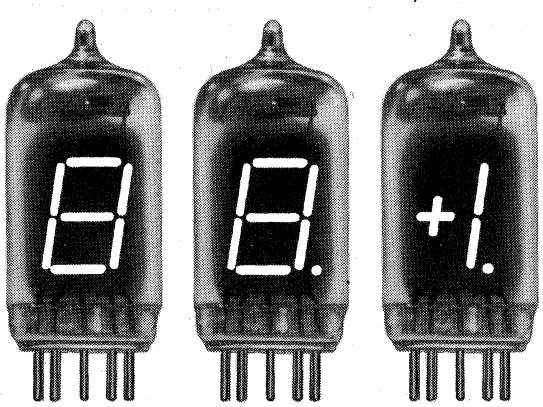
Tung-Sol incandescent readouts and status indicators provide optimum contrast under high ambient light conditions. Filtering attenuates the reflection from unlighted segments to assure maximum definition of the display. Light shades are not needed. Tung-Sol readouts are designed to function in extreme environmental conditions. They are available with seven segment characters or with sixteen segments which provide full alphanumeric display. Made in both stacked and integrated styles. Special fixed characters can be supplied. The 20 ma and 70 ma lamp banks are mechanically interchangeable.

TYPICAL CONFIGURATIONS



VACUUM TYPES

DIGIVAC S/G VACUUM FLUORESCENT READOUTS



DT1704A DT1705C DT1707A

This is a new concept in seven-bar segmented vacuum readouts designed for low signal level applications. Even the most advanced systems can employ this side-display readout without compromising performance or reliability. In less sophisticated equipment, it can improve the readout function while remaining cost-competitive.

1. Low cost
2. Single plane display
3. 150° viewing angle
4. Low cost socket
5. High brightness
6. Low power
7. Low voltage
8. Simplicity of design
9. I.C. compatibility
10. Optional decimal
11. Optional ± 1 decimal
12. 10 numerals; 13 letters
13. Variety of colors with appropriate filtering

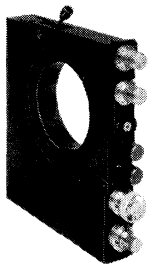
YOKE SPECIALISTS

COMPLETE LINE for every Military and Industrial Purpose in PRODUCTION QUANTITIES or CUSTOM DESIGNED to your specific requirements

- Yokes for ALL types of ⅞", 1", 1⅛", 1½", and 2⅛" neck dia. CRT's—only representative types are shown.
- Special designs for all types of computer and high speed character displays.
- Wide variety of coil impedances in both push-pull and single-ended configurations.
- Most experienced yoke engineers in the industry, plus complete production and testing capability.



MODEL D4499

MICROMETER–CONTROLLED PRECISION COIL ALIGNER

For fast, convenient alignment of yokes and focus coils in (1) ultra precision displays and flying spot scanners, and (2) laboratory research and prototype evaluation. **Exclusive** independent micrometer adjustment of pitch, yaw, horizontal and vertical translation . . . with firm precision locking. **Exclusive** true precision control and exact repeatability, plus rugged construction. For full details request catalog page.

TYPE F20

PRECISION ELECTRO-MAGNETIC FOCUS COILS for ⅞", 1½", 2⅛" and other neck dia. CRT's.

All designed for ultimate focus. Negligible effect on spot size when properly aligned to beam. Static types (all sizes)—low power or high power. Dynamic-static combinations (1½" neck dia.) . . . compact single gap design . . . or double gap design to simplify circuitry by eliminating coupling between static and dynamic coils. Wide range of coil resistances available. For full technical details, request catalog pages. Please specify your CRT and beam accelerating voltage.

TYPE P7

TYPE P8

ANTI-PINCUSHION DEVICES, both PM and EM types

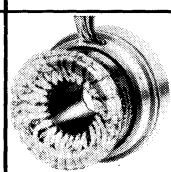
Eliminates CRT geometrical picture distortion. Type P7 permanent magnet anti-pincushion assembly requires no current . . . occupies small space . . . easily adjustable . . . mounts directly on standard yokes . . . available in wide choice of magnet strengths with tight tolerances. Type P8 electromagnetic coil anti-pincushion assembly has very high precision construction . . . allows convenient front panel adjustment. For full technical details request catalog page.

TYPE C4942

Request catalog page

SHIELDED DYNAMIC FOCUS COIL

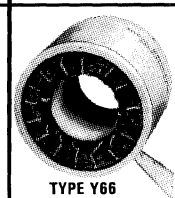
For sharp focus applications up to 25kv accelerating potential, such as scan converter storage tubes and flat faced high resolution CRT's. Static and dynamic coils combined into a single gap to ease alignment and position. Gap in forward position for superior focus and best image-to-object ratio.



TYPES Y58-Y60-Y62-Y64 for 42°, 52°, 70°, & 90° Deflection Angles

PRECISION STATOR YOKES for 1½" neck dia. CRT's.

High efficiency and accuracy achieved by stator type core which also provides exceptionally low astigmatism and residual magnetism. Push-pull or single-ended coils for time shared sweep displays, character displays and others. Request catalog sheet for full details.



TYPE Y66 Up to 60° Deflection Angle

LARGE I.D. YOKES for 2⅛" neck dia. CRT's.

Single-ended and push-pull designs especially for charactron CRT's to give minimum twisting or distortion of characters. Suitable also for precision displays with other types of 2⅛" neck dia. CRT's. Request catalog sheet for full details.

TYPES V21 & V22

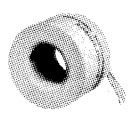
VIDICON YOKES & FOCUS COILS for 1" Vidicons

IN VOLUME PRODUCTION NOW. For both commercial and military applications. Engineering Service available. Special designs for all types of 1" vidicons including electrostatic focus magnetic deflection types. For full technical details request catalog page.

TYPE Y25-R Series Up to 52° and 70° Deflection Angles

COMPACT ROTATING COIL YOKES for 1½" neck dia. CRT's

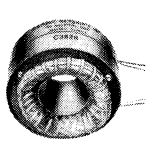
For Radar Plan Position Indicator and all other rotating coil applications. Versions available with dc off-centering coils. Complete in aluminum housing containing deflection coil, slip rings and brush assembly, drive gear and bearing for easy installation into any equipment design. Only 3¾" OD x 2 11/16" long. For technical details request catalog page.



TYPE Y65 Up to 70° Deflection Angle

ENCAPSULATED MINIATURE PRECISION YOKE for ⅞" or 1" neck dia. CRT's.

Push-pull and single-ended coils available in a wide range of inpedances for transistor drivers or vacuum tube circuits. Features electrically balanced windings with equal deflection sensitivities. Close angular tolerances of the display are achieved by precise construction. Epoxy encapsulated to withstand extreme environments. For full technical details, request catalog page.



TYPES C3287/C3528

MAGNETIC SCAN-CONVERTER DEFLECTION YOKES

Stator Design for standard 1½ inch neck diameter scan converter storage tubes. High resolution, geometrical accuracy and sensitivity are combined to offer power savings, plus ultimate performance. A desirable short precision magnetic field is achieved by combining short overall length and small ears with the proper distribution, insertion and extreme care in construction. Magnetically shielded designs also available. Request catalog sheet for full details.

NOTES:

(1) The above list is representative of the variations of industrial and Military Cathode Ray Tube types available from Westinghouse. In general, any industry bulb can be combined with specific phosphor and electron gun types to meet individual display system requirements.

(2) Many of the above tubes can also be furnished with any of the following variations: Internal Graticules, Fiber Optic Faceplates or Strips, Yokes, Shields, Mounting Fixtures, Implosion Protection or Potted Leads.

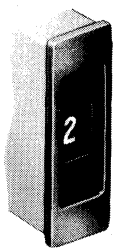
READALL® READOUT INSTRUMENTS

READALL Readout Instruments are precision-built data readout devices for displaying characters in accordance with a pre-determined code. READALL Readout Instruments will translate, display, store and transfer data in digital form. The instruments are compact and self-contained and can be applied to the output of telemetering systems, digital computers, teletype receiving equipment, or wherever data must be displayed. Special characters can be provided on request.

An outstanding feature of READALL Readout Instruments is their ability to retain information indefinitely. They are so constructed that they store the positioned character electrically as well as visually. The stored code can be transmitted into other readout instruments, printers or transmitters. Once positioned, they consume no power while information is retained and displayed.

10-CHARACTER READALL READOUT INSTRUMENT INDUSTRIAL



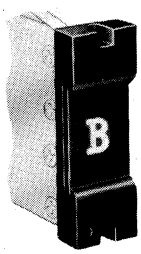
10-Character READALL Readout Instruments will operate through one million random operations reliably and efficiently. These instruments utilize a four-bit binary code to position ten characters for visual display. The relation of the visable character to its code is the direct translation of binary notation to decimal indication. If desired, combinations other than those included in this particular instrument can be developed.

12-CHARACTER READALL READOUT INSTRUMENT MILITARY

The 12-Character Readall Readout instrument is designed to meet the severe environmental requirements specified in MIL-E-5422D. The digital display includes characters in numerical sequence from 0 to 9 and two blank spaces.

These readout instruments can be used individually in separate gasket-sealed cases, or as modules assembled in groups to display several characters in a single case. Greater flexibility of operation is provided through the separate code and motor circuits, which permit application in low level circuitry.

64-CHARACTER READALL READOUT INSTRUMENT INDUSTRIAL AND GROUND SUPPORT



The 64-character READALL Readout Instrument employs a six-bit code and a differential sprocket and belt arrangement to accomplish a digital readout. The character belt is back-lighted with diffused light by means of a miniature aircraft-type bulb. In order to make back-lighting possible, the belt is made with characters on one side only. And, in order to reduce its size, the belt is formed into a Mobius-like configuration.

These instruments meet many of the requirements of the existing military specifications. Specific information can be obtained upon request.

64-CHARACTER READALL READOUT INSTRUMENT SEALED CASE FOR MILITARY APPLICATION

This 64-character Readall Readout is designed to meet the severe environmental requirements of MIL-E-5422D and other specifications. It provides reliable operation under conditions of intense shock, vibration and extreme ranges of temperature. The sealed case protects the instrument in humidities of 100 per cent; it will operate at altitudes up to 50,000 feet. Salt spray, dust, sand and other foreign particles cannot penetrate the case.

The method of operation and internal arrangement are similar to that of the standard 64-Character READALL Readout Instrument.

READALL READOUT SPECIFICATIONS—All operating data at 60 to 80 deg. F.

SPECIFY "ARNOLD" FOR YOUR PERMANENT MAGNET

ALNICO MAGNETS

Arnold permanent magnets are available in all types of Alnico material, in sizes ranging from large castings weighing over 80 pounds to very small sintered parts weighing less than one gram.

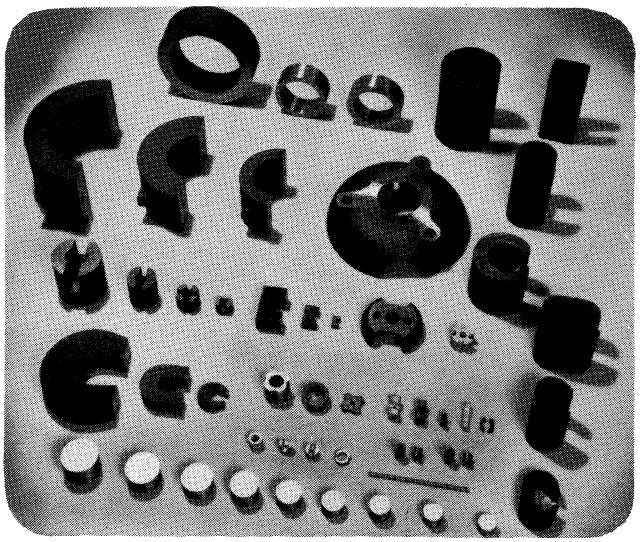
Alnico 5 can usually be depended upon to deliver the greatest energy product to the magnetic circuit per weight of magnet material. It is therefore generally the first choice for a magnetic material except where special physical considerations are paramount. Modified or premium grades are also available, such as Alnico 5-7, a crystal-oriented material used where size and weight must be reduced without loss of energy.

Special assemblies such as rotors, traveling wave tube magnets, magnetron magnets, etc. may be supplied in an aluminum jacket to facilitate mounting and supply an added protection to the magnet.

Large magnet assemblies may be supplied for focusing mass spectrometer and other measuring applications where a high degree of stability and uniformity of field is required.

Many sizes and types of Alnico magnets are carried in stock for immediate delivery.

ALNICO 8 Available from Arnold in production quantities, Alnico 8 possesses the highest coercive force of all Alnico grades, as well as a high energy product and a relatively low temperature coefficient. It is especially suited for traveling wave tube periodic focusing applications. Gap flux densities greater than 1000 gausses are attainable in tubular-type straight field focusing magnets. Alnico 8 is also recommended for applications which involve strong demagnetizing fields, or where space considerations dictate the use of a short magnet.



Typical group of Arnold permanent magnets, both cast and sintered types.

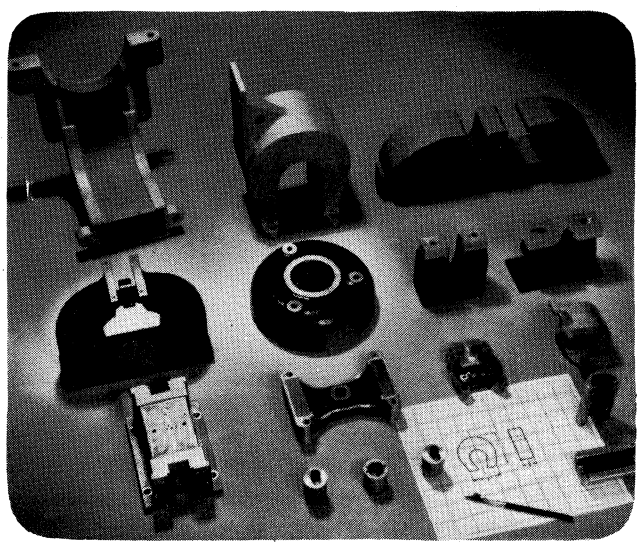
SPECIAL PERMANENT MAGNET MATERIALS

ARNOX 3 Arnox 3 is a molded-type magnet having high coercive force and moderately low residual induction and energy product. Principal uses are for magnetic requirements which are not stringent, and for a relatively short magnet of reasonable cross section. Accurate dimensions and close tolerances can be economically obtained. These magnets can be premagnetized before assembly, and have very high resistance to demagnetiziation. Slightly better magnetic properties are obtained in the pressing direction than in other directions.

ARNOX 5 Arnox 5 is a ceramic permanent magnet material composed of highly oriented barium ferrite. It has many times the energy product of Arnox 3 and is comparable in many applications to Alnico 5. Because of its high coercive force, its use is recommended in applications where a short magnetic length is desirable or where extremely high demagnetizing forces are encountered.

VICALLOY Vicalloy is a carbon-free permanent magnet alloy containing about 10% vanadium, 50% cobalt and the balance iron.

Vicalloy may be fabricated in the form of castings, hot rolled bars and forgings, or cold rolled strip, wire and tubing. After suitable heat treatment, the material is quite readily machinable. Vicalloy is available on special order in bar, strip and thin tape for recording purposes.



Typical group of permanent magnet assemblies.

SILECTRON C, E, O AND DISTRIBUTED GAP CORES Precision-rolled Silectron strip in 1, 2, 4 and 12 mil thicknesses. They are supplied in a wide variety of shapes, and in sizes from a fraction of an ounce to several hundred pounds. In addition to standard transformer applications, they may also be supplied for special applications such as saturable reactors, instrument transformers and pulse transformers.

Distributed Gap Cores reduce watt loss by 30%, exciting current by 70% and cost by 10% over conventional 12 mil C cores of the same size and weight. Made of the best commercial grades of .012 grain-oriented silicon steel, cores are available in 36 basic sizes for power transformer and reactor applications.

Over 1,000 stock cores are listed in the Arnold Silectron catalog. A wide selection of preferred sizes are stocked for immediate shipment.

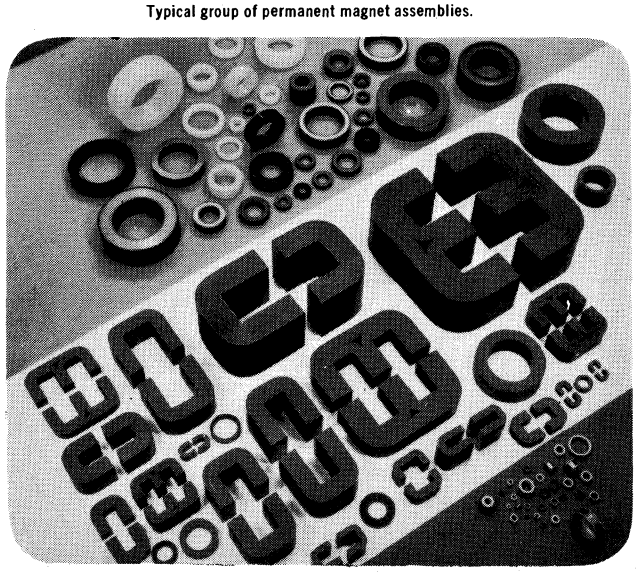
TAPE WOUND CORES OF HIGH PERMEABILITY MATERIALS Arnold tape wound cores are available made of Deltamax, 4-79 Mo-Permalloy, Supermalloy, Mumetal, 4750 Electrical Metal, Silectron, or the new rectangular-loop material, Supermendur. All except Supermendur cores are available in standard tape thicknesses of ½, 1, 2, 4 or 12-mils.

Toroidal cores are made in 30 standard sizes with protective nylon or aluminum cases. Special sizes produced to individual requirements. Wide selection of Deltamax, Square Permalloy and Supermalloy type 6T cores (aluminum cased, oil filled, hermetically sealed and epoxy coated) carried in stock for immediate shipment.

BOBBIN CORES Arnold bobbin cores are available in a wide range of sizes, tape thicknesses, widths and number of wraps to suit the ultimate use of the core in electronic computer assemblies. Magnetic materials usually employed are Deltamax and Square Permalloy in standard thicknesses of 1, ½, ¼ and ⅛ mil. Bobbins are supplied in ceramic or stainless steel.

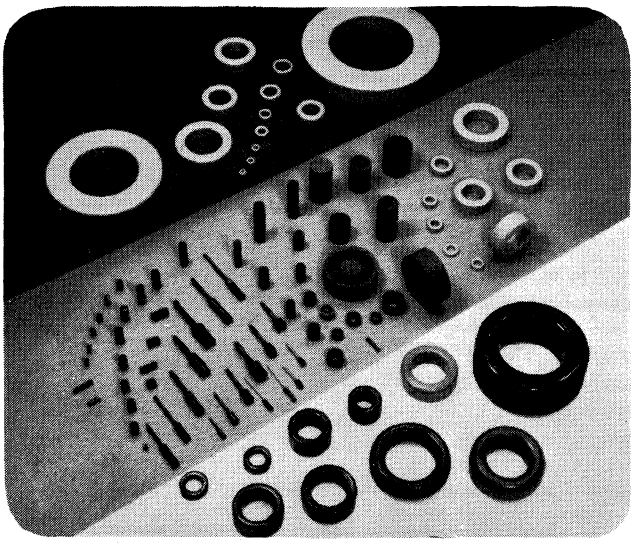
MO-PERMALLOY POWDER CORES Available in a wide range of sizes, from .183" OD to 5.218" OD. They are given various types of enamel and varnish finishes, some of which permit winding with heavy Formex insulated wire without supplementary insulation over the core.

These powder cores are supplied in standard permeabilities of 14, 26, 60 and 125 Mu; high-permeability cores of 147, 173 and 205 Mu are also available in all sizes. They provide constant permeability over a wide range of flux density, and in many cases may be furnished stabilized to provide essentially constant permeability over a specific temperature range. Preferred sizes carried in warehouse stock for immediate shipment.



Top to bottom: Tape wound cores, Silectron C, E and O cores, and bobbin cores.

AND OTHER **MAGNETIC MATERIAL** REQUIREMENTS . . .



Powder cores.

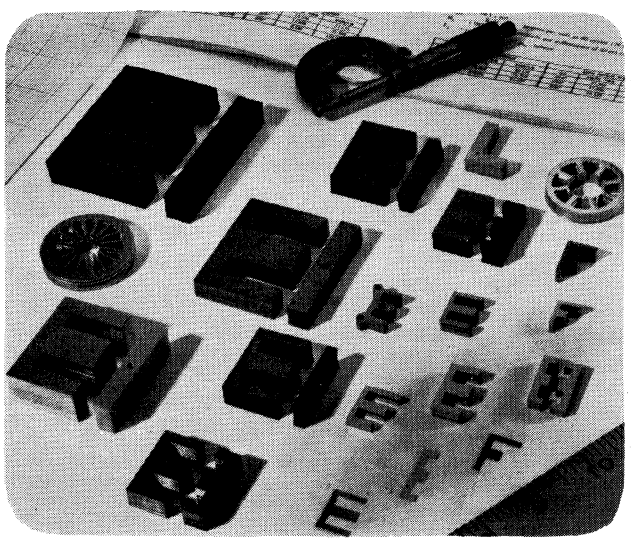
IRON POWDER CORES A wide selection of cores is available from simple cylinders to special cores of complicated design. The line includes all standard types of threaded cores, cup, sleeve, slug and cylindrical insert cores; for use in antenna and RF coils, oscillator coils, IF coils, perm tuning, FM coils, television coils, noise filter coils, induction heating and bombarder coils, and other low frequency applications. Preferred sizes are carried in warehouse stock for quick shipment. A standard series of iron powder toroids is also manufactured, conforming to the standard sizes adopted by the Metal Powder Industries.

MSS IRON POWDER CORES Lower magnetostrictive noise than other commercial iron powder even when cores are operated at saturation flux densities.

MSS powder cores are being used in interference filters, "gateless" SCR circuits for light dimming, etc. These cores have very high electrical resistivity, thus permitting utilization over a wide spectrum of frequencies ranging from 60 cycles through telephone carrier frequencies.

MSS cores are moderately priced and are available in a wide range of sizes.

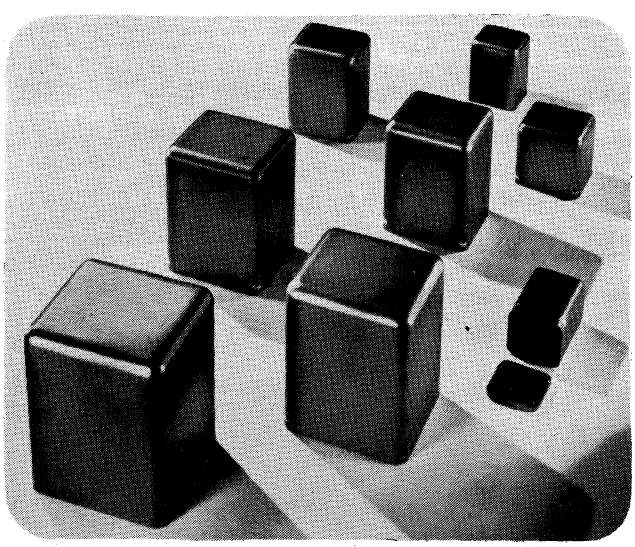
LAMINATIONS AND FORMED PARTS Arnold produces a wide selection of silicon-steel, nickel-iron and cobalt-iron laminations for motors and transformers. Thin-gauge laminations (1, 2 and 4-mil thicknesses) of high-permeability materials are specialties. A complete line of transformer cans and hardware is available, including Mil-T specification. Many sizes and types of magnetic shields are available



Laminations of silicon and nickel-iron.

Typical group of formed magnetic shields.

or can be fabricated to your exact requirements from Mu-Metal and other shielding materials. Shielding materials are also available in bulk form, without annealing.



Typical group of drawn transformer cans.

SPECIAL MATERIALS

2V PERMENDUR . . . a ferromagnetic alloy of cobalt, vanadium and iron that possesses high flux density saturation properties. Its magnetostrictive properties are useful in many transducer applications.

VIBRALLOY . . . a ferromagnetic alloy of nickel, molybdenum and iron whose temperature coefficient of elastic modulus is controllable over a wide range. It has high ferromagnetic permeability, and a rather high coefficient of magnetostriction. Used in applications where a zero or controlled thermo-elastic coefficient is desired.

Glass-to-metal PRECISION HERMETIC SEALS

BENDIX glass-to-metal seals represent the highest standards of excellence in design, materials and workmanship. All assemblies meet or exceed MS requirements for shock, immersion, corrosion resistance, pressure and dimensional integrity. They are unsurpassed for dependable performance in any application for which they are designed. BENDIX hermetic seals are available in standard configurations and finishes for most applications. Custom designing to your individual requirements is our special skill.

Bendix Electronics

They're on their mark. They're set. Or they're unset.

And they're ready to go to you with the highest standards of precision set for industrial jewel bearings, orifices, insulators, or assemblies. Produced under the most rigid quality control with advanced manufacturing and testing techniques, Bird precision jewels guarantee a low coefficient of friction, non-magnetic properties, and high performance over a long life expectancy. Available in either *glass* or *sapphire.* Set or unset. These jewels are ideal for meters, compasses, control units, gauges, or any electrical or mechanical device where critical parameters must be met uniformly and dependably.

From the people who pioneered magnetic recording

Brush magnetic rubber.

non-wearing medium for magnetic recording

Molded bands of tough, highly stable rubber . . . densely impregnated with magnetic oxide . . . smooth-surfaced for minimum head wear . . . an ideal memory system for machine or process-control sequences, data processing, fault recording, repetitive message reporting (over 3,000,000 repeats without failure).

Recorded data is virtually permanent until erased . . . normal operating life well above 10,000 hours at 30 ips.
• Prolonged life • Minimum Head Wear • High Signal/noise ratio • High Fidelity • High Reliability • Low Operating Cost.

In either Hypalon® or extra-tough Adiprene® . . . bands ½" to 6" width, 2" to 18" diameters.

Whatever your problem involving magnetic media, give us your specifications. Clevite Corporation, Brush Instruments Division, 37th and Perkins, Cleveland, Ohio 44114.

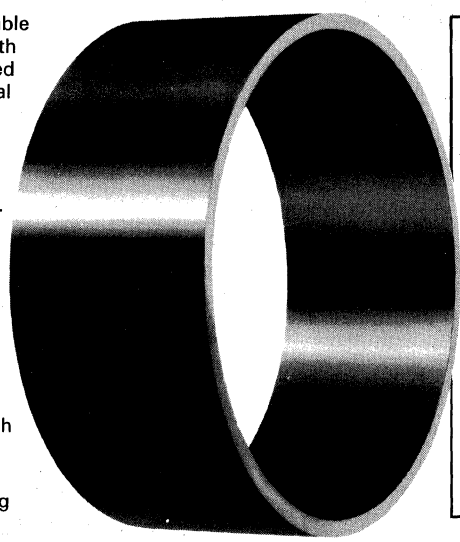

TABLE I
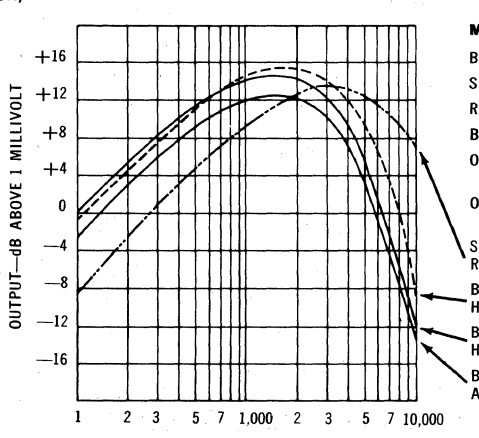
MATERIAL SPECIFICATION OF MAGNETIC BANDS

Magnetic Properties	Hypalon	Adiprene	Hypalon
Compound	98306	03866	98308
Coercive force *Hc-Oersteds	350	355	385
Remanence *Br - Gauss	720	510	690
Maximum Induction—Gauss	1130	800	1050
Physical Properties			
Tensile Strength, PSI Min. ASTM-D-412-51T-Die C	1500	1800	1500
Elongation Before Breakage, Min. ASTM-D-412-Die C	100%	200%	100%
Normal Elongation Recommended for Mounting	6%	6%	6%
Hardness, Shore "A" Durometer	85 ±5	80 ±5	85 ±5
Relaxation—Max. (Inches) ASTM-D-412-512-Die C.	.125"	.175"	.125"

*Magnetic properties are average values obtained from hysterisis loops and assumed magnetic cross sectional area. The loops were obtained using a 60 CPS magnetizing field of 4000 oersteds, peak to peak. Physical properties were determined from a random sampling of bands.



MAGNETIC BAND FREQUENCY RESPONSE

Brush BK-1090 Record—Reproduce Head.

Speed: 7½ in./Sec.

Record Current: 0.2 Milliamps/Winding (0.4 Milliamps Total)

Bias Current: 1.5 Milliamps/Winding (3.0 Milliamps Total) @ 50 KCPS

Optimum Record Current is taken as that current which produces an output 12 dB down from saturation.

Optimum Bias Current is that current which produces 2% or less third harmonic distortion at 750 CPS record signal.

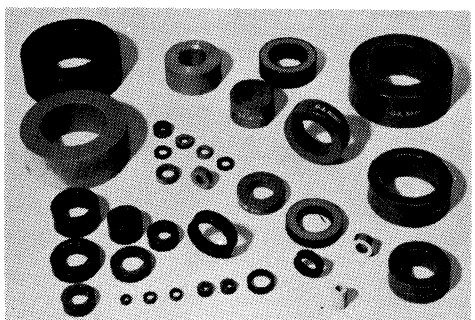
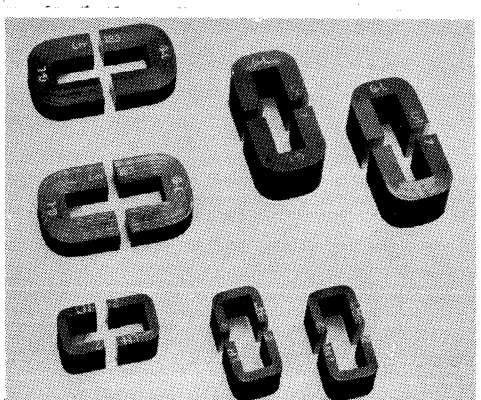
MAGNETIC LAMINATIONS Request Bulletin TB-108A



TAPE WOUND CORES Request Bulletin TB-105



"C" CORES Request Bulletin TB-109

MAGNETIC LAMINATIONS
...nickel alloys and grain-oriented silicon steel

Available without tooling charge in a wide variety of standard EI, EE, F, DU, IU, L shapes, in 6 and 14 mil thicknesses, of non-oriented (round loop) and oriented (square loop) 50% nickel alloys, high permeability 80% nickel alloys, and grain-oriented silicon steel.

Exclusive G-L "Hy-Q" finish and use of highest quality carbide dies, provides high stacking factor, high interlaminar resistance, and high "Q" in transformers, filters, reactors, chokes, and inductors.

Maximum initial permeability is obtained from precisely controlled hydrogen anneals in closed furnaces. In the 80% nickel alloys, G-L "Mu-Max" laminations have raised the minimum initial permeability available to the designer by an average of 30%.

Special shapes are tooled in G-L's own Die Shop either with steel dies for economical short-runs or in carbide for maximum die life. Typical specialties are head laminations, spacers, and shields in thicknesses down to 1 mil, with thickness tolerances as close as 50 microinches.

TAPE WOUND CORES and BOBBIN CORES

Promptly produced in gapless toroidal form—in sizes from 1/16" OD and 1/32" tape width...to more than 10" OD and 2-3/4" tape width, weighing thousands of grams.

Wide selection of available alloys, as tabulated below, cover applications from tiny pulse transformers for transistorized ignition systems to massive cores for mag-amp controlled power supplies of missile launching submarines.

Cores are wound with 1/8 mil to 14 mil thick tape in various nickel alloys and silicon steel—uncased, or cased in a choice of aluminum, molded phenolic, or new glass filled nylon boxes...or on stainless or ceramic bobbins. Aluminum cased cores optionally available with G-L's "EE" coating, which not only eliminates taping before winding the core, but also provides a seal resistant to vacuum impregnation. The "EE" coating is neither tacky nor brittle, exhibits no cold flow, and does not soften at high temperatures. Aluminum cased cores, "EE" coated, have been used successfully in magnetic amplifiers at temperatures as high as 200°C., and have survived the shock of missile launching and in-flight centrifugal and centripetal forces, as high as 200 G.

"C" CORES

A wide range of 4 mil "C" cores from the smallest requirements up to approximately 4-1/2" in overall length are now available from stock. G-L "C" cores are produced by new manufacturing techniques with special emphasis on maintaining precise dimensional and electrical uniformity, to assure easy assembly and low power losses.

Because of new improved impregnation materials and techniques, "C" cores manufactured by G-L will operate continuously in temperature environments in excess of 200 degrees Centigrade without deterioration of the interlaminar bond.

AVAILABILITY:

LAMINATIONS—Stocks of all popular standard shapes, alloys, and thicknesses warehoused on both East and West Coasts for immediate shipment.

TAPE WOUND CORES—Stocks of IEEE, EIA standard sizes cased in plastic, aluminum, and EE coated, warehoused on both East and West Coasts for immediate shipment. Most other sizes available in quantity in less than two weeks.

"C" CORES—Prototype stock maintained on both East and West Coasts for immediate delivery.

BOBBIN CORES — Catalog bobbin sizes available in quantity in three weeks or less...bobbin cores are normally made to customer specifications.

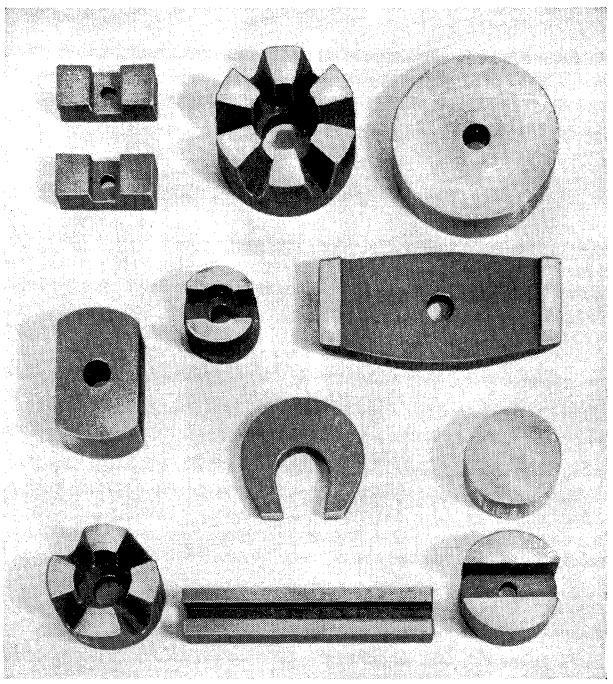
PERMANENT MAGNETS

Many GE permanent magnets are stocked and may be ordered by catalog number. Where a stocked magnet does not meet all the application's requirements, General Electric can design a magnet that does. Engineering design assistance or information on stocked and special magnets is available on request.

ALNICO MAGNETS

- Radio and television speakers
- Telephones
- Refrigerator latches
- Electron tube assemblies
- Motors
- Generators
- Toys and novelties
- Space vehicles and missiles
- Controls



In today's industries, Alnico is still the most widely used permanent magnet material, and the growing family of Alnico grades continues to find new and ever-increasing usage.

This broad acceptance is the result of the wide range of magnetic properties obtainable with Alnico, the high degree of stability with respect to time and temperature, and the vast array of sizes and shapes that can be manufactured economically through General Electric's mass production methods.

The Alnicos are precipitation-hardened alloys made by conventional casting or sintered powder metallurgical techniques and a specialized heat treatment. Precise control of the various Alnico chemistries plus the heat treating process give the material its well-known qualities of high magnetic induction and high resistance to demagnetization.

The family of GE Alnico permanent magnets includes cast Alnico 3, 4, 5, 5DG, 5-7, 6, 8, 9, and sintered Alnico 2, 5, and 8. These various grades offer industry proven magnetic materials with a wide range of magnetic inductions and coercivities (resistance to demagnetization) in the exact shape and size required.

The versatility of Alnico, plus General Electric's advanced research and design and application engineering capabilities, continues to broaden the acceptance of these most widely used magnets.

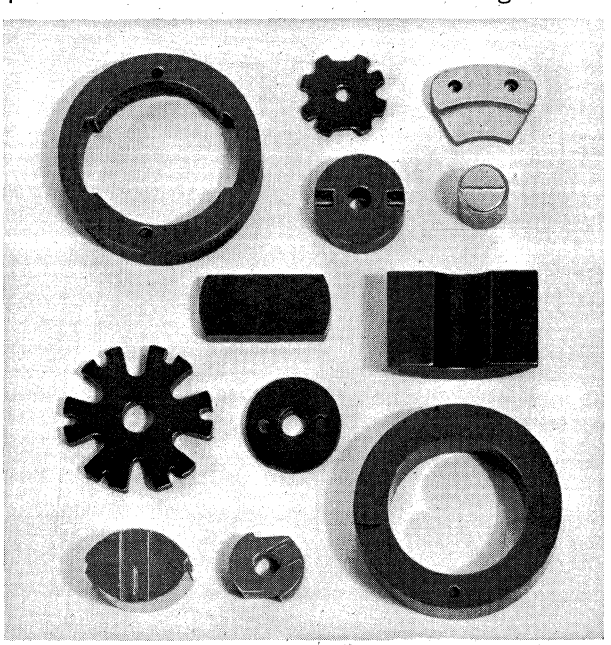
LODEX® MAGNETS

- Hearing aids
- Core meters
- Miniature motors
- Speedometers
- Reed switches
- Timing motors

Lodex, the trade name of General Electric's recently developed magnet material, can be formed economically into precise close-tolerance shapes and small sizes for intricate applications.

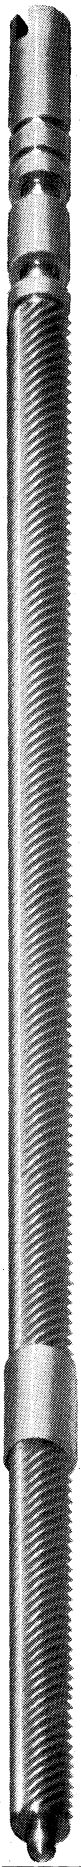
A product of GE research and development, Lodex production techniques eliminate form grinding or high-temperature treating. This new magnetic material, consisting of elongated single domain iron cobalt particles in the size of smoke particles uniformly dispersed in a lead matrix, is pressed or extruded (rather than cast or sintered) into its final shape. Such a manufacturing process makes it possible to produce magnet shapes to extremely close physical and magnetic tolerances and to maintain close piece-to-piece magnetic uniformity.

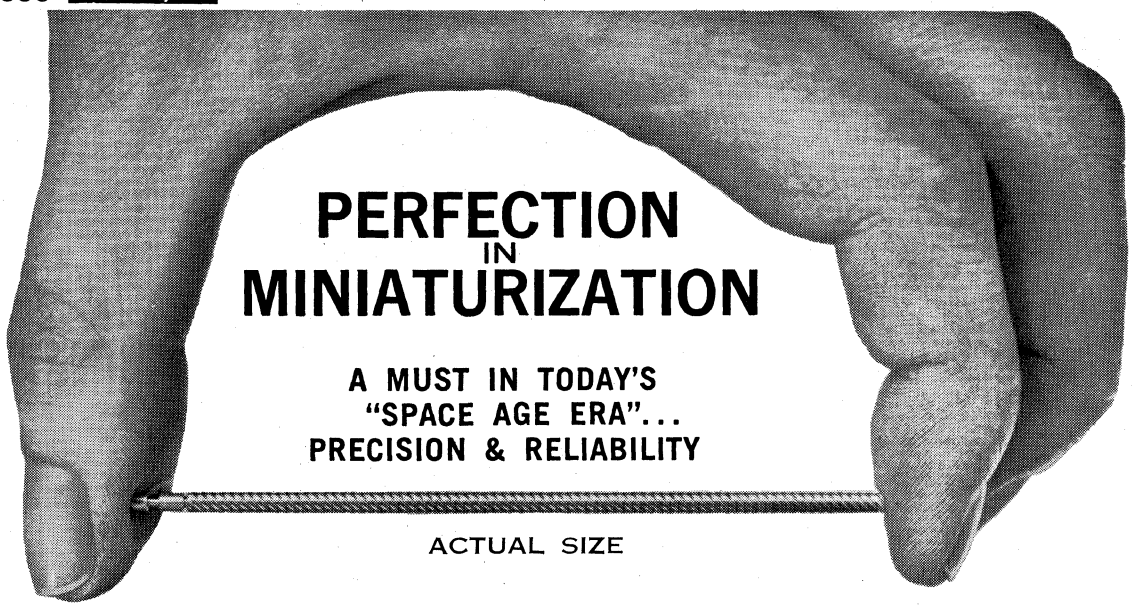
Since its introduction, the family of Lodex magnets has found widespread and growing usage among manufacturers requiring intricate, tight tolerance shapes with a high degree of magnetic uniformity. Designers know that this physical and magnetic uniformity in their applications virtually eliminates the need for final testing of the end product and permits automation in the production process.



For complete information contact nearest GE Sales Office listed on inside front cover, or write to General Electric Co., Section 998-50, Schenectady, N. Y. 12305.

GENERAL ELECTRIC





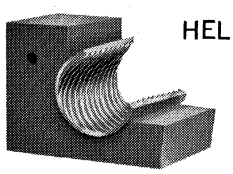
PERFECTION IN MINIATURIZATION

A MUST IN TODAY'S "SPACE AGE ERA"... PRECISION & RELIABILITY

ACTUAL SIZE

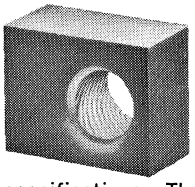
Shown above is a miniature version (exact size) of the highly dependable and reliable HELISHAFT. Because of the extreme need for compactness, *Helitronics* has perfected the miniaturization of all its components; HELISHAFT*, HELIBLOC*, HELINUT* and HELISLIDE*. These poly-start threaded components working as highly efficient teams, divide the work load precisely and equally over each of the multiple threads, realizing a unique degree of accuracy and smoothness of flow, while minimizing wear. The high degree of refinement in today's electronic and mechanical techniques requires that same degree of perfection in all components of the equipment.

All industries including Microwave, Electronic Instruments, Missile, Medical, and Scientific Toys, have recognized the important part Helitronic parts are playing in today's demand for *progress*, with *reliability* and *dependability*.



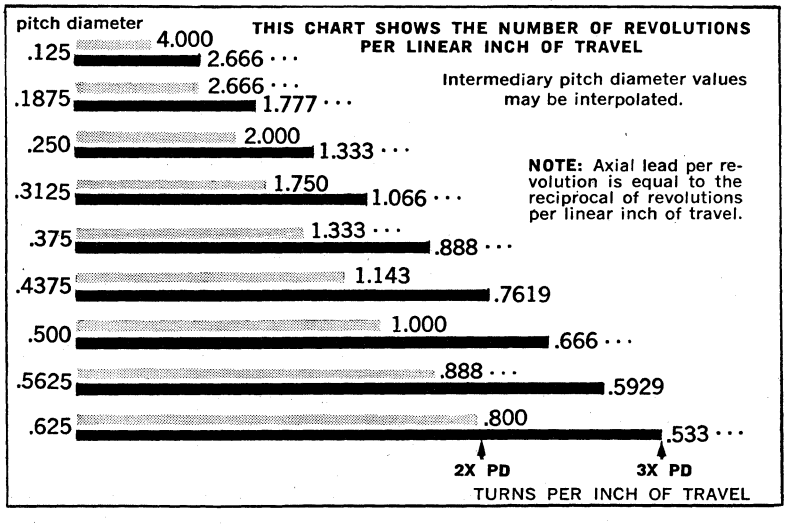
HELINUT*

The HELINUT, a poly-start thin-walled internally threaded metal sleeve (a wall thickness as low as .010) is precisely mated to each individual HELISHAFT. The HELINUT is used as an embedment in our HELISLIDE. It can be potted, or press-fit and staked for your specific needs.



HELIBLOC*

Utilizing the favorable characteristics of Teflon†, the HELIBLOC is a poly-start internally threaded lead-nut or contact slider block, made in a variety of shapes and sizes, to fit your specifications. The design of the HELIBLOC has been tested and proven in the field to be a repetitively reliable mate for the HELISHAFT.



Send for your FREE informative & descriptive literature on all components of the Helitronic unit. All inquiries must be on company letterhead. For immediate information call the plant; area code 201 621-7773. Write our sales office for a representative to call on you.

TELCON METALS LTD.

is one of the largest and oldest manufacturers of nickel, iron and cobalt alloys for magnetic applications. Their fully integrated facilities provide raw materials and fabricated components covering the whole range of commonly used magnetic materials.

NEW SATMUMETAL COMBINES INITIAL PERMEABILITY OF 65,000 AND SATURATION FLUX DENSITY OF 15,000 GAUSS AT COST COMPARABLE TO 80% NICKEL IRON ALLOY. Available in the form of toroidal cores wound from 0.002", 0.004" and 0.008" strip and certain lamination patterns.

TELCON HIGH PERMEABILITY MAGNETIC ALLOYS AND FABRICATED TOROIDS

80% NICKEL	50% NICKEL	OTHER ALLOYS	ULTRATHIN FOIL

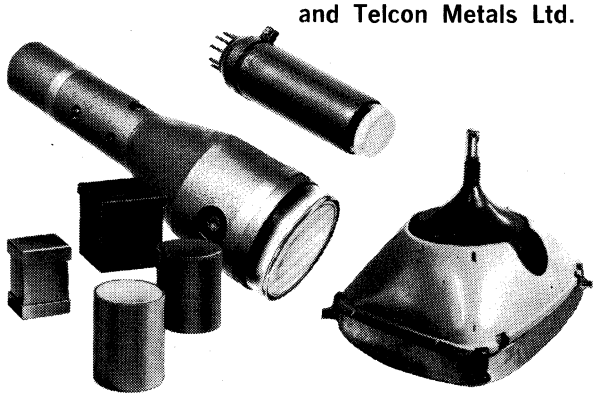
MAGNETIC SHIELDS UP TO 30" DIAMETER FOR CATHODE RAY TUBES & TRANSFORMERS

by Magnetic & Electrical Alloys Ltd. and Telcon Metals Ltd.



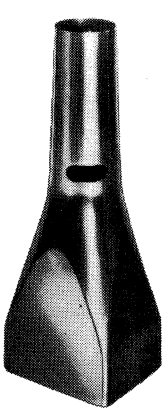
An extensive range of standard shields are available for cathode ray tubes, transformers, chokes, photo multipliers, vibrators, high gain amplifiers and magnetic tape recorder heads. Special patterns also can be produced to meet individual requirements. Shields can be supplied in a wide range of magnetic alloys and are available either single or multilayer. Technical assistance available on your shielding problems.

TELFORM

DEEP DRAWN COMPLEX SHAPES

A NEW CONCEPT IN MAGNETIC SHIELD CONSTRUCTION

Specially developed for quantity production of high efficiency complex shields, new TELFORM construction utilizes precision drawn segments to drastically reduce welded seams. The result is extra close fitting shields with improved shielding characteristics. This new technique is applicable for CRT tubes up to approximately 20" long. No premium charge even though dimensions, finish and appearance are far more uniform throughout batches than conventionally fabricated shields. Rapid delivery after initial tooling. Available in 80%, 50% and 36% nickel-iron alloys up to 0.10" thick.



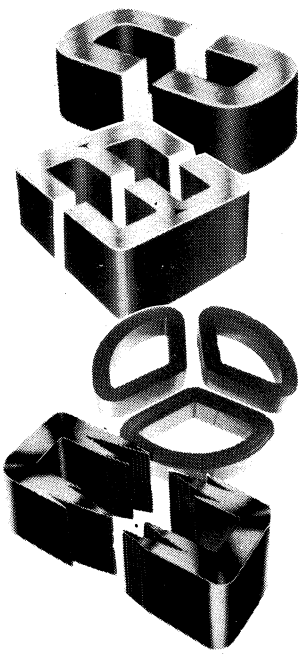
Extremely Competitive Prices on Custom Shields. Send for Illustrated Catalog and Ask for a Quotation.

OTHER TELCON PRODUCTS:

- Thermostatic Bimetals • High Permeability Strip, Rod & Wire For Component Manufacturing & Shielding
- Glass to Metal Seal Alloys.

TELMAG E, C and TOROIDAL

Tape-wound cores



- Made to EIA Spec. RS217 & trade specifications primarily from American Allegheny-Ludlum "Silectron" by our British associate TELCON MAGNETIC CORES LTD. . . . Europe's largest manufacturer of grain oriented silicon cores.
- Available in all American standard or special sizes to American core numbers. Popular types available from New York warehouse for immediate delivery.
- Sold at prices that help you solve your constantly rising cost level problem—due to the unique combination of American material and one of the largest manufacturing facilities in the world.
- Now also available "Circular E cores" for improved performance of 3-phase transformers. Savings in weight, larger window area, better cooling and magnetically balanced circuits offer broad advantages over conventional 3-phase cores.
- **NEW** OLMAG 12/13 mil concentrically wound "C" cores with **matched saw tooth legs** on mating cores, reduces magnetizing current up to 60% and iron losses up to 25%. Almost all bonding is eliminated, with only edge bonding in the region of the cuts to assist in assembly within the bobbin.

COMPLETE PUBLISHED STOCK & PRICE LIST AVAILABLE. LET US ADD YOUR NAME TO OUR MAILING LIST . . . AND CONVINCE YOURSELF!

"C" CORE COMPRESSED AIR BANDING TOOL by TELMAG

Manufacturing rejects caused by variations in banding of "C" transformer cores can now be eliminated. The new "C" core Compressed Air Banding Tool provides consistent banding stresses in assembly-line operation. By making cores useful which were formerly rejected, the tool soon pays for itself.

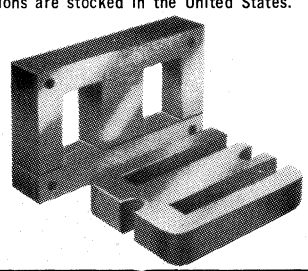
NiFe MAGNETIC LAMINATIONS for TRANSFORMERS & CHOKES

by Magnetic & Electrical Alloys Ltd. . . .

. . . one of the largest commercial manufacturers of high quality NiFe alloy laminations in Europe. To find out the cost savings that M.E.A. can provide let us quote on your next requirement. For off-the-shelf delivery at the lowest quantity prices, many std. laminations are stocked in the United States.

SINGLE "E" LAMINATIONS TO REPLACE "EI187" AND "EE24-25" TYPES IN 6 MIL

An exclusive M.E.A. development that increases performance, reduces material cost, reduces labor cost. No modification of bobbin, clamps or other parts required, and when the final lamination has been inserted into the bobbin, the single "E" is practically self-clamping. End result is a 50% saving in assembly cost.



Specify BERYLLIUM COPPER SPRINGS micro-processed

Specially developed equipment and production processes, combined with the broad experience of I-S engineers, assure higher efficiency and better performance in springs for electronic controls and high frequency applications. Only 100% laboratory certified raw material is used in the production of micro-processed precision springs.

All strips and rings on these two pages are made of beryllium copper Alloy No. 25, conforming to ASTM-B194 and Federal QQ-C-533a Alloy 172. Strips are especially useful for grounding and bonding in high frequency equipment. Rings are made from contact finger stock, and are open in free position. All jig hardened to close tolerances.

ALL ARE STANDARD PRODUCTS AVAILABLE FROM STOCK!

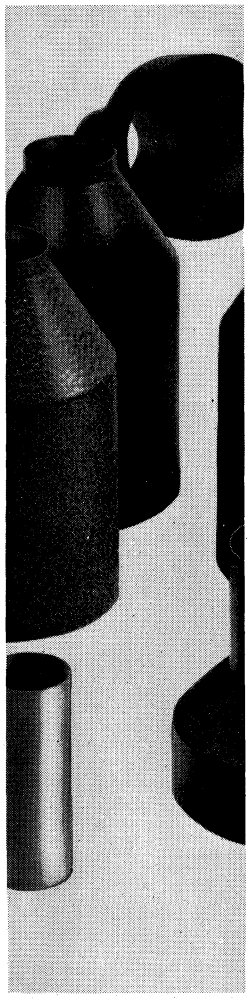
INSTRUMENT SPECIALTIES CO., INC. Little Falls, New Jersey
Phone: 201-256-3500 • TWX 201-256-3784

Magnetic Shield Division has the total magnetic shielding capability to assist you in solving any shielding problem. 80% of current shield designs originated with MSD and this design and engineering experience is available to you for research, planning and fabrication.

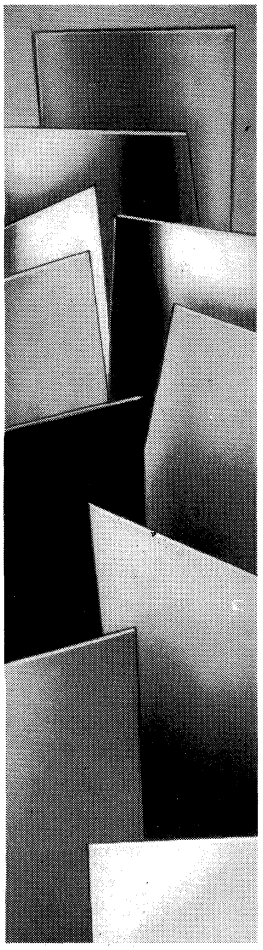
Research through Production for all your magnetic shielding needs

The Six MSD's



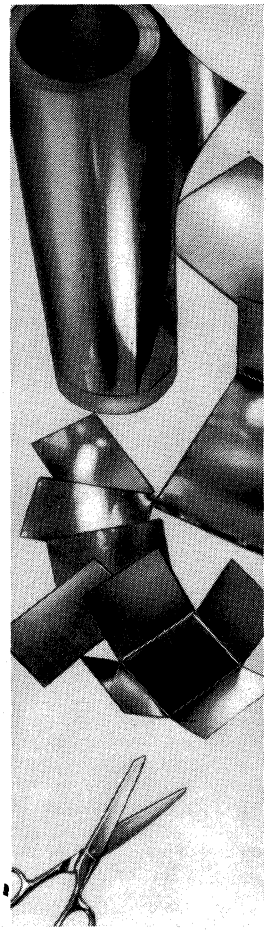
1 FABRICATION

MSD's Netic and Co-Netic Magnetic Shields can be fabricated in any size, shape and quantity, from a miniature tube to a shielded room.



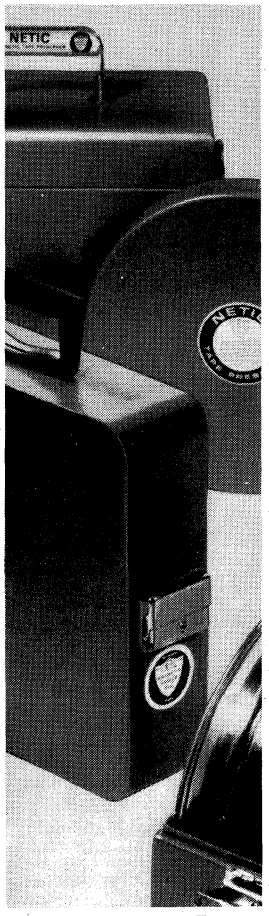
2 SHEET STOCK

For fabrication in your plant or ours. Low cost shielding solutions are provide by fully hydrogen annealed Perfection Annealed stock which normally requires no further heat treatment.



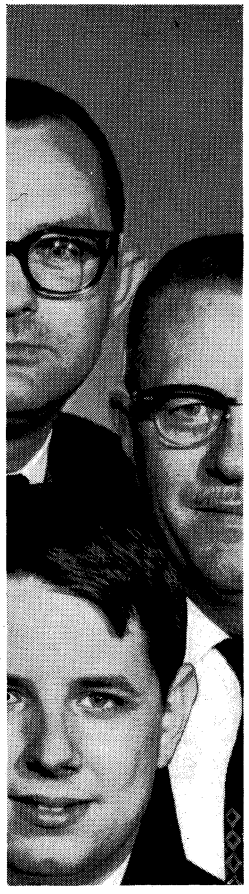
3 FOIL

MSD Netic and Co-Netic Foils are ideal for prototype evaluation and production applications. Available in both plain and adhesive backing, they can be easily shaped in minutes to fit your needs.



4 TAPE PRESERVER CONTAINERS

Used world-wide to protect against loss of valuable tape data. Round and rectangular portable units include the new, smartly designed "Executive." Stacked, sectionalized units for permanent storage are also available.



5 TECHNICAL ASSISTANCE

The concentration of design experience and engineering knowledge that has provided over 80% of the magnetic shield designs now in use is yours to assist you in solving an engineering, R & D or production problem. Phone 312, 766-7800.

6 FAST, CONVENIENT DELIVERY is the SIXTH MSD. Some items from stock. Fabricated items 3-4 weeks.

Netic and Co-Netic Alloys Stocking Guide

Co-Netic AA and Netic S3-6 Sheets are stress annealed for ease in forming, spinning, stamping and drawing operations. They must be hydrogen annealed after fabrication to obtain maximum magnetic shielding characteristics. Perfection Annealed Stock has been fully hydrogen annealed to obtain maximum magnetic shielding properties. This can be used directly for prototype and production fabrication if severe forming and drawing is not involved.

Stock Shipped Same Day As Ordered

Stock Shipped Same Day As Ordered

*Stress Annealed For Ease of Fabrication. Must Be Final Annealed For Maximum Attenuation Characteristics.

**Perfection Annealed Stock Has Been Fully Hydrogen Annealed. No Further Annealing Necessary For Prototype & Production Fabrication If Severe Forming & Drawing Is Not Involved.

NETIC, CO-NETIC — Netic is basically used in fields of high intensity because this shielding alloy will not saturate easily, but it will achieve only medium attenuation. CO-NETIC is basically used in fields of low intensity in order to utilize its high attenuation characteristics. When to use NETIC, CO-NETIC, or combination depends on the attenuation required, and the magnitude and type of field to be shielded against.

PHYSICAL DATA ON SHIELDING ALLOYS
(STRESS ANNEALED CONDITION)

	CO-NETIC AA	NETIC S3-6
Density (gram/cm³)	8.21	7.8
Coefficient of expansion Per Degree C. (20°/100°)	12.42 x 10⁻⁶	13.10 x 10⁻⁶

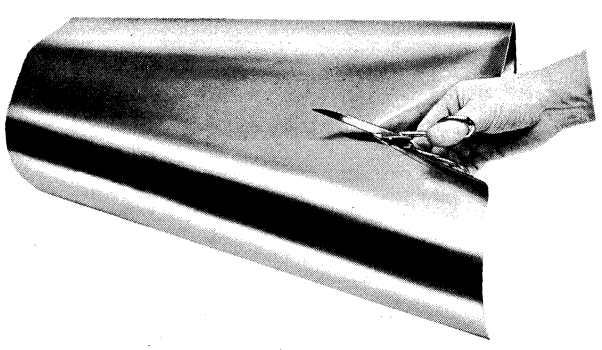
Yield point (lbs/in² x 10³)	28.5	28.0
Hardness-Rockwell B	60/75	20/40
Modulus of elasticity (lbs/in² x 10⁶)	22.50	29.5
Melting point (°F)	2680	2775
Shear point x (10³ PSI)	42.75	35.0
Elongation (2″ sec.)	35%	—
Thermal conductivity (cal/sec/cm²/cm/°C)		
at 20°C	.138	.126
at 100°C	.134	.126
Tolerance on thickness	±.004	±.004

FOIL



No Backing — Shipped Same Day As Ordered.
Adhesive Backed — Shipped Within One (1) Week After Ordered.
Thickness Tolerance ±.001″.
Both CO-NETIC AA And BLUE NETIC Foils Can Be Slit To Any Desired Width with or without Backing. Shipped One (1) to (2) Weeks After Order.
All foil has been Perfection Annealed for maximum attenuation. No further heat treating is necessary to maintain optimum shielding parameters

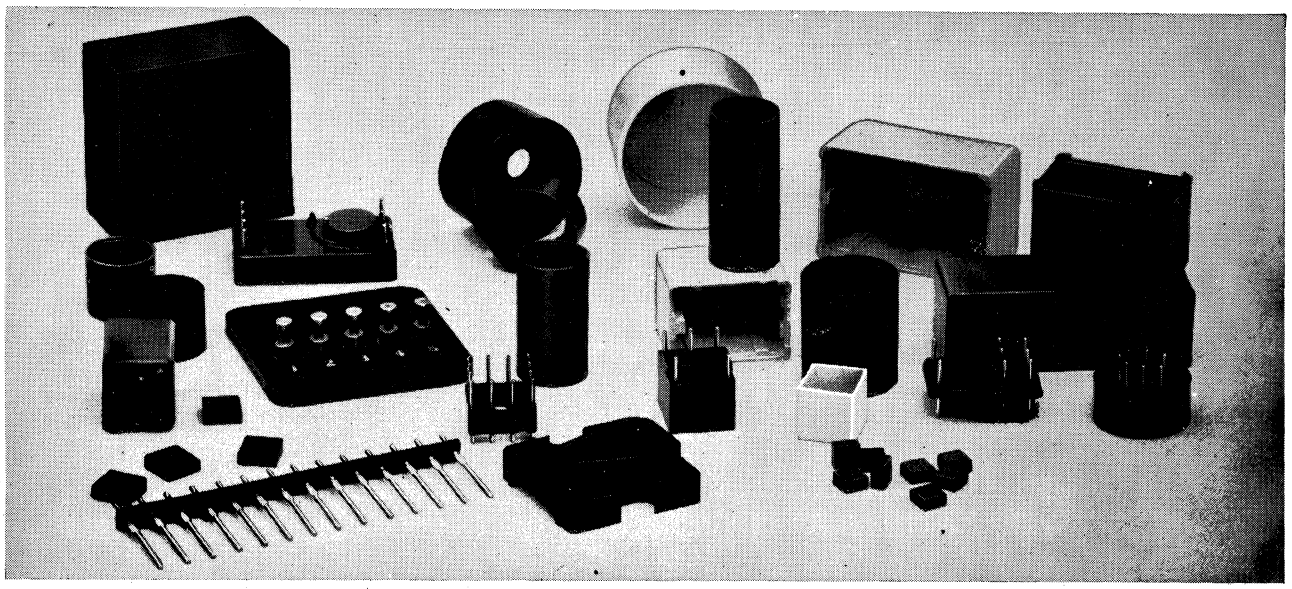
MILTON ROSS PRECISION-FORMED ENCAPSULATION SHELLS AND HEADERS

For Volume Production of Packaged Components and Circuit Modules



Milton Ross shells and headers provide neat, functional packaging for complete electronic sub-assemblies or individual components, without the cost of making and maintaining a large inventory of encapsulation molds.

For simple small-part encapsulation, the user need only place the part or parts to be protected in the shell, add the desired potting agent (in powder, pellet, or liquid form), and cure. If a complete shell-header package is desired—for plug-in mounting, for instance—the part or assembly is simply wired to the header pins and then press-fitted into the shell before potting and curing.

There are no pockets or mold marks on the finished package. The shell-header combination completely envelops the protected components, improving their appearance and enhancing their physical and electrical stability. Each encapsulated component is uniform in size and color, from shell to shell and batch to batch. Above all, the components inside are protected from vibration, dust, humidity—in fact, from almost any adverse environmental condition. Lead dressing and parts spacing are maintained, conductors are insulated.

It is highly probable that your encapsulating specs can be met with off-the-shelf stock. Standard Milton Ross shells are available in cylindrical, square, or rectangular shapes; with wall thicknesses of 0.025″, 0.035″, or 0.045″; and with dimensions on any side ranging from 3/16″ to 2½″, in sixteenth-inch increments. All dimensions are held within ±0.005″.

Shells and headers are available with molded-in keys or flatted areas for automated handling or quick visual orientation. In addition, trademarks, ratings, and part numbers can be molded in. If your needs cannot be met with stock shells, Milton Ross will tool standard-shape shells and headers to your dimension specs—with no tooling charge on orders of 1,000 or more.

SHELL AND HEADER MATERIALS AND COLORS

Because of their favorable chemical, electrical, and physical characteristics, glass-filled diallyl phthalate and mineral-filled alkyd are standard Milton Ross shell and header materials. For special purposes, a wide variety of other materials is available, including thermosetting compounds (epoxies, silicones, phenolics, and melamines), and thermoplastics (polycarbonates, polystyrenes, and polyethylene).

The precision-made pins molded into the Milton Ross headers are available in brass, nickel, copper, and with many varieties of precious-metal plating.

Standard shell and header color is black. DAP shells are also available as standard in blue, green, orange, pink, red, tan, yellow, brown, coral, and gray.

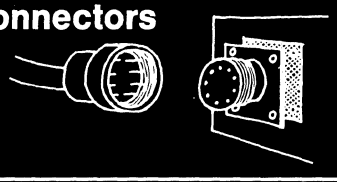
If you want to shield...

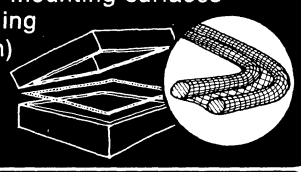
Electrical connectors



use

Metex Porcupine Metalastic.™
Its many contact points make this an ideal gasket for RFI/EMI. Silicone rubber provides a pressure and moisture barrier.

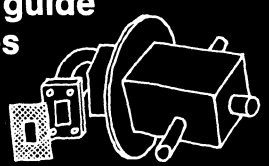
Metal boxes
with flat mounting surfaces (no sealing problem)



use

Metex double round, single fin mesh strip.
This is provided in many different metals and sizes.

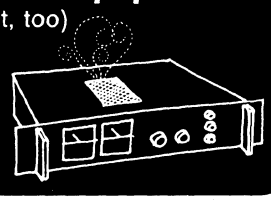
Wave guide flanges



use

Metex Feltex™ material.
Designed for wave guides, specifically provided for either pressurized or non-pressurized systems.

Electronic equipment
(and cool it, too)



use

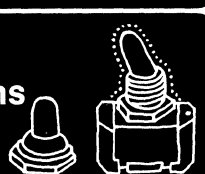
Metex Shield-Cell honeycomb panels.
It's designed to meet specific attenuation requirements over specified frequency ranges. Many standard sizes and materials are available.

Communications cables

use

Metex "Zip-Ex"® zip-on metallic sheath.
Provides 100% reliable electromagnetic shielding. Knitted mesh sheath zips on any shape before or after installation.

Switches/ push buttons
(also keep out moisture)



use

Metex Flex-Shield shielded rubber boots.
Metal mesh, embedded in flexible rubber, gives maximum reliability against RFI-EMI.

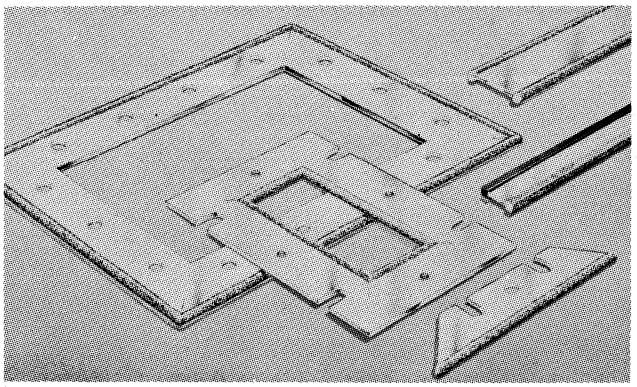
METALEX™ MOUNTING STRIP EXTRUSIONS



METALEX™ consists of a resilient, single fin METEX Electronic Weatherstrip® mechanically joined to an aluminum extrusion. Structural rigidity and ease of attachment are the results of the aluminum mounting strip. Spot-weiding, screwing, riveting, and similar fastening techniques can be utilized.

For complete information, write for METEX Data Sheet ME-7.

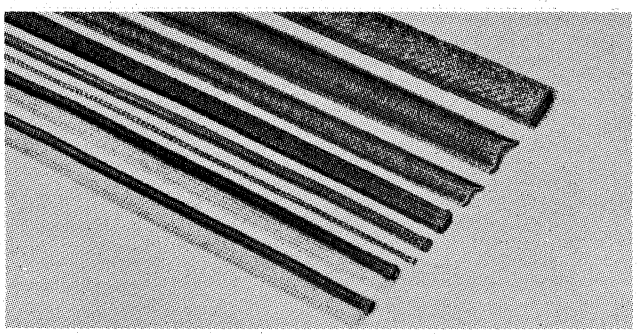
SPECIAL ENGINEERED RF STRIP



Special Engineered RF Strips are designed by METEX to solve difficult and unusual RF gasketing problems in the most economical manner. They are made by knitting or wrapping METEX over a large variety of cores or by forming METEX into unusual cross sections. These special strips are used to solve such problems as a high degree of joint misfit or under conditions where the applied closing pressure on the joint is relatively low.

For complete information, write for METEX Data Sheet ME-9.

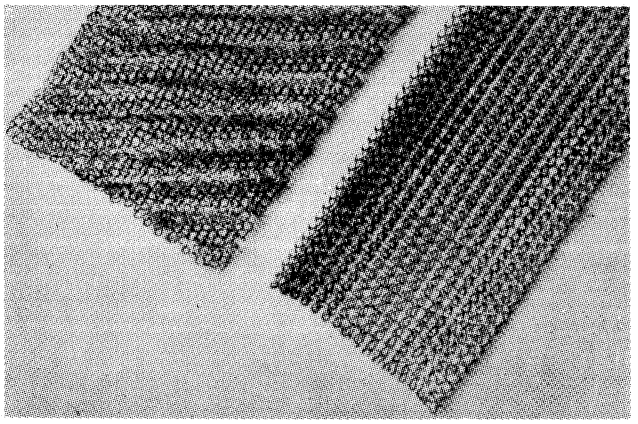
KNITTED WIRE MESH



This material is produced as a two-ply flattened cylinder of varying width, loop spacing, wire sizes and metals. A crimping operation achieves a three-dimensional form for added resiliency. This mesh tape is used as a shielding or grounding material to cover or join irregularly shaped surfaces.

For complete information, write for METEX Data Sheet ME-8.

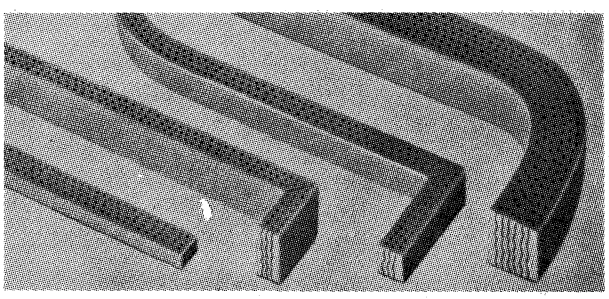
POLASTRIP
Oriented Wire Shielding Material



This unique METEX advance consists of oriented wire mesh embedded in a matrix of elastomeric material. It is the only material of its kind which offers a combination of pressure, and RFI seal in a reliable, fail-proof construction. It will yield an overall system attenuation from 125 to 135 db. Other innovations in the Polastrip family are: Combo-Polastrip for flat flange applications; Polaring — a continuous strip without a joint molded in a circular form; Polaframe — Polastrip bonded to aluminum extrusion; Polasheet — for complex gaskets die cut from Polastrip.

For complete information, write for METEX Data Sheet ME-10.

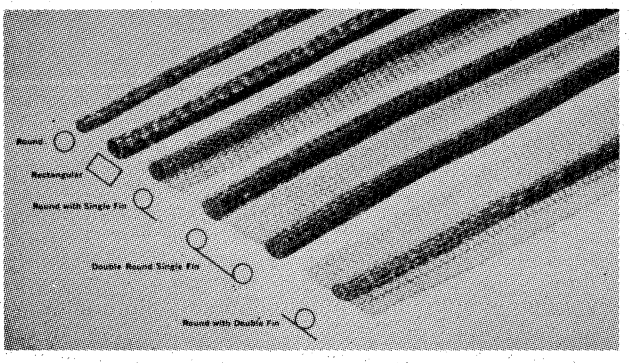
STANDARD ELECTRONIC WEATHERSTRIP®



METEX Electronic Weatherstrip, made from knitted wire mesh, combines resiliency, flexibility and conductivity that make it possible to establish electrical continuity in even the most intricately shaped joints for an effective RF shield. It is available in rectangular, round, round with single fin and double round with single fin. A single round, double-fin type, (not listed) is available in 48 sizes.

For complete information, write for METEX Data Sheet ME-2.

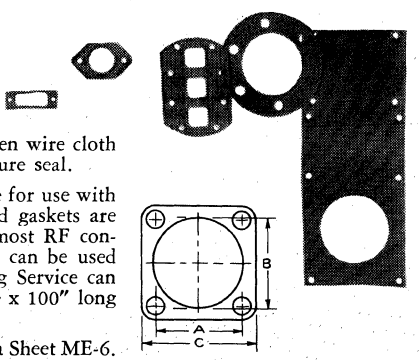
METALASTIC GASKETS



METEX Metalastic Gaskets are made from woven wire cloth and rubber to provide an efficient RF and pressure seal.

A standard line of Metalastic Gaskets is available for use with AN Connectors, Series 3100 and 3102. Standard gaskets are also available for Type SP, PC, and PT, and most RF connectors. Specially engineered Metalastic Gaskets can be used to solve difficult problems. METEX Engineering Service can design Metalastic Gaskets in sizes up to 8" wide x 100" long to meet special requirements.

For complete information, write for METEX Data Sheet ME-6.

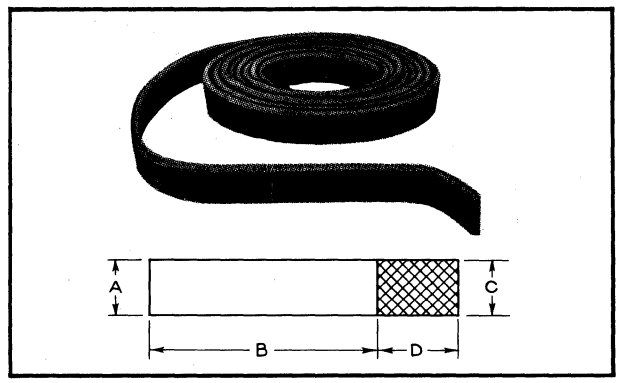
STANDARD & CONTEX™ COMBO-STRIP



METEX Combo Strips are combination RF shielding and sealing gaskets in strip form. In Combo-Strip, METEX Electronic Weatherstrip® and a sealing material are attached to make a single unit that is both RF and pressure tight. The material used for the sealing portion is usually closed cell sponge neoprene, although any sealing material may be furnished where required.

Combo-strips are available with pressure sensitive adhesive backing. Add letters "SB" to part numbers to obtain adhesive backing.

METEX Engineering Service will be happy to develop special strips to answer problems not solved by stock items listed.

For complete information, write for METEX Data Sheet ME-3.

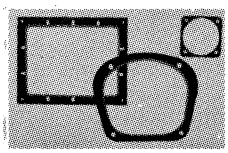
COMBINATION RF GASKETS

METEX Combination RF Gaskets are designed for use in joints that must be both pressure and RF tight. In these gaskets, sealing material and METEX RF Weatherstrip® are bonded into a single component.

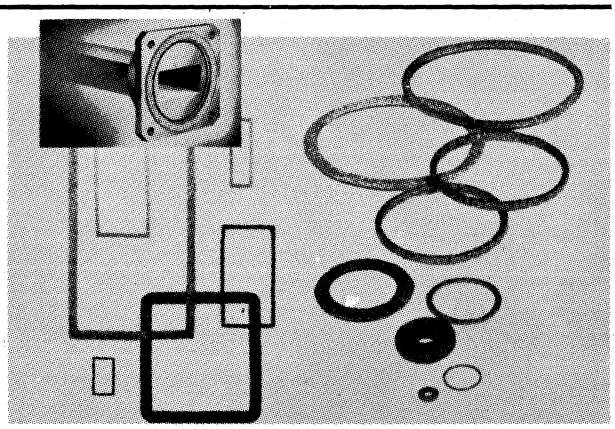
METEX Compressed RF Gaskets are usually used in smaller rectangular and round combinations. In the larger sizes, METEX Electronic Weatherstrip is joined to make a continuous gasket. The joint in the strip is carefully made and wrapped with a fine, knitted mesh to retain the strip ends. After wrapping, the entire joint is reformed so that the cross section is the same as the strip.



The material usually used for the sealing portion of the combination gasket is a 35-45 or 45-55 durometer Neoprene. Where special conditions must be met, other materials may be used.

For complete information, write for METEX Data Sheet ME-5.

COMPRESSED RF GASKETS



METEX Compressed RF Gaskets are made from knitted wire mesh that is die formed to the required size and shape under pressure. There are no joints, metal clips or shavings in the gaskets to cause trouble. Each individual gasket is made from a mesh that is knitted from one or two continuous wires. The gaskets are inherently conductive and resilient and will compensate for joint unevenness.

The shapes of METEX Compressed RF Gaskets are limited only by the size and shape of the dies.

METEX Electronics has available a large stock of forming dies for compressed gaskets. We suggest that designers consult with METEX Engineering Service on availability.

For complete information, write for METEX Data Sheet ME-4.

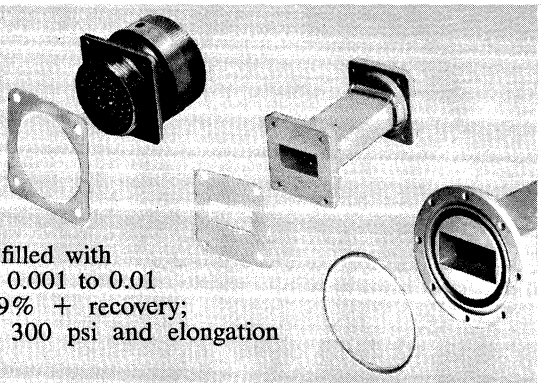
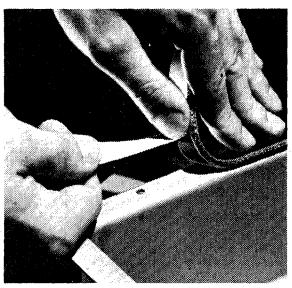
EMI/RFI SHIELDING

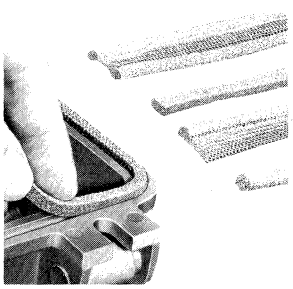
CONDUCTIVE SILVER/SILICONE GASKETS



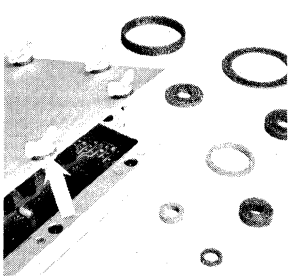
CONSIL® — a highly conductive silicone made possible by a fine network structure of continuously contacting pure silver particles, with all openings in the silver lattice filled with resilient silicone rubber. The volume resistivity ranges from 0.001 to 0.01 ohm-cm³. There is a 20% compression with 50 psi and 99% + recovery; practically no compression set. Tensile strength exceeds 300 psi and elongation ranges from 60% to 150% at rupture. Patent Pending.



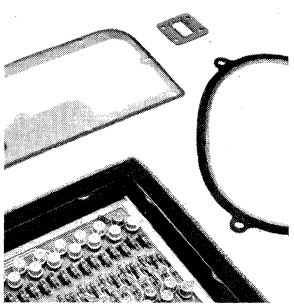
TECKSTIK® — is an easily installed EMI/RFI shielding gasket with a fluid seal, which has a pressure-sensitive adhesive back. Resilient and conductive, it eliminates radiated emissions while sealing out fluids or retaining cooling air. Available in rolls or complete gaskets.



TECKNIT STRIPS — are resilient, conductive, knitted wire mesh gaskets to shield joints having a periphery greater than 4" and simple in shape. Rectangular cross sections are installed in cast or machined enclosures, while round and fin types are used on sheet metal enclosures.

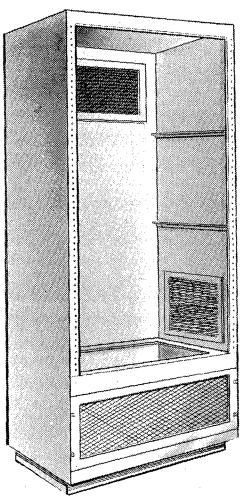


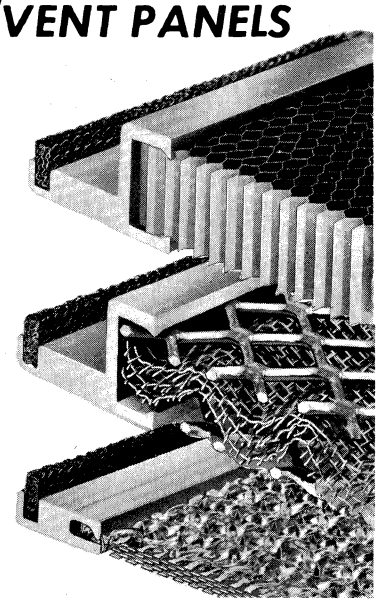
DUOGASKET® — are complete gaskets for sealing and shielding, combining die cut or molded rubber gaskets with a shielding gasketing to provide a single, dual purpose component. Used in all installations where EMI/RFI Shielding Increase must be optimized and pressure or fluid sealing is required.



FORMED GASKETS — are both standard and custom engineered round or rectangular mesh gaskets, which combine excellent resiliency and conductivity to assure RFI-tight joints. Such applications are waveguide choke flange joints, mounting RFI fitters, castings, covers and small EMI/RFI joints.

SHIELD/VENT PANELS





DESIGNED TO PERMIT THE FLOW OF COOLING AIR WHILE MAINTAINING THE SHIELDING INTEGRITY OF AN ELECTRONIC EQUIPMENT ENCLOSURE.

TECKCELL® PANELS are framed, gasketed, metal honeycomb panels ready-to-install. They provide ideal ventilating while negligibly reducing the flow of air and extremely effective EMI/RFI shielding in a wide range of metals, frame styles and chemical plating. The straight sided cells create little or no air turbulance.

TECKSCREEN® PANELS are used on electronic equipment enclosures which must be EMI/RFI shielded and, at the same time, require filtered inlet cooling air. Most standard air movers or blowers can be mounted behind this all metal, woven wire, filter medium. Twelve panel sizes are available to cool 19" or 24" cabinets.

TECKAIRE® PANELS are layers of aluminum expanded foil in an aluminum extrusion designed to filter inlet cooling air in electronic enclosures. Requiring less than 1/4" of enclosure depth, it combines excellent dust arrestance and EMI/RFI shielding properties with minimal restrictions to air flow.

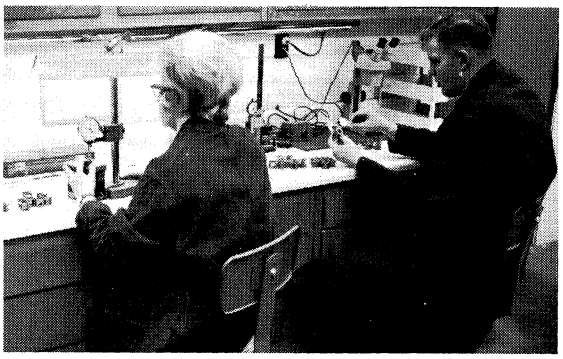
INTRODUCTION TO THERMOTECH



QUALITY ASSURANCE

At Thermotech, quality is no accident. It is the result of high standards and careful supervision . . . it reflects our corporate attitude, philosophy, and way of doing business.

This basic motivation is shared by every member of Thermotech Industries. An exacting Quality Control System is employed through every step of engineering and manufacturing . . . from the rigid requirements established for raw materials and components through the final inspection of the finished product.

At Thermotech, customers' specifications and requirements generally are exceeded and time consuming rejects virtually eliminated.

TOOL MOLDMAKING

An efficient tool and moldmaking department assures the rapid production of consistently high-quality precision parts at a reasonable cost. Self contained, well equipped and operated by expert Thermotech tool and moldmakers. Tool lead time is reduced and mold modifications are facilitated.

Ninety percent of this important work is accomplished in Thermotech's own well-equipped facilities thus developing many exclusive money saving mold-making processes.

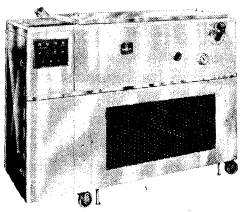
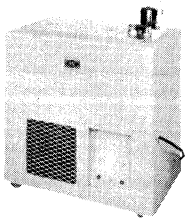
Custom Coil Forms molded in Thermoplastic, Thermosets and Fluorocarbons.

AMINCO

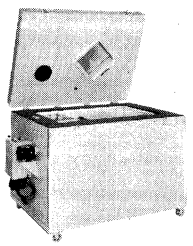
EQUIPMENT FOR THE ELECTRONICS ENGINEER



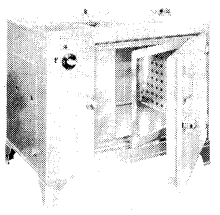
ENVIRONMENTAL TEST CABINETS provide closely controlled atmospheres (temperature and R.H.) in spaces ranging from bench top chambers to walk-in rooms. AMINCO-AIRE features unique temperature-humidity control system that conditions air before it enters test chamber. Temp. and R.H. conditions maintained constant within ±¾° F. dry bulb and ± ½% R.H. Variable cycles and pre-cut cams available to meet most MIL SPECS. 150, 300 & 450 CFM Models. Catalog 565-EEM.



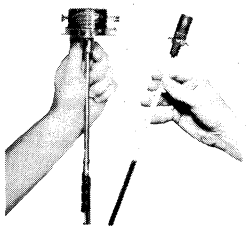
WIDE-RANGE LABORATORY BATH can be used for precisely-controlled constant-temperature bath or circulating controlled-temperature liquids through external apparatus. Contains both refrigerating and heating elements. Temperature range from —29° C to +71° C with temperature uniformities between ±.02 and ±.08° C. Two models available with capacities of 16 and 50 gal. Ideal for cooling water for low temp. viscometer tests, etc. Catalog 565-EEM.



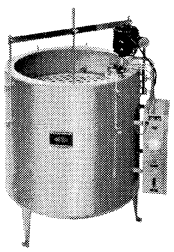
SUB-ZERO CABINET is dry-ice or liquid CO_2 operated, priced well below mechanically-operated units and has low maintenance cost. Provided with observation window. Hand holes, sleeve inserts and recording thermometers available as accessories. Range: +250 to —120° F. Cabinet temperature can be lowered ambient to —100° F. in about 90 minutes. Two sizes, with work chambers: 24 x 24 x 24 in.; and 18 x 16 x 20 in. Explosion proof models also. Catalog 565-EEM.



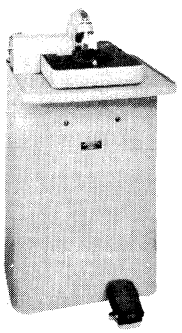
OVENS — Highest quality ovens at the lowest price per cubic foot of work space. Wide range of models includes: forced convection types for precise temperature control, minimum power consumption; high-temperature models for temperatures to 1000° F. Stainless or cold-rolled steel or combinations of both. Explosion-resistant fitting, explosion-proof motors. Catalog 565-EEM.



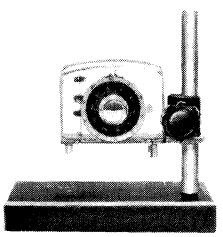
THERMOREGULATORS·AMINCO offers both bimetal and mercury thermoregulators for precise control of temperature in either liquid or air media. Units available with various temp. ranges with a lower limit of —95° C to an upper limit of +538° C; control accuracy of up to ±0.005° C under optimum conditions. Perforated protective tubes available for all thermo-regulators. Vertical, horizontal or oblique mounting. Bulletins 2366 and 2370-EEM.



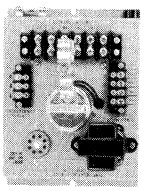
GENERAL PURPOSE BATH. Operates with oil or water. Circulates controlled-temperature liquids through apparatus such as refractometers, polarimeters, viscometers, etc. Ambient to 300°C; uniformity ±0.04 to ±0.18°C. Heavy-duty motorized stirrer. Adjustable immersion shelf, four hanging rods. Heats quickly, maintains high operating temperature. Capacity: 27 gal. Bulletin 530-EEM.



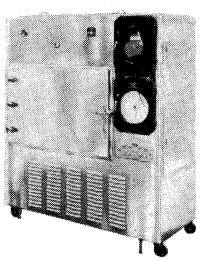
CUTTING-OFF MACHINE provides an inexpensive substitute for expensive machine tools . . . performs smooth, complex cuts in ceramics, stone, quartz, steel and other metals. Especially suitable for cutting tubing of all kinds. For example, machine will cut 1/32-in. slices of 1½-in. diameter glass tubing, with smooth, parallel edges. Bulletin 2312-EEM.



MAGNE-GAGE measures, non-destructively—in 45 seconds—metal and non-metal coatings on iron and steel; nickel coatings on magnetic base or on iron or steel; curved and flat surfaces with ±10% accuracy. Non-magnetic coatings up to 0.080 in. thick on iron & steel; nickel coatings up to 0.001 in. thick on non-magnetic base metals; polished nickel coatings up to 0.002 in. thick on iron or steel. Portable. Bulletin 2253-EEM.



AMINCO manufactures relays of proven dependable performance, including: **ELECTRONIC RELAYS** for power amplication of 200,000,000 — reliability up to 5,000,000 operations; **SUPERSENSITIVE RELAYS** for power amplification of 50,000 and a life xpectancy of 50,000,000 operations (unaffected by line-voltage variations of ±10%); **POWER RELAYS,** including mercury-plunger type, shatterproof, for millions of trouble-free operations. Relays, immersion heaters, motor-driven stirrers & accessories, circulating pumps, described in Catalog 361-EEM.



CLIMATE-LABS provide controlled temp. and R.H. in four models offering 9- or 3-cu. ft. test chambers, each with or without program control. PC models maintain conditions within ±1% R.H. and ±1° F. B models maintain conditions within ±¾° F. and ±½% R.H. 3-PC Model capable of performing Step 7A of MIL-STD-202B, Method 106B, automatically. Variable cycles and precut cams for most MIL Specs Catalog 565-EEM.

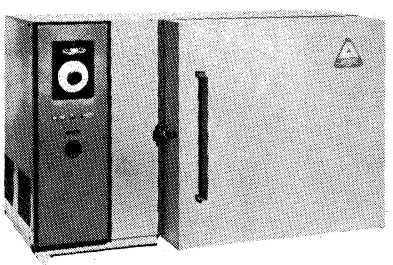
Environmental Test Chambers

MOST COMPLETE, MOST RELIABLE LINE IN THE INDUSTRY! DELIVERED FROM STOCK AT PRODUCTION-LINE PRICES!

Associated Testing Laboratories, Inc., one of the country's largest independent environmental testing facilities serving the aerospace and electronics industry, offers through its Manufacturing Division a complete line of environmental test chambers for research, production, reliability testing and quality control.

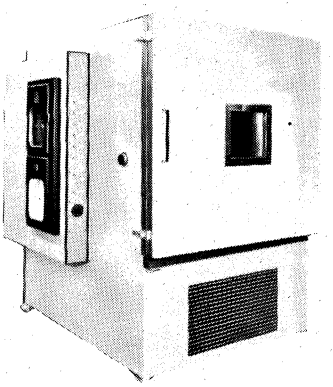
Originally designed for use in Associated's own testing laboratories, these chambers have been time-tested and use-proven in industry after industry, as well as in thousands of hours of on-the-line operations at our own laboratories, performing tests to the most rigorous government specifications. Associated's environmental chambers are a standard line of equipment, manufactured in production quantities and delivered from stock. Detailed specifications, technical data and price information are available directly from our plant or from your regional Associated representative.

LOW-HIGH TEMPERATURE CHAMBERS



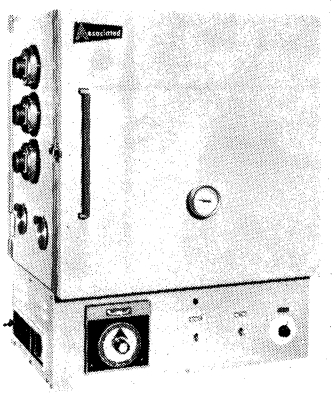
A complete line of chambers for military and commercial testing offering a choice of mechanical refrigeration or CO_2 cooling • Rack, bench and stacking types • Sizes from 0.5 to 27 cubic feet • Low Temperatures to −120°F, high temperatures to +500°F • Solid state controllers, choice of ±½°F or ±¼°F control stability • Adjustable high temperature fail-safe • Wide range of options • Prices for CO_2 chambers start at $335., prices for mechanically refrigerated chambers start at $875. • **Delivery From Stock.**

TEMPERATURE-HUMIDITY CHAMBERS



Performance features normally found only in custom-built chambers, built in production quantities and at production prices • Sizes 4, 8, and 27 cubic feet • Choice of single stage or cascade refrigeration • Optional CO_2 capability • Temperature ranges from −100°F to +350°F • Humidity ranges from 20% to 95% • Forced air circulation • 2-Pen 2-Cam programming recording controllers • Adjustable high temperature fail-safe • Integral demineralizer • **Delivery From Stock.**

BURN-IN TEST CHAMBERS



Designed specifically for life and burn-in testing of semiconductors, integrated circuits, and axial lead devices • Test temperatures from ambient to +300°F, with choice of ±½°F or ±¼°F temperature control stability • Rise time ambient to upper limit in 30 minutes • Printed circuit board trays offer maximum burn-in capacity on axial lead devices of up to 2,200 units per chamber • Low temperature CO_2 capability optional • Prices for standard printed circuit boards and chambers available upon request.

• *Write or call for free catalog of Environmental Test Chambers and Test Equipment.*

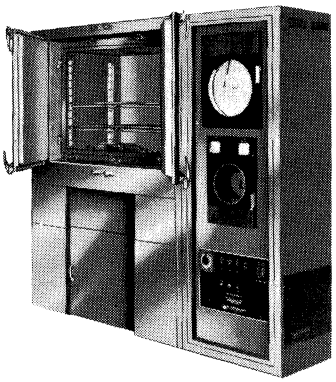
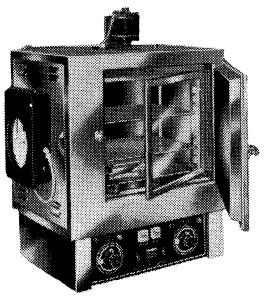
BLUE M TEMPERATURE CONTROLLED EQUIPMENT FOR ELECTRONICS RESEARCH AND PRODUCTION



FULL-RANGE TEMPERATURE/HUMIDITY CHAMBERS

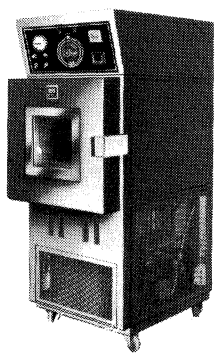
Maximum capability cabinets to perform all current MIL humidity tests. Dual wet and dry bulb POWER-O-MATIC 60® Saturable Reactor Control Systems assure absolute stability and reliability. High speed stabilization and the finest control tolerances available insure accurate reproduction of today's test requirements plus the capability of meeting future requirements when existing standards are tightened. These mechanical convection, horizontal air-flow units feature programming and separate monitoring recorder. Temperature range: −18°C. to +93°C. (±½°C.). Meets MIL-202C, Method 106-B, Step 7A; automatically performs −10°C. dip without changing cams. Maintains R. H. ±½%. Chamber sizes: 5.8, 11, 27, and 64 cu. ft.

Similar units for single steady state tests available. Also new, compact top loading cabinets with similar operating characteristics.



NEW AIR-COOLED TEMPERATURE/HUMIDITY CABINETS

HUMIDAIRE Combination Temperature/Humidity Cabinets, with independent wet and dry bulb POWER-O-MATIC 60. Saturable Reactor Control Systems provide extreme accuracy from +12°C. above ambient to +93°C. (±½°C.). Use air for cooling, not costly conditioned water. Saves 30,000—100,000 gallons a year. The most reliable and economical chamber ever developed for long-term high temperature/humidity testing. Ideal for such steady state tests as MIL-202C, Method 103B—continuous operation for 56 days. Four sizes: 1.47, 3.24, 5.5 and 10 cu. ft.



NEW VERSA-RANGE REFRIGERATED TEST CHAMBERS

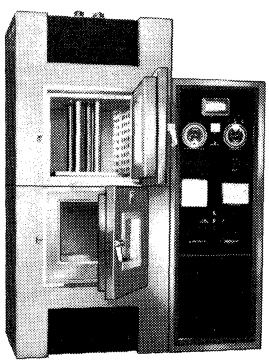
Incomparable control accuracy, reliability and dependability—plus a choice of two versatile ranges: −100°F. to +400°F. and −40°F. to +200°F. Five chamber sizes—3 to 64 cu. ft.—for each range. POWER-O-MATIC 60 control carefully matched with heating system and exclusive quality non-cycling mechanical refrigeration system for maximum efficiency and economy. Rapid pull-down. Also compact top-opening models and chest type cold chambers with ranges to −40°F. and −120°F.

THESE ARE ONLY EXAMPLES OF OUR COMPLETE TEMPERATURE/HUMIDITY AND REFRIGERATION CONTROL CAPABILITY

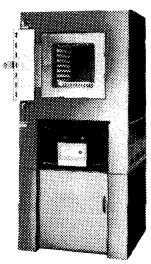
BLUE M THERMAL SHOCK TEST CHAMBERS DESIGNED FOR MIL-STD-202C

DUAL THERMAL SHOCK TEST CABINETS

MEET METHOD 107B CONDITIONS A, B, C & F

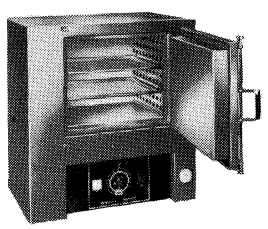


2.3 cu. ft. work chamber moves vertically from lower cold chamber to upper heat chamber as required by spec. Cold chamber uses CO_2 or LN_2 to reduce incoming load to −55°C or −65°C. Has solid-state instrumentation. Heat chamber, with range of +204°C (+400°F), regulated by POWER-O-MATIC 60 Control for reliable, straight-line performance. Also available: 3-stage Thermal Cycling Test Cabinets to meet Method 102A, Preferred Conditions C & D. Test accomplished in one unit instead of two as is customary. Operation of both models is fully automatic—with reliability and accuracy to meet spec. easily.



BLUE M FURNACES

A wide variety of research and production models to suit the strictest needs. Box type muffle furnaces, Globar units — in bench and floor models — new tube furnace. Most have solid-state instrumentation for extremely accurate temperature control and unmatched reliability. Temperatures to +3000°F. Quality materials and workmanship throughout.



BLUE M OVENS

All types. Mechanical and gravity... batch, aging, vacuum, life-test, hazard-safe, gas forming, annealing. Simple lab models to units for Mil Specs. Sizes to 96 cu. ft.... temperatures to +1200°F. Most have patented POWER-O-MATIC 60 Control, others feature patented POWER-O-MATIC 70(TM) Solid-State Proportioning Control. All accessories, including programming, available.

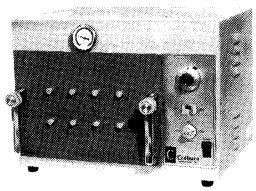
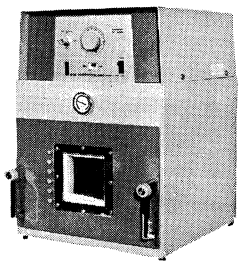
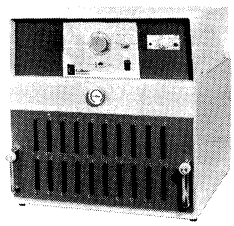
Colburn Instruments, Inc.

A DIVISION OF PADIC, INC.

Colburn environmental test chambers offer these features





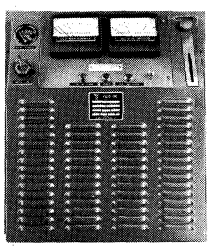


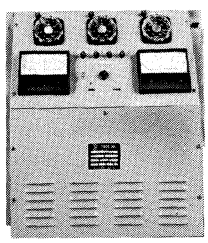
- SOLID STATE CONTROLLER provides close tolerance temperature control with adjustability to satisfy any testing application.
- SOLID STATE POWER RELAY provides electrical noise-free operation, increases longevity.
- REMOVABLE CONTROL PACKAGE provides extreme versatility of temperature control, available on Model 0640 with any combination of nine special features.
- ACCESSORY EQUIPMENT provides testing flexibility, simplifies testing.

Colburn close tolerance, low gradient test chambers provide rapid response with no overshoot of set temperature, reducing test time and exposure.

Environmental Water Chillers

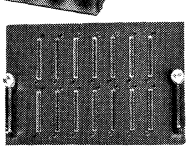
AEROSPACE/MACHINE TOOLS





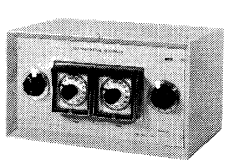
Developed to satisfy the rigid requirements of today's space programs, Colburn water chillers are finding wide acceptance as remote cooling systems for heavy machinery such as hydraulic presses and plastic and rubber extruders. Temperature range from +40°F to +120°F.

Mark II, a new series of sequential scanners for environmental test chambers that offers simultaneous load and read capability in testing two- and three-lead devices.



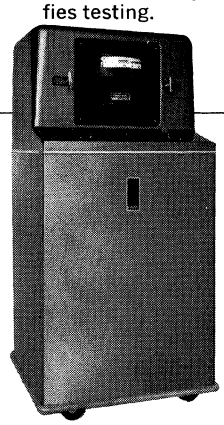
These doors are designed to facilitate testing semiconductors. Up to twenty 44-pin connectors can be accommodated to enable testing of 80 diodes or 40 transistors at one time. Test cards with mounted devices are secured inside the chamber and are powered and/or monitored from outside.

Time-Temperature Sequencers: Provides automatic continuous cycling between any two temperatures within the range of the chamber. Any time duration can be set for either temperature, independent of the other.



Customized systems...

Colburn Instruments welcomes all inquiries for development of environmental systems regarding heating, cooling or humidity control.

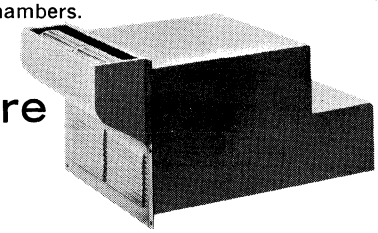


Colburn temperature conditioning units offer

- HIGH THERMAL CAPACITY—more thermal work from these units than is typically available with temperature chambers of 100 cubic feet and up.
- CLOSED LOOP CONDITIONING—provides control capabilities of extreme temperatures, saves testing time and expense.
- SERVO FEED-BACK SIGNAL—allows conditioning unit to control the temperature where it's needed, at the test specimen.
- ACCESSORY EQUIPMENT—provides testing flexibility, simplifies testing.

Colburn close tolerance temperature conditioning units convert simple, inexpensive enclosures into automatically-controlled high/low temperature chambers.

temperature humidity coolers



FOR ELECTRONIC PERIPHERAL EQUIPMENT

Ideal for controlling both temperature and humidity within electronic enclosures. Especially well-suited for instrumentation tape recorders. Variable controller enables wide operating range in an ambient of 0 to 140°F. Maintains enclosures at 68°F to 72°F; humidity at 25-35%. Accommodates 19 inch rack mounting.

UNHOLTZ-

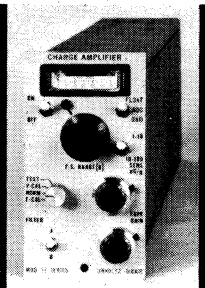
Charge/voltage amplifiers for shock and vibration monitoring

CONDITIONS SIGNALS FROM PIEZOELECTRIC TRANSDUCERS FOR DRIVING TAPE AND GALVO RECORDERS

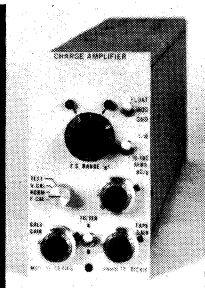
Popular series of signal conditioning amplifiers features individual double shielded power supplies, vinyl-clad, totally enclosed case, solid state printed circuitry, ultra low noise levels, portability of separate units, wider frequency range, and switchable integral charge or remote-preamp operation. Panel height only 5¼ inches with meters. Full scale ranges of .1 g to 10 Kg with accelerometer sensitivities from 1 pC/g to 100 pC/g.

D11 SERIES

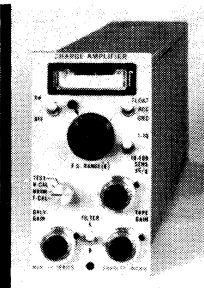
Model D11V
Tape output only
$525.00



Model D11MV
Tape and meter
$575.00



Model D11GV
Tape and galvo
$590.00



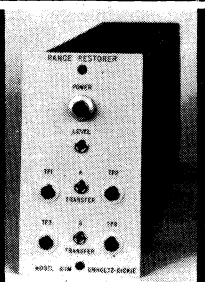
Model D11MGV
Tape, galvo, meter
$640.00

Basic D11 series permits operation with grounded accelerometers while eliminating usual ground loop problems. Differential circuitry provides rejection of common mode signals by a factor of 1000 or more.

OPTIONAL FEATURES

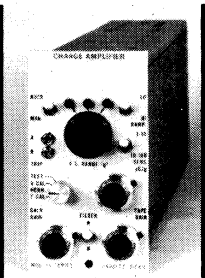
S	10mV/g Servo Output	$50.00
O	1 kHz Internal Calibration Oscillator — fixed amplitude, sine wave	$50.00
F	Floating DC output for amplifiers supplied with meters	$25.00
—8	Large Meter (2½ inch scale) with 8¾ panel height	$20.00
LF2	Extended low frequency response (±5% down to 0.5 Hz)	$25.00

AUTORANGER SERIES

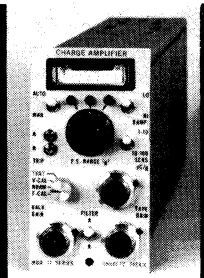


Model 811M
Range restorer
$1200.00

Model 11MAV
Tape and meter
$745.00



Model 11GAV
Tape and galvo
$760.00



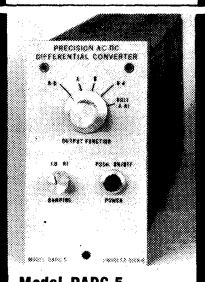
Model 11MGAV
Tape, galvo, meter
$810.00

AUTORANGER series selects best of 3 adjacent full scale ranges. Pilot light and dc code signals indicate range selected. Range sequences of 1, 3, 10 . . ., or 1, $\sqrt{10}$, 10 . . . or 1, 10, 100 . . . are offered. Companion RANGE-RESTORER converts tape recorded data to original dynamic range.

OPTIONAL FEATURES

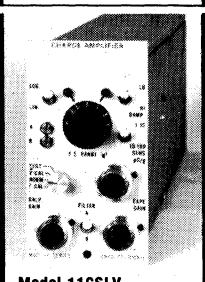
S	10mV/g Servo Output	$50.00
O	1 kHz Internal Calibration Oscillator — fixed amplitude, sine wave	$50.00
F	Floating DC output for amplifiers supplied with meters	$25.00
—8	Large Meter (2½ inch scale) with 8¾ panel height	$20.00

LOG AMP SERIES



Model DADC-5
Differential AC-DC converter
$900.00

Model 11MSLV
Tape and meter
$800.00



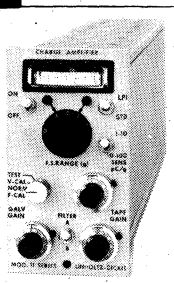
Model 11GSLV
Tape and galvo
$815.00

Model 11MGSLV
Tape, galvo, meter
$865.00

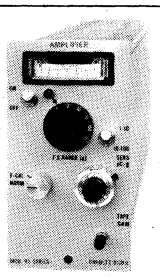
Log amp series compresses 1000:1 input signal variation to 4:1 output signal variation. Waveform and frequency content of output is same as input. When combined with companion DADC-5, direct measurement of transmissibility can be made down to 5 Hz.

OPTIONAL FEATURES

TC	Special connector and circuitry for insertion of tracking filter	$50.00
O	1 kHz Internal Calibration Oscillator — fixed amplitude, sine wave	$50.00
F	Floating DC output for amplifiers supplied with meters	$25.00
—8	Large Meter (2½ inch scale) with 8¾ panel height	$20.00



Model 11MGV-LF1
Extended low frequency response (±5% down to 0.2 Hz). Same options as D11 series except "D" feature not available. LF1 option is $50.00.



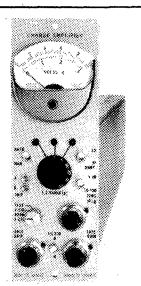
Model V11MS $445.00
Tape, meter, servo

Galvo	$65.00
Osc.	$50.00

Economy Model V11 series operates with either charge type remote preamp (11CA-2) or voltage type remote preamp (11PA-2).

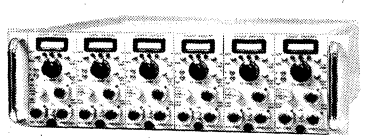
Model 11CA-2
Remote Charge Preamp or
Model 11PA-2
Remote Voltage Preamp
These two preamps operate with all types of series 11 signal conditioning amplifiers

Model 11CA-2	**$80.00**
Model 11PA-2	**$50.00**



Model 11 series with —8 option

Export prices slightly higher; check with factory.



Model 11RA Rack Frame Adapter
with six channels of Model 11

Model 11RA	**$125.00**
Model 11RA-8	**$175.00**
Blank panel	**$7.50**

Model 11P-2
Dual Channel
Portable Adapter
with 2 channels of Model 11
Model 11P-2 $70.00

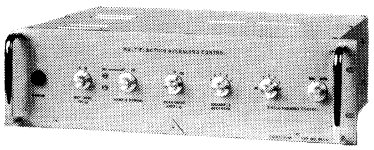
MULTIPLE SHAKER SYSTEMS FOR LARGE LOADS, HIGH FORCE RATINGS, OR SPECIAL APPLICATIONS ARE AVAILABLE

Accessory instruments

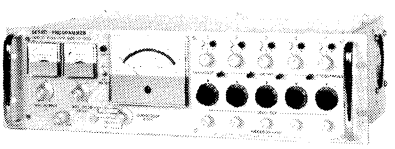
Shaker system controls and protective functions

New '69



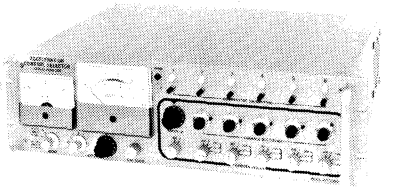
MULTIFUNCTION AVERAGING CONTROL
Model MAC-6C

Features: Phase insensitive averaging for at least 6 inputs ■ Allows averaged shaker system control for sine and random tests ■ Sine tests: absolute average of output yields average of input magnitudes ■ Random tests: spectral density of output yields average of input spectral densities ■ Freedom from detector time constant problems ■ DC output for recording.



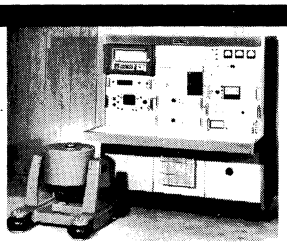
SERVO PROGRAMMERS
Models SP5 and SP2

Features: Combines functions of amplitude servo and vibration programmer in one instrument ■ Programmer contains up to five program segments with servo controlled acceleration, velocity or displacement selectable for each segment (SP5) ■ Simplified closed-loop presetting of vibration levels before actual test is performed ■ Optional safety shutdown at pre-set level of acceleration ■ Solid state, plug-in, printed circuit construction ■ Analog output for recording levels.



ACCELERATION CONTROL SELECTOR
Model ACS-6
Solid State Switching

Features: Automatically switches to highest (or lowest) accelerometer for amplitude servo control ■ Up to 6 input acceleration signals ■ Switching speed continuously variable with frequency ■ Weighted switching from .01 to 10 times nominal acceleration ■ Wide dynamic range ■ Pilot light indicates controlling channel.



Calibration systems for accelerometers

AUTOMATIC CALIBRATION SYSTEMS

Unholtz-Dickie automatic calibration systems, based on Model 106A shaker automatically plot accelerometer calibration curves of charge or voltage sensitivity vs. frequency to any level up to 100 g and 10 kHz. Original data is permanently plotted — eliminating operator error in readout and transcription. Continuous curve detects all variations, expansion or compression of vertical scale for optimum accuracy and readability of curves. One per cent accuracy of unknown accelerometer relative to reference.

ABSOLUTE CALIBRATION OPTICAL SYSTEM

Model DO-5000. New optical instrument gives digital readout of absolute displacement.

Piezoelectric accelerometers

Sub miniature
0.8 grams

General purpose
high sensitivity

For accurate vibration measurements this D21 series of shear mode types insure freedom from case sensitivity and lowest cross axis sensitivity. A range of sizes covers most applications, down to a 0.65 gram sub-miniature model. This series uses Lead Ziconate-Titanate crystals. Also available are Bismouth composition crystals for high temperatures.

Complete information is available on all products. Write to Unholtz-Dickie.

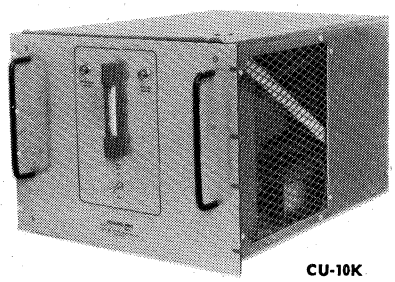
COOLING UNITS
HEAT EXCHANGE - REFRIGERATING

Electro IMPULSE, INC.



CU-10K

CU SERIES

Heat exchange cooling units are useful whenever it is desirable to prevent runaway heat conditions. Heat is absorbed by a circulating coolant liquid, then exhausted into the ambient by forced air passing through a radiator.

Use this series when coolant temperatures can be allowed to rise above ambient.

Model	Capacity Watts	Coolant Flow GPM (0-Back Pressure)	Input Power Frequency	Amps	Suitable Liquids*	Back Pressure P.S.I.
CU-500	500	.3	110v - 60 Hz 24v - DC	6	0	15

CU-100K	100000	20	220v - 60 Hz	15	O	20

*Suitable Liquids: Water — W. Oil — O. Ethylene Glycol with inhibitors — ETH.
Optional Equipment Available: Flow Switch, Thermometers, Thermostat, Flowmeter, Heater and Water De-ionizer.

RU SERIES

Models from this series are required when coolant temperatures must be below ambient. Using refrigeration, they can provide temperatures to 0 degrees C and below, while removing up to 6800 watts of heat.

These units are ideal for remote applications. Coolant temperatures are low, flow rate is steady, and the final heat sink can be in a location which will not cause overloading of air-conditioning equipment.

Special options can provide temperature control of ±1 degree C, while combinations of refrigeration and heating can hold temperatures at any point above ambient.

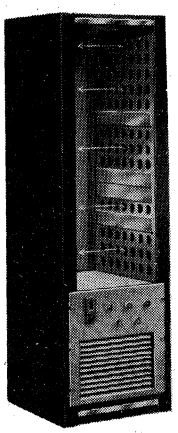
RU-75	1,275	1	60	115	1
RU-100	1,700	2	60	115	1
RU-200	3,400	2	60	220	1.3

Optional Equipment Available: Thermometer, Thermostat, Flow Meter, Heater.
In chart above, change model designation to RC for Rack Cooler specifications, and to RUH for Refrigeration-Heating Combination shown at left.



RACK COOLER

This series is designed for air, rather than liquid cooling. A sealed volume of air is cooled by a refrigeration system and continually re-circulated within the enclosure. Cool sensitive rack-mounted electronic equipment, or use duct work and manifolds for extensive cooling of radar or other electronic control consoles and cabinets.

For specifications, see chart above and merely substitute "RC" for "RU" in the Model column.

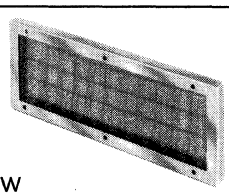
EVANS air filters

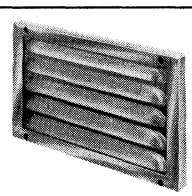
for Electronic Cabinet Application

. . . used on Computers . . . Card Readers . . . Tape Transports . . . Transceivers . . . Power Supply Units . . . both large and small cabinetry. Evans Air filters are permanent. Rigid. Aluminum. Made to withstand the brutal abuse of military field conditions. Frames have mitered corners for smooth, close tolerance fit. Die cut, expanded aluminum grids are criss crossed and precision fitted into each filter. Patented Brillo Lock design gives more air delivery with positive cleaning results.

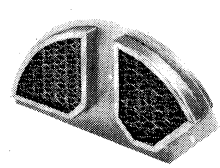
Tolerance:	± 1/32″
Velocity:	200 to 900 FPM
Efficiency:	75% AFI Test
Finishes:	Available in chemical film finish to meet requirements of MIL-C-5541 . . . MIL-F-14072 . . . MIL-A-8625
Sizes:	Filter of 1/2″ or 3/4″ dimension. Made to a maximum area 400 sq. inches . . . with maximum length 25″ on one side without special bracing. For complete information write or call.



LOW RESISTANCE FILTER
Special serts permit fastening solidly to blower unit. Made for air drop equipment.



LOUVERED FILTERS
For outside application. Louvers protect filter media from water, ice, snow.



HEAVY DUTY UNIT
For rugged military use. Extra rigid frame made from .063 aluminum.

The George Evans Corporation 121-37th Street, Moline, Illinois 61265

GLOBE

BLOWER & FAN SELECTOR

24 HOUR delivery on many units

Globe Industries offers a wide range of A.C. and D.C. fans and blowers for every cooling need. Many standard models are stocked for 24-hour delivery. And because Globe is the largest precision motor source, we can move fast to provide engineered specials in prototype or production quantities. Check your needs below. Hundreds of other units available. Request Catalog BBL.

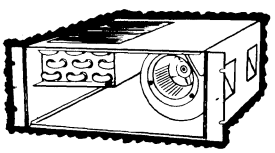
PACKAGED RACK BLOWER

Pressurizes and cools. Removes air pollution. Over 100 models, up to 1000 CFM. Commercial. Mil-Spec. EMI Shielded.

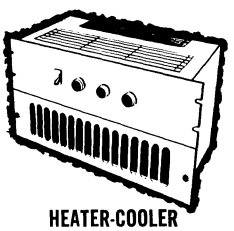
PACKAGED FAN (REVERSIBLE)

Low cost. Minimum space. Shallow depth. Pressurizes or exhausts. Four models, to 1200 CFM. Commercial. Mil-Spec. EMI Shielded.



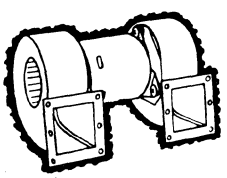
HEAT EXCHANGER

Maintains cabinet at 80°F max. with 1 KW heat dissipation. Air recirculates in rack and is cooled by exchanger in blower case.



HEATER-COOLER

For field installations, unheated military huts, unattended control stations. Maintains even 65°F with surrounding air as low as 10°F.

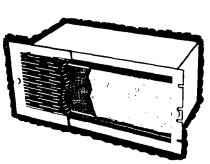


CENTRIFUGAL BLOWER

Single or dual. For spot cooling or pressurizing. 10 to 1000 CFM. Exhaust in any position. Commercial and Mil-Spec.

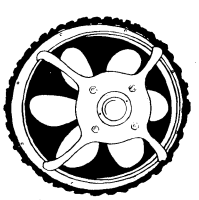
VENTURI-MOUNTED FAN

Rugged economy. 420 CFM, push or pull. Mounts top, bottom, or side. No vibration. Quiet. Commercial or Mil-Spec.



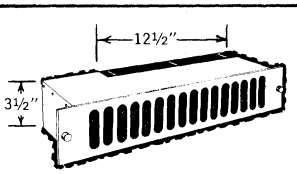
EMI SHIELDED UNITS

Cuts signal leakage either inward or outward in the airstream. Certified to MIL-I-6181D.



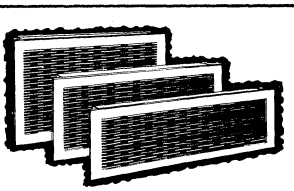
ORIFICE FAN — PANEL FAN

Extra-low-cost cooling. Up to 550 CFM. Strong, quiet, vibration-free. Easy to install. Life lubrication.



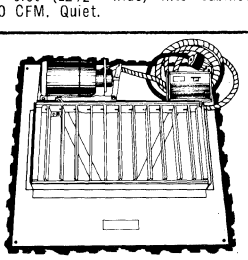
SLOT BLOWER

Ideal for densely packed circuitry. Fits 3½" panel slot. Forces narrow air slot (12½" wide) into cabinet. 150 CFM. Quiet.



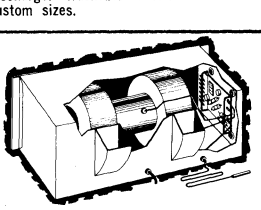
FILTER-GRILLE PANEL

Self-contained. Easy to install. Provide more exhaust louver area for improved air discharge. Washable filter. Standard or custom sizes.



TEMPERATURE CONTROLLED LOUVER

Solid-state! Fail-safe! Modulates cool air flow between 55-85°F. Automatic!



SOLID-STATE TEMPERATURE CONTROLLER

Cuts audible noise level. Modulates blower speed! Keeps equipment operating between 80-90°F. More reliable than air conditioning—but costs less.

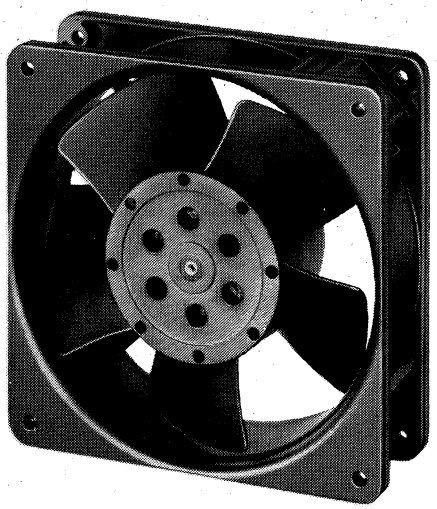
PAMOTOR

MINIATURE AXIAL FANS

MODELS 4500 and 4550 (Shaded-pole Type)

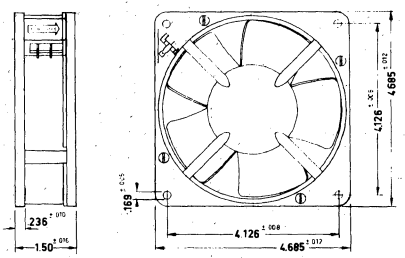
$4\frac{11}{16}$" x $4\frac{11}{16}$" x $1\frac{1}{2}$" • ALL-METAL • LOW-NOISE LEVEL

*Provides 115 cfm with less than 37.5 dB SIL**



- All-metal precision hubs, impellers, and die-cast housings eliminate warping often found in plastic fans.
- Designed for applications in wide variety of electronic apparatus, such as computers, laboratory and office machines, industrial and military communications equipment, industrial control equipment, sound systems, power supplies, telephone equipment, etc.
- Designed to operate continuously at room temperature (25° C) for over 100,000 hours—even at uppermost limit of 55° C, 20,000 operational hours, continuous duty may be expected.
- Delivers more air at a lower noise level, yet priced under similar conventional plastic fans.
- Powerful shaded-pole motor operates with low internal heat rise—efficient inside-out design.
- Hand-fitted proven broached dual-sleeve bearing system assures longer, more reliable operation.
- Weighs just 1¼ lbs. and is interchangeable with similar, less reliable $4\frac{11}{16}$" fans.
- Operates over range of 105 to 125 VAC at dual frequency of 50/60 Hz.
- Has Underwriters' Laboratories Inc. Yellow Card Component Recognition Number E41168.
- Accessories available for use with this model include mounting brackets, filter, metal screen assembly, finger guard, plug and cord assembly.

*Speech Interference Level



Characteristic	MODEL 4500	MODEL 4550
Voltage	117 volts	230 volts
Frequency*	60 Hz	60 Hz
Air Flow	115 cfm	115 cfm
Speed	2900 rpm	2850 rpm
Input Power	20 watts	17 watts
Weight	1 lb. 4 oz.	1 lb. 4 oz.

*These models also operate at 50 Hz.
Additional data available upon request.

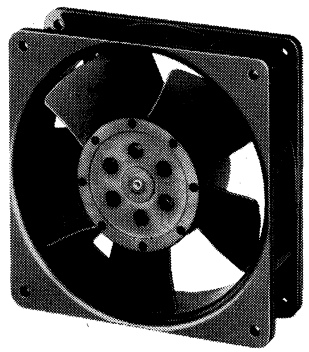
PAMOTOR

MINIATURE AXIAL FANS

MODELS 4506 and 4556 (Shaded-pole Type)
$4^{11}/_{16}$" x $4^{11}/_{16}$" x $1^{1}/_{2}$" • ALL-METAL • 115 CFM



Ball bearing fans for 85° C ambient temperature operation

- Designed for over 20,000 hours of operation at 85° C.
- Low noise level of less than 37.5 dB SIL (Speech Interference Level).
- Designed to meet UL requirements.
- Offer same performance characteristics as Models 4500 and 4550.
- Standard accessories available include mounting brackets, filter, metal screen assembly, finger guard, plug and cord assembly.

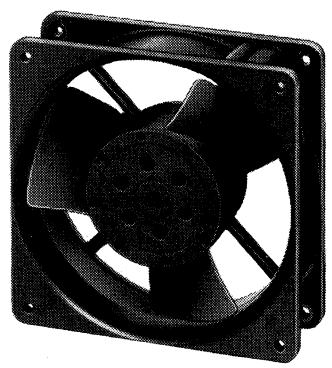
MODEL 4800 (Shaded-pole Type)
$4^{11}/_{16}$" x $4^{11}/_{16}$" x $1^{1}/_{2}$" • ALL-METAL • 70 CFM

Specifically designed for noiseless performance . . . noise level less than 20 dB SIL.

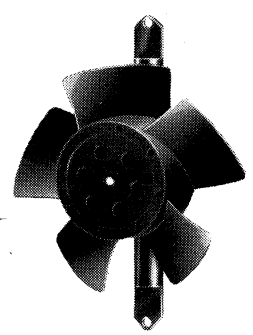
- Designed for applications in Hi-Fi/stereo equipment, TV, office copying machines, etc. where noiseless performance is a prime requirement.
- Hand-fitted proven broached dual-sleeve bearing system with large oil reservoir ensures longer, more reliable operation.
- Designed to meet UL requirements.

Characteristic	MODEL 4800
Voltage	115 volts
Frequency*	60 Hz
Air Flow	70 cfm
Speed	1650 rpm
Input Power	10 watts
Weight	1 lb. 4 oz.

*This model also operates at 50 Hz.
Additional data available upon request.



MODELS 4700 and 4750 (Shaded-pole Type)
$4^{1}/_{8}$" (DIA.) x $1^{1}/_{2}$" • ALL-METAL • 65 CFM

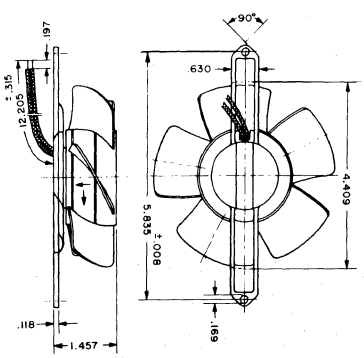


low-cost fans for use where venturi housing is not needed

- "Bracket" models save space and weight when equipment arrangement serves as venturi housing.
- Attach to heat sinks and reduce space requirements.
- Designed to meet UL requirements.

Characteristic	MODEL 4700	MODEL 4750
Voltage	115 volts	220 volts
Frequency*	60 Hz	60 Hz
Air Flow	65 cfm	55 cfm
Speed	2800 rpm	2500 rpm
Input Power	21 watts	19 watts
Weight	1 lb.	1 lb.

*These models also operate at 50 Hz.
Additional data available upon request.



THESE AND A HOST OF OTHER SPECIAL APPLICATION ALL-METAL FANS ARE AVAILABLE FOR IMMEDIATE DELIVERY FROM PAMOTOR AND KEY DISTRIBUTORS IN THE U.S. AND CANADA. CONTACT PAMOTOR OR YOUR DISTRIBUTOR FOR MORE DATA AND PRICES.

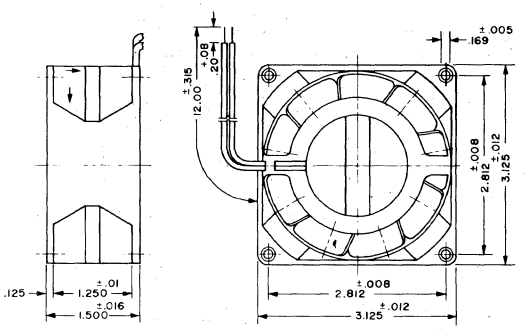
Phone: (415) 347-1203 • TWX: 910-374-2353

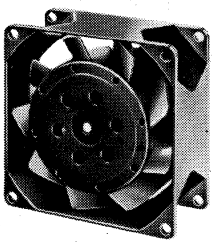
PAMOTOR MINIATURE AXIAL FANS

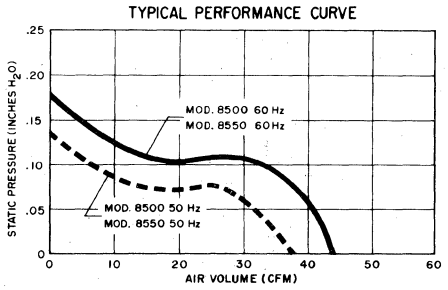
MODELS 8500 and 8550 (Shaded-pole Type)
3 1/8" x 3 1/8" x 1 1/2" • ALL-METAL • 43 CFM

Ultra-compact . . . 1/8" thinner than other 3 1/8" fans

- Unmatched low noise level of 28.8 dB SIL.
- Ideal for tight dimensional applications where performance and cost are prime considerations.
- Standard mounting dimensions for EIA 3½" rack panels.
- All-metal construction ensures longer life in various low-profile electronic equipment.
- UL recognition number E41168.







Characteristic	MODEL 8500	MODEL 8550
Voltage	115 volts	220 volts
Frequency*	60 Hz	60 Hz
Air Flow	43 cfm	37 cfm
Speed	3200 rpm	2600 rpm
Input	13 watts	13 watts
Weight	1 lb. 2½ oz.	1 lb. 2½ oz.

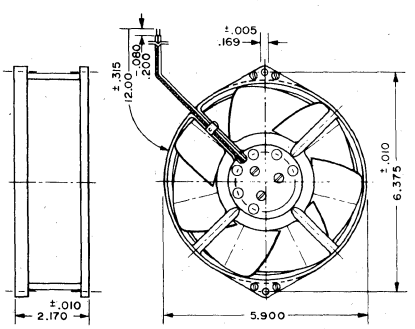
*These models also operate at 50 Hz. Additional data available upon request.

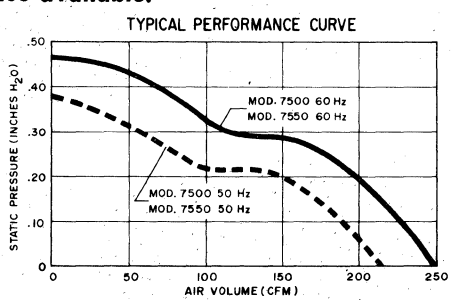
MODELS 7500 and 7550 (Shaded-pole Type)
6" (DIA.) x 2" • ALL-METAL • 250 CFM

use one to replace two or more fans where max. air movement is needed with low 40.5 dB noise level

- High air delivery ideal for cooling large enclosures with high resistance to air flow.
- New design of pressure type blades will sustain delivery as high as 200 cfm at .2 inches of water back pressure.
- UL recognition number E41168.

MODELS *7506/7556*, ball bearing fans for 85° C ambient temperature operation, also available.





Characteristic	MODEL 7500	MODEL 7550
Voltage	115 volts	220 volts
Frequency*	60 Hz	50 Hz
Air Flow	250 cfm	220 cfm
Speed	3250 rpm	2700 rpm
Input	40 watts	36 watts
Weight	2 lbs. 11½ oz.	2 lbs. 11½ oz.

*These models also operate at 50 Hz. Additional data available upon request.

THESE AND A HOST OF OTHER SPECIAL APPLICATION ALL-METAL FANS ARE AVAILABLE FOR IMMEDIATE DELIVERY FROM PAMOTOR AND KEY DISTRIBUTORS IN THE U.S. AND CANADA. CONTACT PAMOTOR OR YOUR DISTRIBUTOR FOR MORE DATA AND PRICES.

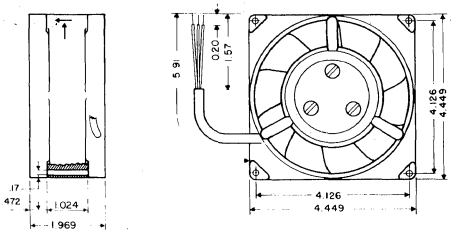
PAMOTOR

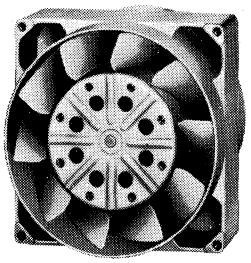
MINIATURE AXIAL FANS

MODELS 1000A, 1100, and 1300 (Induction Type)
$4\frac{7}{16}$" x $4\frac{7}{16}$" x $1\frac{31}{32}$" • ALL-METAL • 125 CFM

The ultimate in reliability and performance in a 4½" fan

- Impedance protected for longer, more efficient operation.
- Universal 4⅛" mounting makes these models interchangeable with similar, less reliable $4\frac{11}{16}$" fans.
- Powerful inside-out motor is impedance protected.
- Standard accessories include mounting brackets, filter, metal screen assembly, finger guard.
- UL recognition number E41168.



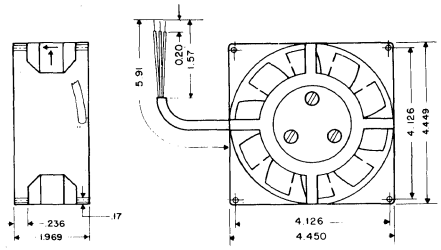


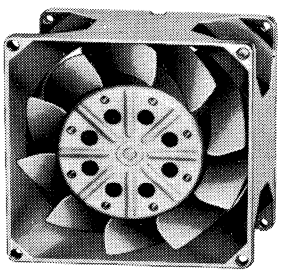
Characteristic	MODEL 1000A		MODEL 1100	MODEL 1300	
Voltage	115 volts	115 volts	115 volts	220 volts	220 volts
Frequency	60 Hz	50 Hz	400 Hz	60 Hz	50 Hz
Air Flow	125 cfm	100 cfm	100 cfm	125 cfm	110 cfm

MODELS 2000 and 2050 (Induction Type)
$4\frac{7}{16}$" x $4\frac{7}{16}$" x $1\frac{31}{32}$" • ALL-METAL • 130 CFM

Highest free air delivery in a $4\frac{7}{16}$" package

- Hand-fitted sleeve bearings ensure reliable performance.
- Extremely low internal heat rise extends life beyond that of conventional fans.
- Stator windings for motor are uniform, allowing for minimum magnetic field density within the air gap.
- Universal 4⅛" mounting.
- UL recognition number E41168.
- Accessories include filter, metal screen assembly, finger guard, and mounting brackets.



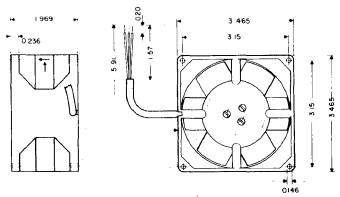


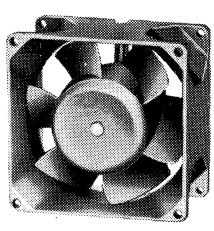
Characteristic	MODEL 2000		MODEL 2050	
Voltage	115 volts	115 volts	220 volts	220 volts
Frequency	60 Hz	50 Hz	60 Hz	50 Hz
Air Flow	130 cfm	116 cfm	130 cfm	116 cfm

MODELS 3000 and 3050 (Induction Type)
$3\frac{15}{32}$" x $3\frac{15}{32}$" x $1\frac{31}{32}$" • ALL-METAL • 65 CFM

Unmatched design and performance in a compact 3½" fan

- Continuous reliable operation in a compact package . . . dynamically balanced rotor.
- Extremely low-noise level.
- Precision hubs, impellers, and die-cast housings.
- Efficient inside-out motor design.
- UL recognition number E41168.





Characteristic	MODEL 3000		MODEL 3050	
Voltage	115 volts	115 volts	220 volts	220 volts
Frequency	60 Hz	50 Hz	60 Hz	50 Hz
Air Flow	65 cfm	58 cfm	65 cfm	58 cfm

THESE AND A HOST OF OTHER SPECIAL APPLICATION ALL-METAL FANS ARE AVAILABLE FOR IMMEDIATE DELIVERY FROM PAMOTOR AND KEY DISTRIBUTORS IN THE U.S. AND CANADA. CONTACT PAMOTOR OR YOUR DISTRIBUTOR FOR MORE DATA AND PRICES.

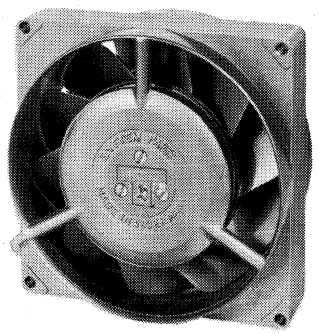
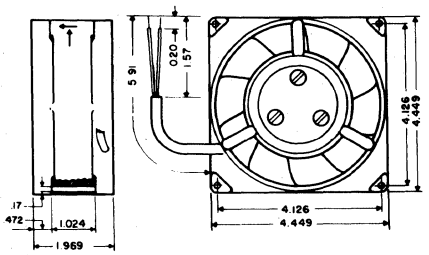
PAMOTOR MINIATURE AXIAL FANS

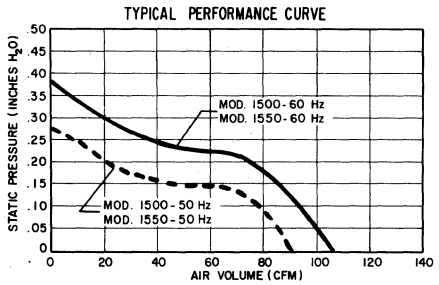
MODELS 1500 and 1550 (Shaded-pole Type)
$4\frac{7}{16}$" x $4\frac{7}{16}$" x $1\frac{31}{32}$" • ALL-METAL • 105 CFM

Universal 4⅛" mounting for interchangeability





- All-metal component parts are natural heat sinks, ensuring cooler operation.
- Special moisture resistant finish prevents corrosion or deterioration under humid atmospheric conditions or in extreme temperature variations.
- Long operating life without maintenance.
- UL recognition number E41168.
- Standard accessories include mounting brackets, filter, metal screen assembly, finger guard.



Characteristic	MODEL 1500		MODEL 1550	
Voltage	115 volts	115 volts	220 volts	220 volts

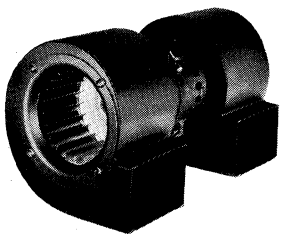
Your Single Source For Standards And Specials

MORRISON

Air Moving Equipment

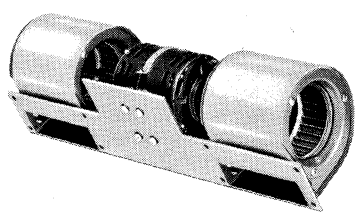
Morrison electronic cooling equipment has found a vast range of applications. Compact, rugged, reliable . . . their double-duty performance in the computer, aerospace, and instrumentation industries is unmatched.

Morrison wants to help. Call us today. Or write us for free catalog data.



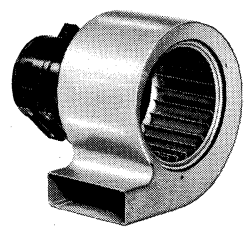
TWIN CENTRIFUGAL BLOWER

- 10-1000 CFM
- Multi-position exhaust
- Meets commercial and mil specs
- For cooling or pressurization



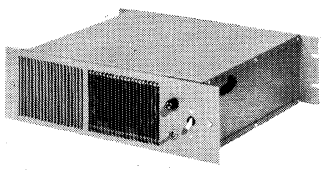
TWIN PANEL BLOWER

- Easy installation
- Permanent lubrication
- Suitable for high temperatures
- Dual voltage and dual frequency
- Up to 300 CFM



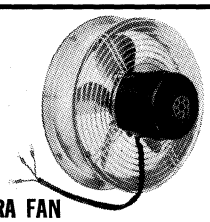
SINGLE CENTRIFUGAL BLOWER

- 10-1000 CFM
- Multi-position exhaust
- Meets commercial and mil specs
- For cooling or pressurization



CABINET BLOWER

- Pressurizes and cools
- Up to 1000 CFM
- Dual and single blowers
- EMI and RFI shielded
- Over 35 models available
- Meets commercial and mil specs

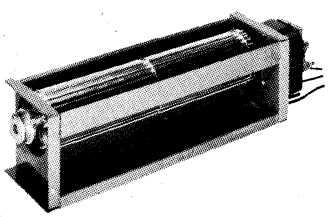


VENTURA FAN

- Rugged
- All-angle mounting
- Quiet
- Safety screens
- Permanent lubrication
- Up to 500 CFM
- Meets commercial and mil specs

SPOT COOLING FAN

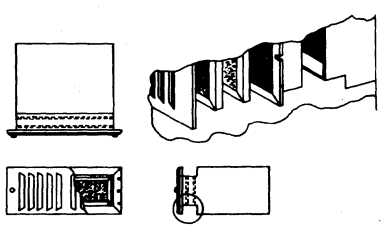
- Compact
- Extra low-cost cooling
- Up to 150 CFM
- Vibration free
- Lifetime lubrication



TANGENTIAL

New concept in air moving . . . assuring uniform air-flow over its entire length. Ultra-compact too.

RFI SHIELDED CABINET BLOWERS



- Morrison can provide an RFI shielded Cabinet Blower, conforming to the best of current specifications on their line of Packaged Electronic Cabinet Blowers.
- All bonding of RFI proofing components are under positive mechanical compression, including monel gasketing.
- All applicable material and finish specifications for RFI proofing are met without sacrifice in air delivery

BALL BEARING STEP-UP BLOWERS

NOW YOU CAN GET HIGH SPEED (8000 RPM) WITH 60 CPS SUPPLY.

- **LONG LIFE** — MIL tested and approved for 10,000 hrs. in extreme environments.
- **SAVE SPACE** — Replace large slow speed blowers and fans.
- **QUIET** — Replace geared speed increasers.
- **BRUSHLESS** — Replace noisy, troublesome DC and universal motors.

RC PRODUCTION MODELS QUICKLY AVAILABLE — SEND FOR DATA.

BRUSHLESS DC BLOWERS

IMPROVE YOUR PRODUCT

Transistorized: No Maintenance
Eliminates Brushes
No Brush Dust
Interchangeable with DC Motors

Life: Extremely Long & Reliable • No Brushes to wear • Silent • Frictionless • No Arcing • Explosion Proof.

RFI: Reduced to Minimum.

Low Input Power: 50% Efficient.

Altitude: Superior at High Altitudes.

Dielectric: Vastly Improved

Environmental: Passes severe environmental conditions of all MIL SPECS.

Continuous Duty:

Speeds: Wide Selection of High Speeds attainable. Available with speed variation feature.

Applications: To replace Brush Type DC Motors, Blowers, Fans in any Electronic Equipment. • In Explosive Atmosphere • Aircraft • Submarines • Space Vehicles • Powered by Solar Batteries.

Motor Types: Induction Motors • Blowers • Fans.

— Send For Data

BLOWER CABINETS

FOR STANDARD 19" RACKS — QUIET, CLEAN, FILTERED COOLING IN A COMPACT PACKAGE.

Mount Quickly & Easily to any Standard EIA Notched 19" Rack.

Also Available: 150 through 800 CFM, All Frequencies and Voltages.

Commercial • MIL-Spec • RFI Shielded

Mounting: Simple and fast to any standard EIA notched 19" Rack.

Front Panel: • 2 Panel Styles — Recessed Models save 1¾". Panel Space. Delivers same air as standard model.

Grille: • Stainless Steel, Heavy Gauge • Attractive, enhances your equipment • CRS with Prime Coat is desired.

Filter: • Washable • Permanent • Quickly removed • Easily Cleaned from front. Also available for 150 through 800 CFM.

Commercial MIL Spec — RFI Shielded.

PART NUMBER 2-3000-A-1A1

- 115 vac, 50/60 cps, 1 Phase 300 CFM.
- Shaded Pole, Self-Cooled
- Sleeve Bearings
- Filter Size — 6½" x 16¾" x ½"
- Front Panel, Size 7" h x 19" L

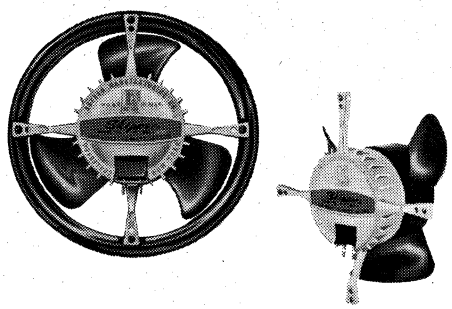
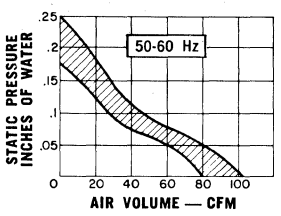
Skipper® FAN



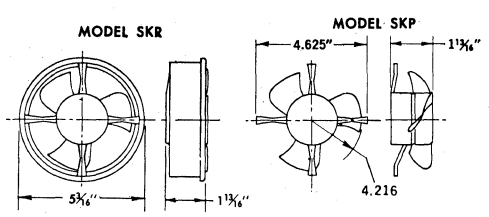


The Skipper Fan signals the best in really economical cooling for computers, office copying equipment, transmitters — all commercial applications requiring 100 cfm of cool air.

It incorporates high quality, precision design and the LOWEST COST. And that's not all. It is designed to SAVE in installation expense — requiring no mounting nuts or bolts — no bolt holes to drill. Consider these features:

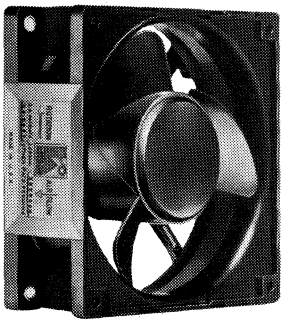
- Requires no mounting nuts or bolts.
- 100 cfm.
- Quiet — just 38 db SIL.
- Thin — only 1-13/16".
- Small diameter 5-3/16".
- Lightweight — 14 oz.
- Reversible air direction (using optional plate part no. 19561-2).
- Designed to operate in temperatures up to 140°F (60°C).
- Designed to meet UL specifications.
- Complete accessories.

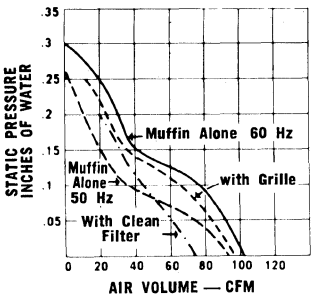
WEIGHT 14 OUNCES



For Further Information Request Catalog Sheet E-2775

muffin® fan





The Muffin Fan is the most reliable commercial tubeaxial fan available. The Muffin Fan can be expected, with a 90% survival rate, to operate up to 10 years at room temperature. Installed in equipment, it minimizes component derating, increases the life expectancy of the equipment and assures top performance. Ultra-long-life bearings are precisely aligned for vibration-free operation. Encapsulated motor winding adds years to life of unit. Molded in bus-bar motor leads. Completely integrated design of motor, blades, optional venturi, grille and filter in a performance matched assembly. The Muffin Fan is designed for 115 VAC, 50-60 Hz, 1 Phase applications. Models for 230 VAC are also available. It has UL yellow card component recognition. File No. E-31293.

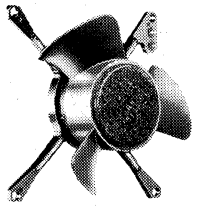
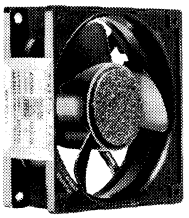
Sentinel, Muffin, Whisper, and Centaur Fans

AVAILABLE IN 4 VERSIONS



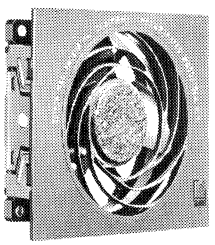
"SKELETON FAN"

Consists of a motor-driven propeller with 4 mounting arms containing molded-in leads. It can be mounted as an air-stirring device among hot components or can be mounted in a round, sharp-edged or bellmouth aperture in the equipment enclosure.



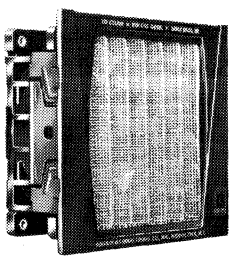
"VENTURI FAN"

An assembly of the "SKELETON FAN" mounted in a 4.68" square molded plastic VENTURI BLOCK only 1.50" thick. May be used in either a round or square opening in an equipment panel. Mounting holes are provided on both upstream and downstream sides to permit the fan to push or pull air. It may also be used with the MOUNTING CLIPS described in this folder.



"GRILLE FAN"

The "GRILLE FAN" results from the addition of the GRILLE and MOUNTING CLIPS to the "VENTURI FAN". The "VENTURI FAN" may be mounted against the inside surface of the equipment enclosure and the grille snapped into place from the outside. The grille is an advanced aerodynamic design which minimizes the accumulation of lint and dust, and keeps the acoustical noise level to the minimum while insuring maximum airflow.



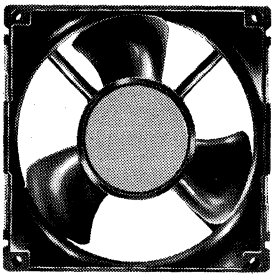
"FILTER FAN"

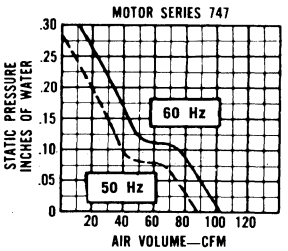
A complete cooling package consisting of matched fan and filter for maximum efficiency. The FILTER BOX locks in place between the GRILLE FRAME and the "VENTURI FAN" adding less than .75" to over-all depth. This unit completely eliminates guess work and risks involved in unmatched fan/filter assemblies. FILTER BOX, GRILLE and MOUNTING CLIPS are also available as separate accessories for existing "VENTURI FAN" installations.

Accessory Items For Sentinel, Muffin, Whisper and Centaur Fans.

Mounting Clips No. 13996 (Set)
Spiral Grille No. 16238
Filter Assembly No. 15449
Filtercoat No. 18440
Finger Guard No. 20132-2
Plug & Cord Assembly No. 16415

Sentinel® FAN





The Sentinel Fan has retained the high air performance, versatility, compact design and low noise level of the Muffin Fan but is designed for the more "rugged" application where the ambient temperature is higher. It is also for the customer that requires long, trouble free life without the requirement for maintenance. The Sentinel Fan may be used in a maximum ambient of 100°C and will withstand greater shock and vibration than the Muffin Fan was designed for. To achieve this design criterion the Sentinel Fan incorporates a glass-filled phenolic venturi block, an encapsulated stator, stainless steel ball bearings and an aluminum heat sink which draws heat from the windings to provide a cool running motor. The Sentinel Fan was designed to meet U.L. approval and has been satisfactorily qualified to MIL-E-4970A. The Sentinel Fan is designed for 115 VAC, 50-60 Hz, 1 Phase applications. Models for 230 VAC are also available.

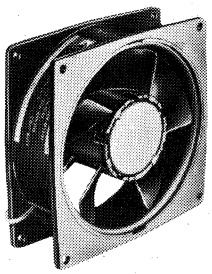
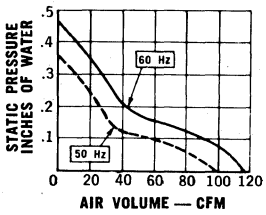
SPARTAN FAN





Delivers 110 CFM free delivery for military applications. Dimensions of $4\frac{11}{16}$" square by $1\frac{1}{2}$" in depth make this fan dimensionally interchangeable with the Muffin Fan. Powered by a multi-slot, double-shielded, ball bearing induction motor which is lubricated for life at a maximum ambient of 100°C. Electrical connection is made by means of 12" leads. The Spartan Fan is designed for 115 VAC, 50-60 Hz, 1 Phase and 400 Hz, 1 Phase and 400 Hz, 3 Phase. The Type "R" version contains round mounting rims for use with standard motor mounting clamps. The air-flow direction may be reversed by turning fan end-for-end. The Venturi Ring, spiders and hub are a single aluminum casting suitable for shock and vibration requirements. The Spartan Fan meets applicable military specifications for ground and shipboard use.

OPTIONAL ACCESSORIES: Terminal Block.
"Synclamps" for Clamping Rim Mtg. Part #109074-337. (3 Required Per Fan).
"Rever-Synclamps" for Clamping Rim Mtg. Part #309074. (3 Required Per Fan).

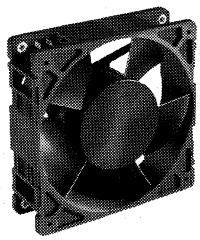
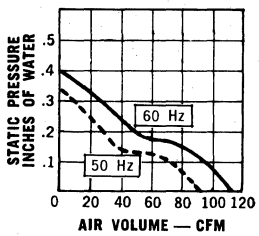
CENTAUR® FAN



Available in 4 Versions



New aerodynamic principles by Rotron permit the new Centaur to achieve greater aerodynamic efficiencies than ever before from axial flow fans — and with low acoustical disturbance and compact size.

The Centaur with its computer designed five-bladed impeller molded of high impact polycarbonate is precisely matched to a powerful shaded pole motor — available with either oil-impregnated sleeve bearings or precision ball bearings lubricated for life. The recommended operating ambient temperature is −40°C to +55°C with sleeve bearings, and −40°C to +72°C with ball bearings. The motor is mounted to a spider of die cast aluminum which is in turn assembled to a venturi of high temperature resistant black phenolic.

The Centaur will deliver 120 cfm of air, free delivery operating at 115 volts, 60 Hz, or 100 cfm free delivery at 230 volts, 50 Hz making it possible for the design engineer to select a fan to deliver the same cfm on European power sources as Muffin fans or Sentinel fans at 60 Hz power used in the U.S.A.

The Centaur is designed to be physically interchangeable with the Muffin fan or the Sentinel fan.

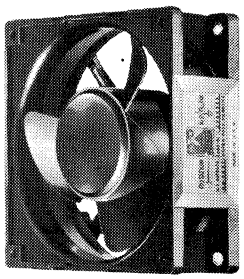
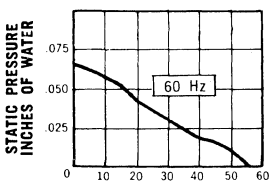
Whisper® Fan



MARK I
Available in 4
Versions



Breathing 55 cubic feet of cool air over, under and around every heat-generating component, the Whisper Fan improves performance of hi-fi equipment, radio-TV receivers and O.E.M. equipments by minimizing drift due to temperature change within the enclosure. So quiet you have to feel the breeze to know it's going. Only 18 db SIL. Also supplied as Whisper Fan Kit complete with special mounting, hardware, plug and cord for electrical connections and detailed instructions. Whisper Fan is designed for 115 VAC only, 50-60 Hz, 1 Phase.

WEIGHT 1.0 POUND

Mounting hole dimensions 4.125"

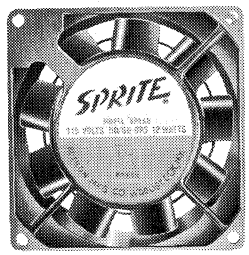
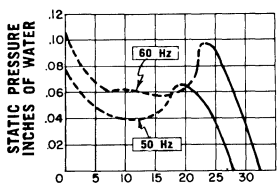
SPRITE® FAN





The Sprite fan has been designed especially for commercial cooling applications in low-profile electronic equipment, where size and reliable LOW COST performance are the important requirements.

It is only 3-1/8" square, still, this rugged little fan with its nine-bladed propeller delivers 35 cfm — tailored to produce high pressure at the ranges approaching free delivery. (See Curve)

Review these important features:

- Small — only 3-1/8" square.
- Peppy — delivers 35 cfm.
- Reversible air flow — Simply turn fan end-for-end.
- Impedance protected.
- Designed to meet UL requirements.
- Designed to operate in temperatures up to 140°F (60°C).
- Quiet — only 35 db SIL.
- Long life — up to five years.

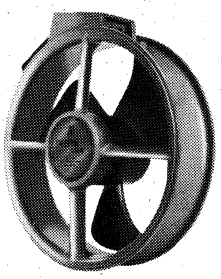
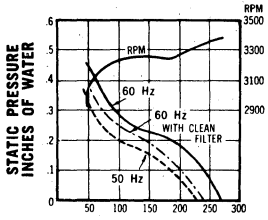
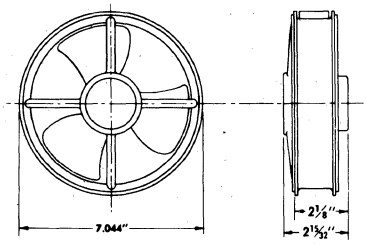
FEATHER® FAN

For Further Information Request Catalog Sheet E-3001





The Feather Fan delivers 270 CFM for flushing computer consoles, power supplies, heat exchangers and electronic control equipment that can spare little room for a cooling device. The fan's depth dimension of only $2\frac{15}{32}$" x 7" diameter imposes little space displacement on the system to be cooled. The Feather Fan is constructed of high-impact polycarbonate plastic which is resistant to extreme temperatures and boasts outstanding dimensional stability. The fan is powered by multi-slot induction motor that incorporates prelubricated stainless steel ball bearings for an ambient temperature range of −55°C to +65°C. 115 VAC, 50-60 Hz, 1 phase. A capacitor is provided which is mounted on the fan venturi. The electrical connection is made to tinned brass terminals and a mating plug and cord is available. The fan is provided with clamping rims for easy mounting and the airflow is reversible by turning the fan end-for- end. A matched filter box #124110 which is permanent, nonloading and washable is optional as are fan guards.

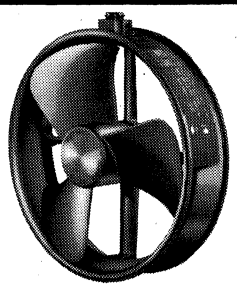


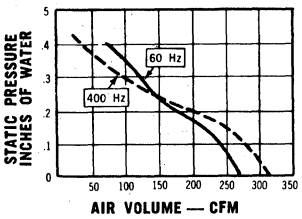
WEIGHT 1.5 POUNDS

OPTIONAL ACCESSORIES:
Rim Guard #14559.
Panel Guard #14651.
Plug & Cord #16398.
Filter Box #124110.
Mounting Clamp #16410 (3 required per fan).
Panel Mount Guard Clip #14611 (3 required per guard).
Rotron Filtercoat #18440.

SAUCER® FAN

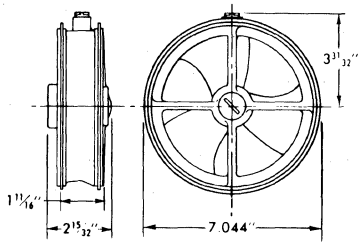
For Further Information Request Catalog Sheet E-3000





The Saucer Fan is ideally suitable for integration into modern electronic packages requiring 270 CFM of cooling air. Its axial length or thickness is strictly limited to the minimum measurement required by a highly efficient propeller, with no further space sacrificed for the driving motor. In other words, **"It is all fan"**. Airflow is reversible by turning the fan end-for-end. Clamping rims at each end of venturi provide easy mounting. Electrical connections are made to a compact terminal block. The Saucer Fan meets applicable military specifications for ground equipment.

A 400 Hz version is also available.



WEIGHT 1.6 POUNDS

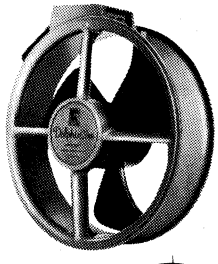
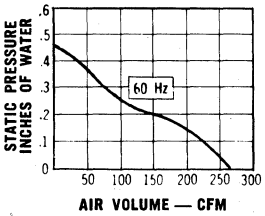
"Synclamps" for clamping rim mounting part #109074-337 (3 required per fan)
"Rever-Synclamps" for clamping rim mounting part #309074 (3 required per fan)
Filter Box #121802.

Dolphin™ FAN

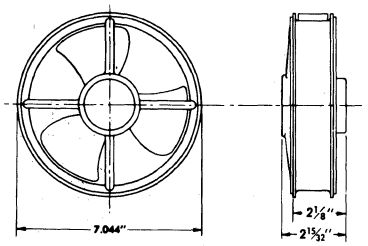
For Further Information Request Catalog Sheet E-3002





The Dolphin is designed for LOW BUDGET applications where its application requirements are not as demanding. The Dolphin is $2\frac{15}{32}$" by 7" diameter and delivers 265 CFM at free delivery. It is powered by a multislot induction motor rotating on oil impregnated sleeve bearings rated for ambient temperatures not exceeding 65°C. Motors are available for 115 V, 60 Hz, 1 phase and 230 V, 60 Hz, 1 phase operation.

A capacitor can be provided neatly mounted on the venturi. The Dolphin is manufactured with high-impact polycarbonate plastic which is universally recognized for its dimensional stability. The Dolphin is provided with clamping rims for easy mounting and the airflow is reversible by turning the fan end-for-end.



WEIGHT 1.5 POUNDS

OPTIONAL ACCESSORIES:
Rim Guard #14559.
Panel Guard #14651.
Plug & Cord #16398.

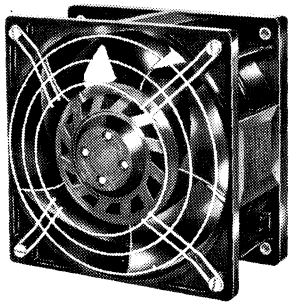
TARZAN® FAN

For Further Information Request Catalog Sheet M-8000.

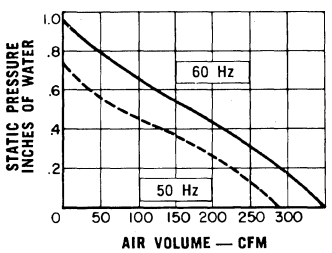


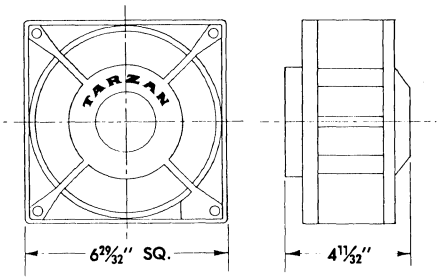
WEIGHT 5 POUNDS

The Tarzan fan brings an entirely new concept of air moving device versatility to the science of electronic cooling — CENTRIFUGAL BLOWER PERFORMANCE IN A COMPACT AXIAL FLOW FAN. This unique Rotron aerodynamic design (patent applied for) develops much greater pressure than comparably sized axial flow fans.

Its straight line performance curve permits the packaging engineer to realize full potential from the Tarzan at any point along the curve with no instability normally found in a curve of an axial flow fan.

When considering a squirrel cage centrifugal blower to deliver 175 cfm at 1/2" water static pressure — CONSIDER A TARZAN FIRST — SAVE SPACE — eliminate discharge diffusers.





More features:

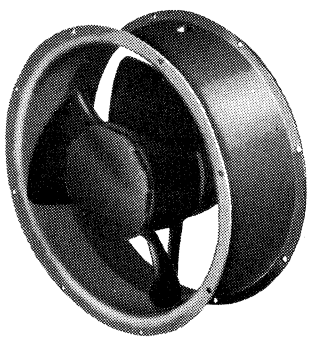
- Long maintenance free life.
- Economically priced.
- Reversible air flow — Simply turn fan end-for-end.
- Ball bearings — lubricated for life.
- 115 VAC, 50/60 Hz.
- 230 VAC, 50/60 Hz.

Optional accessories:

- Plug and Cord #17555.
- Filter Box #20990.
- Finger Guard #21196-2.

Caravel® FAN

For Further Information Request Catalog Sheet E-3050



WEIGHT 4.3 POUNDS

The Caravel Fan delivers an air volume of 575 CFM while holding a narrow depth dimension of only 3½" x 10" diameter. This high performance and compact design makes it ideal for flushing large racks and cabinets. The fan may be mounted directly to a panel or cabinet wall using the holes located around the circumference of the venturi. Airflow may be reversed by turning the fan end-for-end. The motor is sealed and is provided with ball bearings for long, quiet life. No maintenance is required. The electrical connection is made to a terminal block and a mating plug and cord is optional. The Caravel is suitable for the most rugged commercial applications where the cabinet temperature does not exceed 140°F. Thermal protection for the motor, designed to meet UL approval, is available on special order.

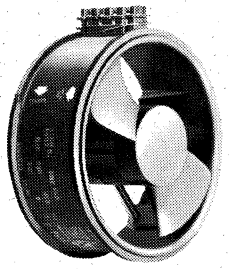
PROPIMAX® 2

For Further Information Request Catalog Sheet E-2900



The PROPIMAX-2 is ideal for 400 Hz airborne and missile applications where high shaft speeds are mandatory to obtain maximum air performance in a minimum of space. Selection from constant speed or high altitude varying speed "Altivar"® motors, which change shaft speed directly with altitude. A 50-60 Hz design is also available. The units are lubricated for a maximum ambient temperature of 125°C and will have a life expectancy of 2000 hours of continuous duty in an ambient atmosphere of 14.7 psia and 72°C. For fan life specifications for motor series 366ZS contact factory. The airflow is reversible by turning venturi ring end-for-end. There are clamping rims at each end of venturi for quick mounting. A single terminal block for all electrical connections. Meets applicable military specifications.

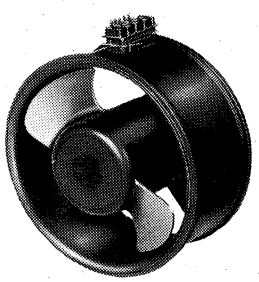
PROPIMAX-3 & 3B

For Further Information Request Catalog Sheet E-2901.



The PROPIMAX 3 and 3B will deliver up to 220 CFM free delivery and will work against high air impedance. It is ideal for cooling small airborne systems which must place maximum emphasis on size and weight. This means heavy component density with large heat loads and high air impedance in relation to the envelope dimensions of the system. The PROPIMAX 3 has a two bladed propeller and is powered by a constant speed 400 Hz motor operating at 22,000 RPM. The PROPIMAX 3 will deliver large volumes of air against relatively high static pressures. The PROPIMAX 3B is provided with a four bladed propeller for operation at speeds of 12,000 RPM or less on 400 Hz. The PROPIMAX 3B will deliver large volumes of air against lower static pressure levels. The PROPIMAX 3B offers a choice of a constant speed 11,000 RPM design and high altitude, variable speed "ALTIVAR"® motors which change speed directly with altitude. There is also a 50-60 Hz design available.

The units are lubricated for a maximum ambient temperature of 125°C and will have a life expectancy of 2,000 hours of continuous duty in an ambient atmosphere of 14.7 psia and 72°C. For more stringent duty conditions fan life specifications must be individually defined. Airflow is reversible by turning fan end-for-end. There are clamping rims at each end of the venturi for quick mounting. A single terminal block for all electrical connections. Meets applicable military specifications.

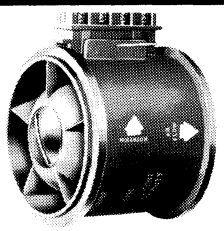
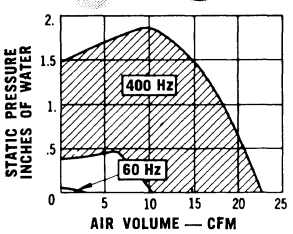
VANEAXIAL FANS

Vaneaxial fans are usually employed in high component density assemblies which require high performance under relatively high air impedance and at the same time offer minimum space for the cooling device. Vaneaxial fans in this group offer exceptional reliability under extreme operating conditions. These fans are generally of high frequency (400 Hz) power designs with resulting extremely high motor rpm. This speed provides the excellent pressure building abilities within their small physical size. They can also be supplied with 50-60 Hz motors. Models with Altivar motors are available for high altitude use in aircraft and unmanned high atmosphere vehicles.

AXIMAX® 1

For Further Information Request Catalog Sheet F-3100.





The smallest and lightest of a family of miniature, high frequency fans for use in tightly packaged airborne "black boxes" where size and weight must be held to an absolute minimum, where reliability is critical and where high heat loads must be dissipated with cooling air. The Aximax 1 will answer all of these requirements while overcoming considerable air resistance. It will deliver 17 CFM at 1" w.g. Mounting is by Clamping rims.

The Aximax 1 is available for both pressurized and non-pressurized applications and is built for single-phase or three-phase operations, and meets applicable military specifications.

A 50-60 Hz motor is available.

Weight 4 ounces.

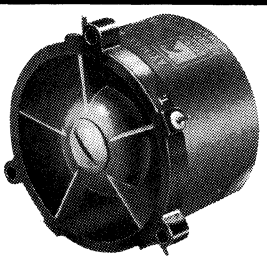
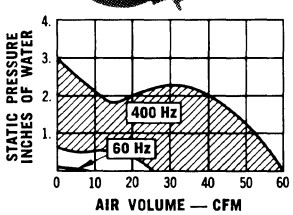
AXIMAX 2

For Further Information Request Catalog Sheet F-3200.





Air delivery of 60 CFM, free delivery, is provided from a fan 2" in diameter by 1.5" axial length. The Aximax 2 is designed for maximum cooling against high static pressures with a minimum space and weight loss. It is available from a choice of constant speed or variable speed motor designs for low or high ambient densities. The Aximax 2 can be supplied with clamping rim mounting and electrical connection to a compact terminal block or as shown in the sketch. It meets applicable military specifications. A 50-60 Hz motor is also available.

Weight: 4.5 ozs.

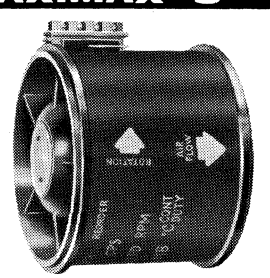
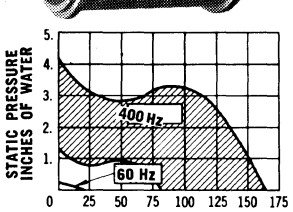
AXIMAX 3

For Further Information Request Catalog Sheet F-3300.





The Rotron Aximax 3 vaneaxial fan is specifically designed for high frequency cooling applications where high air deliveries against high static pressures are to be obtained in a minimum of space, therefore requiring high shaft speed. For airborne equipment, including missiles, the features of the fan will be found particularly attractive. Selection can be made from constant speed motors or varying speed motors for low ambient densities. Airflow is reversible by turning fan end for end. The Aximax 3 is mounted by clamping rims. It meets most applicable military specifications.

A 50-60 Hz motor is also available.

Weight: 14 ozs.

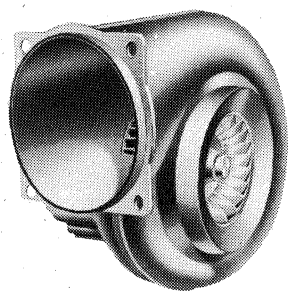
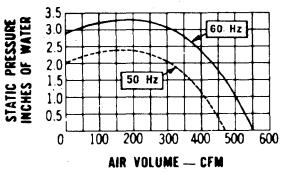
Model CXH33A

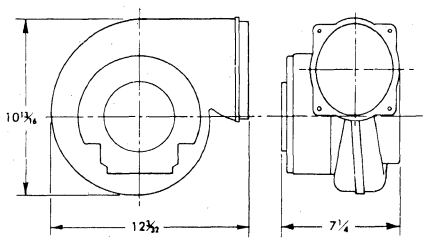
Model CXH29A

CENTRIMAX®

- Delivers more air with more efficiency than conventional squirrel cage blower.
- Package size substantially smaller than assembled squirrel cage blower.
- Motor completely integrated with impeller design.
- No maintenance — oversize, double shielded, precision ball bearings — lubricated for life.
- Ultimate in reliability — no centrifugal starting switches or relays which are the cause of most single phase motor failures.
- Every unit comes equipped with adjustable blast direction — impeller housing can be rotated 360°.

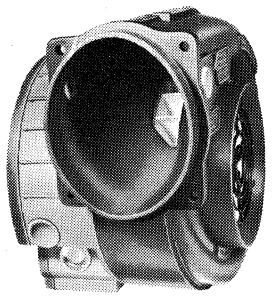


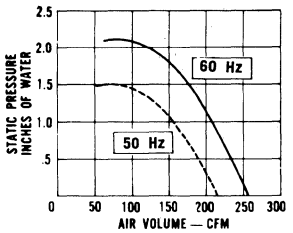


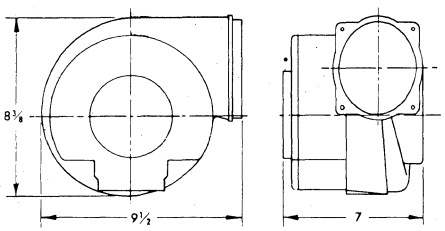


Model	Volts	Hz	Phase	Watts	Amps.	Cap. Mfd.	CFM
CXH33A2	115	50-60	1	420	3.7	12.0	540
CXH33A3	230	50-60	1	380	1.7	6.0	545
CXH33A33	220	50-60	3	400	1.1	—	530

- Can be installed in any attitude and mounted from any one of three mounting surfaces.
- Designed to accept standard, readily available round ducting.
- Blower housing fabricated from flame retardant polyester resin.
- Never rust, never bend.
- Thermal safety cut out feature available as optional.
- Operating temperature from −20°C to 85°C.
- Available in 115 VAC, 60 Hz, single phase; 230 VAC, 50 Hz, single phase; 208-230 VAC, 50-60 Hz, three phase.







Model	Volts	Hz	Phase	Watts	Amps.	Cap. Mfd.	CFM

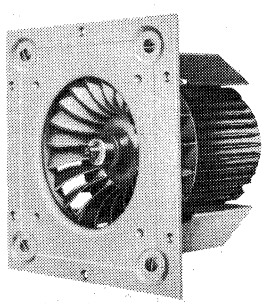
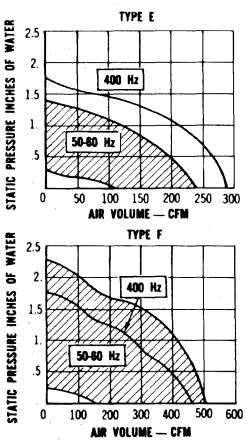
Model G

For complete details request Rotron catalog sheet G-3340.

TYPES E & F





The Model G blowers are another type of blower incorporating the centraxial impeller. This blower uses the impeller without a scroll type housing. It consists of a mounting inlet plate holding the motor and the centraxial impeller. It has the unique feature of drawing the air in axially and discharging it uniformly radially 360° around the impeller. The Model G blower incorporates great flexibility in installing the blower in tight spaces.

Two basic sizes of the Model G blower are available. The Type E with airflows up to 285 cfm and maximum static pressures at no delivery up to 1¾" and the Type F with airflows up to 500 cfm and maximum static pressure at no delivery up to 2¼". Motors are available for either 115 or 230 volts, single or three phase, and 50/60 or 400 Hz. Applicable military specifications can be met. Protective screens on the inlet and mounting for the Rotron Model 2A Airflow Switch are available as accessories.

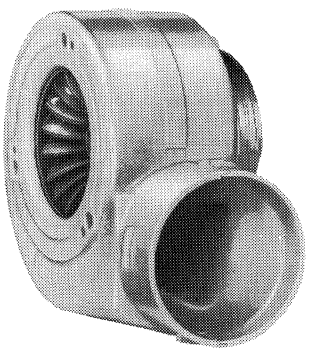
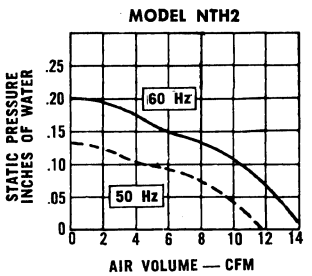
CENTRAXIAL BLOWERS

Centraxial blowers, so named for their unique impellers, are far more efficient than squirrel cage blowers of similar capacity or size. The centraxial impeller functions similarly to a turbine impeller. Therefore, you might compare efficiency by comparing a water turbine to an old fashioned water wheel. Centraxial blowers cost less to buy, cost less to install because of their built-in versatility and cost less to operate since they require less power to get performance.

They operate in the specific speed range of 9,000 to 80,000.

NUGGET® BLOWER





The Nugget (Model NTH2) is a new, compact, low cost blower ideally suitable for spot cooling applications in test instruments, transmitters, TV cameras, office machinery, and tape recorders. Its centraxial wheel, a new design concept by Rotron affords greater efficiency than standard squirrel cage wheels — greater volume to pressure characteristics. It is only $3\frac{19}{32}$" x $4\frac{1}{32}$" x $2\frac{3}{32}$". The Nugget delivers 14 CFM. The Nugget incorporates a specially designed miniature subfractional horsepower induction motor that draws only 7 watts. 115 VAC, 50-60 Hz, 1 Phase, 3200 RPM. The rugged blower housing is injection molded from polycarbonate plastic to form a combination of features which will prove helpful and convenient to any packaging engineer. The Nugget is also available without housing to be used as an air stirring device (Model NTP2). This model requires a space of only $2\frac{1}{2}$" x 2".

OPTIONAL ACCESSORIES:

Plug & Cord Assembly, Part No. 17555 (For both models)

Rim (inlet), Part No. 17469 (For Model NTH2 only)

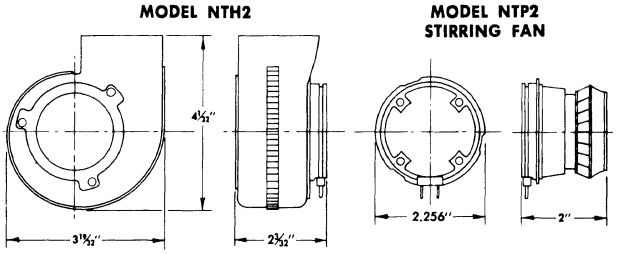
Inlet Clamp Part No. 17597-1 (For Model NTH2 only) (Use with Rim #17469)

Outlet Clamp, Part No. 17597-1 (For Model NTH2 only)

Flange (Outlet) Part No. 17471 (For Model NTH2 only)

3 Brass Inserts, Part No. 19803 to be used on Blower Inlet, Model NTH2

WEIGHT 0.6 POUNDS



For Further Information Request Catalog Sheet G-3310.

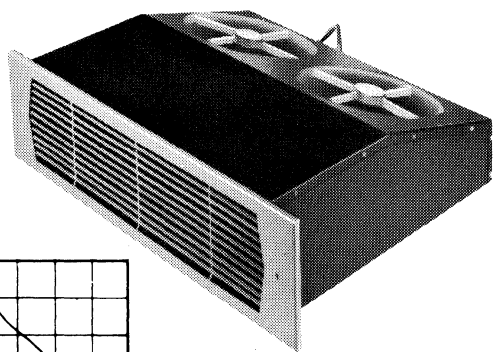
CABINET COOLING PANELS

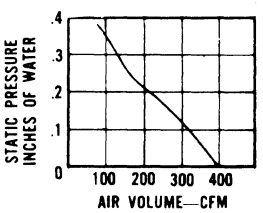
Rotron cooling panels are designed to flush standard 19" enclosed relay racks with clean, filtered air. They may be used to flush several racks simultaneously, if the racks form a single enclosure.

Cooling panels should be mounted in the base of the rack in order to take advantage of the natural convection currents in addition to the forced flow from the fans. For maximum cooling effect, adequate louvering or screening should be provided at the top of the cabinet to allow free passage of the cooling air.

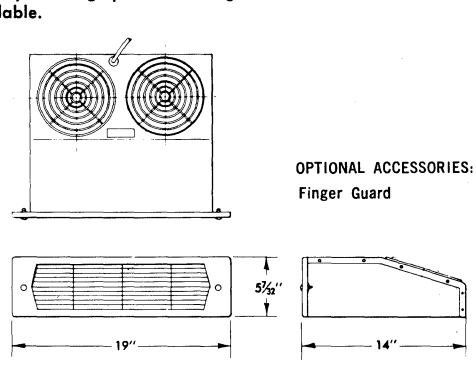
It is always recommended that the cooling panel be used as a pressure-building device for the enclosure, instead of a suction device, since a slight positive pressure inside the housing prevents seepage of dust to the equipment inside. Because the air is drawn to the fans through a filter, equipment is kept as clean as possible.

TWINPAX®-2





The Twinpax-2 is a cooling panel consisting of twin Feather Fans; a permanent, washable aluminum filter mounted in a compact, well constructed box and an attractive grille which enhances the appearance of the customers equipment. The high air performance of 400 CFM is directed upward so as to minimize dead spots or eddying within the cabinet to assure maximum cooling of all components within the system. The Twinpax-2 requires only $5\frac{1}{4}$" of panel height in the base of the rack and may be quickly installed by means of standard EIA notching. When installed and operating it will dissipate 1.9 kw of heat with a 15°F temperature rise. The noise level is only 55 db (SIL). The power requirement is 115-230 VAC, 50 60 Hz, 1 Phase. Capacitors and an electrical cord are provided. The fans have prelubricated stainless steel ball bearings suitable for years of maintenance-free operation over an ambient temperature range of —55°C to +65°C. A Twinpax-1, military cooling panel utilizing two Rotron Saucer Fans is also available.



OPTIONAL ACCESSORIES:
Finger Guard

Spiral® BLOWERS

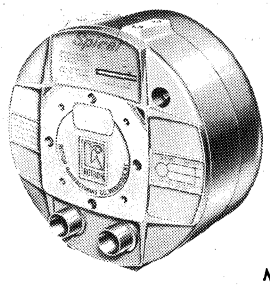
Spiral blowers are revolutionary new motor-blower packages designed to develop unusually high positive or negative air pressure at low to moderate volume of air. Thus, performance achieved without the use of sliding seals or vanes. Contacting surfaces are confined to the precision extra wide ball bearings, lubricated for extremely long life — no maintenance is required.

Life expectancy is enhanced by their low speed motors as well as by the absence of brushes or commutators. The RF noise, characteristic of the universal motors generally used in vacuum cleaner type blowers, is eliminated.

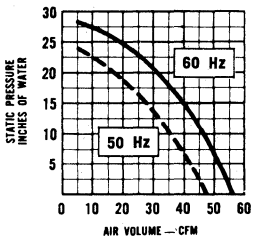
Optional accessories include adjustable trimmer valve, differential pressure gauges for instantaneous trimming to system requirements and a thermal protector.

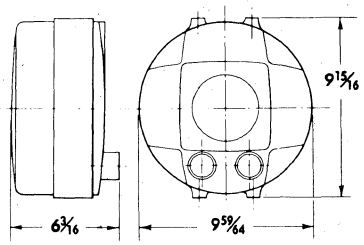
SIMPLEX SPIRAL

For Further Information Request Catalog Sheet J-6600.



MODEL SL2



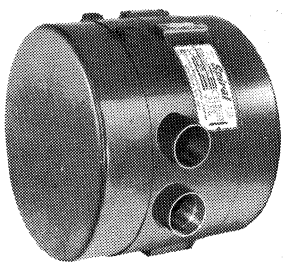


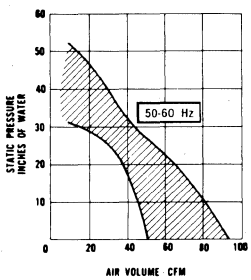
Features:

- Economically priced.
- Only 10" in diameter by 5½" in depth.
- New Rotron induction motor.
- High strength aluminum die castings.
- Precision ball bearings.
- Lubricated for life.
- No RF noise interference.
- Available in: 115 volts, 50-60 Hz, single phase; 208/230 volts, 50-60 Hz, 3 phase; 220/230 volts, 50 Hz, single phase.

DUPLEX SPIRAL

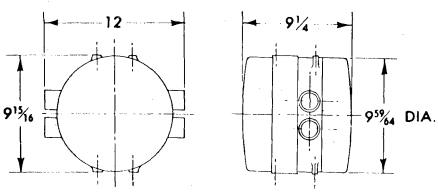
For Further Information Request Catalog Sheet J-6610.





The Duplex Spiral offers greater performance characteristics than the Spiral Model SL2 above. By internal ducting of the airflow from two impellers, higher pressures are achieved with Model SL4; Model SL5 extends the airflow range, and Model SL6 provide an economical source of **two** independent high pressure air streams, which can be utilized at different pressure levels. While the dimensions of all these models are the same, the functions cannot be changed in the field. The Duplex Spiral is designed for use in ambient temperatures up to 55°C, in typical applications as:

- Magnetic tape slack control and capstan motor cooling in one package (Model SL6).
- Document and card handling equipment.
- Paper tape and card reading equipment.
- Power supply for fluid amplifiers.
- Laser head cooling.
- Printed circuit motor cooling.
- Materials handling.
- Waveguide pressurization, or cooling.
- Actuation of machine elements.
- Gas sampling and purification.
- Air bearings for tape and film.
- Microwave cavity cooling.
- For holding photographic film or paper on rollers OR frames.



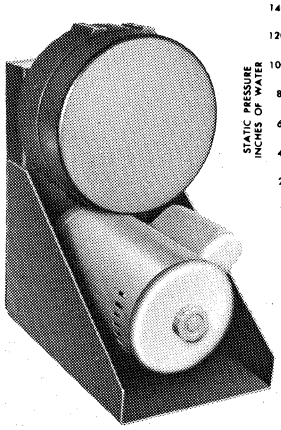
Remember these features:

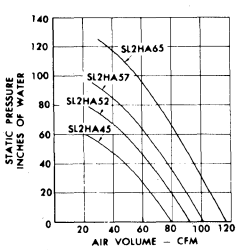
- Two independent air sources from one package.
- Two jobs for the price of one.
  OR
- Extended performance — pressures — vacuums to 2 PSIG.
  OR
- Extended performance — airflow delivery up to 94 CFM.
- Oil free air flow — no possible contamination.
- Quiet.
- Low Speed — 3300 RPM.
- Economically priced.
- Continuous duty.
- Available for single or three phase, 50-60 Hz power, 115 or 208/230 VAC.
- Optional accessory — Dust filter.

BELT DRIVEN SPIRAL BLOWER

For complete details, request Rotron catalog sheet J-6620.

MODEL SL2HA





To obtain even higher pressures and airflows than can be obtained with a Model SL2 or Duplex Spiral shown above, Rotron has adopted the Model SL2 to be belt driven from an external motor. This permits the blower speed of the Model SL2 Spiral to be increased for higher air performance. Pressures or vacuums up to 4½ psig can be obtained. Flows at free delivery of 115 cfm can be obtained. The flexibility of different pulley ratios permits the designer to meet altitude and frequency requirements without overdesign.

Motors used with this blower are induction motors with no brushes to wear and operate at 3450 rpm. They are available in all common voltages and frequencies and have permanently lubricated ball bearings. Belts are designed for 10,000 hours life with no maintenance or adjustments.

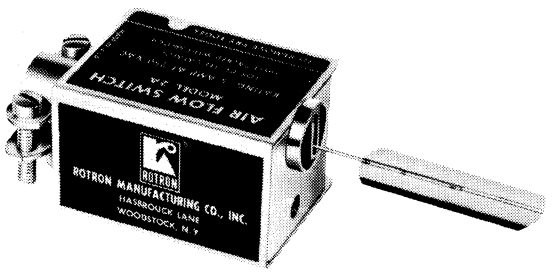
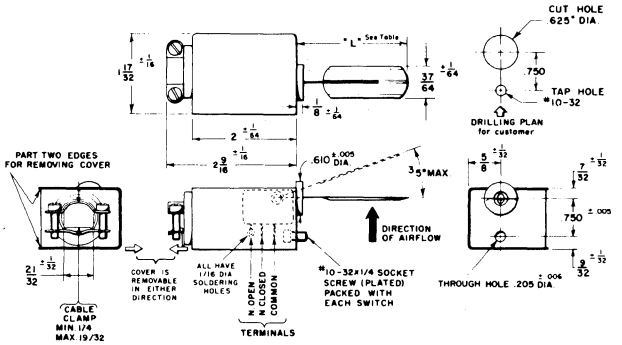
AIRFLOW INTERLOCK SWITCH

For Further Information Request Catalog Sheet K-6800.

The Rotron Model 2A Airflow Interlock Switch provides insurance against equipment damage due to a loss of the cooling airflow regardless of the reason for the malfunction. The Model 2A Airflow Switch is a velocity actuated switch, not pressure actuated, and senses the loss of airflow because of an obstruction, or air leak up-stream from its location, or due to the failure of the cooling fan. The switch is a single pole double throw type and normally open and normally closed contacts are available which may be used to turn off the power to the endangered equipment or actuate alarm systems. Eight different vane sizes are available to size the switch for various air velocities. A convenient determinator kit permits quick selection of the proper air vane for a particular application.





Rotron Model 2A Airflow Switches Will Actuate and De-Actuate in an Airstream of the Following Velocity in Ft./Min. For "Standard" Air (29.9 Inch HG, 70°F).

BATAC® DELTAC

SOLID STATE INVERTERS AND CONVERTERS FOR USE WITH ROTRON FANS AND BLOWERS

A variety of solid state Batac inverters capable of converting 12, 28, 32 and other DC voltages to 60 Hz and 400 Hz are available for use with Rotron Aximax 1, Aximax 2 and Aximax 3 Vaneaxial fans. Rotron Propimax 2, Propimax 3 and 3B Tubeaxial fans and some Model D blowers can also be used.

Also available for use with the aforementioned fans is a variety of solid state Deltac converters capable of increasing or decreasing output frequency with respect to input, on 115 VAC, single phase supplies.

Designs are compact and offer high reliability, consistent with other Rotron products.

For further details, contact Rotron Application Engineering Department.

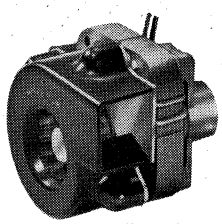
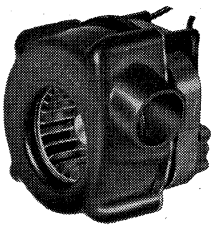
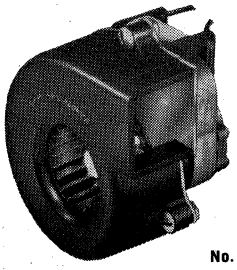
SPACE-SAVING *Precision Bearing* MOTOR-BLOWERS



No. 1½



No. 2



No. 2½

A new line of compact Motor-Blowers are now available with air deliveries ranging from 5 to 19 cfm free air output. Designed to fill the requirements where space is a problem and a minimum of 5-year maintenance free performance is imperative. The precision bearing "power-pac" motor with permanent sealed-in lubrication requires no oiling and operates at an extremely low noise level. The unit can be mounted in any position. The low input wattage required is a cost saving factor of particular advantage in multiple installations.

ACTIVE NOTCH, LOW PASS, HIGH PASS FILTERS

These filters are available in a number of standard versions. Additional frequencies are available upon request.

60 Hz NOTCH FILTER – APN 60 reduces 60 Hz content to less than 1% of input voltage but passes all other frequencies from D.C. to 200 KHz. The rejection bandwidth can be narrowed to 1 Hz. Q's up to 60 can be obtained by an external adjustment. A power supply is available.

FIXED LOW PASS, HIGH PASS FILTER – Any cutoff frequency from 0.01 Hz to 20 KHz. 24 DB/octave skirt.

ALL UNITS FEATURE: Unity gain in passband, max. swing 4 volts R.M.S., input impedance 1 megohm, output impedance 200 ohm driving up to 20,000 ohm load. 9 volt radio batteries supply the power.

MODEL	FIG.	FUNCTION	PRICE

PORTABLE VARIABLE FILTERS

These fully transistorized variable filters let you set cut off frequencies continuously and are available in a variety of versions as shown in the table below.

All units feature: Unity gain in passband, max. swing 4 volts R.M.S., 24 DB/octave skirt, max. attenuation 80 DB, input impedance 1 megohm, output impedance 200 ohm driving up to 20,000 ohm load. 9 volt radio batteries supply the power.

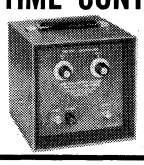
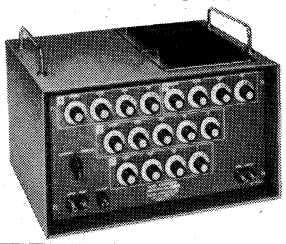
RISE TIME CONTROL — MODEL 50-1



The model 50-1 was designed for precise adjustment of the rise and fall time of pulse generators. This unit slows the pulse by a controlled amount by means of Gaussian filters. Any of 110 different filters can be selected by the use of two decade switches. Rise times are controlled in 10 nanosecond steps from 0 to 1.1 microseconds. The 50 ohm input allows for direct impedance match to the output of most pulse generators.

SPECIFICATIONS:
Impedance: 50 ohm.
Filter Type: Gaussian (passive).
Overshoot: 5%.
Maximum Rise (and Fall) Time: 1.1 microseconds.
Steps: .01 microseconds.
Accuracy of Rise Time Reading: 10%.
Size: 7″ x 8″ x 8″.

FILTER SYNTHESIZER — MODEL 10K-1M



Design a filter in a minute.
Check it in your circuit in another minute.
Install the components on your breadboard.

The filter synthesizer is composed of all passive elements. As you use it, you always know the circuit that is in use, and the values that are being used.

Design the filter with the nomographs supplied. No knowledge of filter design theory is required. Choose any impedance between 100 and 1000 ohms. (Higher and lower impedances not on the nomographs can be calculated from formulas supplied.) Choose any frequency between 10 kc and 1 megacycle. (For other frequencies use the formulas.)

Choose one of the different types of elliptical high or low pass filters. Set the values from the nomographs into the decade capacitors and inductors and check the filter in your circuit. If it is satisfactory, install the capacitors and inductors in your breadboard and the filter is finished.

Frequency Range: 10 kc to 1 megacycle (Higher and lower with a restriction on impedance).
Impedance Range: 100 to 1000 ohms (Higher and lower with a restriction on frequency).
Type: High pass or low pass elliptical function filters 20 db to 40 db attenuation.
Construction: All networks passive and controlled by decades.

RADIO INTERFERENCE FILTERS

TUBULAR TYPES

EFFECTIVE TO 10 GHz

SELECT ELECTRICAL AND MECHANICAL FEATURES EXACTLY TO YOUR NEEDS.

FOLLOW THESE EASY STEPS —

1. DETERMINE CURRENT AND VOLTAGE OF CIRCUIT WHERE THIS FILTER WILL BE USED.
2. OBTAIN BASIC PART NUMBER FROM TABLE BELOW BASED ON SUPPRESSION REQUIREMENTS.
3. SELECT MOUNTING STYLE AND TERMINAL TYPE FROM THIS PAGE.
4. BUILD UP PART NUMBER THIS WAY —

STANDARDIZED FILTERS!

70R2.5M M 10

BASIC PART NUMBER — MOUNTING STYLE — TERMINAL TYPE

RADIO INTERFERENCE FILTERS

STANDARDIZED FILTERS

Standardized filters are low pass filters. Rectangular and some tubular filters are pi types while the lower insertion loss tubulars are L types. They are supplied with two terminals to be connected in series with a power line. This places an inductor in series with the line and a capacitor is internally connected from terminal to the case. The filter case must be grounded for proper operation. The internal inductors and capacitors are especially designed for radio frequency filter operation to provide good filtering action over a wide frequency range.

CURRENT RATINGS

Filters are rated for continuous use at a maximum ambient temperature of 85°C (185°F). They are made to withstand occasional momentary surges for normal motor starting, etc. If you have an intermittent duty problem contact factory for a suitable rating.

VOLTAGE RATINGS

The filters are rated for continuous use at the specified voltage at temperatures up to 85°C (185°F). Filters with a dual voltage rating (e.g. 400 VDC/150 VAC) are rated for the higher voltage only in direct current applications. The rating drops to the lower value for alternating current applications. Any filter may be used at a lower voltage than its rating.

CASE SIZES

All rectangular filters are in deep drawn seamless cases. They are hermetically sealed with solder sealed covers. Dimensions shown for cases are basic sizes, but because of their deep drawn nature, dimensions will vary slightly depending upon the point of measurement.

Cases and brackets are steel, hot tin dipped finish.

TERMINALS

Standard terminal types are shown. If two different terminals are desired on one filter, insert both terminal types in the part number — for example 70D6.3GW1121. For mounting styles L, M, S, V, Y the first terminal type listed in the part number will be supplied on the end near the mounting studs or flange.

INSERTION LOSS

The column marked ***db*** in the table of basic part numbers is the insertion loss at a frequency of 150 kilohertz. Insertion loss is a measure of the effectiveness of a filter at a particular frequency. The insertion loss is the logarithmically adjusted ratio of signal input to signal output measured in a standard circuit of 50 ohms input and output impedance. The larger the number of ***db***, the greater is the signal reducing ability of the filter.

The following table will help to illustrate the ratio between the interference voltage input to a filter and the output voltage as stated in ***db***.

db	*Voltage Input : Voltage Output*
0	1:1
6	2:1
20	10:1
40	100:1
60	1,000:1
80	10,000:1
100	100,000:1

All the *db* figures in the chart represent the insertion loss for each filter at 150 kilohertz. A complete description of insertion loss requires a graph or a tabular chart showing a number of *db* readings at frequencies spread throughout the useful range of the filter. The filters in this catalog have a useful range from below 150 kilohertz to above 250 megahertz. They have been designed to maintain approximately the stated level of insertion loss in the frequency range of 150 kilohertz to about 10 megahertz and then to follow a gently sloping reduction maintaining effective levels of insertion loss to between 250 and 400 megahertz. This corresponds to the normal frequency distribution of radio interference generated by most electrical machinery, electromechanical devices and a great deal of electronic equipment.

The tubular filters are designed for more severe requirements and will maintain the stated level of insertion loss from 150 kilohertz to greater than 10 Gigahertz.

VOLTAGE DROP

All filters are designed to have a voltage drop of low value so that they will not interfere with proper operation at the equipment in which they are installed. The 70 volts D. C. series has a maximum drop of 0.3 volt when operated at full rated current. The 400 VDC/150 VAC and the 600 VDC/250 VAC have a drop of less than one percent of the AC rating when carrying full rated current.

WHY USE FILTERS?

Much electronic and electrical equipment produces interference which disrupts radio communication and seriously affects the safety and efficient operation of aircraft, marine, industrial and military communications. As a result, the Federal Communications Commission is enforcing statutes which require control of interference and interference sources. The various military branches of the Department of Defense are specifying interference free operation in much of the equipment they now purchase. Manufacturers of sensitive and complex electronic equipment find that often their devices do not function properly as a result of interference produced in parts of their own or nearby systems.

The answer to this is radio frequency interference control. This control can be accomplished by one or more of the following methods.

1. Redesign to use non-interfering type components instead of those which generate interference. Example—Replace commutator type universal cooling blower motor with interference free induction motor.
2. Provide effective shielding to prevent direct radiation. Example—Interference producing ignition system of a internal combustion engine shielded with complete metallic housings over spark plugs, cables and magneto.
3. Install radio interference filters in power lines to prevent interference signals from being conducted to distant areas on those power lines. Example—Filters installed in power lines to a direct current aircraft motor to prevent motor interference from being conducted to the radio installation.

Interference reduction and control is generally a judicious balance among these three methods. Usually no one method is completely effective. Once the equipment design is finalized, further interference reduction becomes a combination of shielding and filtering. They complement each other and in most cases neither shielding nor filtering is completely effective alone.

HOW TO USE FILTERS EFFECTIVELY

First one must learn to recognize the serious sources of radio frequency interference. Interference is generated wherever there is a spark or electrical discharge. Commutator type electric motors and generators, electric arc and fluorescent lamps, switches and relays, thyratron and other gaseous discharge tubes may all be sources of radio interference of which the manufacturer or user may not be aware. Electronic equipment which utilizes oscillating circuits may generate radio frequency signals to perform necessary functions. These signals become radio interference when they leave the confines of the circuits and equipment where they are needed and interfere with other radio frequency sensitive equipment. An example of this is the oscillator used in a superhetrodyne receiver. Among electronic generators those dealing with critically shaped waveforms such as saw tooth or square wave and pulse generators can cause a considerable amount of interference as a result of harmonics of the fundamental frequencies.

For best results, isolate the severe interference producing sources and prevent them from contaminating interference free equipment or lines nearby. This can be accomplished by shielding and enclosing case construction around the interference sources combined with filters in the power lines.

Filters will reduce the radio interference currents flowing in power lines to very low levels. This is essential to prevent unwanted signals from traveling great distances and radiating into space from these distant power lines. Filters are not a complete cure for all radio interference problems. They need the help of adequate shielding and isolation to be completely effective.

The physical placement of a filter is important. Improper positioning can sometimes nullify the effectiveness of a filter. The radio interference filter should be mounted close to a shielded source, or considering the whole chassis a source, close to the power line entrance. Input and output lines of the filter should be separated. For best results use mounting styles L, M, S, V or Y and project one terminal through a shielding partition or bulkhead in the chassis or wiring enclosure. Shielded lead style terminals can also help isolate input and output lines. Be sure that shielded leads have the outer covering grounded to chassis at both ends.

LITERATURE AVAILABLE

A five page reprint entitled ***"Radio Interference Filters — Their Design and Use"*** showing how to obtain best results when using filters for radio interference reduction in electronic equipment is available on request.

ALL-TRONICS PRODUCTS

In addition to Standardized Filters, ***All-Tronics, Inc.*** is a supplier of custom designed radio interference filters to the original equipment market. Filters with unusual ratings, peculiar shapes, extended environmental requirements and rigid specifications are available to order. If you have any applications for which our Standardized Filters do not completely meet your requirements, forward your specifications to us and our engineering department will gladly recommend a design to solve your problem.

In keeping with our comprehensive coverage of the RF filter field we also manufacture screen booth filters, line stabilization networks, encapsulated, impregnated and hermetically sealed networks, assemblies and coils to specifications.

All-Tronics, Inc. reserves the right to improve design specifications or withdraw items from this catalog in the light of new technological advances.

NEW

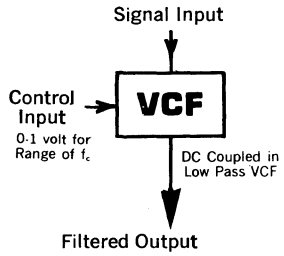
VCF's

(VOLTAGE CONTROLLED FILTERS)

Actual Size
Patent Pending

SPECIFICATIONS

Cutoff Frequency Range	Up to 100:1 f_{cmin} to f_{cmax} from 0.1 Hz to 20,000 Hz
Input Impedance	> 100 KΩ
Cutoff Control Voltage	0 to 1 volt
Voltage Output (max)	70% of ± Power Supply Voltage
Minimum Load Impedance	1 KΩ
Output Impedance	5Ω (max)
Gain	0, 10, 20 or 30 db
Asymptotic Rolloff Slopes	6, 12, 18, 24 or 30 db/octave
Power Supply Voltage	±3 to ±15 VDC
Size	⅜" x 2.1" x 2.1"
Temperature Range	−30°C to +70°C (standard)
Price	100 Lot — $100 to $200 per unit Single Lot — $260 to $525



WHAT IS A VCF?

ARITECH VCF's are active filters having voltage controlled components that provide smooth continuous translation of the frequency and phase response without affecting the shape of the response. The filters are compact, stable, and extremely reliable — even for the most sophisticated applications.

WHY WAS THE VCF DEVELOPED?

The VCF was developed to handle signal processing requirements that are not readily satisfied by single fixed filter techniques.

VCF's lend themselves to automatic as well as manual signal processing, because of their unique ability of being externally voltage controlled.

Variable band pass and notch requirements can be satisfied by cascading low pass and high pass filters in series or in parallel, respectively.

ORDERING INFORMATION

SPECIFY MODEL NUMBER per example below

Slope (db/octave) — 30 — Type (Butterworth High Pass) — BHP — 150 — 15000 / Cutoff Frequency Range (Hz) — 0 — In-band Gain (db)

Band pass and notch filter designs having independent voltage-controlled center frequencies and band widths and featuring extremely steep skirts are also available.

PHASE SHIFTER/METER

(Bulletin PSM-360A)

- 10 Hz to 1 MHz Phase Meter and Phase Shifter
- Shifts and Measures 0° to 360°
- Direct Reading in Degrees
- High Input Impedance and Input Sensitivity
- DC Output Proportional to the Phase Shift being Measured or Generated

DIGITAL IC TESTER

(Bulletin ICT-516)

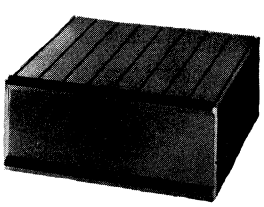
- A Logical and Simply Connected Program
- Prewired Patch Plugs
- Rapid Manual Testing
- Self-Contained — Can Test All Digital Logic for Functional Failures
- Input and Output Indicator Lights for Visual Analysis
- Universal Input Connector — Accepts Up to 16 Pins

TONE BURST & GATING GENERATOR (Bulletin TG-210)

- DC to 1 MHz Input Frequency Range
- Switching Transients and Feedthrough > 60 db Down
- Greater than 30 db Input Dynamic Range
- Tone Burst and Dwell Time Independently Variable from 1 to 1024 Cycles in 20 Steps
- Gating Voltage Output
- Pulse Output

INSTRUMENT ENCLOSURE & POWER SUPPLY SYSTEMS (Bulletin ENC-1000)

- Two Interlocking Aluminum Extrusions
- Good-Looking Simplicity
- Rugged Construction: ⅛" Wall
- Versatile Built-in Mounting for Multiple Circuit Boards
- Includes Rubber Feet, Tilt Bail, Rear Panel, Complete Hardware
- Optional Power Supplies
- 3½" x 8⅜" x 7½" HWD
- Single or Dual Rack Adapters Available
- Clear Chromate Finish
- Blue Finish on Cover (Optional)



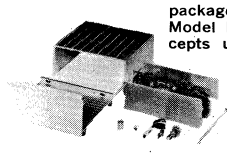
POWER SUPPLY SPECIFICATIONS

Type	Low Voltage	High and Split Voltage
Voltage (DC)	V ±10%	V ±0.5 Volts
Current	Up to 1 amp	Up to 200 ma
Impedance	<0.2Ω	<0.02Ω
Regulation (Line & Load)	<0.2 V	<0.02 V
Ripple	<0.005 V	

POWER SUPPLY MODELS AVAILABLE

Model	Output (DC) Voltage Levels (Volts)
PS-LV	3.6 or 5.2
PS-SL	3.6 or 5.2, and $\pm\frac{12}{6}$ and 18,
PS-HV	or ±15 and 30
PS-SV	$\pm\frac{12}{6}$ and 18, or ±15 and 30
PS-HL	3.6 or 5.2 and 18 or 30

Examples: PS-SL1 — 5.2 and ±15 and 30
PS-SV1 — ±15 and 30
PS-HL1 — 5.2 and 30



Now designers can power and package circuitry with ease. Model ENC-1000 cabinet accepts up to 5 circuit cards without any additional mounting hardware. High quality power supply; versatile multiple output voltages. Excellent heat transfer characteristics. Suited for dense packaging. Easy assembly, appealing design.

DESIGNERS KIT AND ACCESSORIES

Model	Description
PB-1000	Precut Breadboards (2¾" x 8" x 1/16")
AK-1000	Accessories Kit Including: Pilot Lamp, 2 BNC Connectors, 11 Position Rotary Switch, DPDT Switch plus Spare Fuse
R1 or R2	19" x 3½" x 7½" Single or Dual Rack Adapter
NEX	Blue Finish on Cover

Clevite Ceramic Filters

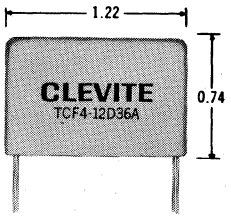
for the man with designs on something better.

Small, lightweight and rugged. Steep-sided selectivity. Large range of bandwidths. Non-microphonic. Permanently-tuned. Immune to magnetic fields. High stop band rejection free of spurious response. Highly stable with both temperature and time.

Computer Designed TCF Hybrid Ceramic Filter

High efficiency design combines the input advantage of a tuned transformer with the stability and high performance of Clevite cermic filters. This design offers manufacturers of quality communications equipment greater selectivity at a lower cost. Made specifically for CB, mobile, aircraft and marine radios . . . in a package less than 0.6 cu. in.

(A selection of other bandwidths and characteristics to cover a range of applications from FM to CW is available on special request.)



TCF-4 CERAMIC FILTERS

Model Number	Bandwidth 6dB (Min.) (kHz)	Bandwidth 60dB (Max.) (kHz)	Insertion Loss (dB)	Stopband Rejection (dB)	Impedance (Kilohms) In**	Impedance (Kilohms) Out
TCF4-8D20A[1]	8	20	8	60	40	1.5
TCF4-12D36A[1]	12	36	8	60	40	2.2
TCF4-18G45A[2]	18	45	6	50	40	2.2

1.—Center Frequency* 455kHz ±1.0. 2.—Center Frequency* 455kHz ±1.5.
*Stability: TIME—within +0.2% for 5 years.
TEMP—within 0.2% from −20 to +60°C.
**Max. Ratings: 100 volts DC, 5 ma DC.

TCF-6 CERAMIC FILTERS

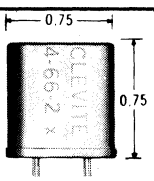
Model Number	Bandwidth 6dB (Min.) (kHz)	Bandwidth 60dB (Max.) (kHz)	Insertion Loss (dB)	Stopband Rejection (dB)	Impedance (Kilohms) In**	Impedance (Kilohms) Out
TCF6-4D10A[1]	4	10	10	60	40	4.7
TCF6-30D55A[3]	30	55	5	60	20	1.0
TCF6-35D60A[3,4]	35	60	5	60	20	1.0
TCF6-12F36A[1]	12	36***	10	90	40	2.2

3.—Center Frequency* 455kHz ±2.0.
4.—Available on special order at a center frequency of 500kHz.
*Stability: TIME—within +0.2% for 5 years.
TEMP—within 0.2% from −20 to +60°C.
Max. Ratings: 100 volts DC, 5 ma DC, *@90dB.

For more information, write for Bulletin 94026. Clevite Corporation, Piezoelectric Division, 232 Forbes Road, Bedford, Ohio 44146.

Split Ring Low Frequency Filter

These miniature, fixed-tuned filters combine very narrow band widths and high performance with small size and weight. Optimum applications include low frequency communications receivers, selective calling systems and control circuits.

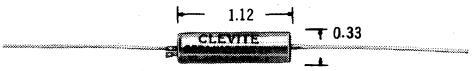


Model Number	Center Frequency (kHz)	Insertion Loss (dB)	Impedance (Kilohms)
TSR-9B	9	4	56
TSR-12B	12	4	56
TSR-15B	15	4	56
TSR-18B	18	4	47
TSR-21B	21	4	47
TSR-24B	24	4	47
TSR-27B	27	4	33
TSR-30B	30	4	33

(Note: These Filters are available at all center frequencies from 9kHz to 50kHz.)
Bandwidth: (%f_0): 1% @ 3dB; 13% @ 20dB.
Stability: TIME—within 0.2% for 5 years.
TEMP—within 0.2% from −40°C to +85°C

For more information, write for Bulletin 94. .3. Clevite Corporation, Piezoelectric Division, 232 Forbes Road, Bedford, Ohio 44146.

Compact D-11 Ladder Filter — 60dB Stopband Rejection



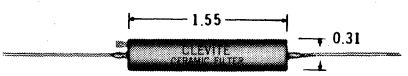
Improved D-11 cermic i-f filters are designed for communications circuit applications where the precise center frequency tolerance and high stop band rejection of the widely-used 17 disc Clevite ladder filter are not required.

Model Number	Center Frequency Tolerance (kHz)	Bandwidth 6dB (Min.)* (kHz)	Bandwidth 60dB (Max.)* (kHz)	Insertion *Loss (dB)
TL-6D11-12A	±2	6	12	6
TL-10D11-20A	±2	10	20	4
TL-16D11-32A	±2.5	16	32	5
TL-20D11-38A	±2.5	20	38	5
TL-30D11-57A	±3	30	57	5
TL-40D11-72A	±3	40	72	4

Packaged Size: 1.12 ±.030 x .327 Dia. Max. *At Room Temperature 27°C.
Center Frequency: 455kHz. Also available at 500kHz on special order.
Stability: TIME—within + 0.2% for 5 years.
TEMP—within 0.2% from −40°C to +85°C.
Impedance: 10kHz B/W and below—2000 ohms.
(In and Out) 16kHz B/W and above—1000 ohms.
Stopband Rejection: 60dB.

For more information, write for Bulletin 94021. Clevite Corporation, Piezoelectric Division, 232 Forbes Road, Bedford, Ohio 44146.

Standard 17-disc Ceramic Ladder Filter



Clevite 17-disc ceramic ladder filters are designed for i-f stages of military and top-of-the-line commercial superheterodyne radio receivers used in airborne or ground AM and FM communications equipment.

Model Number	Bandwidth 6dB (Min.)* (kHz)	Bandwidth 60dB (Max.)* (kHz)	Insertion Loss * (dB)
TL-2D5A	2	5	10
TL-4D8A	4	8	7
TL-6D11A	6	11	6
TL-8D14A	8	14	5
TL-10D16A	10	16	4
TL-16D25A	16	25	5
TL-20D32A	20	32	5
TL-30D45A	30	45	5
TL-40D55A	40	55	4
TL-45D65A	45	65	4

Center Frequency: 455kHz: ±1kHz for narrow band;
±2kHz for bandwidths above 20kHz.
Stability: TIME—within +0.2% for 5 years.
TEMP—within 0.2% from −40°C to +85°C.
*At Room Temperature 27°C.
Impedance: 10kHz B/W and below—2500 ohms.
(In and Out) 16kHz and 20kHz B/W—1500 ohms.
30kHz B/W and above—1200 ohms.

For more information, write for Bulletin 94017. Clevite Corporation, Piezoelectric Division, 232 Forbes Road, Bedford, Ohio 44146.

CLEVITE

ESC LC FILTERS.....

design and performance checked BEFORE prototyping

To meet your specific filter requirements, ESC first constructs a mathematical model based on actual physical components available. Through the use of high speed computer techniques with ESC's inhouse IBM 1130, the electrical characteristics and physical dimensions of your proposed filter are immediately tested and "proven out." Typical computer output data includes input impedance, attenuation, phase, phase delay, and group delay—all versus frequency. It is therefore possible for ESC to evaluate your filter needs, develop a suitable design and submit a quotation in a fraction of the time previously required.

The products illustrated to the right were designed and produced by ESC and are representative examples of our filter capabilities.

Please do not request that we send you a filter catalog or other descriptive literature—we don't have any. All of our designs are custom. We do have a Filter Questionnaire, however. If you fill it out, we will be able to discuss your specific requirements with you.

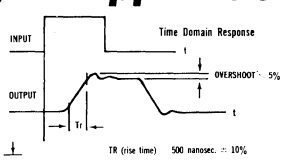
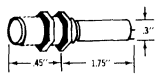
as sophisticated as your application

RFI TUBULAR FILTER WITH CONTROLLED OVERSHOOT AND RISE TIME

FREQUENCY RESPONSE

Flat within ± ½ db to 200 kHz
2 MHz > 3 db
30 MHz > 60 db
30 MHz—1 GHz > 40 db

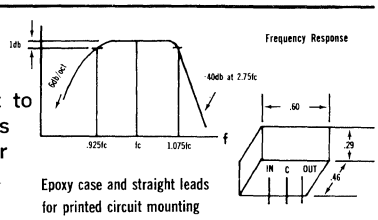




Z source = 75Ω
Z load = 50kΩ

ULTRAMINIATURE TELEMETERING FILTERS

Center frequencies from 400 Hz to 165 kHz. Available in bandwidths of ± 7½% and ± 15% of center frequency (fc)
Z source/load = 10kΩ

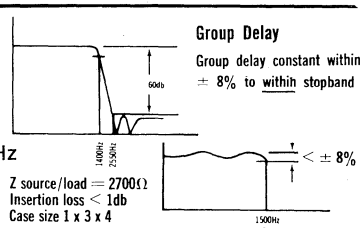


Epoxy case and straight leads for printed circuit mounting

CONSTANT GROUP DELAY LOWPASS FILTER WITH HIGH DISCRIMINATION

FREQUENCY RESPONSE

Passband flat within ± .1 db
Cutoff frequency (< 3 db), 1400 Hz
Attenuation at 2550 Hz and above, > 60 db



Z source/load = 2700Ω
Insertion loss < 1db
Case size 1 x 3 x 4

BANDPASS DELAY LINE FOR HIGH DELAY IN SMALL PACKAGE

Center frequency 100kHz
Passband ± 3kHz < 1 db
Group delay 1.0 millisec.
Z source/load = 1kΩ

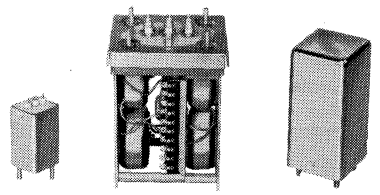
HERTZ FILTERS

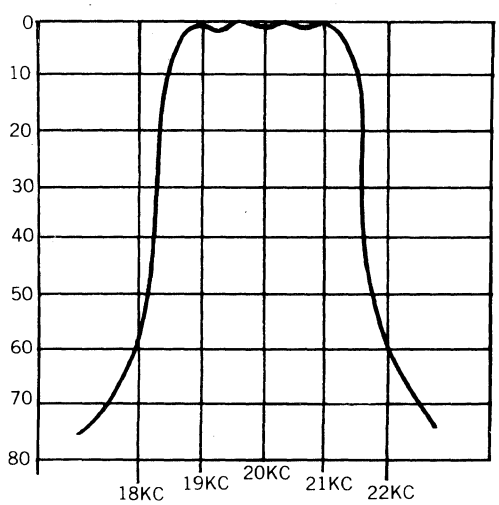
BAND PASS FILTERS CUSTOM DESIGNED TO FILL YOUR NEEDS



Hertz Filter Corporations' engineering department is made up entirely of specialists in the field of custom design of band pass filters. They are all fully experienced and prepared to help you solve your filter problems. Call or write Hertz for reliable service and prompt delivery.

FEATURES

1. Filters, Band Pass, Passive
2. Center Frequencies — 50 Hz to 50 Meg Hz
3. Shape factors — better than 2.0 for ratios of 60 db to 3 db
4. Bandwidth to center frequency ratio — up to 10%
5. Phase linearity — within 10° through passband
6. Low passband insertion loss
7. Better than 80 db attenuation 50% above and below center frequency
8. Input and output impedances as required
9. Low input and output impedances in stop band
10. Low passband ripple
11. L, C, and R elements only



PARTIAL LIST OF HERTZ FILTERS

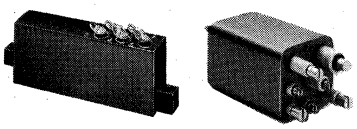
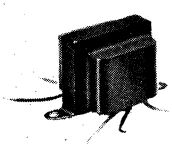
GENISCO

FILTERS / TRANSFORMERS CHOKES / COILS / SWITCHES ENGINEERING SERVICES



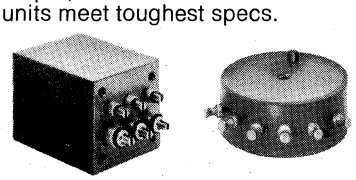
CONSTANT VOLTAGE TRANSFORMERS

Regulate voltage within ±1%, even with input variations as great as ±15% with closely controlled source frequency. Response time 1.5 cycles or less. Harmonic content in output voltage wave held to minimum. 175 watts to 15 KW.



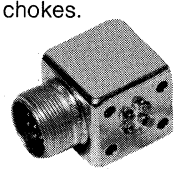
AUDIO TRANSFORMERS

Commercial and military types for subsonic, sonic, ultrasonic frequencies, renders harmonic and intermodulation distortion negligible. Minimum hum pickup. Frequency response for input, output, driver and modulation units meet toughest specs.



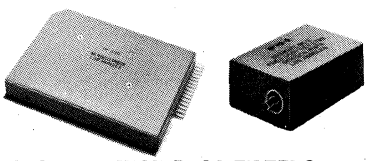
REACTORS

Wide variety of chokes and reactors. Includes modulation reactors, splatter chokes, filter reactors, swinging chokes, smoothing chokes, charging chokes, high Q chokes.



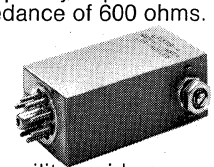
ELECTRIC WAVE L-C FILTERS

PC high-performance types designed and manufactured to the most rigid customer specifications. Available in complete range of sizes and shapes, including subminiature packaging to meet all customer requirements.



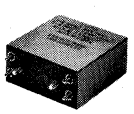
LOW AND HIGH PASS FILTERS

Series of inexpensive standard low and high pass designs available. One typical low pass design delivers constant output within ±0.3% from DC to 20 cps and attenuation of greater than 35 db at 100 cps, 25 ohms input, 3 megohms output. Typical high pass design from an M derived, two section filter has 30 db attenuation at a cut-off ratio of 0.67 of the 3 db frequency. Input and output impedance of 600 ohms.



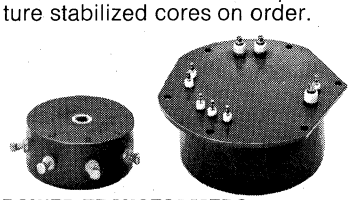
DELAY LINES

Qualified for military airborne and missile applications. Attenuation less than ½ db per microsecond delay with 0.25 microsecond pulse width.



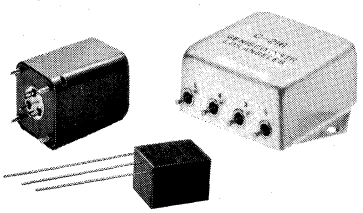
TOROIDAL INDUCTORS

Open coil, encapsulated coil and hermetically sealed coil types in wide range of sizes and capacities. Over 700 models to choose from. Inductances range from .010 mH to 1 H. Dimensions held within ±1/16 inch or better. Temperature stabilized cores on order.



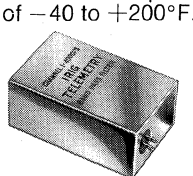
POWER TRANSFORMERS

Includes step-up, step-down, isolation and auto to 100 KVA. Meet or exceed MIL-T-27A and B. Hermetic metal cased. Sealed encapsulated. Open frame impregnated. Also high shock versions of all three. Operating temperatures to 170°C+, as specified. Life expectancy 10,000 hours minimum.



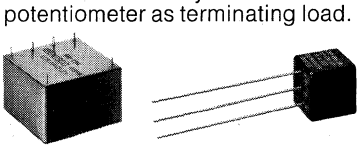
PULSE TRANSFORMERS

Wide variety of values in microhenries to millihenries range. Virtually any package size and style. Hermetically sealed in metal cases or plastic encapsulated. Core types include toroid, cup, tape. Per applicable mil specs. 250 to 750 ohms impedance. Taps —0 to 10 microseconds — located within 25 nanoseconds at various points. Temperature coefficient of delay not to exceed 0.00005 microsecond per microsecond per °F. over a temperature range of —40 to +200°F.



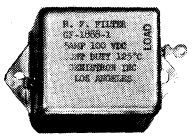
TELEMETRY FILTERS

Set of 80 excellently matched comb. filters. Holds 3 db points within ±1 cps within 25 cps bandwidth from 0 to 2,000 cps. Voltage gain obtained by 25K ohm output with input impedance of 500 ohms. Enables output voltage to be set accurately with potentiometer as terminating load.



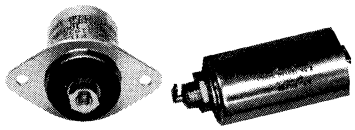
TUNED CIRCUIT NETWORKS

For 400 cps tuned circuits using simple combinations of capacitors and inductors. Specifications ordinarily made for Q, dc resistance, inductance, capacitance and tuning frequency of the network. Produced in accordance with exacting Genisco specifications.



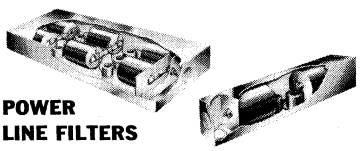
RADIO INTERFERENCE FILTERS

Per MIL-F-15733D. 1 to 50 amp, 100 VDC to 120 VAC, 400 cps, 400 VDC. Insertion loss per characteristic B or D as required, measured per MIL-STD-220. Both 85°C and 125°C ratings, typical voltage drop .25. All other electrical and mechanical requirements are met.



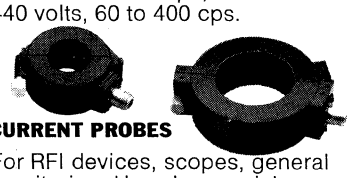
ARC SUPPRESSORS

Available in ratings from 1.0 through 4.0 microfarads, in 25, 50, and 100 amp groups. Suitable for work at high amperages on voltages of 100 VDC and below. Capacitors designed to meet or exceed MIL-C-11693-B.



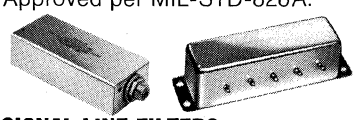
POWER LINE FILTERS

Shielded enclosure, RF filters. Over 100 db isolation over 14 Kc to 1,000 Mc range. Attenuation per MIL-STD-220A. Design and construction per MIL-F-15733D. Operating temperature −55° to +65°C. Filter panels from 2 X to .5 X to 4 X 125 amps, 120 to 440 volts, 60 to 400 cps.



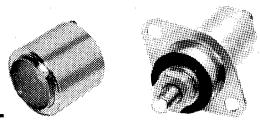
CURRENT PROBES

For RFI devices, scopes, general monitoring. Use also as pickup devices and/or sensors for signal conditioning equipment. Useful range few cycles to 1,000 Mcs. Apertures ¼ to 8 inches. Sensitivity to 0.5 microamps. Power line limits of 10 to 300 amps. Approved per MIL-STD-826A.



SIGNAL LINE FILTERS

Designed for line communications such as telephone, teletype, carrier current, data phone and computer links. Transmission loss in the pass band is 1 db or less, and has a high insertion loss, generally greater than 100 db at frequencies of 14 kc up to 1.0 Gc. Meet applicable sections of MIL-F-18327 and MIL-F-15733D.

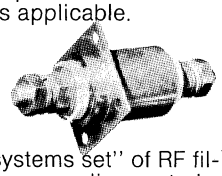


SPECIAL CAPACITORS AND NETWORKS

Non-standard sizes, shapes and electrical values are a specialty. Years of experience and wide engineering background are combined to provide the highest reliability in special capacitors and networks. Engineering experience in systems analysis and study help provide you with a part carefully designed and evaluated for your specific need. Short delivery cycles for these non-standard items.

ISOLATION NETWORK

The Isolation Network is designed to meet the requirements of MIL-STD-188B and FED-STD-222 for low level digital transmission reference systems. It additionally receives a pulse on the input, transduces the pulse through a metallic shielded wall and reconstitutes the pulse in the output section. This achieves total electrical isolation of input and output. It is applicable to signal, clock, and control circuits for military digital DC communication equipment where a serial binary interface appears. It is packaged to form a completely functional unit which will connect directly into the communications network. It shall be used to couple the loop and line side of cryptographic and cryptographic control equipment as applicable.

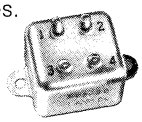


SHEILDED ROOM FILTERS

Complete "systems set" of RF filters for use on power lines entering or leaving electronic shielded enclosures. Each of five different filters provides over 100 db of isolation or filtering over the frequency range of 14 kc to 1000 mc. isolation or attenuation is in accordance with MIL-STD-220A and filters are manufactured in accordance with MIL-F-15733D. Operating temperature from −55°C. to +65°C. Current and voltage of different panels ranges from 2 X .5 amps to 4 X 125 amps, 120 volts to 440 volts and 60-400 cps.

RFI TRANSIENT-FREE SWITCHES

Genisco RFS-Series Switches are solid state AC or DC switching devices that allow the turning on or off of AC or DC currents with a minimum of electrical transients and/or circuit noises.



DC 1 AMP AND 5 AMP

Our new DC transient free switch is a small, low-cost unit designed for 28 VDC service. It is available in 1 amp and 5 amp configurations, and both models exceed the requirements of MIL-STD-826A when switching a full rated load. Current requirement 20 ma. Voltage Drop 1 volt.

AC RFI-FREE SWITCH/ CONTROLLER

One-amp, combination RFI-free switch and controller which can serve as a transient-free on/off switch for AC power circuits. Designed for a 115-volt, 50-400Hz power line. Current requirement less than 2 ma. Measures only 1¾ x 2 x ¾ inches. Weighs only three ounces. Turns AC power circuits on and off with minimal electrical noise generation. After control terminals are shorted, electronic logic waits until line voltage reaches a zero crossing before applying power to the load. Conversely, when control terminals are opened, load power continues until load current crosses zero. Switch meets the noise limits of MIL-STD-826A without additional filtering or shielding.

RFI/EMI ENGINEERING SERVICES

Genisco Technology components reflect the continual advances being made through Genistron's outstanding capabilities in RFI/EMI research, development, engineering and production. By devoting all efforts exclusively to radio frequency/electromagnetic interference and system compatibility control, Genistron has built up what may well be the greatest single-source wealth of knowledge in this specialized area. For RFI/EMI components, applications engineering assistance or consultation, write us or contact our representative nearest you.

FILTER NETWORKS UNLIMITED

To solve our clients filter problems, Helix Research Associates offers a management and engineering team with more than 50 years experience in design and production of highly customized and sophisticated electronic wave filters. By extensive untilization of computers during design plus a vast library of normalized designs, HRA provides its clients with rapid response and optimum design characteristics at the greatest possible savings in cost.

HRA's manufacturing facilities utilize the most advanced techniques known and is itself continually helping to advance the state-of-the-art. With rigidly enforced Quality Assurance and Quality Control procedures, HRA's clients are assured high production of the best possible quality on schedule.

HRA filters can be packaged to meet specific volume requirements. Whether your requirements are conventional, exotic, commercial, or military, HRA can solve your filter design problems and manufacture in quantity to your exact requirements.

The examples below are typical of HRA solution to unique customer filter requirements and represent only a small sampling of HRA's Filter Networks Unlimited. Write, wire or phone for the complete story.

STANDARD FILTERS

For Highest Selectivity

Standard filters are designed by modern network methods for minimum stop to pass band ratios. Applications are those requiring optimum utilization of frequency spectrum.

CUSTOM FILTERS. Low, band or high pass and band stop filters with optimum characteristics can be supplied to your special requirements and MIL-F-18327. Construction utilizes toroidal inductors and high quality capacitors of special films or silvered mica, according to frequency and space requirements. Operating frequencies range to 10 mc/s. Temperature stabilization for both amplitude and frequency can be effected. Mechanical styles may be epoxy encapsulated or hermetically sealed steel in sizes from 0.2 to 200 cu. in.

OTHER PRODUCTS: Precision Inductors • Transformers & Reactors • Tuned Circuits • Amp/Phase Equalizers • Lumped Constant Delay Lines.

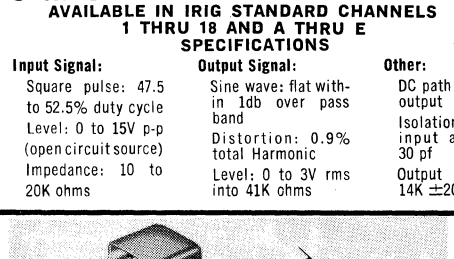
AVAILABLE IN IRIG STANDARD CHANNELS 1 THRU 18 AND A THRU E

SPECIFICATIONS

Input Signal:
Square pulse: 47.5 to 52.5% duty cycle
Level: 0 to 15V p-p (open circuit source)
Impedance: 10 to 20K ohms

Output Signal:
Sine wave: flat within 1db over pass band
Distortion: 0.9% total Harmonic
Level: 0 to 3V rms into 41K ohms

Other:
DC path at input and output
Isolation between input and output 30 pf
Output impedance: 14K ±20%



SERIES 68 MINIATURE LOW PASS

SPECIFICATIONS:

Relative Attenuation	f_c cps	Part No.
3 db ± .5 @ f_c	330	68-01

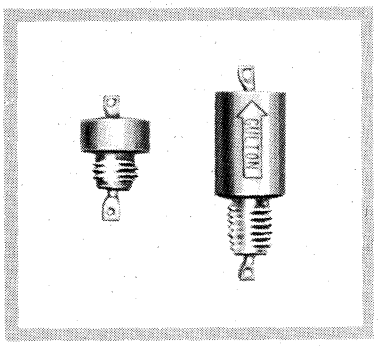
40 db min @ 1.5 f_c	600	68-03
	660	68-04
Insertion loss—1 db max	790	68-05
	900	68-06
Terminations	1050	68-07
Input—10K ohms	1200	68-08
Output—10K ohms	1600	68-09
	2100	68-10
Physical Specifications	3000	68-11
Case Hermetically Sealed Steel	3300	68-12
Size (330 to 900 cps)	4000	68-13
1.26"x1.26"x1.5" High	4500	68-14
Mounting: two 6-32 studs	5250	68-15
spaced 1.25"	6000	68-16
Size (1050 to 13000 cps)	8000	68-17
1"x1"x1" High	10500	68-18
Mounting: two 4-40 studs	11500	68-19
spaced 1"	13000	68-20
Terminals—3 solder type		

Gulton

EMI BROAD BAND LOW PASS FILTERS
SUBMINIATURE AND MINIATURE



Gulton offers the widest range of broad band low pass filters on the market today. . . subminiature BUTTON series, miniature TEMPERATURE STABLE series and standard broad band series. They are available in 50, 100 and 150 VDC voltage ratings and 60 ma. to 15 amp. current ratings. Note. . . BUTTON series. . . the smallest broad band filters.

BUTTON SERIES L NETWORK 50 VDC

Gulton

TEMPERATURE STABLE BROAD BAND FILTERS
LOW PASS

Gulton TEMPERATURE STABLE broad band filter line offers 50 VDC, 100 VDC and 150 VDC ratings in L, Pi and T networks. The TEMPERATURE STABLE line features:

- Guaranteed minimum insertion loss with full load applied from -55°C to +125°C
- No voltage derating to +125°C
- Low DC resistance

Contact Gulton for data on the 100 VDC and 150 VDC rated L, Pi and T network broad band filters.

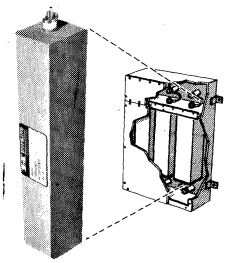
POWER FILTERS

Hopkins Power Line Filters are designed, built and tested to deliver maximum trouble-free continuous service year-after-year. Available as individual power filters, or housed in cabinet assemblies, these units are intended for use in shielded enclosures, secure installation and general power applications. They are available in various current ratings from 1 AMP through 200 AMPS.

1960 Series

The 1960 Series filters furnish 100 DB of attenuation from 14KHZ to 10GHZ when measured in accordance with Mil Standard 220A load conditions.

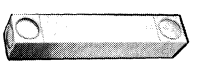


12600 Series

The 12600 Series filters furnish 100 DB of attenuation from 14KHZ to 10GHZ when measured in accordance with Mil Standard 220A. Also measured under full load conditions from 14KHZ to 20MHZ with special buffer networks to allow valid measurements below 100KHZ.

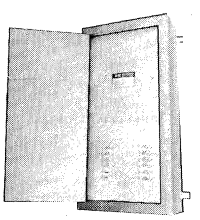
1776 Series and 1620 Series

Filters are also available in single and dual circuit units offering lower performance characteristics when required.

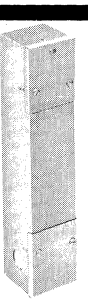


RF SHIELDED & FILTERED CIRCUIT BREAKER PANELBOARD

Hopkins R-F Shielded and Filtered C/B Panelboards are intended for use in installations where secure communication is mandatory. The unique design of these Panelboards maintains shielding integrity with the cabinet door **open.** Designs are available utilizing both the 1960 Series and 12600 Series filters. Circuit Breaker Complement must be specified when ordering.



COMMUNICATIONS/ SIGNAL LINE FILTERS

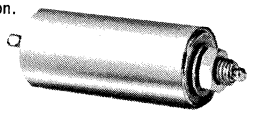


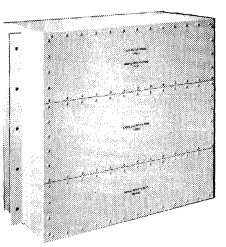
258B-S2

This unit is a Voice and Signal Line Filter offering 100 DB attenuation from 14KHZ to 1GHZ per Mil Standard 220A with outstanding reliability. Originally designed for use in 600 OHM balance system, it has been widely used in other applications such as Secure Communications.

F-4386 & F-4386-1

These Voice and Signal Filters are designed to meet the requirements of DCA Cir 175-6A Application #1. They are single circuit bulkhead mounting tubular filters intended for cabinet installation.





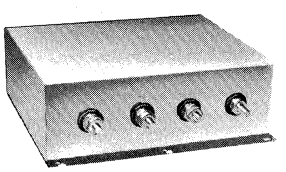
Special cabinet designs are available incorporating any number of the above filters modified for cabinet installation. These units are constructed with an R-F Shielded bulkhead between input and output housings in order to maintain shielding integrity required for secure installations.

UL RECOGNIZED FILTERS FOR DATA PROCESSING EQUIPMENT

The 44 Hopkins RFI Filters designed expressly for data processing equipment provide maximum suppression of Radio Frequency Interference and other extraneous signals detrimental to efficient operation of data processing equipment.

Hopkins RFI Filters are designed and tested to deliver maximum, trouble-free duty for many years.

You will speed production and save both time and money in the manufacture of your data processing equipment when you specify, whenever possible, off-the-shelf Hopkins RFI Filters which are included as recognized components.



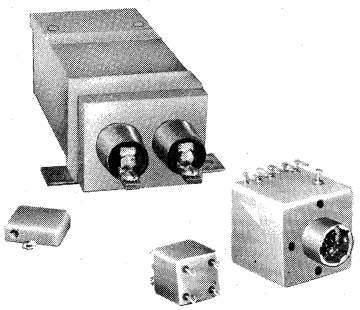
The Hopkins line offers the widest selection of RFI filters recognized under the component program of Underwriters' Laboratories, Inc.

U.L. Yellow Card listings available upon request. Available in various amperage ratings and case styles.

CUSTOM AND GENERAL PURPOSE EMI/RFI FILTERS

Custom Filters

Hopkins has long been a leader in the design and development of special custom filters to satisfy specific customer requirements. Thousands of designs are on file incorporating all voltage, current ratings and case configurations. Design and performance are verified by computer. Our complete Engineering and Manufacturing Facility is available to assist in the solution of your particular filter problems.

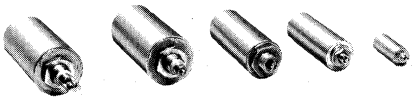


General Purpose Tubular Filters—14000 Series

Intended for use in critical applications where the "feed-thru" characteristic is necessary for good high frequency performance. Available in various circuit configurations from a single element capacitor thru multiple element Pi and T sections. Various performance characteristics are available to allow the user to select the unit best suited to his needs. Typical ratings from 50VDC @ 1 Amp. to 277 VAC @ 50 Amp.

All units designed to meet requirements of MIL-F-15733.

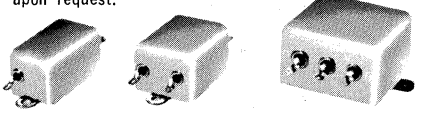
These Units are available mounted in cabinets on special request. Contact Factory.

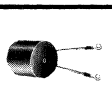


General Purpose Rectangular Filters—16000 Series

These units are intended to be used where installation is not critical. They are available in one, two and three circuit configuration as well as a wide variety of voltage and current ratings. Various attenuation characteristics allow the user to select the unit best suited to fit his particular needs. Typical ratings are from 50 VDC @ 1 Amp. to 277 VAC @ 50 Amp. All units are designed to meet the requirements of MIL-F-15733.

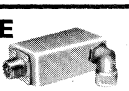
Electronic Wave Filters utilizing modern network design techniques are available as custom filters upon request.



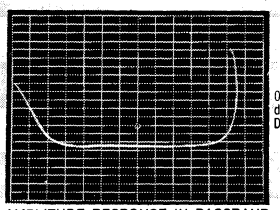


SPECIAL CHOKES

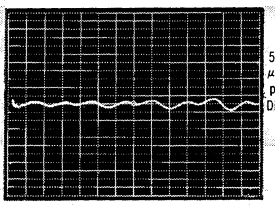
BAND PASS/WAVE FILTERS



HOW KAPPA GETS CONSTANT DELAY IN STEEP RESPONSE FILTERS!



AMPLITUDE RESPONSE IN PASSBAND



PASSBAND GROUP DELAY DISTORTION

Difficult? . . . of course! . . . but

WE PROGRAMMED A GENERAL SOLUTION

in double precision **FOR** a high-speed digital computer, to enable us to meet the demands of systems requiring delay distortionless transmission.

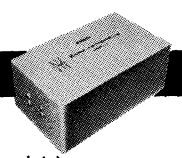
ANY PREDETERMINED ENVELOPE DELAY

can now be attained

BY ITERATION OF THE POLES AND ZEROES

of a complete system with up to 50 equalizer sections. By **ACHIEVING EQUAL RIPPLE RESPONSE** this method outperforms any other equalization technique in minimizing delay distortion. KAPPA design engineers can assist you in attaining **ECONOMICALLY** an improved accuracy of time correlation between signals in data transmission systems.

KAPPA 2211 SERIES FILTERS



(TYPE: BAND PASS)

PASS BAND RESPONSE :	
Frequency Range:	3300-6000 Hz (1 db points)
Amplitude ripple:	± 0.25 db.
Group Delay Distortion:	Less than ± 100 usec.
Insertion Loss at 4500 Hz:	Less than 2.5 db
STOP BAND RESPONSE :	Min 50 db at 3000 Hz and lower Min 50 db at 6420 Hz and higher
Impedance Range:	500-6000 ohms
Pass Band Harmonic Distortion:	Less than –65 db
Intermodulation Distortion between equal simultaneous level tones:	55 db below –10 dbm
Environmental:	MIL F-18237 B

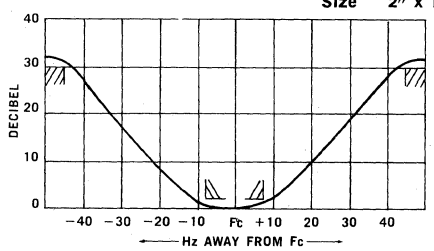
TYPICAL FILTERS

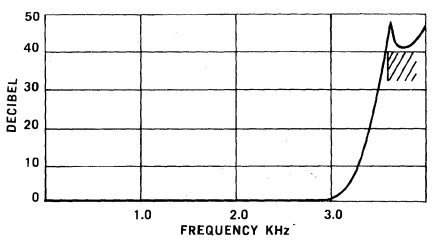
BAND PASS

Frequency	90 Hz
Bandwidth 0.4 db	10 Hz min.
Shape Factor 30/0.4	6:1
Source Impedance	250 ohm
Load Impedance	250 ohm
Insertion Loss	4.0 db max.
Temperature	−55°C to +85°C
Size	2″ x 1.5″ x 2″



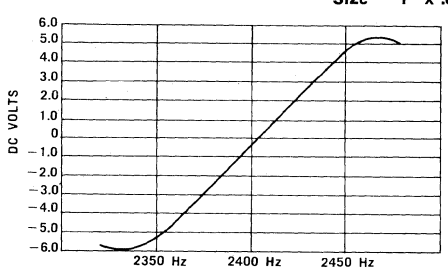
LOW PASS

Frequency	0 - 3000 Hz
Zin = Zout	600 ohm
Return loss from 0 - 3.0 KHz	20 db min.
Shape Factor 40/0.5	1.2:1
Insertion Loss	1.0 db max.
Band Pass Variation	±0.1 db
Temperature	−40°C to +85°C
Size	2.5″ x 2.0″ x 1.5″



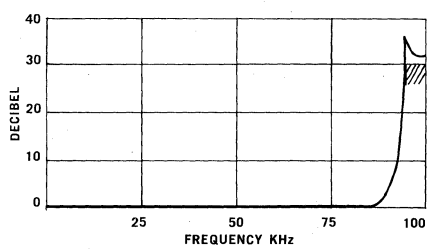
DISCRIMINATOR

Frequency	2400 Hz
Source Impedance	600 ohm
Load Impedance	100 K ohm
Temperature	−55°C to +85°C
Output Linearity	±5% @ ± 50Hz
Space	±170 Hz
Size	1″ x .85″ x 1.5″



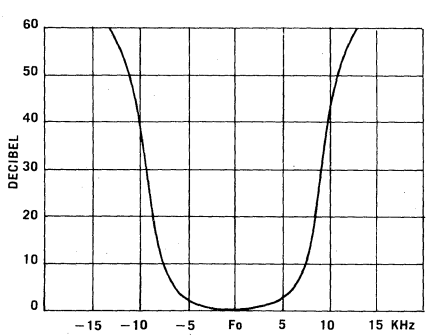
LOW PASS

Frequency	53 KHz
Band Pass Variation 0 - 53 KHz	0.05 db max.
Attenuation 95 KHz to 2 MHz	30 db min.
Phase Linearity 0 - 53 KHz	1.0° max.
Insertion Loss	0.5 db max.
Temperature	−10°C to +55°C
Size	2.5″ x 3″ x 1.5″



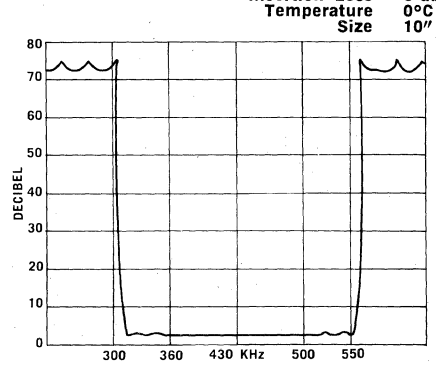
BAND PASS

Frequency	455 KHz
Bandwidth 6 db	13 KHz min.
Shape Factor 80/6	2.5:1
Source Impedance	47.0 K ohms
Load Impedance	10.0 K ohms
Insertion Loss	12 db max.
Temperature	−40°C to +85°C
Size	1.5″ x 1.5″ x 3″



BAND PASS SUPER GROUP

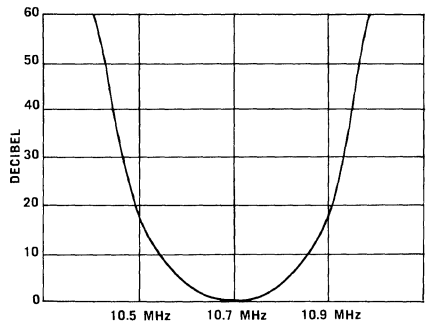
Frequency	430 KHz
Bandwidth ±0.5 db max.	312 to 552 KHz
Attenuation 60 to 303 KHz	70 db min.
560 KHz to 2 MHz	70 db min.
@ 308 KHz	40 db min.
Return Loss: From 312 to 552 KHz	23 db min.
Input Impedance	75 ohm
Output Impedance	75 ohm
Insertion Loss	6 db max.
Temperature	0°C to 60°C
Size	10″ x 2″ x 6″



TYPICAL FILTERS (Cont'd)

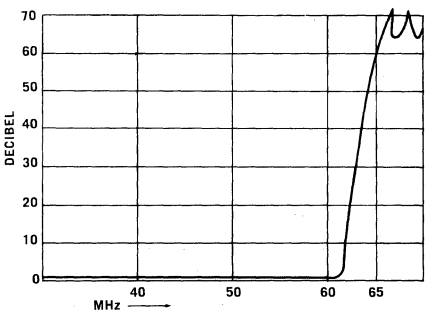
BAND PASS

Frequency	10.7 MHz
Bandwidth 3 db	215 to 230 KHz
Bandwidth 60 db	580 KHz max.
Insertion Loss	14 db max.
Phase Linearity	15° max.
Source Impedance	50 ohms
Load Impedance	50 ohms
Temperature	−55°C to +85°C
Size	2.4″ x .7″ x .75″



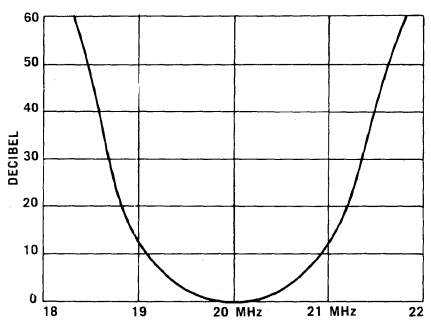
LOW PASS

Frequency	60 MHz
Band Pass Variation .20 - 61 MHz	.8 db max.
Insertion Loss	1 db max.
V.S.W.R. 10 - 61 MHz	1.1:1
RF Power	50 Watts max.
Temperature	−40°C to +85°C
Impedance In - Out	50 ohms
Size	6″ x 2″ x 1.5″



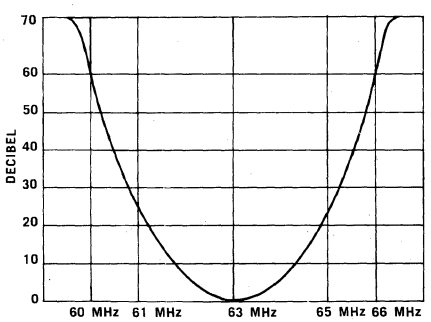
BAND PASS

Frequency	20 MHz
Bandwidth 3 db	1.0 MHz min.
Bandwidth 52 db	4.0 MHz max.
Zin = Zout	200 - 260 ohms
Insertion Loss	6 db max.
Temperature	−40°C to +85°C
Size	2.3″ x .75″ x 1″



BAND PASS

Frequency	63 MHz
Bandwidth 3 db	±600 KHz min.
Bandwidth 60 db	±3 MHz max.
Input Impedance	500 ohms ±20%
Output Impedance	100 ohms ±20%
Insertion Loss	10 db max.
Temperature	−55°C to +85°C
Size	2¼″ x 15/16″ x 1⅛″



UPPER SIDE BAND CRYSTAL FILTER

Carrier Frequency	1750 KHz
Bandwidth 2 db	3.2 KHz
Carrier Rejection	30 db min.
Attenuation: 0 to 1749.7 KHz and	
1745.5 KHz to 20 MHz	60 db min.
Ripple	1.5 db max.
Insertion Loss	6 db max.
Temperature	−40°C to +80°C
Source Impedance	250 ohms
Load Impedance	250 ohms
Size	3.3″ x 2″ x 1.1″

Note: The frequency and bandwidth range in the tables don't show our production limits. Other specifications are available in the range from 100 Hz to 500 KHz.

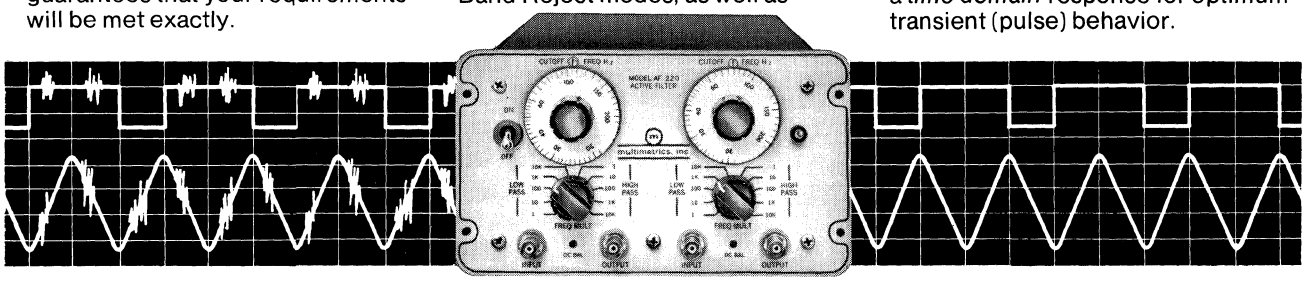
Fight signal pollution.

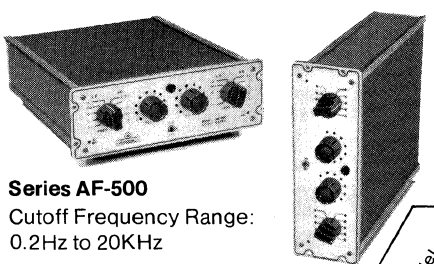
From 0.001Hz to 2MHz, unwanted noise or undesired information present in your signal processing equipment needn't be tolerated.

Our broad range of active filters, stocked for immediate delivery, guarantees that your requirements will be met exactly.

In our extensive line of Variable Active Filters, all individual channels are operable as either Low Pass or High Pass filters. In addition, the interconnection of independent channels allows Band Pass and Band Reject modes, as well as steeper attenuation slopes, to be obtained.

Selectable T/D response permits altering the performance of the Low Pass mode from the optimum frequency domain (Butterworth) to a *time domain* response for optimum transient (pulse) behavior.





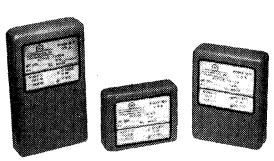
Series AF-500

Cutoff Frequency Range: 0.2Hz to 20KHz

Accuracy: ±5% (Continually adjustable or digitally adjustable—single digit)

The Series AF-500 is available with empirical, continuous tuning or digitally tuned for fractional octave filter applications.

This series is packaged for bench or NIM bin mounting.



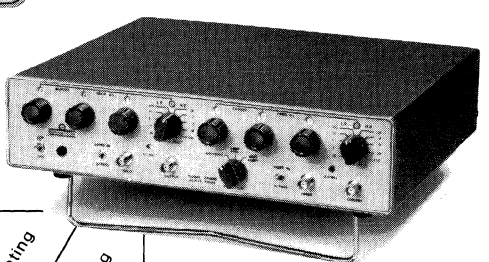
Series AF-300

Fixed Frequency Modules are available in virtually an infinite number of configurations to meet your signal conditioning requirements—Low Pass, High Pass, Bandpass or Band Reject functions with Butterworth, Bessel, Chebyshev, Legendre and other response parameters. Standard Fco multiples are 1, 2, 3, 5 and 10 from 0.1Hz to 100KHz, 60, 120, 180Hz and 2-4 pole units available from stock.

Series AF-100 & AF-200

Cutoff Frequency Range:
AF-100—20Hz to 2MHz
AF-200—0.2Hz to 20KHz

Accuracy: ±5%
(Continuously adjustable)



Series AF-400

Cutoff Frequency Range: 0.01Hz to 99.9KHz

Accuracy: ±2%
(Digitally adjustable)

Operates from Battery or 115/230VAC.

Model	Frequency Range, Hz	Accuracy	Channels	Slope/ Channel	Functions	Mounting	Tuning
AF-110	20 to 2M	±5%	1	24 db/ octave	HP, LP	Bench, rack	Continuous
AF-120	20 to 2M	±5%	2	24 db/ octave	HP, LP, BP, BR	Bench, rack	Continuous
AF-210	0.2 to 20K	±5%	1	24 db/ octave	HP, LP	Bench, rack	Continuous
AF-220	0.2 to 20K	±5%	2	24 db/ octave	HP, LP, BP, BR	Bench, rack	Continuous
AF-410	0.01 to 99.9K	±2%	1	24 db/ octave	HP, LP, By Pass	Bench, rack	Digital
AF-420	0.01 to 99.9K	±2%	2	24 db/ octave	HP, LP, BP, BR, By Pass	Bench, rack	Digital
AF-510	0.2 to 20K	— —	1	24 db/ octave	HP, LP	Bench, NIM BIN	Empirical
AF-510D	0.2 to 20K	±5%	1	24 db/ octave	HP, LP	Bench NIM BIN	Digital
AF-520	0.2 to 20K	— —	2	24 db/ octave	HP, LP, BP, BR	Bench, NIM BIN	Empirical
AF-520D	0.2 to 20K	±5%	2	24 db/ octave	HP, LP, BP, BR	Bench NIM BIN	Digital

Other frequencies, response characteristics and pole configurations are readily generated by our computer-design techniques.

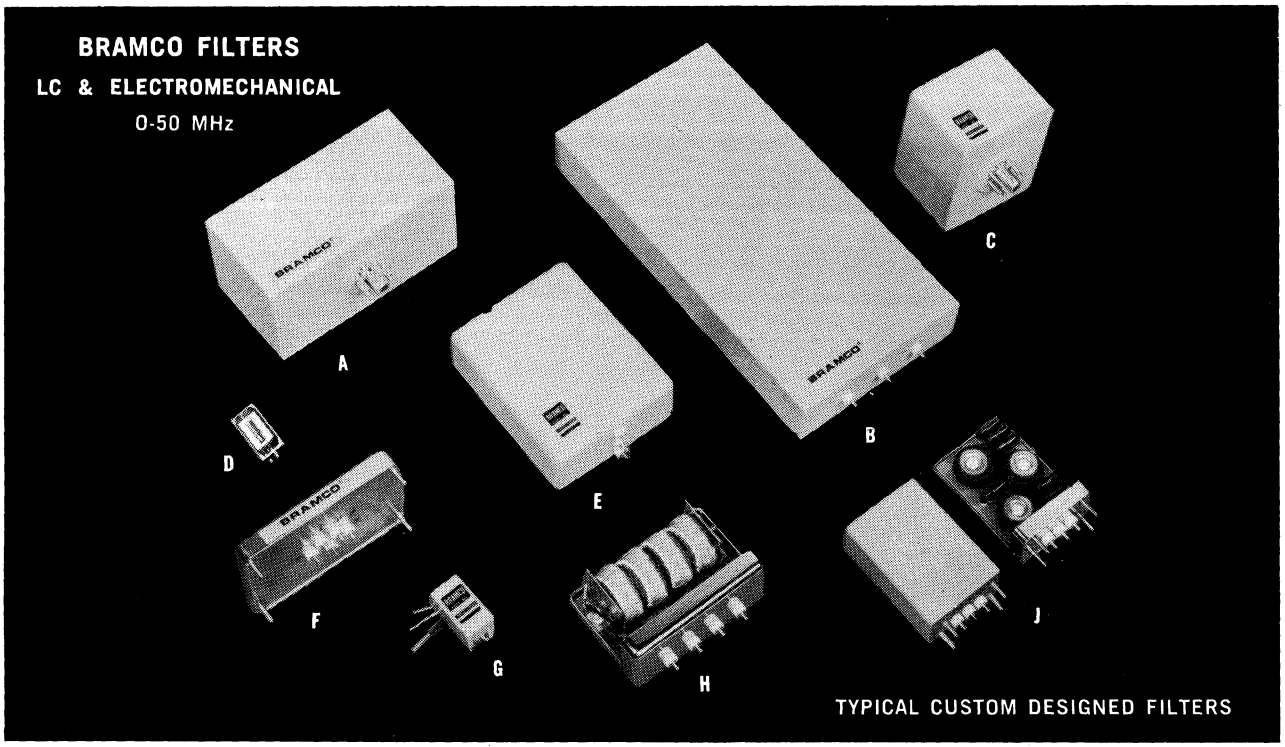
LEDEX®

BRAMCO CONTROLS DIVISION, LEDEX INC.
College and South Streets, Piqua, Ohio 45356 • Phone 513-773-8271



A. Tone Telegraph Bandpass Receive Filter
(MIL-F-18327/7)
Insertion loss: less than 8 db in the pass band
fc: 425 to 3825 Hz in 170 Hz increments
Transformer isolation between input and output
Size: 4 15/16" x 2 9/16" x 2 9/16"

B. Tone Accessory Band Stop Filter
For use with 600 ohm source and load
Typical insertion loss: 3 db, 20 Hz to 1.43 kHz
60 db, 1.58 kHz to 1.9 kHz
3 db, 2.1 kHz to 20 kHz
Size: 9" x 4½" x 1¼"

C. Tone Telegraph Bandpass Transmit Filter
(Mil-F-18327/7)
Specifications same as receive filter (A) except insertion loss less than 5 db in the passband
Size: 2 15/16" x 2 1/16" x 2 9/16"

D. RF20
Contactless Resonant Reed Filter, 80 to 3000 Hz
Works as audio tone filter or stable frequency source (±0.15%) for audio tone generator. See Section 4500 for more details.

E. Tone Accessory Low Pass Filter
For use with 600 ohm source and load
Typical insertion loss: less than 3 db, 20 Hz to 3 kHz
greater than 60 db, 3.45 kHz to 20 kHz
Size: 4" x 3¼" x 1¼"

F. Dual Hipass - Lowpass Filter
Insertion loss, lowpass section: less than 1 db, 20 Hz to 400 Hz
less than 3 db, 400 Hz to 4 kHz
greater than 40 db, 9.5 kHz to 20 kHz
Insertion loss, highpass section: less than 1 db, 9 kHz to 20 kHz
greater than 40 db, 20 Hz to 4 kHz
Operating Temperature: −40 to +85°C
Size: ⅝" x 2¼" x 3¾"

G. EIA Land Mobile Low Pass Voice Filter
1000 ohms source and load impedance
Insertion loss: less than 2 db in passband
greater than 10 db at 4.4 kHz
greater than 30 db at 9.5 kHz and above
Operating Temperature: −30 to +60°C
(EIA Shock and Vibration specs)
Size: ¾" x ⅝" x 1¼"

H. Tone Telegraph Bandpass Receive Filter
fc: 420 Hz to 3180 Hz in 120 Hz increments
Insertion loss: typically 6 to 10 db in the passband
Size: 3¼ x 2¼" x 1¼"

J. Radio Receiver Low Pass Filter
(Mil-F-18327/14, Type FR60X11YY1)
Insertion loss: less than 1 db from 200 Hz to 3 kHz
less than 3 db at 3.5 kHz
greater than 20 db at 3.5 kHz
greater than 45 db from 4.5 kHz to 20 kHz
Operating Temperature: −55°C to +85°C
Size: 2¾" x 1 29/32" x 31/32"

At Bramco the emphasis is in custom engineering LC and electromechanical filters.

We offer broad experience, fast engineering response. Know how to squeeze into tight spots, odd shapes. Use computer synthesis program for optimum design. Build to Mil-F-18327 or commercial specs.

Write for helpful data sheets, or outline application requirements. We'll welcome the chance to work with you.

STANDARD WEE-FIL® FILTERS FOR CUSTOM REQUIREMENTS

Temperature Range: 0 to 105°C. ■ Frequency Range: 50 KHz to 10 MHz. ■ Constructed to meet the requirements of MIL-F-18327, Grade 5 Class R.

LOW PASS WEE-FILS

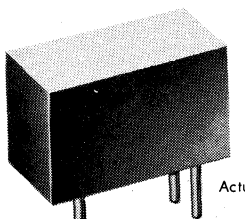

FIG. 1 Single Section

SL20 Wee-Fil Filter
20 db Single Section drops sharply from 3 db attenuation at f_c to 20 db at 1.5 f_c.
See Fig. 1 for size.

SL35 Wee-Fil Filter
35 db Single Section 3 db attenuation at f_c drops sharply to 35 db at 3.5 f_c.
See Fig. 1 for size.

DL35 Wee-Fil Filter
35 db Double Section drops sharply from 3 db attenuation at f_c to 35 db at 1.5 f_c.
See Fig. 2 for size.

DL50 Wee-Fil Filter
50 db Double Section drops sharply from 3 db attenuation at f_c to 50 db at 2 f_c.
See Fig. 2 for size.

HIGH PASS WEE-FILS

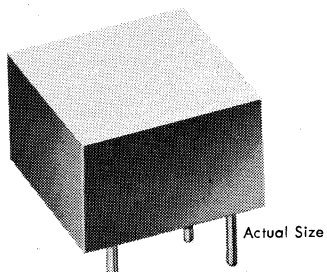

FIG. 2 Double Section

SH20 Wee-Fil Filter
20 db Single Section drops sharply from 3 db attenuation at f_c to 20 db at 0.67 f_c.
See Fig. 1 for size.

SH35 Wee-Fil Filter
35 db Single Section drops sharply from 3 db attenuation at f_c to 35 db at 0.4 f_c.
See Fig. 1 for size.

DH35 Wee-Fil Filter
35 db Double Section drops sharply from 3 db attenuation at f_c to 35 db at 0.67 f_c.
See Fig. 2 for size.

DH50 Wee-Fil Filter
50 db Double Section drops sharply from 3 db attenuation at f_c to 50 db at 0.5 f_c.
See Fig. 2 for size.

BANDPASS WEE-FILS

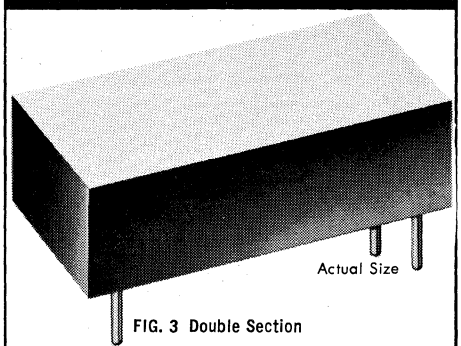

FIG. 3 Double Section

SB20 Wee-Fil Filter
20 db Single Section reaches 20 db attenuation at 3.5 times the bandwidth of the 3 db passband.
See Fig. 2 for size.

DB30 Wee-Fil Filter
30 db Double Section reaches 30 db attenuation at 3.5 times the bandwidth of the 3 db passband.
See Fig. 3 for size.

DB45 Wee-Fil Filter
45 db Double Section reaches 45 db attenuation at 3.5 times the bandwidth of the 3 db passband.
See Fig. 3 for size.

NYTRONICS WEE-FIL FILTERS
. . . afford fast delivery and low price due to Nytronics' standardization of parts and computer programming of design, parts requisition and test procedure printout. For applications having the same input and output impedance and operating frequency of 10MHz, max, specify Wee-Fil Filters.

For custom filters, consult your nearest NYTRONICS representative.

Philamon® INCORPORATED

90 HOPPER STREET, WESTBURY, NEW YORK 11590

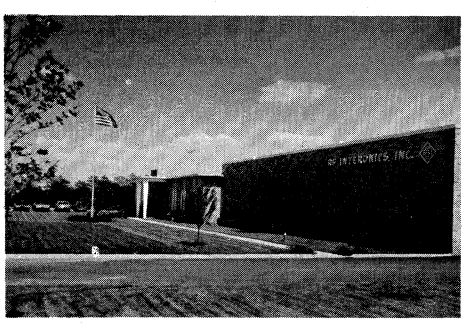
If RFI is your problem, RFI is your answer. RFI? RF Interonics, Inc., leading producer of RFI/EMC filters and capacitors.

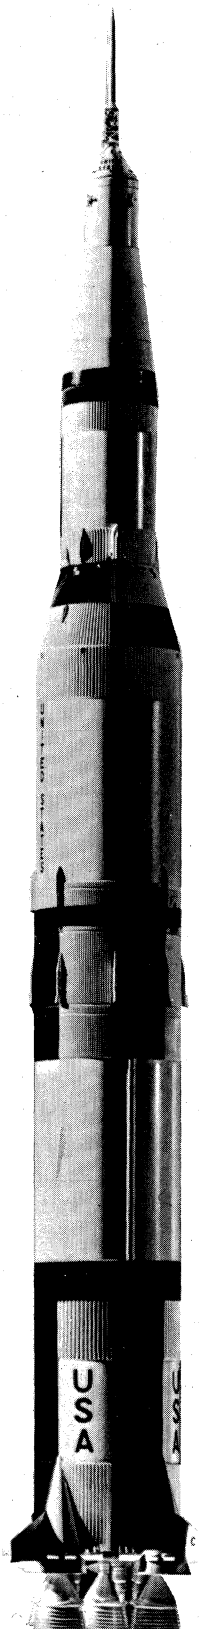
RF Interonics, Inc., with its proven record of unsurpassed technical competence, is prepared to solve your most complex RFI/EMC filter problems.

The RF Interonics facility is the most modern of its type in the country, and is industrially engineered for the efficient manufacture of high reliability radio frequency filters and capacitors. The plant is fully air conditioned and humidity controlled. Clean rooms are maintained for capacitor winding and the assembly of NASA quality filters. A complete in-house capability includes sheet metal fabrication, inductor winding, vacuum impregnation and all necessary processing and test equipment to assure adequate control and quick-reaction time.

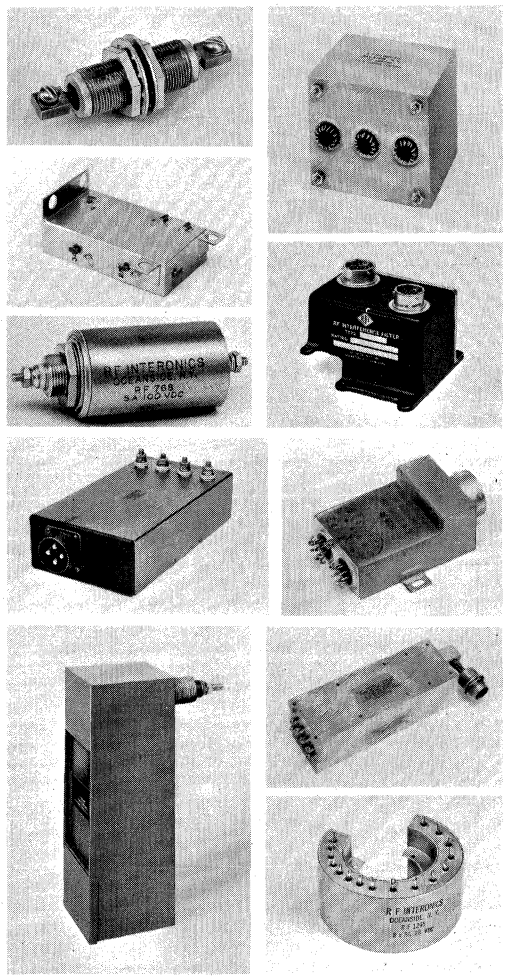
More than 5,000 filter designs are available as standard or custom-engineered assemblies. Filters are produced with current ratings ranging from 1 milliampere to 1,500 amperes, and voltages from 0.1 volt to 20,000 volts.

All filters conform to the requirements of MIL-F-15733E. Where required, parts are produced in conformance with NASA specifications NPC 200-3 and NPC 200-4.





Filters designed and built by RF Interonics are aboard Saturn V as part of the LEM Rendezvous and Landing Radar; the LEM Descent Engine; the Instrument Unit; and the S-II Second Stage. (Photo courtesy North American Rockwell)



CYLINDRICAL FILTERS. Covering a broad range of current and voltage ratings, providing high attenuation over the complete RF interference spectrum.

MULTI-CIRCUIT FILTER PACKAGES. Many circuits in one compact filter assembly. Incorporating the input connector eliminates need for a separately-shielded RF compartment.

SINGLE-CIRCUIT FILTERS. Chassis-mounted (utilizing mounting brackets), or bulkhead-mounted (through a panel that isolates filter input from output).

SHIELDED ROOM FILTERS. Easily bulkhead-mounted directly to shielded enclosures or equipment panels. Removable access covers on shielded side (often an RF leakage source) have been eliminated.

FEED-THROUGH CAPACITORS. Designed and built to exceed MIL-C-11693. Available in a wide range of current and voltage ratings, with attenuation over a broad frequency range.

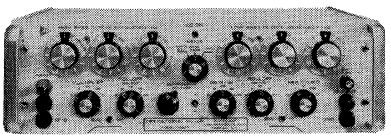
ELECTRONIC FILTERS

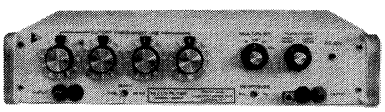
by Rockland Laboratories, Inc.



OPERATIONAL FILTER® Model 1000F $1495

FILTER — AMPLIFIER — OSCILLATOR 0.001 Hz — 11.1 KHz

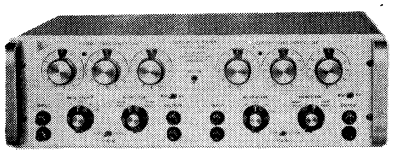
The Series 1000 OPERATIONAL FILTERS are the first multifunction laboratory instruments for frequencies in the range of .001 Hz to 11 KHz. These solid-state, precision instruments offer the following operating modes: FILTER — Low Pass, High Pass, Band Pass, Band Reject, Sharp Null; AMPLIFIER — Low Noise, low drift amplifications of up to 40 db over any selected filter band-width, or up to amplifier bandpass; OSCILLATOR — General purpose laboratory sine wave oscillator covering the entire filter tuning range, and capable of external synchronization. High pass and low pass rolloffs are separately adjustable to a maximum of 24 db/octave. Butterworth or RC response is selectable by front panel switch. Input, single ended or differential. Input impedance 1 megohm. Output impedance 50 ohms. Maximum output voltage swing, 28 volts p-p. AC (115/230 V, 50 - 400 Hz) or DC (+ and –20 V) operation. Chassis dimensions, 5¼" height x 17" width x 14" depth. Bench/rack convertible. Weight 18 lbs.



HI/LO FILTER® Model 1020F $745

HIGH-PASS or LOW-PASS Variable Electronic Filter 0.001 Hz — 111.1 KHz

The Hi/Lo Filter, Model 1020F, is a versatile, low-noise, low distortion, solid state filter which provides either low-pass or high-pass response and exact 4th order (24 db/octave) Butterworth or simple RC characteristics. The cutoff frequency is selected digitally over a span of 8 decades (0.001 Hz to 111 KHz). Hi/Lo Filters can be used individually, or two units can be interconnected to obtain band-pass (series connection) or band-reject (parallel connection) filter response; or to achieve greater high-pass or low-pass attenuation slopes (48 db/octave). Additional units can be connected in series to produce higher order characteristics if required. Series connection can also provide high overall gain, since each unit gives up to 20 db gain. Input impedance, 10 megohm. Output impedance 50 ohms. Output voltage swing, at least 20 volts p-p. AC (115/230 V, 50 - 400 Hz) or DC (+ and –20 V) operation. Chassis dimensions, 3½" height, 17" width, 11" depth. Bench/rack convertible. Weight 12 lbs.



DUAL HI/LO FILTER® Model 1022F $1425

HIGH-PASS, LOW-PASS, BAND-PASS or BAND REJECT 0.001 Hz — 111.1 KHz

The Dual Hi/Lo Filter consists of two identical and independent filters mounted side by side in a single chassis. Each section is a low-noise, solid state active filter which provides either high pass or low pass response and exact 4th order (24 db/oct) or 8th order (48 db/oct) Butterworth or RC characteristics. Cutoff frequency is digitally selected over the 7 decade range from .01 Hz to 111 KHz, with other ranges optional. The filter sections can be used separately or they can be interconnected to obtain band-pass (series connection) or band-reject (parallel connection) filter response; or to achieve greater high-pass or low-pass attenuation slopes. Additional units can be connected in series to produce higher order characteristics if required. Series connection can also provide high overall gain, since each section gives up to x10 gain. Input impedance, 10 megohm. Output impedance 50 ohms. Output voltage swing, at least 20 volts p-p. AC (115/230 V, 50 - 400 Hz) or DC (+ and –20 V) operation. Chassis dimensions, 5¼" height, 17" width, 14" depth. Bench/rack convertible. Weight 18 lbs.

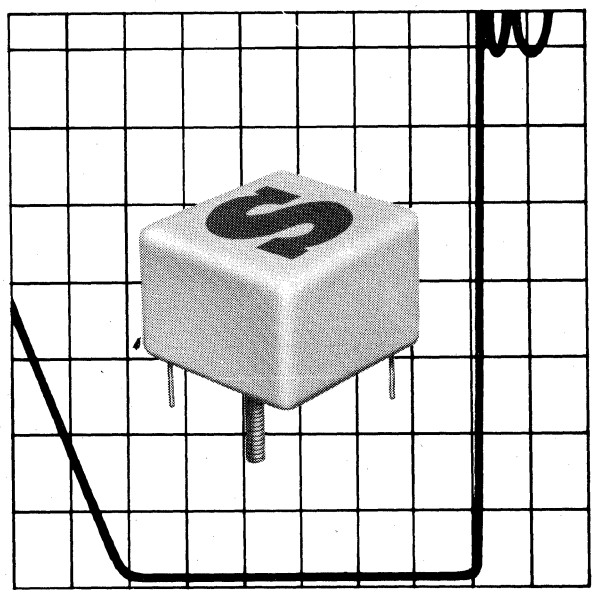
OUR COMPETENT ENGINEERING DEPT. WELCOMES A DISCUSSION OF YOUR FILTER PROBLEMS

•



Advanced Computer Programming with an extensive computer facility plus a tremendous library of normalized designs added to the finest engineering capability in the industry enables SEG to react to your needs with amazing speed and to MIL Spec.

We have extensive experience in meeting your needs for such applications as: Telemetry, Over and under shoot control, aliasing, FSK, data-handling, time-domain synthesis, tunable characteristics, group delay, phase and intercept control.

WE SOLVED THESE PROBLEMS LAST YEAR:

MINIATURIZATION: 11.5 MHz 2 cubic inch IF Filter; 300 KHz—3db BW; 1.6 MHz—60 db BW

DCA SPECS: A group Delay Equalizer that matches-in cliff-sided Multiplex Channels

RINGING: A Time Domain Equalizer that wipes it out in narrow band RF systems

SINGLE FREQUENCY: A 10 KHz Band Pass Filter with 1 Hz 3db BW and 4 Hz 60 db BW

PULSE COMPRESSION & EXPANSION: Linear Time Delay (Quadratic Phase) Filters (Chirp)

FREQUENCY SWITCHING: Band Reject Filters that switch by digital logic

ANTENNA MATCHING: Antenna Couplers with Bandpass Filters for high selectivity and optimum matching at lower radio frequencies.

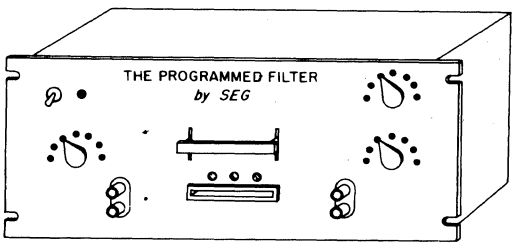
The PROGRAMMABLE FILTERS by SEG

INFINITE LC NETWORK CHARACTERISTICS

APPLICATIONS:

Filter: BP, HP, LP, BR
Delay Compensated Filter
Delay Uncompensated Filter
Group Delay Equalizer
Telephone Line Simulator
Multi-band Filters
Modem Tester



Seg Electronics new Programmable Filter answers a vital need of the industry. The most commonly used functions such as Butterworth, Chebychev, Bessel and Cauer filters in various numbers of poles are supplied in a deck of punch-cards. Simply inserting the proper punch card, setting source and load impedance reproduces the desired characteristic. Included in the deck are the well-known Seg "worst-case" line Simulator characteristics. At any time punch-cards with special characteristics of delay and amplitude response can be ordered from Seg at a nominal cost by furnishing the desired data.

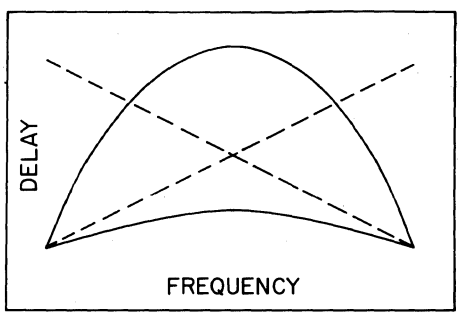
The range of characteristics is limitless. Some less common examples: Arithmetic Symmetry, periodically repeated characteristics, transfer functions with complex coefficients, time-domain characteristics, Time delay variation with flat amplitude, Hilbert transforms, time delay equalized versions of standard filter characteristics.

With this instrument there is no longer a need for building prototypes to determine whether your spec works or not — prevents over- and under-design. Pat. Applied For.

NEW Concept SWITCHABLE LINE EQUALIZERS by SEG

GROUP DELAY FOR USE WITH TELEPHONE LINES

SATELLITE COMMUNICATIONS GROUND STATIONS



Match the characteristic parabolic delay of your telephone lines by selection of the correct parabola and slope at the flick of a switch.

Model FA1292 (TV IF)

Model FA1355 (Telephone line)

First of a highly versatile series of easily adjusted delay equalizers.

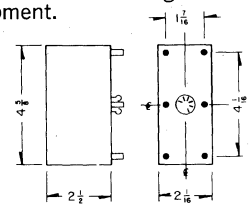
"Worst Case" TELEPHONE LINE SIMULATOR by SEG

SEG LINE SIMULATORS are passive, stable, 600 ohm networks. They effectively simulate a nominal worst case condition of attenuation and envelope delay of the Bell Telephone data lines, 4, 4A, 4B, 4C.

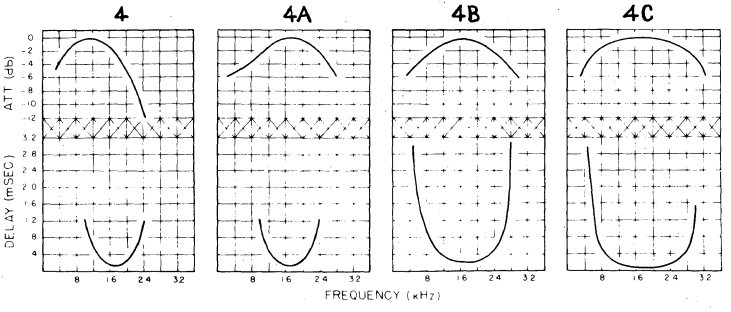
Variations in characteristics can be supplied to order including such perturbations as noise, FM modulation, switchable attenuation, delay ripple, and for F1A&C Message Weighting, Telephoto 1 and 2.

SEG LINE SIMULATORS are government specified test equipment.

$350 EA



Characteristic curves for delay and attenuation for each model.



MODELS: FA1205 BP1157 BP1158 BP1186

FIXED OR ADJUSTABLE EQUALIZERS & SIMULATORS (AMPLITUDE & DELAY) are Regularly Designed to Requested Specs

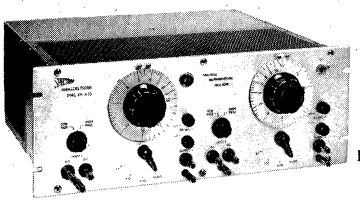
ACTIVE FILTERS

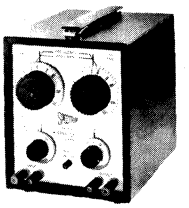


VERY HIGH SIGNAL CAPACITY
(65 VOLTS PEAK-TO-PEAK)
+
LOW NOISE LEVEL
(150 MICROVOLTS RMS)
=
EXCELLENT DYNAMIC RANGE
(>100 DB)

TYPE LH-42D

PROTOTYPE - Seven-pole Butterworth maximally flat pass band voltage transfer, high pass or low pass; 42 db/octave terminal slope in stop band.
PASS BAND CHARACTERISTICS - Lower limit - d.c. (zero frequency); upper limit 5mc/sec. (controlled to 2.5mc/sec.)
INPUT CHARACTERISTICS - 5 megohms resistive paralleled by 10 pf capacitance. Alternative a-c input terminals with 2 ufd blocking capacitor; max. permissible swing - 65 volts peak-to-peak.
OUPUT CHARACTERISTICS - Impedance seen by load - 150 ohms or less; d-c coupling with panel offset adjustments; maximum short circuit current capability - ± 10 ma. Noise - 150 microvolts rms or less.
POWER REQUIREMENTS - 105-125 volts, 50-60 cycle.
DIMENSIONS - 7" high x 19" wide x 14-1/2 deep.
WEIGHT - 44 lbs. ALSO AVAILABLE IN CABINET!

MADE IN 8 CUTOFF TUNING RANGES			
STYLE A	20 - 200,000 cps.	STYLE E	0.2 - 20,000 cps.
STYLE B	2 - 20,000 cps.	STYLE F	0.2 - 200,000 cps.
STYLE C	0.2 - 2,000 cps.	STYLE G	0.02 - 2,000 cps.
STYLE D	2 - 200,000 cps.	STYLE H	0.02 - 20,000 cps.

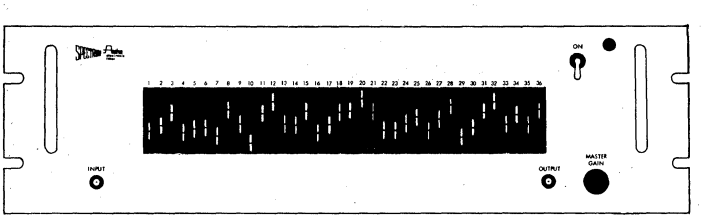


SOLID STATE TUNABLE BANDPASS FILTER...

TYPE BB4-1

FUNCTION - Bandpass filter comprised of cascade of independently tuned low pass and high pass filters.
PROTOTYPE - Four-pole Butterworth (each section) with maximally flat pass band and 24 db/octave stopband slope.
PASS BAND - 20cps to 200,000cps or any segment thereof dependent upon tuning control settings; (dial reading x decade multiplier).
INPUT IMPEDANCE - One megohm resistive shunted by 10 pf capacitance.
OUTPUT CHARACTERISTICS - Internal impedance of 70 ohms; max. signal capacity of 28 volts peak-to-peak into 10,000 ohm load.
PASS BAND GAIN - Unity ±1 db.
PASS BAND FLATNESS - Butterworth (maximally flat) ± 1 db.
NOISE - 500 microvolts rms with input shorted.
DYNAMIC RANGE - 86 db.
CUTOFF ACCURACY - ± 5% of indicated frequency, high pass or low pass.
POWER REQUIREMENTS - 105-125 volts, 50-60 cycle.
DIMENSIONS - 7-1/4" high x 6-1/4" wide x 8-1/4" deep.
WEIGHT - 10-1/2 lbs.
ALSO AVAILABLE IN RACK MOUNTING VERSION!

THE BPA SERIES

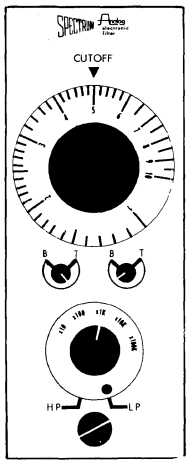


THIRD-OCTAVE ARRAYS FEATURING...

- Up to 36 individual plug-in filters per 5¼" rack panel
- 60 db per octave skirt selectivity
- ASA standard center frequencies from sub-audio to video; (others on special order)
- All silicon solid state
- Vertical slide attenuators for convenient equalizing or spectrum shaping
- Applicable, with auxiliaries, for third-octave real-time spectrum analysis

Series BPA ANALOG Filter assemblies are a low-cost, flexible answer to spectrum shaping and analysis problems in many situations. For example:

- Timbre modification in electronic music composition and production
- Equalization or band shaping for shake-table drivers
- Empirical extraction of voice intelligence from noise masked recording
- Third-octave spectrum analysis of sound meter data for legal or safety purposes



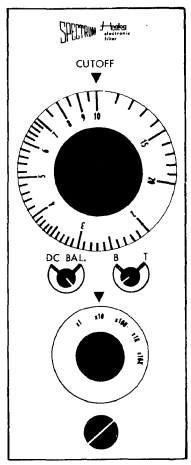
NOW! A VERSATILE, TUNABLE ELECTRONIC FILTER SYSTEM THAT EVERY LAB. CAN AFFORD

THE SPECTRUM TYPE LH-3 BUILDING-BLOCK MODULE

Previously available active filters offer a rigidly limited choice of cut-off rate and/or operating mode; i.e. "X" db/octave (unchangeable) combined with either Butterworth (maximally amplitude flat), Thompson (maximally flat time delay) or, in some cases a mode quaintly referred to as "simple R-C", subtly passed off as a linear phase mode, which it is not.

The Spectrum LH-3 building-block is a three-pole design offering a choice of high pass or low pass roll-off at 18 db/octave. Unlike any filter previously offered, the characteristic mode is panel adjustable to Butterworth (maximally flat), Thompson (linear phase) or to any intermediate transitional condition.

Using a cascade of the basic modules (up to six per panel) the user can construct any desired low pass, high pass or band pass characteristic required in multiples of the basic three-pole structure; i.e. six-pole, nine-pole, twelve-pole, etc. with a standard continuous tuning range from 10 cps. through 1 megacycle/sec.



THE SPECTRUM LBT SERIES...

Modular Signal-Conditioning ANALOG Filters.

A tunable low pass configuration stressing those characteristics most frequently required in instrumentation systems:

(a) Selectable mode, from flat amplitude to flat time-delay.

(b) Direct coupling, to preserve d-c values in signals.

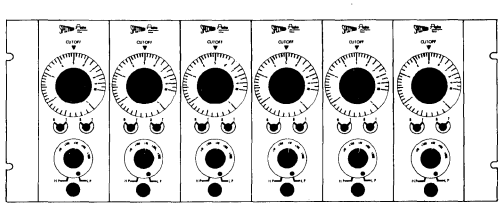
(c) Continuous tuning, for on-the-spot optimization of signal band limiting.

(d) Plug-in format, for on-the-line interchangeability.

Available in various designs from three to six poles, with matching racks.

MODULAR SIX-PAK

Rack panel carriers accept plug-in units described above. The system may be expanded as required. Quick change feature guarantees system reliability. Modules may be preset for instant modification of channel characteristics.



OTHER PACKAGING CONFIGURATIONS

May be supplied, such as single or dual module bearing portable table cabinet (similar to BB4-1 illustrated on opposite page).

SPECTRUM INSTRUMENTS, INC. (founded 1953) offers a background of extensive experience in the design of active filters and spectrum analyzers to customer requirements. We solicit your inquiries, as we can frequently suggest alternative sources of hardware not within our immediate sphere of interest as manufacturers.

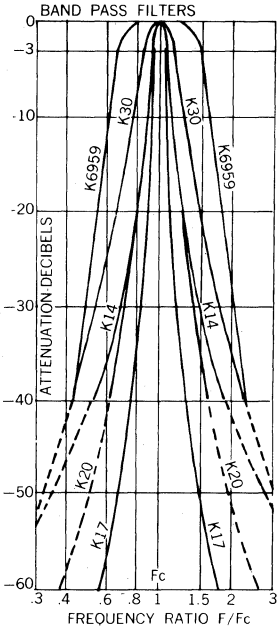
K16	10KHz	100KHz	±5% F_C	and 2F_C	100	3K	100	500K	1	$32
K17	100Hz	10KHz	±5% F_C	60db at .5F_C	500	10K	100	1Meg	4	$39
K18	10KHz	100KHz	±5% F_C	and 2F_C	100	100K	100	500K	3	$39
K20	100Hz	3.9KHz	±7.5% F_C	40db at .57F_C	500	10K	500	10K	4	$42
K21A	4KHz	100KHz	±7.5% F_C	and 1.75F_C	500	10K	500	10K	3	$45
K30	100Hz	3.9KHz	±15% F_C	40db at 0.4F_C	500	10K	500	10K	4	$42
K31A	4KHz	100KHz	±15% F_C	and 2.5F_C	500	10K	500	10K	3	$45

The bandwidth for any of the above filters can be increased or decreased to specification.

WIDE BAND FILTERS: Bandwidths of ±25% or greater can be obtained by ordering TT standard High pass and Low pass filter sections as a composite network. Select numbers from the Series H and J listings on the next page which give the desired attenuation slopes and combine these numbers. For example to obtain a slope of 40db at 0.65 of the lower freq. cut-off, F_{c1}, (High pass section) and 40db at 1.6 of the upper freq. cut-off, F_{c2}, (Low pass section) use H69A and J59A. Specify the two as K6959. **The high pass model number is first, followed by the low pass number.** Models with dissymmetrical attenuation slopes can be combined. Also specify the three db down cut-off frequencies F_{c1} and F_{c2} and impedance. The price is the sum of the HP and LP section prices.

TYPICAL RESPONSE CURVES FOR STANDARD BAND PASS FILTERS



Telemetering: Refer to model K20, K21A, K30 or K31A. TO ORDER specify IRIG Channel number or letter, source and load impedances.

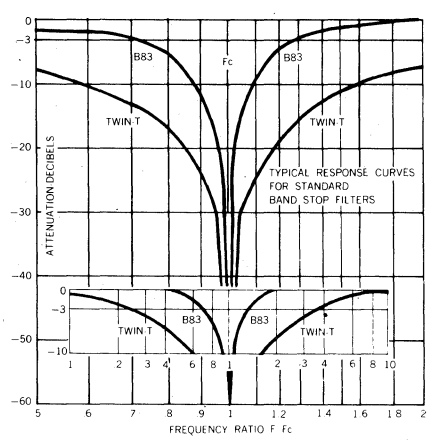
TO ORDER BANDPASS FILTERS — Specify (1) T T Model No., (2) minus 3db frequencies, (3) source impedance, (4) load impedance.

SPECIALS are available for center frequencies from 20Hz upward and 40db to 3db bandwidth ratios as sharp as 1.2:1.

TO ORDER Specials, specify (5) bandwidth and (6) stop band attenuation required in addition to the above data. Terminations are regarded as resistive unless otherwise specified.

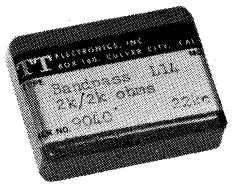
BAND REJECT STANDARD FILTERS FOR ANY CENTER FREQUENCY FROM 10Hz TO 100KHz

Model No.	F_C Center Freq. Range Min.	Max.	Bandwidth —3db	Attenuation	Impedance Min.	Ohms Max.	Circuit	Case No.	Approx. Price
B83	10Hz	100KHz	.77F_C & 1.3F_C	50 db Notch	600	1 Meg.	L-C	4	$30
D	10Hz	100KHz	.25F_C & 4 F_C	35 db Notch	SEE ORDERING INSTRUCTIONS BELOW		Twin-T	2	$11
E	10Hz	100KHz	.25F_C & 4 F_C	56 db Notch			Twin-T	2	$17
F	10Hz	100KHz	.25F_C & 4 F_C	60 db Notch			Twin-T	2	$27
R20	100Hz	3999Hz	3db Bandwidth to 40db		10K	50K	L-C	3	$29
R20	4KHz	100KHz	Bandwidth Ratio = 5 or less		1K	10K	L-C	4	$33



TO ORDER REJECT FILTERS — Specify (1) T T Model No. or Letter, (2) center frequency, (3) source impedance, (4) load impedance. For Model R20 and R30 specify 40db bandwidth. Twin-T prices and cases apply to all filters using capacitor values from 0.1 MFD to 500 MMFD. $C = 1/8.85\ F_{HZ}\ (R_{source}\ D_{load})^{1/2}$. C is in farads. Filters with null frequencies as low as 1 Hz are available. Series E and Series F networks are available with octal plug-in bases. LOADS up to 10 megohms can be used with B83 filters at increased insertion loss. Low freq. B83 filters require 10K or higher loads for specified response. Prices are higher for some low frequency - low impedance or high impedance models. Multi-notch units are available. Terminations are regarded as resistive unless otherwise specified.

TT *miniature* FILTERS



FAST DELIVERY — PROTOTYPE IN 2 WEEKS

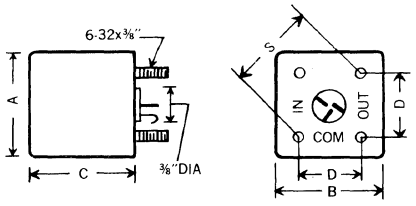
CASE DIMENSIONS AND MOUNTING INFORMATION



Case No.	A	B	C	D	S	Studs
1	.75	.75	1.38	—	.56	(2) 4-40 x 3/8
2	1.19	1.19	1.25	.75	—	(4) 6-32 x 3/8
3	1.31	1.31	1.75	—	1.25	(2) 6-32 x 3/8
4	1.63	1.63	2.38	1.19	—	(4) 6-32 x 3/8
5	1.94	1.81	2.44	1.38/ 1.25	—	(4) 6-32 x 3/8

- You may request PC board flat case dimensions by specifying filter model number and available height.
- All TT Filters are epoxy encapsulated to withstand shock and vibration. All units are also hermetically sealed in drawn steel cases which reduce stray pickup. **NOTE:** Mount clear of power transformers or other strong magnetic fields.
- 7 pin miniature plug-in bases are optional. Octal bases are available.
- Some low-frequency low-impedance combinations may require slightly larger cases. Customer will be advised of this when ordering. Some high frequency types can be supplied in smaller cases.

RESPONSE TEST: With the switch in the down position set the oscillator freq. at 10F_c (HP or BR) .IF_c (LP or BR) or at F_c (BP) and osc. level for zero db at filter output, E_o. Read E_g and keep this voltage constant throughout test. Do not keep the filter input voltage constant. Read E_o in db at other frequencies to obtain response curve.

NOTE: R source and R load are external resistors.

INSERTION LOSS: Obtain zero db reference as above, then throw switch to up position and read output db holding E_g constant.

MAXIMUM OUTPUT, 20 milliwatts. Our production test level is 0.77VRMS unless specified otherwise. The B83 types are limited to .77V for any specified impedance.

FILTERS

Texscan Microwave Products' standard line includes tubular bandpass and lowpass filters ranging in size from 3/16 to 1-1/4 inches which operate within the frequency range of 10 MHz to 13 GHz, and tunable bandpass filters which cover the frequency range of 48 MHz to 4 GHz.

BANDPASS • LOWPASS TUNABLE • MULTIBAND • CUSTOM

BA Series

250 MHz to 13 GHz
3/16 inch diameter

A microminiature, fixed, bandpass, filter, 3/16 inch diameter, which features high frequency coverage, low VSWR, excellent stability and light weight. Its small size makes it ideal for printed circuit board use, space applications, or man-pack requirements.

LA Series

1 to 13 GHz
3/16 inch diameter

A microminiature, fixed, lowpass, filter, 3/16 inch diameter, which features high frequency coverage, low VSWR and excellent stability. Its small size and light weight make it ideal for printed circuit board use, space applications, and man-pack requirements.

BB Series

70 MHz to 5 GHz
3/8 inch diameter

A subminiature, fixed, bandpass, filter, 3/8 inch diameter, which has features similar to the BA series plus the additional advantages of lower frequency coverage, lower insertion loss, higher power rating and adaptability for most connector types.

LB Series

100 MHz to 5 GHz
3/8 inch diameter

A subminiature, fixed, lowpass, filter, 3/8 inch diameter, which has features similar to the LA series plus the additional advantages of lower frequency coverage, lower insertion loss, higher power rating and adaptability for most connector types.

BC Series

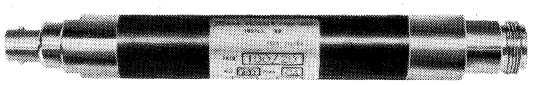
50 MHz to 4 GHz
1/2 inch diameter

A low priced, fixed, bandpass, filter, 1/2 inch diameter, with frequency coverage from 50 MHz to 4 GHz. This series is ideal in meeting low loss and medium power applications for prototype or production use. Delivery can be made in less than 48 hours. Many optional features are available to increase the flexibility of this series.

LC Series

40 MHz to 4 GHz
1/2 inch diameter

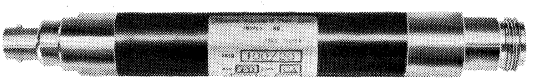
A low priced, fixed, lowpass, filter, 1/2 inch diameter, with frequency coverage from 40 MHz to 4 GHz. This line is most competitive for either prototype or production requirements. Delivery can be made in less than 48 hours. Many optional features are available to increase the flexibility of this series.



BD Series

25 MHz to 2 GHz
3/4 inch diameter

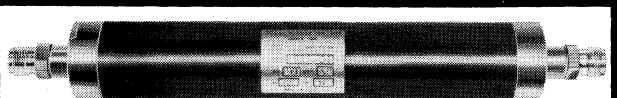
A medium power, fixed, bandpass, filter, 3/4 inch diameter, which features low insertion loss and low frequency coverage. It is constructed in part aluminum and can accept all connector types.



LD Series

25 MHz to 2 GHz
3/4 inch diameter

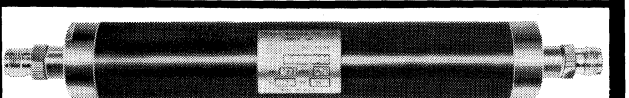
A medium power, fixed, lowpass, filter, 3/4 inch diameter, which features low insertion loss and low frequency coverage. It is constructed of aluminum and can accept all connector types.



BE Series

10 MHz to 1 GHz
1-1/4 inches diameter

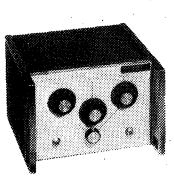
This high power, fixed, bandpass, filter series has the lowest insertion loss of all the bandpass series. It is 1¼ inches in diameter and is ideal for receiver and transmitter applications where insertion loss of 0.1 db is desirable and selectivity is of major importance.



LE Series

10 MHz to 1 GHz
1-1/4 inches diameter

This high power, fixed, lowpass filter series has the lowest insertion loss and lowest cutoff frequency of the lowpass series. It is 1¼ inches in diameter and is constructed of aluminum.



MBF Series 48 MHz to 2 GHz

Tunable bandpass filters covering the frequency range of 48 MHz to 2 GHz. Two or three tunable filters are packaged as one unit to enable the user to have continuous frequency coverage.

VF Series 48 MHz to 4 GHz

Tunable bandpass filters covering the frequency range of 48 MHz to 4 GHz with any single model covering more than an octave. These units are available with either a three or five section response and have a 3 db bandwidth of 5%. Several options are available to increase the flexibility of this series.

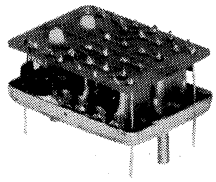
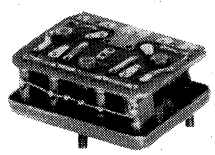
FREQUENCY CONTROL DEVICES

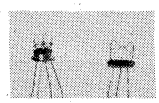
Besides manufacturing precision quartz crystals, shown in Section 2300 of EEM, Tedford Crystal Labs. is rapidly becoming a leader in the field of crystal filters and oscillators. Our present capability includes bandpass, band-reject and single sideband crystal filters in either monolithic or discrete configurations. Tedford Labs. also offers a complete line of temperature compensated crystal oscillators.



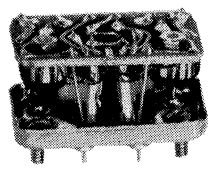
SINGLE SIDEBAND

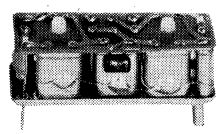


BAND-REJECT



MONOLITHIC





BANDPASS

CRYSTAL FILTERS

Crystal filters have found a wide range of uses in the communications field and Tedford Crystal Labs. stands ready to assist the design engineer in specifying his particular filter. By using the latest techniques employing multi-electrode crystals or monolithic crystal filters, Tedford Labs is able to offer a compact design at a minimum cost. As an aid in the first phase of design, consult the chart at the right to determine the feasible relationship between frequency and bandwidth. A step-by-step procedure for specifying crystal filters is available, upon request, from Tedford Crystal Labs.

DISCRETE CRYSTAL FILTERS

Off-the-shelf types are listed, custom designed types available upon request.

Center freq.	BW 3db	BW 60db	Type
21.900 MHz	2.000 KHz	15.000 KHz	Band Pass
14.200 MHz	5.000 KHz	27.000 KHz	Band Pass
10.700 MHz	240.0 KHz	1100.0 KHz	Band Pass
9.000 MHz	2.000 KHz	3.800 KHz	Single Sideband Pair
646.00 KHz	200 Hz	7.000 KHz	Band Pass
455.00 KHz	500 Hz	3.500 KHz	Band Pass

MONOLITHIC CRYSTAL FILTERS

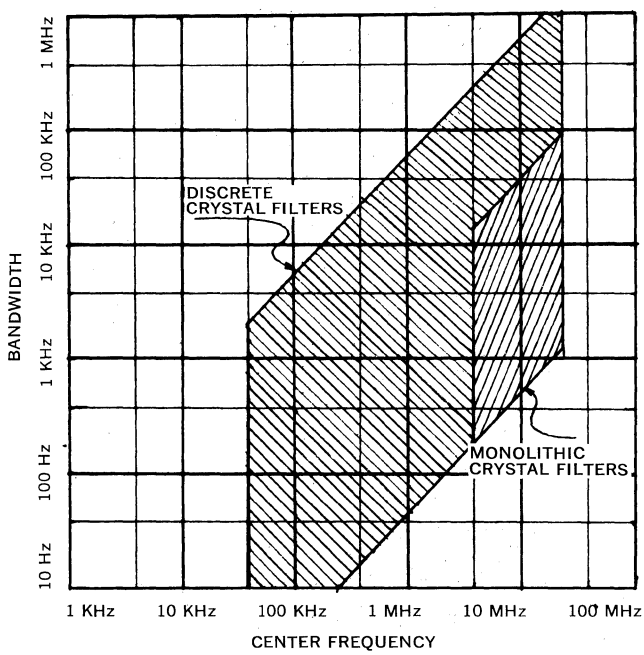
Our capabilities include a line of monolithic crystal filters in the frequency range of 5 to 30 MHz. Custom engineered two pole filters are now available with either CHEBISHEV or BUTTERWORTH transmission characteristics. Filters with 3db bandwidths from 0.005 to 0.25%, insertion loss of 0.5 to 2db, and 3db to 30db ratio of 1:5 are now available.

CENTER FREQ.	BW 3db	BW 30db	INSERTION LOSS	RATIO
10.700 MHz	23.000 KHz min.	92.000 KHz max.	1db max.	1:4
11.700 MHz	23.000 KHz min.	92.000 KHz max.	1db max.	1:4
11.700 MHz	15.000 KHz min.	60.000 KHz max.	1db max.	1:4
21.900 MHz	7.000 KHz min.	35.000 KHz max.	1db max.	1:5
21.900 MHz	15.000 KHz min.	60.000 KHz max.	.7db max.	1:4
21.900 MHz	5.000 KHz min.	25.000 KHz max.	1db max.	1:5
21.400 MHz	15.000 KHz min.	60.000 KHz max.	.7db max.	1.4
20.000 MHz	14.000 KHz min.	58.000 KHz max.	.7db max.	1:4

NOTE: Input and output impedance are dependent upon ripple, frequency range and transmission characteristics. Typically they range between 100 ohms and 5K ohms with ripple between 0 and 1db. Temperature drift tolerances of ±0.005% in the temperature range of —40 to +70°C are possible.

CUSTOM DESIGNS AVAILABLE

Why not give us a shot at your next spec on crystals, crystal filters, integrated filters or temperature compensated crystal oscillators (TCXO)? Maybe we can cut your costs, and give you a better product in the bargain. Write for free product catalogs.



TEMPERATURE COMPENSATED CRYSTAL OSCILLATORS (TCXO)

Tedford Crystal Labs. is presently developing a complete line of TCXO's. Using computer-aided design techniques your particular needs can be met with optimum cost and quick delivery. TCXO's are available in the frequency range of 5 to 18 MHz, with the following tolerances.

Standard Stability	±5ppm	—30 to +70°C
Custom Design Stability	±1ppm	—30 to +70°C
Custom Design Stability	±0.5ppm	—10 to +50°C

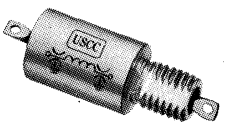
FREQUENCY CONTROL DEVICES

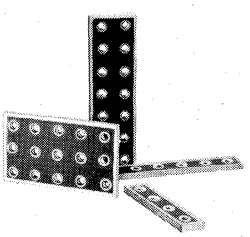
RFI/EMI Filters

USCC



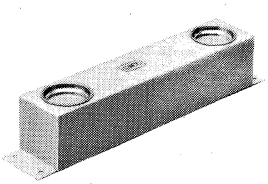
RFI/EMI Filters
Ceramic Dielectric

Modern technology in electromagnetic and radio frequency interference suppression has led to the development of the USCC line of miniature ceramic dielectric filters. These devices are designed to suppress broadband noise in the 10 kHz to 10 GHz range. Available in both Pi and L Section configurations, the feedthrough type packaging is ideal for either chassis or bulkhead mounting. Voltage ratings from 50 Vdc through 400 Vdc and current ratings up to 10 amperes are available. These units are effective in all high frequency filter applications. For additional information, contact USCC.



Multichannel
RFI/EMI Filters

USCC state-of-the-art technology in the design of monolithic ceramic capacitors has evolved into the development of multichannel feedthrough ceramic RFI/EMI filters. Space requirements are less than 1/10 the volume of previously available devices. Capacitance values up to .35 Mfd at 50/100/200 Vdc are available. For multichannel solutions to RFI/EMI filter problems, contact USCC.

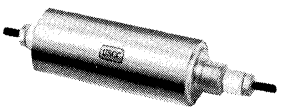


Communications Filters
Audio and Signal Line

To meet the growing need for secure communications, USCC has developed a complete line of high performance communications filters. Intended for applications encompassing both signal and voice lines, they are available in feedthrough tubular designs and rectangular configurations for surface mounting. Up to 100 dB is offered from 14 kHz to 10 GHz. Voltage ratings up to 600 Vdc and current ratings to .5 ampere are offered. For further information and custom designs, contact USCC.

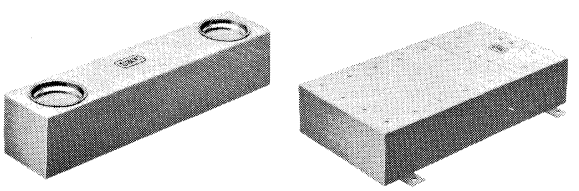
RFI/EMI Filters

USCC



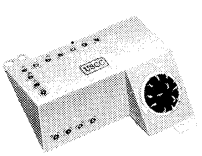
General Purpose RFI/EMI Filters

An increasing demand for General Purpose RFI/EMI filters for applications having moderate levels of interference voltages has prompted USCC to design filters offering a variety of dielectrics and ratings. Standard designs include both tubular and bathtub cases, Pi and L sections in various plastic and ceramic dielectrics. Voltage ratings up to 600 Vdc and current ratings up to 50 amperes are available. For a standard or special requirement, contact USCC.



Power Line High Performance Filters

USCC offers a complete line of high performance power line filters for use in all maximum security communications installations. Single filter installations, filter cabinet assemblies and filtered circuit breaker cabinet assemblies are available. Standard ratings to 440 Vac and currents to 200 amperes are offered. All units are designed to meet the latest specifications. For complete information, contact USCC.



Custom Filters

Recognizing the need for custom designed filters encompassing unique characteristics, USCC offers a comprehensive filter technology to solve the toughest problems. Our advanced assembly techniques allow us to produce single and multicircuit units to the most rigid standards. For a detailed proposal call, write or visit: USCC.

ELECTRIC WAVE FILTERS

Almost forty years of experience in the design and production of electric wave filters have resulted in UTC being a first source for top quality, reliability and advanced engineering . . . for both special and stock applications. Present designs incorporate a wide variety of core structures, winding methods, and capacitors to provide maximum performance. stability and reliability. Military (to MIL-F-18327C) and industrial types are available both metal cased and molded. Range of frequencies is from DC to 30 MHz.

CIRCON Miniature & Sub-Miniature CIRCON

HARDWARE • INDICATOR LAMPS • COMPONENTS

Premium Quality Electronic and Instrument Miniature Precision Hardware

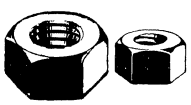
EYELETS — Rolled Instrument & Funnel Flange
Gold Plated and Shot Burnished

Every eyelet a precision product with absolute uniformity from part to part.
Lengths from 1/16" to 7/16" in 1/32" increments.
New MICROLETS now available in lengths from 1/64" to 3/16" in 1/32" increments.

RIVETS & TERMINAL LUGS

For instrument, electronic, and printed circuit applications involving space requirements smaller than normal subminiature hardware permits. Sizes from 1/16" x 1/32" and up in 1/32" increments. Shot burnished and 24 carat gold plated.

NUTS



Instrument nuts in sizes from #000 to #4. Precision manufactured of controlled formula non-magnetic brass cadmium plated.

EYELET SETTING TOOLS

Superior quality tools designed to provide flexible inexpensive tooling for precision setting of Circon eyelets in laboratory, model shop, instrument room and limited production applications. May be used in drill press, arbor press, kick press, punch press, air press, or they may be used as simple hand or vise-held tools.

SCREWS

Precision Instrument Screws of cadmium plated brass or stainless steel. Instrument head (oval modified fillister) or flat head. (82°). Size from #000 to #4 — Lengths from 1/8" and up in 1/16" increments. Taps available for all screw sizes.

WASHERS

Split Lock and Flat instrument washers in sizes #000 to #4. Precision manufactured to be smooth, clean and free from burrs. Insulating washers formed of an improved grade of XXXP modified phenolic laminate. Suitable for use in vigorous environment, at all frequencies. Sizes from #00 to #4.

MINIATURE & SUB-MINIATURE INDICATOR LAMPS

For Printed Circuit and Regular Applications

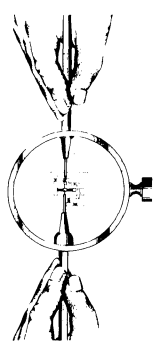
POLA LENS
VARIABLE INTENSITY INDICATORS
Used with Circon sub-miniature lampholders, the POLA-LENS makes it possible to vary the incident light from full brightness to near extinction to meet ambient requirements. Gradual change in lighting control is accomplished by simple hand rotation of the lens.

SCREW BASE MOUNTING

FLARE-MOUNT

- **SMALLER SIZE** — Only 3/8" diameter. Minimum projection from front and rear of panel.
- **WIRELESS INSTALLATION** in printed circuit design and simplified wiring in conventional installations.
- **WIDE RANGE OF LIGHT INTENSITIES** for both low-level and high-level applications.
- **STANDARD COLORS** — Lenses available from stock include red, green, yellow, blue, white, transluscent and clear.
- **ALL VOLTAGES AVAILABLE** — 1.3, 2.7, 6, 14, 28 volts and neon. Single or double-contact models.
- **MESSAGE INDICATIONS** — including numerals, warnings, letters and labels.
- **REPLACEABLE LAMPS** of standard construction having long life and proven performance.

SUPPLIED WITH EITHER INCANDESCENT OR NEON BULBS

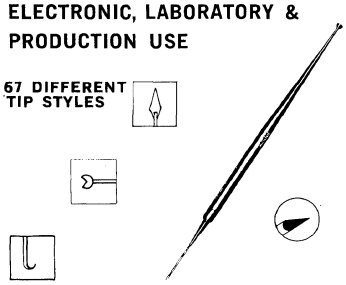


microProbe for ELECTRICAL TESTING

A hand probe designed for testing contacts in small and inaccessible areas. Ideal for microscopic electrical testing. Supplied with a phone tip to fit your favorite meter or instrument and a banana plug adapter. 20 different tip configurations include a .005" diameter micropoint for fine work, sharp points, forks, loops and hooks, each in either straight shank, 45° or 90° bend.

microTools FOR INSTRUMENT, ELECTRONIC, LABORATORY & PRODUCTION USE

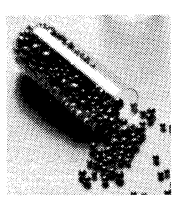
67 DIFFERENT TIP STYLES



CUSTOM TIP — Selection from 67 different styles. Each tip designed and engineered to do a specific microelectronic or instrument job in the best way.
FINEST MATERIALS — Selected tool steels. Permanent metal handles. Entire tip area behind working element is 24 carat gold plated and shot-burnished to insure corrosion resistance and a contaminant free tool.
PRECISION MANUFACTURE — Cutting edges, points and working surfaces precision forged, machined, ground or honed to microscopic perfection.
SMALL SIZE — Active working elements from 0.001 to 0.1 in size. Hinged lid boxes and individual tip protection provides visual selection with easy use and storage.
Interchangeable tips include: Needle Point, Knife, Spade, Chisel, Graver, 45°, 90° corner and bifurcated Manipulators, Hooks, Loop, Burnisher, Scale, Brush, Spatula, Probe and Taps.

GOLDEN SOLDER BALLS

Precise Spheres of Eutectic Solder for Specialized Soldering Needs



Designed to be used in the Pulse-Dot System, the correct amount of solder can be chosen from twelve graded sizes of balls from .005" to .060" in diam. 24K gold plated. Gold color disappears when melting temperature is reached. Balls contain no fluxing agent permitting user to choose most suitable flux. Many other uses in the engineering and instrument field.

STAINLESS STEEL CAPTIVE HARDWARE

Simple! Fast! Sure! PMP Presserts offer a number of advantages.

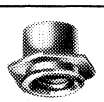
PRECISION METAL PRODUCTS CO.
41 ELM STREET, STONEHAM, MASSACHUSETTS 02180 Tel. (617) 438-3650

FL Flush Nuts — Fit flush on both surfaces of panel, replacing tapped holes providing both the strength and wear resistance of a nut. Designed for installations where space is limited, loads are light, and panel thickness permits an adequate number of threads in nut.

EXH Extension Nuts — Dimensionally the same as FL Flush style except for extension beyond the panel surface on the hex side. Recommended for thin panels as extension provides additional threads. Extension may be used as a spacer or standoff for mounting panels or brackets to chassis.

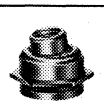
EXR Extension Nuts — Dimensionally similar to FL and EXH styles except that the nut opposite the hex is extended beyond the panel surface. Provides additional threads in thin panels and may be used as a standoff mounting.

EXRR Round Extension Nuts — They are designed for stand-off applications. These nuts have a round extension on the hex side which provides extra threads beyond the panel surface. Dimensionally similar to FL, EXH & EXR styles.

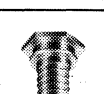


LN Self-Locking Extension Nuts are designed to provide all the wear-resistant benefits of Pressert fasteners, plus the self-locking feature. In addition to providing additional threaded surfaces, the oval shaped extension adds increased holding power by being self-locking. Threads treated with Vydax (Du Pont) to assure compliance with Spec. MIL-N-25027, insertion and removal.

FN Floating Nuts permit correcting up to .015 misalignment in mating holes. Misalignment adjustment is accomplished by the lateral movement through 360° of a threaded insert, which is trapped in the Pressert-type body. Pressert type FN Floating Nuts project less than 1/8 inch above the panel surface. Both the threaded insert and body are machined from stainless steel. Threads are Class 2B in all sizes.



FLN Floating Locknuts — The construction of the self-locking type — FLN is similar to Type FN, except the floating insert extends above the Pressert retaining base, and has a self-locking thread. A dry Teflon-type lubricant (Du-Pont) Vydax is applied to the thread to facilitate easier insertion and removal of the screw.



ST Style Studs provide mounting studs in soft materials, without any projection beyond the outside surface. With stud locked in panel, assembly of other parts is easier, faster. Hex, major and minor diameters same as FL style.

ORDERING INFORMATION

When Presserts are ordered, furnish this information —

For example: 34N(.062)EXH 3 is —

Hex Size in 16ths	Thread Size	Nut or Stud (N or S)	Panel Thickness	Style (FL, EXH, EXR, ST)	Extension in 32nds
3 (3/16")	4 (4-40)	N (nut)	(.062) 1/16"	EXH Extension hex side	3 3/32" beyond panel

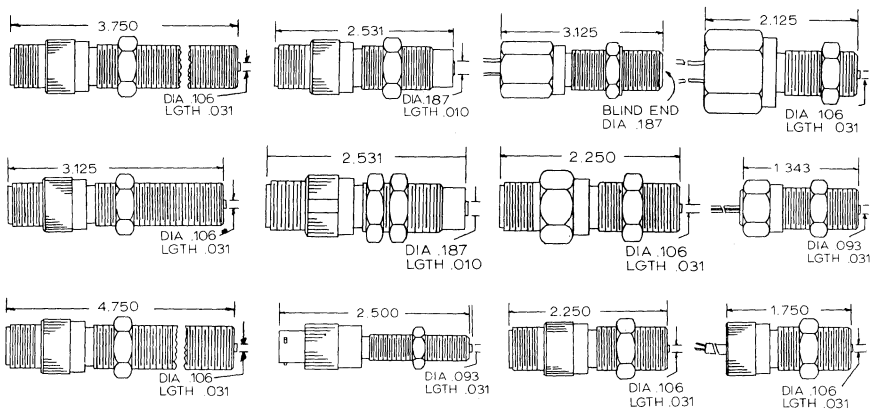
RPM MEASUREMENT and CONTROL

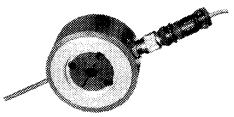


A few of the many Airpax Magnetic Pickups available.

MAGNETIC PICKUPS

Convert mechanical motion to an ac voltage without physical contact or external power. The pickup creates an external magnetic field which, when interrupted by a magnetic discontinuity, i.e., a ferrous gear tooth, generates an ac voltage.

TACHOMETER TRANSDUCER



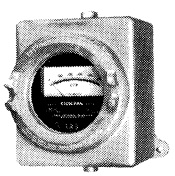
A self-generating unit, when used with a magnetic pickup. Designed to provide an electrical signal linearly proportional to the rotating speed of a shaft to which it is attached.

The Airpax solid state electronic tachometer system uses a frequency discriminator to convert a varying or alternating input signal to a proportional dc output. The conversion accuracy is nominally 0.25% over frequency ranges to 100 kHz.

Supplied in a variety of enclosures designed for industrial and military applications and accessory components, the system represents the most accurate, inexpensive electronic tachometer or frequency converter available.

TACH-PAK

An electronic tachometer using a system of transistor amplifiers and a saturating core transformer to convert RPM, speed or frequency into a dc output.



TACH-TROL

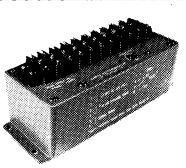
An industrial tachometer that converts RPM, speed or frequency to high level output current ranges (1-5, 4-20, 10-50 mA dc) which is linearly proportional to the input signal.

DIGITAL TACHOMETER

An industrial device that accepts and counts signals over a given time interval providing a displayed readout in engineering units, i.e., RPM, FPM, CPS, etc.

ZERO SPEED SWITCH

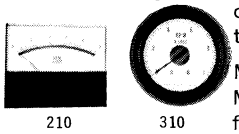
Is used when an alarm switching or equipment shutdown function is required as the speed of a rotating shaft approaches zero.



SWITCHING TACHOMETERS

Monitor the RPM of rotating equipment and provide 1, 2 or 3 switchpoints (set-points) where predetermined action (alarm, programming or verification) takes place.

METERS



210 310

Model 210 accepts standard 0-1 mA dc output of a tachometer for visual monitoring of RPM, speed or frequency.

Model 310 is a rugged meter (similar to Model 210) but offers a 250° arc scale for increased readability.

MILLIVOLT TO CURRENT CONVERTER

Converts a dc mV input from a thermocouple or other mV source to a proportional dc mA output. Magnetic-transistor amplifier provides stable operation, reliability and input-output isolation. Request Bulletin MC-12.

Catalog S1-1 provides complete information on RPM Measurement and Control instruments. Yours on request.

api INDICATING & CONTROLLING

Temperature controllers

Two-mode temperature controllers offer solid-state sophistication at low cost for plastics, textiles, packaging, hydro-carbon processing, semi-conductor manufacture.

Model 227 is the smallest, lowest-priced instrument among two-mode controllers with indicating meters and integral control elements. Requires no adjustments except temperature setting. Maintains temperature on a straight line at set point, without "droop" or overshoot. Spans as small as 100°F or 50°C. Wide choice of outputs. One week delivery in standard ranges. ***Request Bulletin No. 63.***

Models 225 and 226 are more sophisticated controllers designed for applications where certain adjustments are desirable. Proportioning SCR output and adjustable high and low alarms are standard. Choice of analog or digital set point. ***Request Bulletin No. 49.***

Series 700 temperature controllers, for OEM and in-plant use, maintain temperature within ±.5°F. Adjustment seldom needed. Push-button calibration for external resistance of sensors. Continuous indication with 1% accuracy. Vibration-proof.

On/Off, Time Proportioning or SCR Proportioning in either analog or digital set point models. Stocked in standard ranges. ***Request Bulletin No. 49.***

Compack temperature controllers are miniaturized instruments with reliable solid-state circuitry and rugged taut-band meter movements. Choice of On/Off, Time Proportioning or SCR Driver output. Adjustable single or double set points. Continuous temperature indication. Upright and edge-reading models stocked for quick delivery in standard ranges between 0 to 300° and 0 to 3000°F. ***Request Bulletin No. 49.***

Panel meters, meter-relays, controllers

DC meters available from stock include 15 Panelist and Stylist models with standard 1% tracking and frictionless taut-band construction in 20 to 100 μa ranges, at no extra charge.

Other models available in all standard AC and DC ranges. Taut-band standard between 0 to 3 and 0 to 100 μa; 0 to 3 and 0 to 25 mv. Taut-band is special in ranges above 100 μa. Most taut-band DC meters can be calibrated for 0.5% tracking, 1% accuracy, or 0.5% accuracy. Square and rectangular models range from 2¼" to 10" in width.

Additional panel meter types include: (1) black phenolic in both front-mounting and recessed-mounting Stylist models, (2) Mod meters, with interchangeable slide-out scales for measuring different variables, (3) long-scale meters for narrow rack panels, (4) edge-reading meters for maximum space saving, (5) VU meters for recording and broadcasting applications, and (6) ruggedized-sealed meters. ***Request Bulletin No. 47.***

Indicating pyrometers are stocked in 10 ranges to read temperatures from −200° to +3000°F. Standard accuracy is 2%, with 1% available. Same case styles as panel meters. ***Request Bulletin No. 47.***

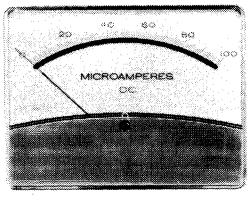
Contactless (optical) meter-relays are offered in Panelist, Stylist and edge-reading styles. Adjustable single or double set points, reliable control action at set point, continuous indication of input signal, operation from small (unamplified) signals.

Stocked in most popular ranges and sizes. Circuit modules with choice of On/Off, SCR Driver and 3-Zone control. ***Request Bulletin No. 48.***

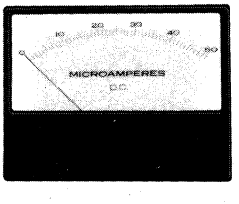
Other controlling instruments include contactless (optical) meter-relay pyrometers, contacting (locking-coil) meter-relays, and contacting (magnetic) meter-relays.

The Ultimeter, while not a meter-relay, allows circuit designers to combine signal indication and easy set point adjustment with the latest integrated circuit techniques at lowest possible cost. Contains 1% linear meter movement and 0.5% linear potentiometer, both precisely calibrated to the meter dial.

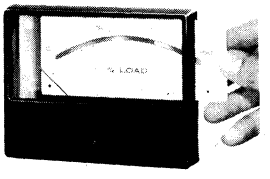
Designed for use with IC op amps, IC comparators, Schmitt triggers, Darlingtons, SCR's, or output relays. Combination then suitable for proportional controllers, simple panel loaders, component testing bridges and other systems. ***Request Bulletin No. 64.***



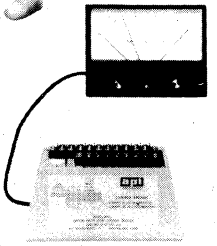
Panelist—clear acrylic, six models.



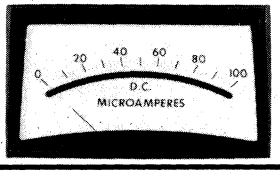
Panelist—black phenolic, three models.



Mod Meter.

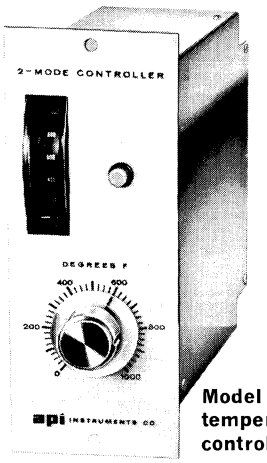


Contactless (optical) meter-relay with circuit module.



Stylist—recessed-mounting, four models.

INSTRUMENTS



Model 227 two-mode temperature controller.

Model 226 (digital set point) two-mode temperature controller.

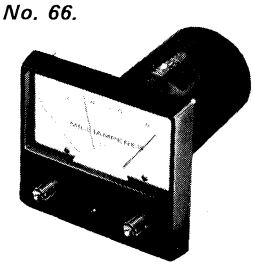
Series 700 temperature controller

Compack IV controllers are five times more sensitive and considerably faster than comparable instruments previously available for On/Off control. Standard full-scale ranges as sensitive as 0 to 1 μa and 0 to 1 mv.

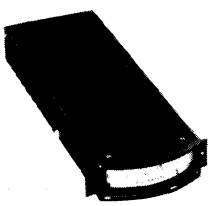
Control is independent of meter movement, triggering electronically when signal strength equals set point value. Other features are easy set point adjustment, standard 1% accuracy, small space requirement, simple installation. Ranges up to 0 to 50 amperes DC and 0 to 500 volts DC.

Also available in edge-reading model, Compack V.

Request Bulletin No. 66.



Compack IV— integral controller.

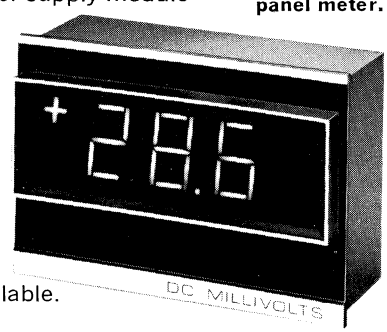


Compack V— integral controller.

Digital products

Model 4301 is a 3-digit DPM that requires only 1½" behind the panel when its exclusive detachable power supply is remotely mounted. Power supply module adds just 2½" when plugged into meter. Seven-bar segmented digits (⅞" high) are readable from 40 feet at angles to ±70°.

Model 4301 digital panel meter.



Standard accuracy ±.1% of reading, ±1 digit. Features include print command, display-hold, 30% overrange, auto-polarity, BCD output. Ranges are 0 to 99.9 mv to 0 to 999 volts DC, and 0 to 9.99 μa to 0 to 999 ma DC. Set points available.

Request Bulletin No. DP-1.

Model 4304 is a 3½-digit instrument with similar specifications, but with 100% overrange. Standard ranges are 0 to 199.9 mv to 0 to 199.9 volts DC, and 0 to 19.99 μa to 0 to 199.9 ma DC.

Systems DPM's, 3½ and 4-digit, will be available in mid-1969.

Other API products

Graphic recorders are available in two models: *Temprint* for temperature, *Versaprint* for other variables. Inkless, clamper-bar type instruments operate on unamplified current or voltage signals. Standard ranges available.

Request Bulletin No. 31.

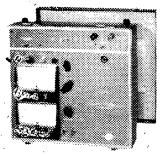
INSULATION TESTING INSTRUMENTS

ASSOCIATED RESEARCH, INC

Portable DC HYPOTS® to 100 KV



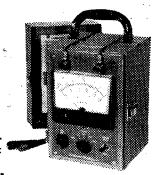
Output of the several portable DC HYPOTS is continuously variable from 0 to maximum with the voltage metered directly in the output. Leakage current measurements are on four range meters reading down to as low as 0.05 microamps. Features: 2% metering accuracies, electronic circuit protection, by-pass and metered return terminals, grounded steel cases, silicon rectifiers, plug-in high voltage leads, etc.

Model	Output Voltage	Output Current	Price
5205	0-5 KV	2.0	$ 550
5212	0-10 KV	2.0	675
5220	0-15 KV	2.0	735
5271	0-50 KV	2.5	2250
5321	0-100 KV	5.0	3115

Request Portable DC HYPOT Bulletins

Insulation Resistance Testers

Ranges from 100 to 10 million megohms at test potentials to 10 KV.



The VIBROTEST megohmmeter provides a wide selection of battery and line-powered instruments for accurate insulation resistance measurements of circuits, components, cables, motors, etc. They are direct reading and push button operated requiring no cranking or leveling.

Select from 17 models ranging from pocket-size to portable 10 KV with variable voltage. Some models combine megohm with ohm and AC-DC volt scales in one instrument. Five popular models are:

Model	DC Test Voltage	Max. Megohms	Features	Price
2000	500	100	Pocket-size	$ 95
201	500	200	Includes 2K ohm and six AC-DC volt scales	148
211	1000	2000	200 K ohm range	255
2850	500 / 50	10 Million	Constant test voltage through 6 decades	345
2955	0-2,500	50,000	Adjustable test voltage	890

Request VIBROTEST Megohmmeter Bulletins by model number.

Testing Manual Available

This 60 page collection of Bulletins covers specs, prices and applications of insulation resistance testers, AC HYPOT Juniors, portable and mobile DC test sets, corona and materials test equipment, kilovoltmeters, precision ohmmeter, current transformers, phase sequence indicators.

Request Manual 2900 on company letterhead

A-C HYPOT Jrs... to 10 KV, limited current

Portable a-c dielectric strength testers providing outputs continuously variable from 0-1500 V up to 10,000 V a-c. Use of neon breakdown and leakage current indicators in conjunction with collapsing field-type high voltage transformers assures rapid and safe production testing.

The leakage current indicator is adjustable from 0.3 to 3 ma. A 4½" kilovoltmeter provides high accuracy. Short-circuit current cannot exceed 18 ma.

Three popular models are:

Model	Output Voltage	Price
411	0-2,500	$155
404	0-4,000	170
422	0-10,000	245

HYPOT Jr. Automatic "Squawker" Models

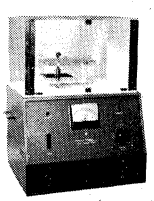
Available with output voltages from 0-1500 volts to 0-6000 volts a-c. Similar to the standard HYPOT Jr. models but include an audible signal unit and external control terminals.

DC and Combined AC/DC HYPOT Jrs.

offer same features as described above, plus test potentials to 5 KV.

Request AC & DC HYPOT Jr. Bulletins.

Insulating Materials Testers



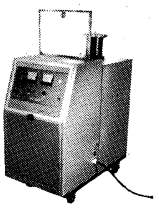
A full range of testers for solid and liquid insulating materials to 100 KV and higher is available. Due to the rapid progress of insulating materials and testing techniques, new equipment is added whenever required to meet ASTM, MIL and Federal test specifications.

Model 4501 Materials Testing HYPOT 0-35 KV at 2 KVA

This popular model meets dielectric strength testing requirements of Specification D-149, ASTM Standards on Electrical Insulation Materials. Output continuously variable from 0-35 KV a-c at 2 KVA (intermittent rating). Magnetic breaker trips when specimen breaks down. Output termination in jacks at center of the lucite cabinet top accepts the interchangeable ARI materials testing fixtures. Optional features: interlocked clear lucite test cage and selection of ARI plug-in materials testing fixtures, automatic rate of rise, dual sensitivity circuit breaker, etc.

Request Insulation Materials Tester Bulletin

High Voltage Test Equipment to 500 KV AC and 1,000 KV DC



A full range of instruments for extra high voltage dielectric strength testing. AC or DC potentials at capacities of up to 150 KVA or more. Control and measurement features include: automatic rate of voltage rise, memory circuit to record breakdown voltage, output current metering, separate low voltage control and high voltage test cabinets and many others.

AR has over 30 years experience in the design and manufacture of heavy duty very high voltage test equipment. All instruments are ruggedly constructed and fully tested in our own high voltage laboratory.

Corona Testing Equipment

New instruments detect, display and measure corona caused by voids, surface or other conditions in insulation sample or equipment under test.

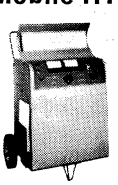
Instruments include: specially constructed corona-free HYPOT test set, a pickup network to extract the true corona signal and the corona detection display module. The detector also incorporates a calibrator to make quantitative corona measurements down to 0.1 picocoulombs.

These modules are available as individual units or as a complete integrated instrument. Standard models with test potentials of 10 to 100 KV AC include these two popular models:

Model	Output KV	KVA Capacity	Cabinet Style	Price
4074	10	0.25	Bench	$2250
4309	35	1.0	Console	3950

Request Bulletin 4-1.9.

Mobile HYPOTS... to 150 KV DC



Heavy-duty mobile test sets for determining insulation leakage and dielectric strength of cables, bushings, switchgear, transformers, motors and generators.

Outputs continuously variable from 0 to 45 KV and on up to 150 KV, with ratings of 2.5, 5, 10 ma. at full voltage.

Features include: 4½" kilovoltmeter connected directly across the high voltage output; three-range 4½" microammeter electronically protected against overload; zero return interlock; connector for remote safety interlock; fast-acting magnetic circuit breaker in output to protect high voltage circuits and external load; thermal overload breaker to protect input circuits; long-life silicon high voltage rectifiers; metered return and bypass return terminals for measurement of load (leakage) or bypass (guard) currents.

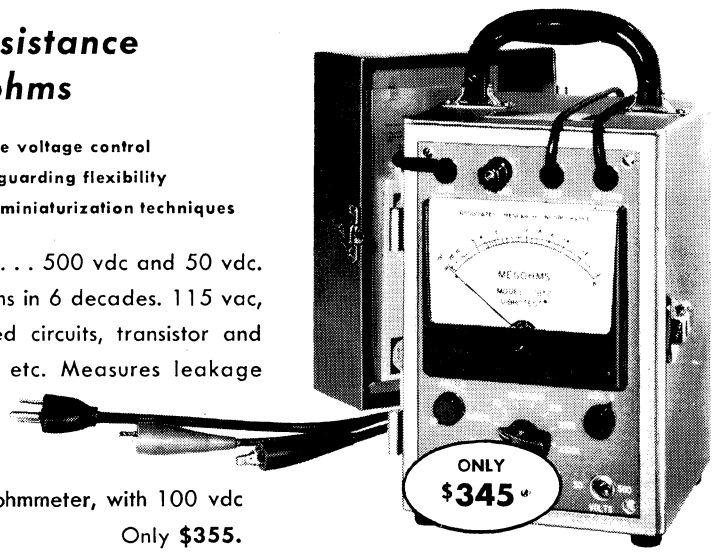
INSULATION TESTING INSTRUMENTS

NEW VIBROTEST® MEGOHMMETER MODEL 2850

Measures insulation resistance to ten million megohms

ADVANCED FEATURES

- constant test voltage over full range
- positive line voltage control
- maximum guarding flexibility
- no overload damage
- latest tube-miniaturization techniques



Versatile, accurate, reliable. Dual test voltage . . . 500 vdc and 50 vdc. 24" total scale length . . . 1 to 10,000,000 megohms in 6 decades. 115 vac, 50/60 cycle input. Measures resistance on printed circuits, transistor and miniaturized circuit components, cables, motors, etc. Measures leakage resistance of capacitors. Measures grounded and ungrounded sections of three-terminal resistors.

Also available . . . Model 2851 Vibrotest Megohmmeter, with 100 vdc and 500 vdc dual test voltages. Only **$355.**

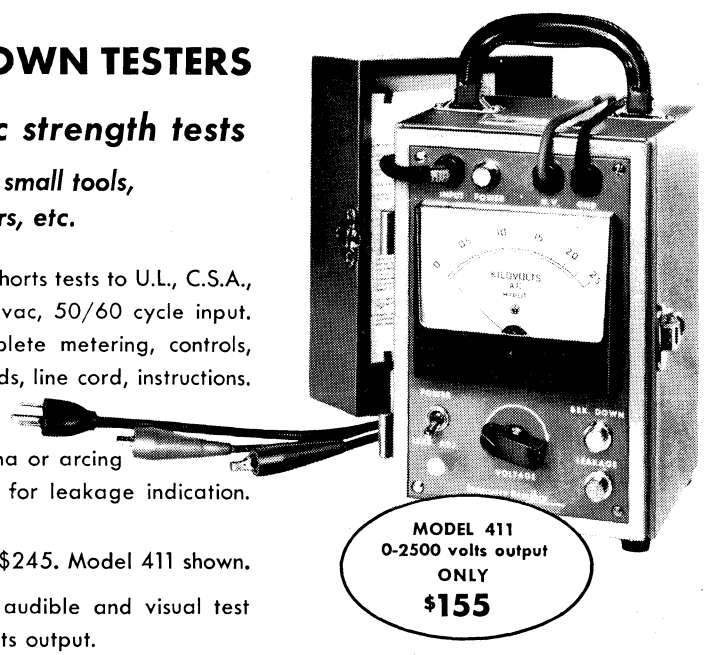
Immediately available from factory stocks

Get all facts . . . write for Bulletin 2-1.4

HYPOT® JUNIOR BREAKDOWN TESTERS

Make faster, safer AC dielectric strength tests

of electronic parts and components, small tools, appliances, motors, transformers, etc.



Simple to operate. Make breakdown, leakage and shorts tests to U.L., C.S.A., ASTM, NEMA, IEEE, MIL and EASA standards. 115 vac, 50/60 cycle input. Continuously adjustable output. Included are: complete metering, controls, safety features, case with removable cover, test leads, line cord, instructions.

Visual Indicator Models . . .
Have neon "breakdown" light for breakdown, corona or arcing indication . . . and separate neon "leakage" light for leakage indication. Five models from 0-1500 to 0-10,000 volts output.

Priced from $145 to $245. Model 411 shown.

Automatic "Squawker" Models . . . Provide audible and visual test indications. Four models from 0-1500 to 0-6000 volts output.

Priced from $265 to $290.

Now in factory stock for fast delivery

For complete details, write for Bulletin 4-1.3

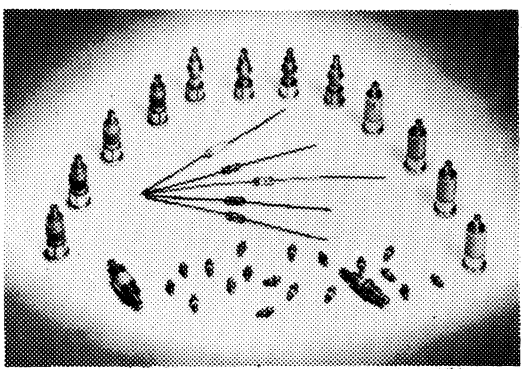
SEMICONDUCTOR DEVICES



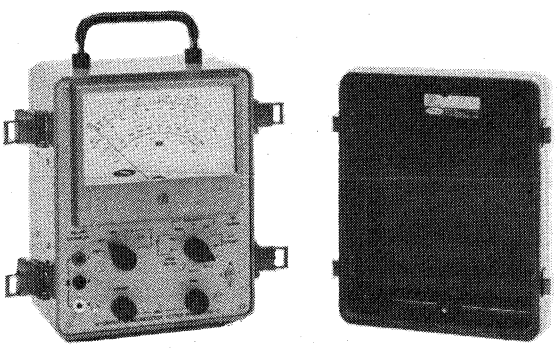
☐ VARACTORS
- Broad line of standard varactors with cutoff frequencies up to 180 GHz
- Custom diodes are also available to specific requirements.
- Specifically designed for switch, multiplier and parametric amplifier applications.
- Available in a variety of microwave packages.

☐ TUNING VARACTORS
- Total capacitances ranging from 3.3 pf to 27 pf with Q's up to 1200 and breakdown voltages up to 120 V.
- Capacitance ratios as high as 10:1.
- Available in a variety of packages.

☐ CRYSTAL VIDEO DIODES
- Designed for operation from 50 MHz to 40 GHz
- Available for use with all AEL detector mounts for highest sensitivity.
- Yield higher performance with most holders.

☐ MIXER DIODES
- Custom designed for L- and S-band operation.
- Guaranteed noise figure is 5 db max.
- Wide dynamic range.

☐ DIODE ATTENUATOR DIAT®
- 50 and 75 ohm design centers
- Minimum intermodulation distortion
- Environmental stability
- RF characterization
- 10 to 500 MHz
- Large resistance swing.



The **AEL MODEL 259C IN-CIRCUIT SEMI-CONDUCTOR TESTER** measures leakage in-circuit of transistors, diodes and field-effect transistors (F.E.T.'s). The device provides a rapid means for testing all semiconductors, and includes an Automatic Beta Calibration circuit, which automatically sets the collector current of the transistor under test at 1 milliamp.

- ☐ MEASURES LEAKAGE IN-CIRCUIT of Transistors, Diodes and F.E.T.'s.
- ☐ CHECKS TRANSISTORS, DIODES, RECTIFIERS AND F.E.T.'s in- or out-of-circuit.
- ☐ MEASURES TRANSISTORS AND DIODES IN-CIRCUIT FOR REVERSE LEAKAGE down to 500 ohms of loading.
- ☐ MEASURES F.E.T. TRANSCONDUCTANCE (Gm) to 10,000 micromhos.
- ☐ SIMPLE, COMPLETELY SAFE means for testing all semi-conductors.
- ☐ MEASURES HIGH- AND LOW-POWER Transistors for 1000 cycle Beta (h_{fe}) within range of 1 to 1000—diodes and rectifiers for opens or shorts, IN-CIRCUIT, with as little as 20 ohms load across the device terminals—resistance between semi-conductor electrodes.
- ☐ SMALL, LIGHTWEIGHT, RUGGED.
- ☐ OPTIONAL ACCESSORY—Model 246 in-circuit test probe.

120B VIDEO AMPLIFIER/AWN 1294 ANTENNA ACCESSORY

The Model AWN 1294 antenna in combination with the AEL Model 120B video amplifier provides testing applications for MIL-STD-461.

The Model 120B video amplifier has a frequency response of 8 Hz to 10 MHz with an output level of 100 volts peak to peak. The output drives the high impedance antenna load (25 picofarads) which in turn produces a field intensity of 1 volt per meter at a three foot distance when amplifier is placed on a ground plane.

The antenna consists of a seven foot collapsible whip and is readily mounted on the front panel of the 120B video amplifier. A short piece of coax cable with connectors is provided to make the connection between the amplifier and antenna.

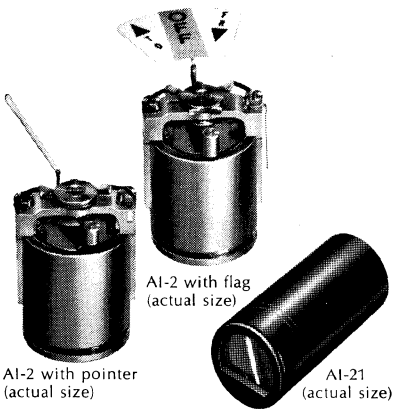
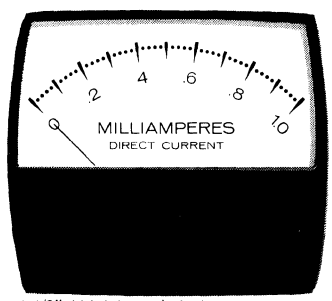
Neat...Compact...Accurate

PLUS a wide variety of styles



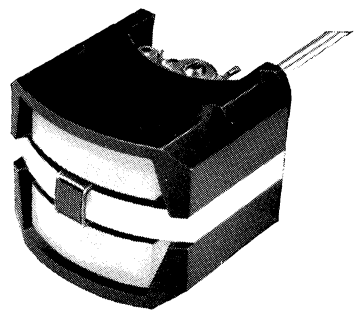
Ammon Series AI miniature, self-shielded mechanisms are designed to provide optimum performance in airborne indicating systems or wherever critical indicating and control functions are required. Self-shielding makes compass effect negligible. Units may be mounted side-by-side with no interaction. Panel material has no influence on calibration. Their compact size, coupled with the versatility of synchro-type and conventional type mounting methods, offers design engineers great freedom in adapting them to specific applications.

AI-2 mechanisms offer these advantages reduced size and weight, high torque-to-weight ratio, self-shielding, enclosed movement and negligible compass influence. Model AI-2 is 11/16" in diameter, 1" in length and weighs 3/4 of an ounce. Model AI-17 is 7/8" square and flange mounted, .832" in body diameter, 1-25/64" in length, weighs 1.6 ounces, constructed of brass, and hermetically sealed. Model AI-20 is 7/8" square and flange mounted, .832" in body diameter, 1-11/32" in length, weighs one ounce, constructed of hi-temp plastic, and sealed against dust and moisture. Model AI-21 is 7/16" in diameter, 31/32" in length and weighs 11.5 grams. Choice of pointer or flag is available on all models.



1-1/2" AM-1 (actual size)

Ammon AM-1 self-shielded panel meters have smart, sophisticated styling . . . easy reading scale . . . a most complete selection of sizes ranging from sizes 1-1/2 to 4-1/2". Rugged high torque mechanisms offer 1% linearity, 2% accuracy and sensitivity to 20 ua. Completely shielded to eliminate error from magnetic panels. Mounts bezel-to-bezel on any material without interaction or effect on calibration. Choice of colors or finishes, custom dials — ASA/MIL 4-stud mounting in AM-1 and AM-4 models and ASA/MIL 3-stud mounting in AM-2 and AM-3 models.



APT-1; 1 cu. in., 3.15 oz. (actual size)

Ammon APT-1 moving coil mechanism is a highly stable, linear and accurate mechanism for indicating, control or recording systems. 18-0-18° linearity is 1%. Coil design with over 75% of winding "working" in high energy, uniform field air gap assures greater accuracy. Coil system weighs 0.85 gm, develops 26.4 mmg of torque; 31:1 T/W. Mechanism offers negligible vibration pivots and jewels — custom damping — wide range of sensitivities.

Consult the factory or your AMMON representative for complete details or for any assistance you require.

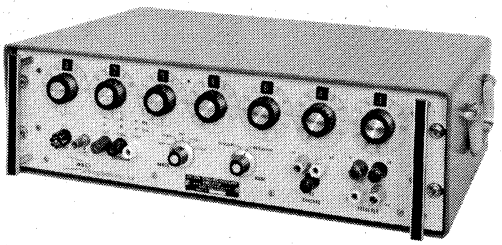
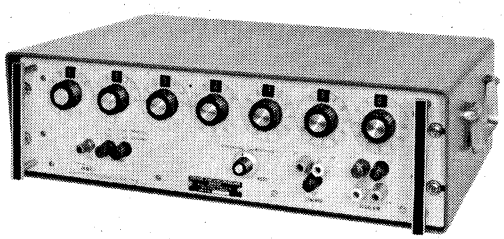
Advanced Test Instrumentation

Decade Synchro/Resolver Standards

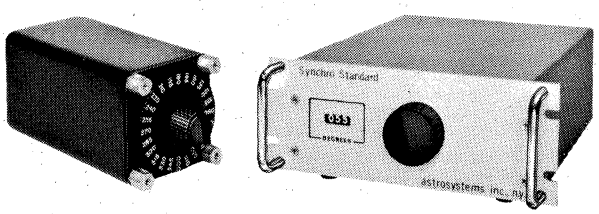
Decade Synchro/Resolver Standards provide a completely passive, extremely precise technique for testing and simulating synchro/resolver systems and components to absolute accuracies of 2 seconds of arc. Units are available with 1° to .0001° resolution and feature direct angular readout. A front panel switch provides for standard output voltages of 11.8, 26 and 90 and 115 volts. Wire for Data File No. 105.

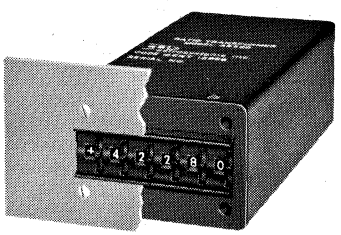




Decade Synchro/Resolver Bridges

Decade Synchro/Resolver Bridges, completely passive direct angular readout inductive type instruments, simulate synchro or resolver receivers (CT) to an absolute accuracy of 2 seconds of arc, traceable to the National Bureau of Standards. The unit is designed for testing all types of synchro, resolver and servo systems using a proportional nulling method, or by using the proportional voltage gradient method. Write for Data File No. 105.





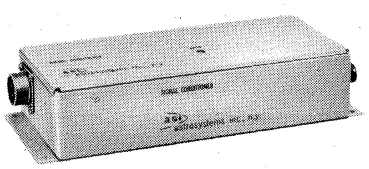
Synchro and Resolver Standards and Bridges

Synchro and Resolver Standards and Bridges test and simulate synchros, resolvers and servo systems quickly and economically. All units are accurate to 2 arc seconds, traceable to the National Bureau of Standards. Units are available with 5°, 10° and 15° resolution to cover a wide range of applications for both laboratory and system use. Write for Data File No. 105.

Decade Ratio Transformers

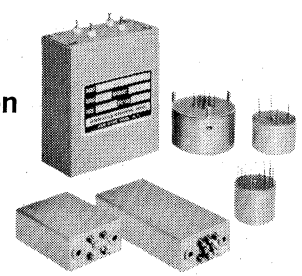
A complete line of Decade Ratio Transformers is available with guaranteed accuracy to 0.5 parts per million. Low output impedances eliminate loading errors and reduce pickup and noise effects. Rack and miniature panel mounted units are available. Write for Data File No. 106.

AC Signal Conditioning Modules



Astrosystems isolated solid state AC Signal Conditioning Modules feature input impedances to 13 megohms combined with a common-mode rejection of 80 db. Three input configurations are available as standard; differential, three-wire synchro or four-wire resolver. Write for Data File No. 118.

Instrumentation Transformers



Astrosystems high precision toroidal transformers are produced to accuracies of better than 0.5 parts per million. Available are matched high precision isolation transformers, bridging transformers, high precision voltage scaling transformers and Scott "T" transformers. Write for Data File No. 117.

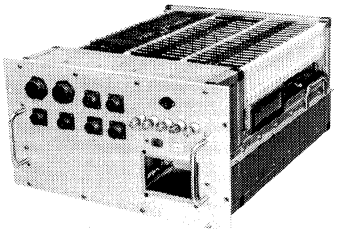
Automatic Test Instrumentation

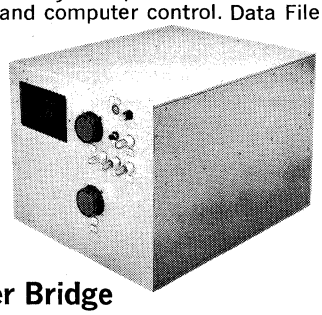


Programmable Synchro Resolver Testers

Astrosystems designs and produces standard and custom synchro and resolver testers. These devices automatically measure synchro/resolver parameters such as accuracy, phase shift and transformation ratio. Programmable indexing tables can also be supplied as part of complete synchro/resolver and servo test systems. Options include error print out and computer control. Data File No. 107.

Automatic Test Building Blocks

Building blocks are available for use in general purpose and special purpose automatic test systems. Devices include stimuli equipment such as synchro simulators, programmable AC voltage generators, programmable power supplies and automatic servo inputs. Measurement devices include voltage measuring blocks, response monitors and phase indicators. Write for Data File No. 107.

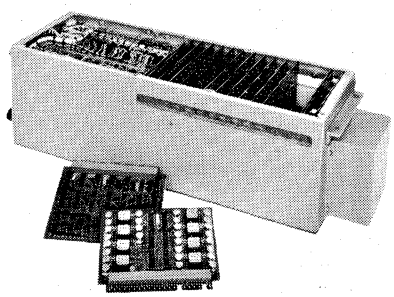


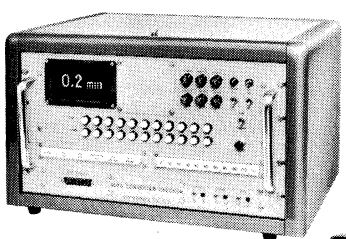
Automatic Synchro/Resolver Bridge

The Automatic Synchro Resolver Bridge reads out synchro or resolver inputs on a direct in-line decimal display to an accuracy of 0.01°, completely automatically. This solid state readout eliminates the necessity for complex manual setting of synchro bridges and error detectors. BCD or binary electrical digital outputs are provided. Write for Data File No. 111.

Automatic Synchro/Resolver Converters

Automatic Synchro/Resolver Converters provide for programmed synchro/resolver outputs and measurement of synchro/resolver inputs in the same unit. These solid state devices are available with resolutions and accuracies to 16 binary bits (20 seconds of arc). Standard units cover the frequency range from 200Hz to 10K Hz without deterioration in accuracy. Write for Data File No. 107.

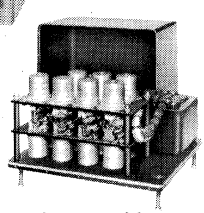




Automatic Converter Tester

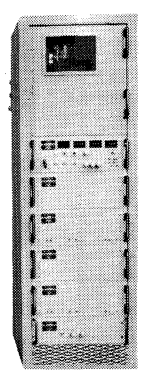
Automatic Converter Testers are completely self contained devices for laboratory or production testing of all types of synchro, resolver and voltage digital conversion equipment. The units feature push button selection of tests such as accuracy, phase shift and transformation ratio, with an in-line decimal display of error in actual measurement parameters. Write for Data File No. 107.

Programmable AC Voltage Modules



Programmable AC Voltage Modules provide an AC voltage output equivalent to a programmed digital input. Applications include both test and system applications where a high precision programmed AC voltage input is required. Standard output accuracy is better than 10 parts per million, traceable to the National Bureau of Standards. Data File No. 107.

Automatic Test Systems



Astrosystems designs and manufactures complete general purpose and special purpose automatic test systems. These units are constructed from standard building blocks and provide programming, stimuli, measurement and recording functions. Programming and data readout can be tape or computer controlled. Simple programming allows tests to be accomplished by relatively unskilled personnel. Data File No. 107.

FREQUENCY-TIME STANDARD

and now... Precision Frequency Standards *by* Atomichron® MODEL 3501

CESIUM BEAM PRIMARY TIME AND FREQUENCY STANDARD
Atomic and UTC Time Scales

Model 3501 Atomichron is a compact, solid-state, self-contained, cesium-beam primary time and frequency standard, designed for scientific, industrial and military applications. The 3501 provides output frequencies accurate to ± 1 parts in 10^{11} for the life of the cesium beam resonator, with a 1,000-second stability of ± 3 parts in 10^{12}, rms. The fundamental primary-loop frequency is 14.59+ MHz. Standard output frequencies (10 MHz, 100 kHz, 1 PPS and 14.591479 MHz) and standard time-scale selection (Atomic Time A.1 or Universal Time UTC) are provided by an internal frequency synthesizer (secondary loop) with a 10 MHz reference oscillator. No accessories are required to convert the unit from one time scale to another.

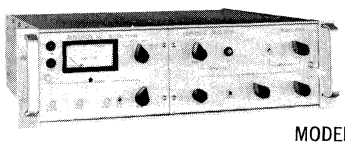
SPECIFY

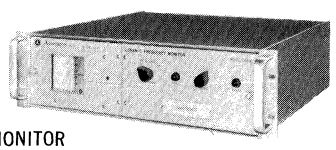
AUSTRON

Time/frequency instruments & inverter/converter power supplies

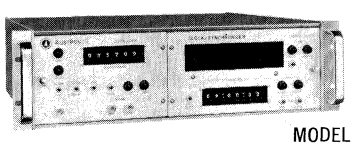
AUSTRON TIME/FREQUENCY INSTRUMENTS



MODEL 2000
LORAN-C MONITOR



MODEL 2004
LORAN-C FREQUENCY MONITOR



MODEL 2070A
CLOCK/SYNCHRONIZER

AUSTRON, Inc., offers a complete line of instruments for time/frequency calibration and control. Designed to maximize utilization of Loran-C, VLF, and Omega transmissions, AUSTRON instruments find applications in time synchronization, timekeeping, frequency calibration, propagation studies, and ionospheric event monitors.

The Model 2000 receives and automatically phase-tracks all Loran chains. Direct cycle identification. Ground or skywave tracking for micro-second timing. Electronic servo. Loop or whip antenna system available.

The Model 2004 is a low cost, automatic phase-tracking Loran-C receiver for frequency calibration. Electronic servo. Eliminates VLF type diurnal phase shifts. Parts in 10^{13} for one day averaging, traceable to USNO and NBS.

The Model 2070A provides in-line, digital time-of-day display. Synchronized by Loran-C or other electrical reference. Includes Loran-C repetition period generator. Internal Crystal Frequency Standard of 2×10^{-10}/day is optional.

The Model 2040 Loran-C Signal Simulator generates Master or Slave test signals at any repetition period for Loran-C receivers. Phase shifter for signal time adjustment. Doppler simulator and Loran-D format optional.

The Model 2010A Oscillator Control Unit permits phase-locking a crystal frequency standard to a higher stability reference such as an atomic standard or Loran-C receiver output. The unit uses a third order servo system for automatic correction of systematic oscillator aging in the event of primary reference failure.

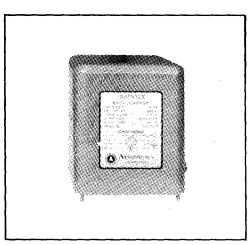
The Model 2062A Group Repetition Period and Time of Coincidence Generator adapts skywave monitors and visual receivers for timing by odd-rate Loran-C stations. The unit also provides visual and electrical indication of TOC seconds.

The Model 2082 Loran-C TRF Receiver is optimized for visual or photographic monitoring and analysis of Loran-C signals. Unit includes two adjustable notch filters. Additional filters optional.

Data sheets for these instruments and others are available. Also write for the following application notes:

1) A Loran-C Skywave Timing Experiment
2) A Frequency Control Experiment
3) Loran-C for Time and Frequency

POWER SUPPLIES



DC-AC
SQUARE WAVE POWER INVERTER

The AUSTRON Model 1008 is an all silicon, solid state unit supplying a square wave output of 250VA. The package is 5.4 x 4.8 x 6.2 inches, weighs 11 lbs. −20°C to +65°C, output frequency tolerance 0.2% or optional adjustment. Output voltage adjustable with taps.

AUSTRON is active in the following areas of POWER SUPPLIES:

- MODULAR DC-DC CONVERTERS — microwatts to 750 watts.
- MODULAR SWITCHING MODE REGULATOR — integrated circuit power regulator.
- MODULAR DC-AC INVERTERS — 25VA to 750VA.
- STANDBY POWER SYSTEMS — battery charger and inverter system.

Austron power supplies feature all silicon semiconductors. Extremely high efficiency allows for high temperature operation, permits full MIL environmental certification.

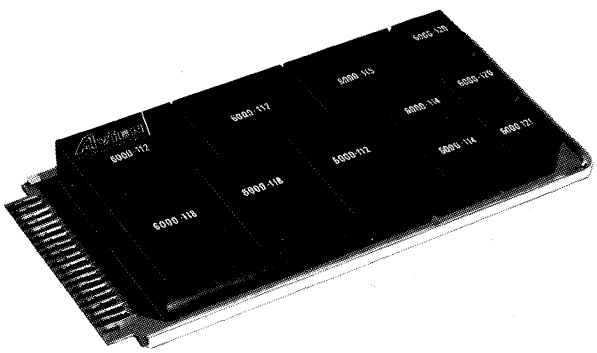
AVIEN INCORPORATED

MODEL 6100 / Synchro-To-Digital Converter

DIGITIZE SYNCHRO AND RESOLVER OUTPUTS TO 12 BITS WITH ONE LOW COST CARD



FEATURES:

- Complete synchro-to-digital converter on one 4⅝″ x 11¼″ printed circuit card.
- Solid state "no adjustment" encapsulated construction ideally suited for rugged industrial applications (−55° to +125°C model available, specify Model 6100M).
- Operation from standard ±15V dc and +5V dc system voltages or 115V, 60Hz with mating 4⅝″ x 11¼″ power supply card.
- Plug-in functional modules provide maximum flexibility to facilitate OEM applications, including ... custom card size, multiplexing, multi-speed synchro, resolvers, output codes, display time ...
- High input impedance ... permits use of the converter for readout, logging, computer input ... while simultaneously permitting the synchro to provide direct signals for servo system operation and/or control.
- Laboratory standards system accuracy available to the industrial user for the first time at low cost and small size ... Avien's Model 6100 S/D supplies precision 400Hz for synchro excitation, permitting industrial system use of a synchro under laboratory measurement conditions.
- System accuracy will be within 6′ of specified synchro/resolver accuracy.
- Multiplex Capability ... up to 200 inputs.
- Tracking ... up to 72,000°/sec.
- High speed conversion for fast control, i.e. valves, chemical mixing, nuclear reactors ...

DESCRIPTION:

The Avien Model 6100 Synchro-to-Digital Converter provides, on a single card, all the electronics (including clock and excitation reference) necessary to convert a 3-wire synchro signal to a 4-digit BCD output signal (12 bit accuracy). Proprietary techniques permit achievement of an overall system accuracy implied by the synchro accuracy itself ... by utilization of a little known but important element in all servo specifications ... accuracy specified under precise frequency and amplitude excitation conditions. The Avien Model 6100 offers laboratory instrument performance (previously found only in bulky units) at the lowest cost and size.

SPECIFICATIONS:

EXCITATION OUTPUT 400 Hz ±0.1%, 26 V rms ±1%
Note—This signal is provided from an integral module on the card.

INPUT SIGNAL 3-wire synchro output
11.8 V rms

OUTPUT BCD, 4 digits plus decimal

RESOLUTION 2′38″

LOGIC LEVELS +5 V ±10% = Logic "1"
0 V to .5 V = Logic "0"

LSD 6′

CONVERSION TIME <20 ms

DISPLAY TIME
Standard Unit: .1 to 10 seconds (factory preset to customer requirements)
Optional Feature: Continuously variable from .1 to 10 seconds

PACKAGE One P.C. board 4⅝″ x 11¼″

TRACKING Standard Unit: (18,000 − 50x)°/sec
Optional Feature: (72,000 − 200x)°/sec
Where x is the shaft angle in degrees at the start of the conversion interval.

POWER REQUIREMENTS ±15 V ±5% at 200 mA
+5 V ±10% at 200 mA

OPERATING TEMPERATURE 0° to +70°C
−55° to +125°C (optional, specify Model 6100M)

ACCURACY
6′ peak error from all sources, excluding input signals (synchro or resolver).

SYSTEM ACCURACY
Peak system error will not exceed peak conversion accuracy by more than the manufacturer's specified accuracy of input device (synchro or resolver)

MULTIPLEX CAPABILITY

Standard Unit: $N = \frac{50}{R}$

Optional Feature: $N = \frac{\text{Excitation Frequency}}{2R}$

Where: N = Number of multiplex inputs
R = Number of readouts/second for each input

Call, wire, or write for details and evaluation sample of the smallest, lowest cost, highest performing SYNCHRO-TO-DIGITAL CONVERTER available.

Progressive changes in design may be made without prior announcement.

DIC* / Digital Integrated Circuit Test System

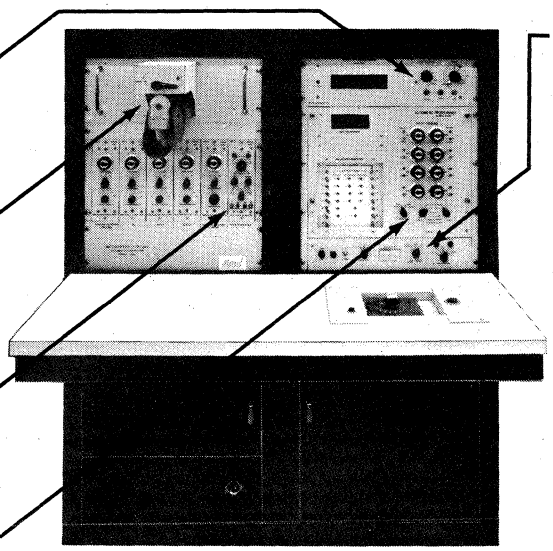
A NEW LOW COST CONCEPT IN AUTOMATIC TEST, MEASUREMENT AND DISPLAY OF DIGITAL INTEGRATED CIRCUIT PARAMETERS.

DIGITAL COMPARATOR VOLTMETER
Analyzes failures by measuring voltages (0 to ±100 Vdc, 0.1mV resolution) and currents (0 to ±100mAdc, 10nA resolution).

TAPE READER
All your test and measurement requirements are on punched Mylar tape 82 bits wide. No internal memory or factory programming is required. Unlimited number of tests.

STIMULI
Test any digital IC with up to four voltage (0 to ± 100 Vdc), and one voltage/current (0 to ±100 Vdc/0 to ± 100 mAdc) plug-in supplies.

PROGRAMMER
Preset digital voltages and device leads for the IC... takes less than one minute... then you are ready to test millions of IC's.



MODEL 2400

CONTROL PANEL

Choice of operating modes:
- Diagnostic Test—provides operating status of the Model 2400 using self-test tape.
- Continuous—accept/reject indication upon completion of all tests.
- Stop on Failure—failed test number and parametric measurement displayed.
- Single Test—test number and parametric measurement displayed with accept/reject indication.
- Manual/Power Soak—power applied continuously to unit under test.
- Automatic Handler—provides interface with Automatic Handler.

Choice of data logging modes:
- Log All—continuous data logging of each test and measurement.
- Log Failures—record parametric measurement on test failures.
- Off—no data logging.

CONSTRUCTION

- Modular IC circuitry.
- Kelvin connections provide precision measurements of high currents at low voltage... and low voltage at high currents... also permits remote measurements (i.e. environmental testing).
- Shielded circuits and wiring... compensation for lead capacitance... circuit capacitances automatically discharged.
- Plug-in modules avoid obsolescence.
- "Swing-Out" accessibility simplifies maintenance.
- Floor Cabinet—46" w x 59" h x 24" deep.
- Power—115V, 50/60 Hz, 1Ø, 3 amps.

HERE IS WHAT IT CAN DO:

- Uniquely designed for dc parametric test and measurement of digital integrated circuits—Avien's specialty.
- High-volume incoming inspection testing of **all** digital IC's—3,000 IC's per shift **without** automatic handler.
- QA failure analysis—each failure can be analyzed in detail with the widest range of input/output voltages and currents and with display of high accuracy parametric measurements.
- Engineering evaluation—device performance can be tested, measured, displayed, and recorded under the widest range of applied stimuli.
- Test data logging—BCD output can be used to record all test data for on-line and off-line analysis.
- DC testing of any device within the input/output voltages and current capability of the 2400 DIC* Test System.
- Digital IC Classification—unlimited number of tests permits the widest range of machine instruction for parametric classification of devices.

HERE IS WHAT YOU GET:

Avien Model 2400 DIC* Test System comes complete, ready to be plugged in to test your IC's. You get:
- Model 2400 DIC* Test System.
- Tape punch and 100 feet of tape to get you started (the average program requires one foot of tape).
- Enough test work sheets for about 50 IC types.
- Operating manuals, schematics, and instructions.
- On-site training program.
- Complete set of IC test sockets and adapters (Kelvin connected).
- Full warranty.

Call for full details on the Model 2400 DIC* Test System and Avien's LEASE/PURCHASE Plan which can put a Model 2400 in your plant for minimal cost.

Progressive changes in design may be made without prior announcement.

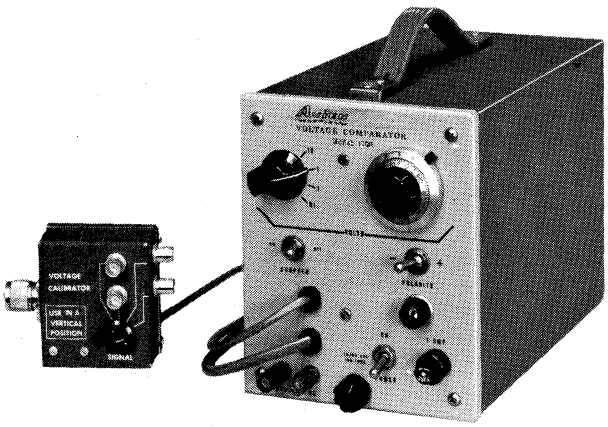
MODEL 6000 / Voltage Calibrator

FOR PRECISE VOLTAGE AND BANDWIDTH CALIBRATION OF OSCILLOSCOPE SIGNALS.



FEATURES:

- Excellent Long Term Stability
- Low Temperature Coefficient, .003%/°C
- Overall Accuracy ±0.1% of Full Scale
- Rise Time Less Than 3 Nanoseconds
- Precision D.C. Voltage Available at Front Panel
- Four Probe Inputs
- Fits Compartment of Oscilloscope Dolly
- 0-10 Volt Input Range Expandable to 400 Volts with Series 6007 Attenuators

DESCRIPTION

The Model 6000 is a precision instrument for voltage calibration and bandwidth measurement with an accuracy of 0.1% of full scale. The voltage or current amplitude of the signal under measurement is compared with the DC voltage of the calibrator which forms two clear horizontal lines (see figure 1). The signal and the DC voltage are alternately connected to the input of the oscilloscope. A typical pulse measurement is shown in figure 1 and a sine wave in figure 2.

The mercury chopper is mounted in a box which is connected directly to the oscilloscope input connector, thus minimizing signal distortion.

Amplitude distortion is prevented by not using any active elements between the signal to be measured and the oscilloscope.

The mercury chopper closes in the nanosecond region without any jitter to the leading edge, permitting oscilloscope bandwidth measurements up to 100 MHz. Figure 3 shows the leading edge applied to the input of a Tektronix Model 545A oscilloscope. The amplitude of this wave may be varied from 100 microvolts to 10 volts. It is therefore a simple matter to use this fast wave front to measure the high frequency cutoff of the oscilloscope. The combination of an accurate DC voltage and a means of measuring the high-frequency bandwidth will insure accurate measurement of high frequency pulses or continuous waves.

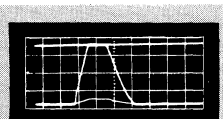


Figure 1

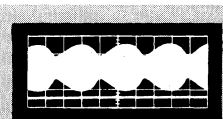

Figure 2

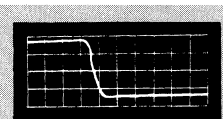

Figure 3

SPECIFICATIONS

VOLTAGE SCALE:
0 to 10 volts in four scales. With the Model 6007 attenuator, the maximum voltage input is 400 volts.

ACCURACY:
0.1% of full scale. Zero temperature compensated zener diodes, having a temperature coefficient of 0.003%/°C are used. Resistors for determining D.C. voltage output have a temperature coefficient of <25 ppm/°C.

RISE TIME OF MERCURY CHOPPER:
<3 nanoseconds.

CHOPPER NOISE:
<1.5 millivolts up to 10 K ohm source impedance.
<2.0 millivolts up to 1 megohm source impedance.

ACCESSORIES:
Series 6007 Attenuators for voltage range expansion.

POWER INPUT:
50/60 cps, 105-125 volts, 15 watts.

PHYSICAL SPECIFICATIONS:
Size: height 7 in., width 5¾ in., depth 10¼ in.
Weight: 10 lbs., net.

Progressive changes in design may be made without prior announcement.

B & K Instruments, Inc. specializes in the application and marketing of Bruel & Kjaer instruments and complete systems for measurement, analysis, control, and recording of AC voltages from 2 Hz to 200,000 Hz. To provide customers with immediate access to men familiar with their problems and with application experience in their area, the B & K staff is divided into specific market groups:

EDUCATIONAL — Teaching dynamic measurements; sound, vibration, strain, and shock.

HUMAN ACOUSTICS — Speech and hearing, hearing aids, psycho-acoustics, neuro-physiological research, heart sound.

AEROSPACE ENVIRONMENT — Data acquision, data processing, vibration environmental testing, instrument and transducer calibration, and bio-acoustics testing.

PRODUCT NOISE AND VIBRATION — Product noise and vibration analysis, control, or reduction; materials testing, architectural acoustics, traffic, airport noise, and similar fields.

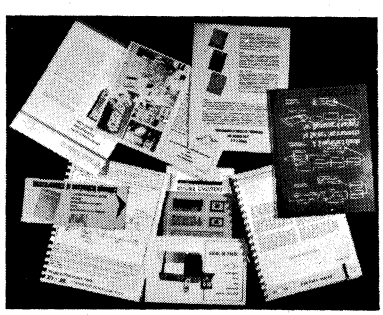
COMMUNICATIONS — Recording, reproduction, broadcasting, and dictating equipment; telephone equipment, hydrophones, and related equipment.

GENERAL INSTRUMENTS — Measurement of voltages, resistance, impedance, phase angles, and other values.

Within each market group is a pool of practical experience and know-how, available through the B & K field representatives, or by direct contact to Cleveland.

Individual Bruel & Kjaer instruments are unique and unmatched for accurate, professional measurements. A separate staff is maintained in Cleveland to assist customers in integrating instruments into reliable systems — or to design and manufacture custom systems to solve specific measurement, control, or analysis problems.

B & K instruments and systems are available for sale, lease, or rental. Factory-trained field representatives are located in most major cities.



Each B & K instrument is described in an individual Specification Sheet. The entire line is presented in condensed form in an annual Condensed Catalog. A quarterly journal, the B & K Technical Review, reports new developments in the field and from Bruel & Kjaer research. For the B & K instrument user, a Service Note program keeps him up-to-date on new servicing and calibration techniques, accessories, and ideas for assuring effective use of his instruments. An Application Note series discusses new solutions to difficult or unusual problems. All publications are available free, on request.

Beckman®

INSULATION TEST EQUIPMENT

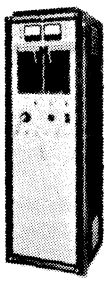
WIDE-RANGE MEGOHMMETERS

Model L Series — Including Digital Readout. Designed for laboratory and high speed testing of motor and transformer winding insulation, cable insulation, high value resistors, capacitor insulation, and for the measurement of surface and volume leakage of insulating materials. Meets requirements for testing insulation resistance in accordance with ASTM D-257, and Federal Spec. LP-406B, Method 4041.

Model	Test Voltage	Resistance Range Low	Resistance Range High	Power Consumption	Weight Net	Weight Shipping	Size
L-4B	200 or 500 fixed	1 meg. 2.5 meg.	100,000 meg. 250,000 meg.	50 watts	14	17	15" x 8" x 10"
L-6C	100 to 600*	1 meg.	100,000 meg.	80 watts	15	18	15" x 8" x 10"
L-7	100 to 600*	1 meg.	5 x 10^{13} ohms	75 watts	20	24	8" x 10½" x 11½"
L-8	10 to 1000**	10^5	10^{14}	35 watts	18	22	7½" x 11" x 13"
L-9†	10 to 1000*	10^4	10^{14}	145 watts	140	165	21" x 19" x 21"

* Continuously variable, built-in voltmeter for accurate setting.
** Continuously variable, selectable by switch.
† Features digital readout, automatic or manual range selection.

AC BREAKDOWN TESTERS Model PA Series



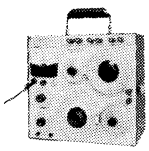
Type PA variable high voltage AC breakdown testers are designed to meet the requirements of ASTM specification D-149, and Federal specification LP-406, Method 4031, as well as all general purpose breakdown testing. Provided with motor-driven control of output voltage with any desired rise of secondary voltage. Available with wide variety of testing jigs.

PA-5-152	15,000 V. rms. 2KVA
PA-5-155	15,000 V. rms. 5KVA
PA-5-252	25,000 V. rms. 2KVA
PA-5-255	25,000 V. rms. 5KVA
PA-5-502	50,000 V. rms. 2KVA
PA-5-505	50,000 V. rms. 5KVA
PA-50-1005	100,000 V. rms. 5KVA

For even greater versatility, dual range units using multiple winding transformers are available on order. These provide two meters and a total of six scales. Typical dual-range models as follows:

PA-5-252/052	25 kv or 5 kv rms. 2KVA
PA-5-502/102	50 kv or 10 kv rms. 2KVA
PA-50-5010/1510/510	50 kv or 15 kv or 5 kv rms. 10KVA

IMPEDANCE BRIDGE Model ZB-2A

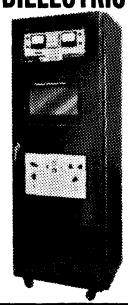


Model ZB-2 is a universal type bridge for the precise measurement of AC and DC Resistance, Inductance and Storage Factor, and Capacitance and Dissipation Factor. The instrument provides clear in-line readout, features simplified operation, and covers an exceptionally wide range for all types of measurements. In-line readings for DQ and RCL facilitate faster and more accurate reading. A new meter null detector is utilized on both AC and DC measurements to eliminate the conventional "electron-ray" or "eye" tube.

Range:	Resistance	0.0001 ohm to 11 megohms AC or DC (8 ranges)
	Capacitance	1 pf to 1100 μf (7 ranges)
	Inductance	1 μh to 1100 h (7 ranges)
	D	0.001 to 1.05 at 1 KC } Provision for
	Q	0.02 to 1000 at 1 KC } external extension
Accuracy:	Resistance	±(0.1% + 1 dial div.)
	Capacitance	±(0.2% + 1 dial div.)
	Inductance	±(0.3% + 1 dial div.)
	D Factor	±(5% + 0.0025)
	Q Factor to 10 HY	±(5% + 0.0025)
	at 100 HY	±(5% + 0.015)
	at 1000 HY	±(5% + 0.055)

Internal Oscillator Frequency: 1KC± 1%
Internal DC Supply: 10 V at 250 ma (DC Low)
200 V at 10 ma (DC High)

DIELECTRIC BREAKDOWN TESTER Model PDA-1



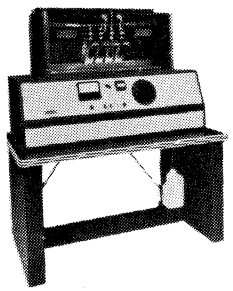
Designed to provide simple, safe, accurate means of determining dielectric strength and breakdown voltage in the laboratory or factory (conforms to requirements of ASTM specifications D-149 and Federal specification L-P-406 method 4031).

Push button selection — four different leakage current meter ranges (six operating modes) — enclosed test cubicle, fail-safe circuitry, interlocked doors and oil immersed gravity-drop shorting switch allows safe use by unskilled personnel.

- Continuously adjustable (automatic or manual) test output voltage control uses full 100% rotation to allow fine control for critical testing (choice of AC or DC).
- Provides for transient suppression and introduction of non-linear resistance into transformer.
- Maximum versatility of test jig set-up using plug-in jigs or high voltage cable to external "hi-pot" testing circuits.
- Self contained unit — portable yet provides easy access to all parts for maintenance.

TRACKING and EROSION RESISTANCE TEST -- TERT-1

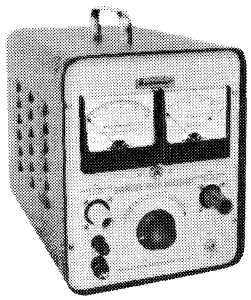
Evaluates relative track and erosion resistance of various materials using Liquid Contamination Inclined Plane method described in ASTM and IEEE specifications. Test represents service exposure evaluation of wide range of insulated material subject to AC surface current. Test conditions simulate water film on insulation surface in which ionizable and other contaminants may dissolve. Contaminant rate easily controlled to simulate different service stresses and outside conditions. Tests conducted on 2" x 5" specimen; actual test covers 1" x 2" track area. Test criteria is either "time to track a fixed distance at a fixed voltage," or "voltage to initiate tracking" — depending on specific service requirement evaluation.



WHEATSTONE BRIDGES
Model RN Series

Universally used for the measurement of all types of resistance devices and circuits where high accuracy is required. Models available for performing Murray-Varley Loop tests.

Model	Total Resistance of Decade	Ratio Dial Settings	Circuits
RN-1	9X(1+10+100+1000)	.001, .01. .1, 1.0, 10, 100, 1000	.....
RN-2	9X(1+10+100+1000)	.001, .01, .1, 1.0, 10, 100, 1000, M10 M100, M1000	Murray & Varley
RN-3	10X(1+10+100)+9(1000)	1/1000, 1/100, 1/10, 1/9, 1/4, 1/1, 10/1, 100/1, 1000/1, M10, M100, M1000	Murray & Varley

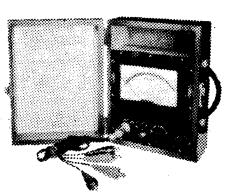


INSULATION TEST SETS

Used in testing insulation where AC voltages are desired. Dual instruments are also available which provide choice of AC or DC output. Includes kilovoltmeter, current meter and automatic overload limiter circuits. Metering accuracies are ±3%. The basic model number covers AC types. Add the prefix AC/DC to the basic model number for the dual output type.

Model	Type	Voltages	Current Meter
3000	AC or AC/DC	0 to 3,000	10 MA
1000	AC or AC/DC	0 to 10,000	10 MA
2500-DC	DC only	0 to 25,000	100 μA
4000-DC	DC only	0 to 40,000	50 μA

LOW RESISTANCE OHMMETER Model LRO-1



Designed for the measurement of resistance of sensitive relay contacts, fuses, bus-bars and connections, rail joints, pipe or conduit, switch contacts, transformer windings, motor windings, bonding, grounding and similar applications. The current through the unknown resistance never exceeds 110 ma. Extreme accuracy for the most critical measurements. Entirely self-contained, including 1½ V flashlight battery. Ranges: .1 ohm, 1 ohm and 10 ohms. 100 meter scale divisions. One scale division on .1 ohm range is .001 ohm. Accuracy of ±1½% or better on LRO-1. Accuracy is based on full scale values. Maximum current through piece under test = 0.11 amp.

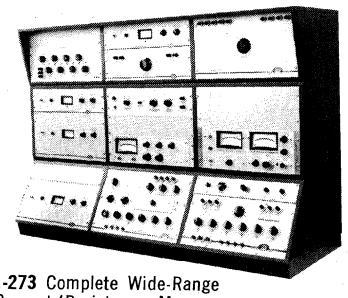
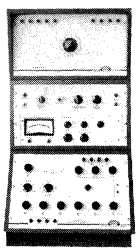
PIONEERS IN MODERN POTENTIOMETRY AND BRIDGE INSTRUMENTATION

VERITOR™ ULTRA-PRECISE MEASURING & GENERATING MODULES & SYSTEMS

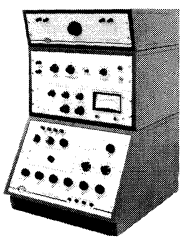
Veritor Systems are fully integrated standards-laboratory consoles that take the tedium, time, and trouble out of testing—anywhere in the plant. They are as much at home at 1,500 volts as at 10 millivolts, and have **nanovolt** sensitivity and resolution—yet are so completely guarded, shielded and free from ground loops, pickup, thermals, and other sources of uncertainty that you'll never again spend hours setting up and verifying in order to take a few minutes worth of measurements! This series comprises 14 different models, for both measuring **and** generating NBS-traceable **voltage, current** and **resistance,** to state-of-the-art accuracies.



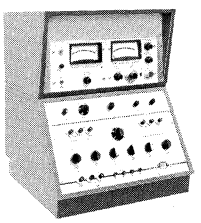
Model 71-273 Complete Wide-Range Voltage/Current/Resistance Measuring/Generating System. Write for Bulletin 71-6 EEM.



Veritor Model 71-111 Complete Wide-Range DC Voltage-Measuring System: 15 ranges from 16 millivolts full-scale to 1.6KV; nanovolt resolution, fully guarded, noise free. No accessories required — just set the range and take 6-digit readings!



Veritor Model 71-121 Complete Wide-Range DC Current Measuring System: 8 ranges, from 75 mA f.s. to 15A f.s., plus 3 EMF ranges, from 16 mV f.s. to 1.6 Volts f.s. Same convenience as 71-111 (left).



Veritor Model 71-131 Complete Wide-Range Resistance Meas System Continuous 0.1 ohm to 11,111 megohms. Fully Guarded. Direct-reading-Resistance-Deviation, 0-100/1000 PPM. Regulated dual-range guarded power supply. Sensitive detector. No accessories required.

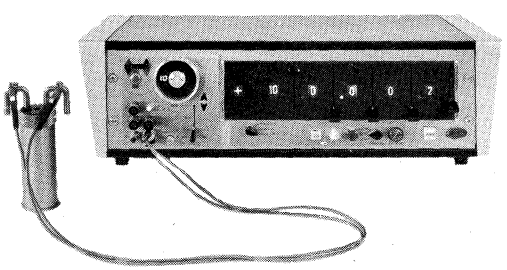
MENTOR

PRECISION TEST INSTRUMENTS

Laboratory Accuracy...Production-Line Convenience



Full five-digit, wide range, multi-parameter capability with 3-in-1 facility: Use them for fully automatic limit testing (800/900 Series has adjustable "Go" Band Limits and "Lo-Go-Hi" indication) . . . Use them in a semi-, or fully-automatic system to guide the adjustments of input parameters to pre-set targets and limits . . . Use them as error-free, logic-assisted manual measuring instruments. Standard models priced from $1585. Two series of Standard Instruments: 800/900, primarily for Limit Testing/Adjusting . . . 400/500, primarily for Manual Logic-Assisted Measurements.

BIDDLE VERSITOR® PORTABLE INSTRUMENTS

VERSITOR® INSTRUMENTS are compact, modern potentiometers and bridges, designed to travel wherever a precision measurement is required, and to preserve their full rated accuracy for years. They feature ultra-sensitive solid state null detectors driving rugged, fast response taut-band meters. Corrosion-proof, impact-resistant cases; laboratory-grade circuit components, battery operated.

Accessory Modules

72-542

72-910

72-920

Run-Up Box
A battery-operated, low-impedance source of adjustable DC millivoltage.

Volt Box
Expands the voltage range to 1000V in four ranges.

Shunt Box
Adapts the MV Potentiometer for DC measurements up to 1 ampere in three ranges.

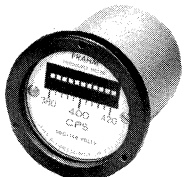
Solid State Null Detector

a 4μV per division zero center meter driven by a solid state high gain differential amplifier, powered by two mercury batteries.

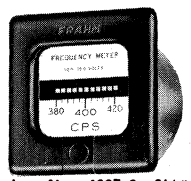
72-807

FRAHM® RESONANT REED FREQUENCY METERS

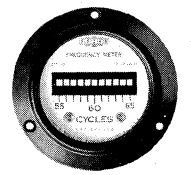
NEW . . . 1½", 5, 7, or 9 reeds, 50, 60 and 400 cycle Frahm Miniature Frequency Meter with metal case, hermetically sealed.



Catalog No. 2997—2½", 11 reeds, 400 cycle Frahm Miniature Frequency Meter with metal case.



Catalog No. 4997-2—3½", 11 reeds, 400 cycle, Frahm Frequency Meter with square plastic case.



Catalog No. 4967—3½", 11 reeds, 60 cycle, Frahm Frequency Meter with plastic case.

3½" meters available in round plastic, or metal (sealed), or round plastic with square bezel. Portable instruments available in all ranges shown with 3½" cases.

15 TO 1500 CPS (SPECIAL UP TO 1700 CPS) 2 TO 122 REEDS. MOLDED PLASTIC OR METAL CASES. SEALED IF REQUIRED. 1 1/2" TO 8 1/2" • PANEL MOUNTING OR PORTABLE

The first resonant reed instrument in the U.S.A. was introduced 50 years ago by James G. Biddle Co. We have maintained this leadership ever since, to place at your service the greatest knowledge of materials, processes, and controls—the finest facilities to produce quality instruments for unfailing accuracy and long life.

Basic specifications are shown in the table at right.

Specially designed instruments will be made to your requirements.

Write or phone if you have applications which require special modifications of range, methods of actuating, scale graduations or other design characteristics.

For standard specs and prices write or phone for BULLETIN 32 EEM.

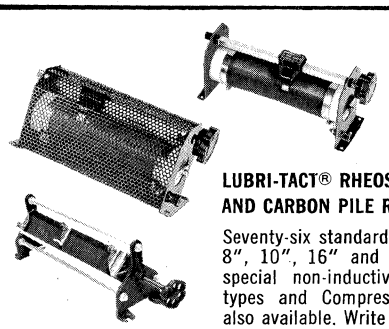
Voltages 100 to 150 v—D.C. resistance 100 ohms per volt. Instruments meet MIL Specifications. Cases meet ASA standard diameter dimensions.



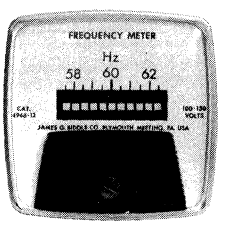
LUBRI-TACT® RHEOSTATS AND CARBON PILE RHEOSTATS

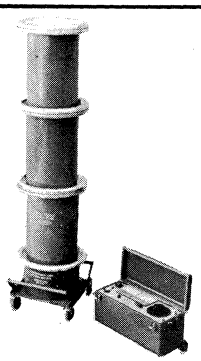
Seventy-six standardized ratings available in 8", 10", 16" and 20" sizes. A variety of special non-inductive, double and graded types and Compression Carbon Rheostats also available. Write for Bulletin 41-EEM.

The New Look!

3½" FREQUENCY METER

Available with all 5, 7, 9, 10 and 11 reed instruments listed in our Bulletin 32. A handsome addition to any modern panel at no additional cost.





DIELECTRIC TEST SETS

From 5 to 150 kv, both a-c and d-c. Excellent safety features and output voltage regulation.

For information on all ranges—Request file 22-EEM.

CORONA TEST EQUIPMENT

. . . for measuring corona starting and extinction voltage, apparent corona charge, relative corona current.

. . . for use in non-destructive or breakdown dielectric tests on electrical insulating materials, individual insulation structures and insulation of electrical equipment. Write for Bulletin 66-EEM.

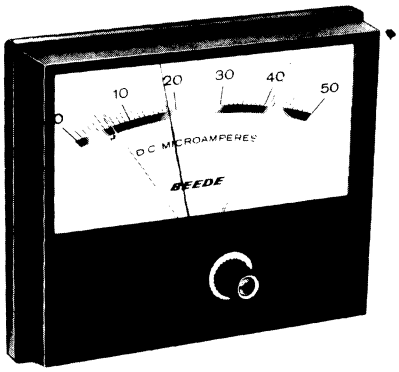
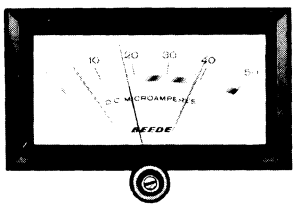
BEEDE... value by design

NON-CONTACTING CONTROL METER RELAYS





The Beede Control Meter Relay is an instrument that combines a permanent magnet-moving coil meter with an adjustable photoelectric sensor, switching circuit and output switch. As the indicated variable being monitored passes the adjustable set point, an output relay is either energized or de-energized. Units are available with either one or two adjustable set points. BEEDE has greatly simplified the design of the conventional non-contacting meter relay, significantly reducing the number of parts incorporated in the unit, resulting in price savings of up to 50% without a loss of quality features.

FEATURES

- **Optical, non-contacting control-continuous indication**
- **Wide variety of options available for easy, inexpensive customizing**
- **Inherently Fail Safe**
- **AC or DC power input**
- **Directive Drive Set Pointers**
- **Bulb Life in excess of 10 yrs.**
- **Meter movement and dial custom designed to your specifications if required**
- **Meter permanently free of static influence**
- **Attractive modern "Centurion" style case**
- **Large easy-to-read dial**

SPECIAL PYROMETER FEATURES

- **Models available from 0-300° F**
- **Electrical ambient temperature compensation**
- **Thermocouple break protection**
- **Internal potentiometer to compensate for external lead resistance**
- **Deadband externally adjustable**

SPECIFICATIONS

Accuracy ±2%
ON-OFF operation or latching with manual reset
Output: SPDT relay for each set point. DPDT relays available. Solid State Output available
Standard Deadband is 0.5% max. standard
Power Requirements 105 to 130 Volts AC. Other AC and DC models available
Ambient Temperature 40° F to 165° F is standard

MOVEMENTS

MAG-BAND TAUT BAND
0-10 uA DC minimum range
MAG-B PIVOT AND JEWEL
0-50 uA DC minimum range
Size: 4 inch (3" and 6" sizes will soon be available)

MODELS AVAILABLE

	Mounting	Single Set Point	Double Set Point
Complete Package	Front of Panel Behind Panel	MR-14-05 MR-14-06	MR-24-05 MR-24-06
Optical Element Only	Front of Panel Behind Panel	MR-14-05-01 MR-14-06-01	MR-24-05-01 MR-24-06-01
Separate Control Package	Front of Panel Behind Panel	MR-14-05-02 MR-14-06-02	MR-24-05-02 MR-24-06-02

PANEL METERS

A wide variety of standard Beede Panel Meter Case styles is available, featuring the new "Centurion" line. A number of standard Beede meter movements, available in a complete range of sensitivities and electrical characteristics, are used to meet specific electrical requirements. BEEDE also installs meter movements in special customer cases or supplies meter movements separately for customer installation.

METER MOVEMENTS

MAG-BAND TAUT BAND . . . Self-shielded, high-torque, excellent balance and no drift. Maximum sensitivities: 0-5 uA DC; 0-5 MV DC ± 1% or ± 2% accuracy.

MAG-B . . . Rugged, high-torque, self-shielded pivot and jewel movement. Maximum sensitivities: 0-50 uA DC; 0-20 MV DC ± 1% or ± 2% accuracy.

250° MOVEMENT — A fine tracking, sturdy, self-shielded 250° movement.

ALSO . . . external magnet, AC repulsion and miniature core magnet movements.

CENTURION LINE

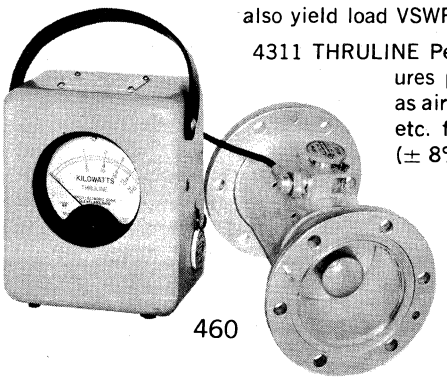
BIRD RF POWER 50-OHM COAXIAL QUALITY INSTRUMENTS

TO MEASURE, TERMINATE, ATTENUATE & FILTER

43

THRULINE® RF DIRECTIONAL WATTMETERS

Insertion instruments for measuring and monitoring incident and reflected power in coaxial transmission lines with ± 5% of full scale accuracy. Insertion VSWR is less than 1.05. Net power under any load condition is the difference between incident and reflected power readings, which also yield load VSWR from a nomograph.

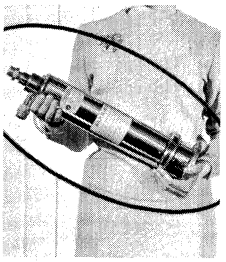


460

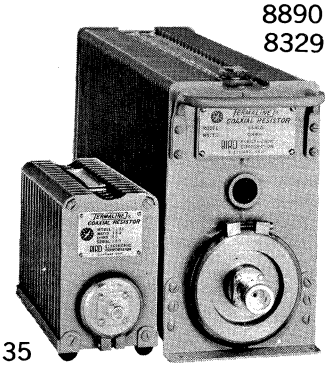
4311 THRULINE Peak **and** CW Wattmeter **also** measures power of **pulsed RF** systems such as air navigational aids, telemetry, radar, etc. from 0.4 microsecond pulse width (± 8% accuracy).

Models 4111-12-13 are new palm-sized CW Wattmeters with one forward and one reflected power scale for servicing transmitters in the 2-30 MHz or 25-175 MHz frequency range.

Line Sections with single or double element sockets for all THRULINE Wattmeters, as well as 7/8" diameter instruments available.



15kW to 50kW



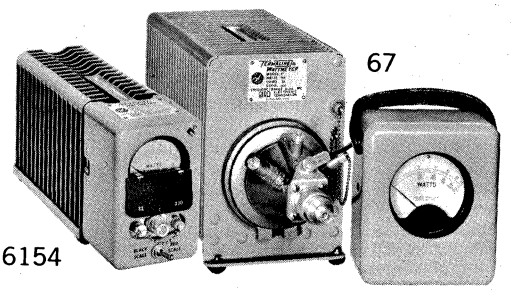
8890
8329
8135

TERMALINE® RF COAXIAL LOAD RESISTORS

For accurate, non-radiating termination of 50-ohm RF coaxial transmission lines are designed for use in permanent installations, development testing and trouble shooting of transmitters, intermediate components, power tubes, and accessories.

TENULINE® POWER ATTENUATORS

In addition to terminating a 50-ohm system, deliver an output signal 30 dB below the input, for RFI measurements, for extending the range of low-power wattmeters, for isolation of system components, etc.



6154
67

TERMALINE® RF ABSORPTION WATTMETERS

Are direct reading instruments for absorbing and measuring RF power in 50-ohm coaxial line systems through the frequencies of 2 to 1000 MHz. The load section of the TERMALINE Wattmeter serves as a dummy load. The indicating meter is calibrated to read RF power directly in watts with ±5% of full scale accuracy. TERMALINE Wattmeters are available from milliwatts to kilowatts.

COAXIAL RF FILTERS

Custom engineered or field-proven designs. High rejection attenuation filters available with Low-pass cut-off from 16 to 2700 MHz (about fifty designs at 400 MHz), Hi-pass cut-off frequencies from 30 to 1000 MHz, Band-pass as narrow as 5% of center frequency. Sizes from ½ cubic inches, with subminiature connectors, to 3⅛" line.

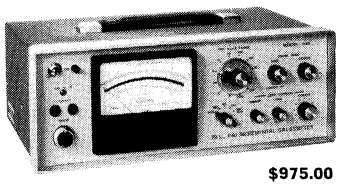
F.W. BELL INC

INSTRUMENTS

GOLD SEAL GUARANTEE
All ceramic-encapsulated transverse probes guaranteed one year against breakage

HALL EFFECT GAUSSMETERS

In addition to the three popular high performance models of the Hall Effect Gaussmeters shown below Bell offers many other models; including direct read-out of ac fields; digital readout, analog output; general purpose for measuring dc fields to 30 kG and others. Write for details on full line.

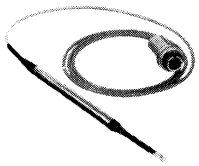


$975.00

INCREMENTAL—Model 640
Above: A new precalibration technique allows direct interchangeability of probes without recalibration. With built-in calibration accuracy of ±0.3%, instrument accuracy is ±1.0% to 30 kG (3 tesla) and ±0.5% to 10 kG (1 tesla) when used with high-linearity probes. Controlled feedback permits incremental operation up to 30 kG. 1000X scale expansion with automatic and true zero center meter readout permits direct measurement of small incremental variations in both a positive and negative direction.

$675.00

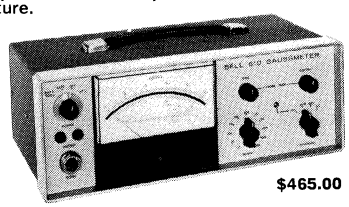
PRECALIBRATED—Model 620
Above: The instrument offers twelve (12) ranges non-overlapping from 0.1 gauss (10^{-5} tesla) FS to 30 kG (3 tesla) FS. With High Field Probe, 100 kG measurements possible. Both dc and ac fields are indicated directly on the panel meter. Ac fields up to 400 Hz are read out (independent of dc fields) as an RMS value for sine wave fields.



PROBE
Wide variety of both transverse and axial probes available.

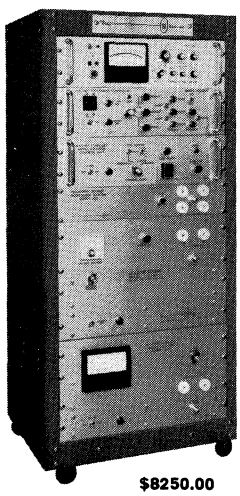
***T-6011**
($120.00)

SELF-CALIBRATED—Model 610
Below: Instrument accuracy is ±1.5% FS to 10 kG and 2.5% FS to 30 kG when using the appropriately selected standard probe. A new calibration technique allows interchangeability of probes with simple built-in recalibration feature.



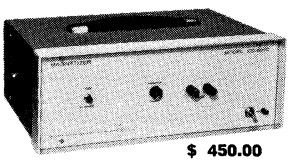
$465.00

INDUSTRIAL MAGNET PROCESSING EQUIPMENT



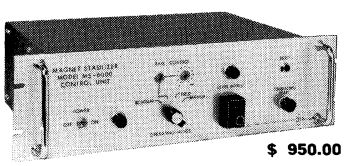
$8250.00

Model 460—Magnet Processing System. Automatic Magnetizing and Stabilizing. Saturate Level Test. Stabilized Level Test. Go-No Go Light Indicators. Cycle Time 5 Seconds.



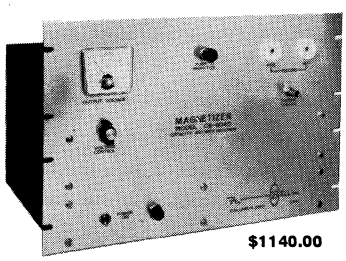
$ 450.00

Model CS-6020 Magnetizer—Solid State Construction. Energy 16 Watt Seconds. Magnets up to 1 cubic inch.



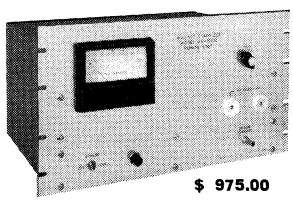
$ 950.00

Model HU-7048 Stabilizer Control—Automatic Stabilizing to Preset Level.



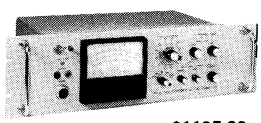
$1140.00

Model CS-6040 Magnetizer—Solid State Construction. Rapid Recycle Rate. 450-900 Watt Seconds. Positive Energy Level Control. Magnets up to 5 lbs.



$ 975.00

Model HU-7049 Stabilizer—Power Unit. AC Supply for Pull Back of Magnets. SCR Control.



$1125.00

Model HU-7051—Narrow banded Gaussmeter. Continuously measure dc component of magnet in presence of the large ac pull back.

F. W. Bell, Inc. can fill your permanent magnet processing requirements including magnetizers, stabilizers, magnetic field measurements and all associated fixtures and handling equipment.

NONDESTRUCTIVE TESTING INSTRUMENTS

Model MRA-100

$795.00

The Model MRA-100 Portable Eddy Current Tester, with five separate frequencies, provides a wide variety of nondestructive testing applications. The high resolution Hall probe supplied, which is independent of frequencies, allows excellent resolution of small surface and sub-surface anomalies or defects to satisfy most testing needs. Calibrated, absolute, air null, work null and expanded modes of operation are possible. Blank meter scales are provided and can be calibrated by the user as needed. A set of test samples, and instructions, is supplied to direct the user to the optimum test configuration for a given application.

Many other model Magnetic Reaction Analyzers offered in the Bell Line are suited for a wide variety of nondestructive testing applications. Write for details, specifications.

*Probes: A wide variety of standard and special probes is available.
Write for a complete catalog or assistance with your application.

Prices and specifications are subject to change without notice.

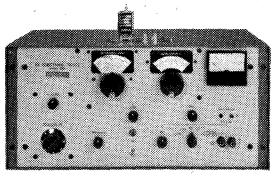
IMPEDANCE INSTRUMENTATION



Model 33A/1

RF Admittance Bridge

Measures 2-terminal shunt capacitance and conductance at high frequencies. Specified capacitance resolution obtains with 10 times lower test level than earlier Model 33A with accuracy improved to ± 0.5%. Inductance, resistance, dissipation factor, and Q may readily be determined. Internal and external dc bias. Major applications in diode, transistor, and IC measurements.

Capacitance Measurement: 0 to 150 pF from 1 MHz to 50 MHz; to 30 pF at 100 MHz; accuracy, ± 0.5%; resolution, 0.02 pF

Conductance Measurement: 0 to 25,000 μmhos; accuracy, ±2%; resolution, 0.5 μmho

Test Signal: 7 internally supplied crystal controlled frequencies of 1, 5, 10, 20, 30, 50, and 100 MHz; level continuously adjustable from 0.1 V down to as low as 1 mV

DC Bias: Internal, continuously adjustable from —6 to +100 V; external, to ±250 V

Price: $2750.00

Model 33B/1

Ultra High Conductance Resolution RF Admittance Bridge

Conductance range, 0 to 5000 μmhos with resolution of 0.1 μmho. Otherwise similar to Model 33A/1

Price: $3300.00

Model 33C/1

Ultra High Capacitance Resolution RF Admittance Bridge

Capacitance range, 0 to 15 pF with resolution of 0.002 pF; basic accuracy ± 1%. Otherwise similar to Model 33A/1

Price: $2950.00

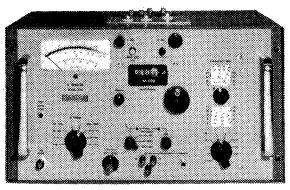
Model 33D/1

Ultra High Capacitance and Conductance Resolution RF Admittance Bridge

Capacitance range 0 to 15 pF with resolution of 0.002 pF. Conductance range 0 to 5000 μmhos with resolution of 0.1 μmho. Basic accuracy ± 1%. Otherwise similar to Model 33A/1. Price: $3,500.00.

Capacitance Range Extensions

Accessories available for measuring higher values of capacitance at frequencies up to 30 MHz for Model 33A/1 and to 20 MHz for Model 33B/1



Model 35A

Q Bridge—100 KHz to 50 MHz

Dramatically new, non-resonant 3-terminal bridge. Provides direct reading measurements of capacitance up to large values and Q over wide ranges with continuously adjustable test frequency. Low test signal levels. No external work coils. Internal or external dc bias.

Capacitance Measurement: 20 to 1,000 pF (100 KHz to 50 MHz); 2 to 10,000 pF (100 KHz to 10 MHz); indirectly 0.005 to 20 pF; basic accuracy, 0.5%

Q Measurement: 5 to 10,000; basic accuracy, 5% for Q's up to 100, (10 + Q/500)% for Q's 100 to 10,000

Test Signal: Frequency continuously adjustable from 100 KHz to 50 MHz; levels <50 mV; continuously adjustable

Dual External DC Bias: HI to GND and/or LO to GND; differential ±200V

Internal DC Bias: HI to LO; 0 to 150V

Price: $3,000.00

Model 71A

Capacitance/Inductance Meter—1 MHz

Quick, convenient, direct reading, 3-terminal measurements of capacitance or 2-terminal measurements of inductance. Internally supplied 1 MHz test signal. Operates with low test signal level, permitting semi-conductor tests. Linear meter scales. Provision for dc bias. Linear dc output proportional to capacitance or inductance reading for display on dvm, x-y plotter, for data logging, or, with suitable voltage comparator, for go/no go testing.

Capacitance Measurement: 0 to 1000 pF in 7 ranges; accuracy, ±1%; resolution, 0.01 pF

Inductance Measurement: 0 to 1000 μH in 7 ranges; accuracy, ±1%; resolution 0.01 μH

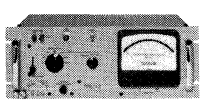
Test Signal: Frequency 1 MHz; level, 15 mV rms for capacitance measurements, < 1 mV for inductance measurements

Q Range: Specified accuracies apply for test specimens having Q's of 3 or more; lower with readjustment

DC Bias: Externally supplied up to ±200 V

DC Analog Output: 0 to 100 mV or 300 mV fs depending on range numerics; also > 1 V fs for loads > 10 MΩ; linearity, 0.1% of reading; response time, 10 ms

Price: $950.00; rack-mounting version with built-in standard, Model 71AR, $1025.00



Model 71CR

Capacitance/Inductance Meter—100 KHz

Quick, convenient, direct reading, 3-terminal measurements of capacitance or 2-terminal measurements of inductance. Internally supplied 100 KHz test signal. Operates with low test signal level, permitting semi-conductor tests. Linear meter scales. Provision for dc bias. Linear dc output proportional to capacitance or inductance reading for display on dvm, x-y plotter, for data logging, or with suitable voltage comparator, for go/no go testing.

Capacitance Measurement: 0 to .01 μF in 7 ranges; accuracy ± 1%; resolution, 0.1 pF

Inductance Measurement: 0 to 10 mH in 7 ranges; accuracy ± 1%; resolution 0.1 μH

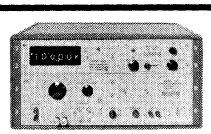
Test Signal: Frequency, 100 KHz; level, 15 mV for capacitance measurements, <1 mV for inductance measurements

Q Range: Specified accuracies apply for test specimens having Q's of 3 or more; lower with readjustment

DC Bias: Externally supplied up to ±200V

DC Analog Output: 0 to 100 mV or 300 mV fs depending on range numerics; also >1 V fs for loads > 10 MΩ; linearity, 0.1% of reading; response time, 10 ms

Price: rack-mounting with built-in standard, Model 71CR, $1100.00



Model 700A

Digital Capacitance/Inductance Meter—1 MHz

Continuous digital readout of 3-terminal capacitance or 2-terminal inductance at 1 MHz. Provisions for remote capacitance measurements and dc bias of capacitance specimen. Internal capacitance standard for both high Q and low Q (Q=3) calibration check. BCD output 1, 2, 4, 8 coded sequence.

Capacitance Measurement: 0 to 1000 pF in 3 ranges; lowest range, 10 pF, fs: 4 digit resolution and over-range (5th digit); basic accuracy, ± 0.5%

Inductance Measurement: 0 to 100 μH in 3 ranges; lowest range, 1 μH, fs; 4 digit resolution and over-range (5th digit); basic accuracy, ±1%

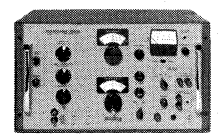
Test Signal: 1 MHz, crystal controlled; level, 15 mV for capacitance, <1 mV for inductance

Q Range: Specified accuracy applies for Q's down to 3; lower with readjustment

DC Bias: Monitored internal and external; ± 100V internal ± 200V external

Response Time: 333 ms

Price: $2,500.00



Model 74D

Capacitance Bridge—100 KHz

Precision measurements of capacitance and conductance over very broad ranges at 100 KHz. Excellent stability with negligible warm-up drift. Test signal level adjustable to low values for semiconductor testing. 3-terminal arrangement permits use of remote test jig without errors owing to cable capacitance to ground. 2-terminal operation also provided. "Linear" mode for limit operation permits go/no go testing. Provision for differential or comparison measurements. Balancing simple and convenient, with no false or sliding nulls. All zeroing controls vernier driven. Internally supplied or external dc bias.

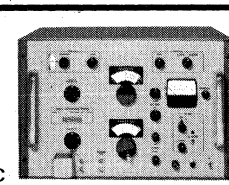
Capacitance Measurement: 0 to 110,000 pF; accuracy, ±0.1%; resolution, 0.0002pF

Conductance Measurement: 0 to 1000 μmhos; accuracy, ±5%; resolution, 0.001 μmho

Test Signal: Internally supplied, 100 KHz; level continuously adjustable from 1 mV to 4 V

DC Bias: Internal, —6 V to +100 V; External, up to ±400 V

Price: $1800.00



Model 75C

Capacitance Bridge—5 KHz to 500 KHz

Versatile 3-terminal bridge with adjustable test frequency. Permits determination of effects of frequency upon test. Includes built-in dc bias supply. Convenient operation; eliminating false and sliding nulls. Completely self-contained including bridge circuit, tunable oscillator and detector.

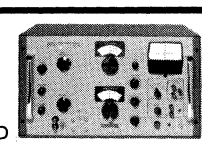
Capacitance Measurement: 0 to 1000 pF; accuracy, ±0.25%; resolution, 0.0002 pF

Conductance Measurement: 0 to 1000 μmhos; accuracy, ±5%; resolution, 0.001 μmho

Test Signal: Internally supplied; continuously adjustable in frequency from 5 KHz to 500 KHz; level adjustable from 1 mV to 3 V

DC Bias: Internal only; continuously adjustable from —5 V to +110 V

Price: $2300.00



Model 75D

Capacitance Bridge—1 MHz

This new bridge replaces 75A and 75B series. Provides 3-terminal measurements of capacitance and conductance allowing remote connection without errors due to stray capacitance to ground. Makes 2-terminal measurements using Ground Plane Adapter supplied. Inductance is read by conversion from equivalent capacitance measurement. The detector is needle sharp yet shows balance direction from the most extreme off-range setting and an additional differential detector mode allows capacitance or inductance sorting of components. Internal and external dc bias.

Capacitance Measurement: 0 to 1000 pF; accuracy, ±0.25%; resolution, 0.00005 pF with phase sensitive detector; 0.0005 pF with amplitude sensitive detector

Conductance Measurement: 0 to 1000 μmhos; accuracy, ±5%; resolution, 0.01 μmho

Inductance Measurement: 25 μH to ∞; basic accuracy, ±0.25%

Test Signal: 1 MHz, crystal controlled; level adjustable from 1 mV to 300 mV

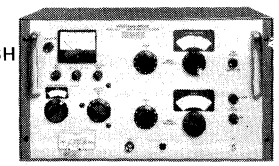
Dual External DC Bias: HI to GND and/or LO to GND; differential ±400 V, max.

Internal DC Bias: HI to LO; —6 V to +150 V

Price: $1800.00

IMPEDANCE INSTRUMENTATION *(cont.)*

Model 63H



Models 63H, 63L and 63M

Inductance Bridges

Direct reading measurements of inductance and series resistance. Convenient operation, eliminating false balance and sliding nulls. Exceptional stability. Completely self-contained, with bridge circuit, oscillator, detector, and null indicator in single, compact bench cabinet. Particularly useful for quality assurance or production tests, as well as for laboratory studies.

Model 63H

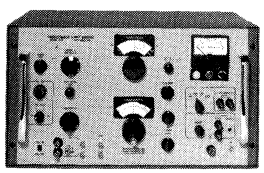
Inductance Measurement: 0 to 110 mH; accuracy, ±0.25%; resolution, 0.0002 μH
Series Resistance Measurement: 0 to 11,000 Ω; accuracy, ±3%; resolution, 0.0002 Ω
Test Signal: Internal oscillator-detector continuously adjustable from 5 KHz to 500 KHz; max. open-circuit level, 3 V

Model 63L

Inductance Measurement: 0 to 11 H; accuracy, ±0.25%; resolution,0.02 μH
Series Resistance Measurement: 0 to 110,000 Ω; accuracy, ±3%; resolution, 0.005 Ω
Test Signal: Internal oscillator-detector continuously adjustable from 400 Hz to 40 KHz max. open-circuit level 5.5 V

Model 63M

Inductance Measurement: 0 to 1.1 H; accuracy, ±0.25%; resolution, 0.002 μH
Series Resistance Measurement: 0 to 110,000 Ω; accuracy, ±3%; resolution, 0.002 Ω
Test Signal: Internal oscillator-detector continuously adjustable from 1 KHz to 100 KHz; max. open-circuit level 5.5 V
Price: Models 63H and 63M, $2500.00; Model 63L, $2750.00



Model 77B

Capacitance Limit Bridge—1 MHz

Automatic, high-speed, dual or single limit tests, or conventional manual measurements of capacitance or inductance. In automatic mode, test is insensitive to specimen loss. "High," "Low," or "Go" test decisions indicated by front panel lamps as well as by continuity closures for actuation of materials handling equipment. Internally supplied crystal controlled 1 MHz test signal. Operates with low test level. Built-in dc bias supply; provision for external bias. 3-terminal arrangement permits remote measurements.

Capacitance Measurement: Automatic Mode, 0 to 1000 pF with 0.001 pF resolution; Manual, 0 to 1000 pF with 0.0001 pF resolution; basic accuracy ±0.25%
Inductance Measurement: Manual or Automatic, 25 μH to ∞; basic accuracy, ±0.25%
Conductance Measurement: (Manual only) 0 to 1000 μmhos; basic accuracy, ±5%; resolution, 0.05 μmho
Tolerance Limits: Programmable at front panel controls from ±0.0005 pF to ±200 pF; basic accuracy, ±1% of limit setting
Test Time: Approx. 50 ms
Test Signal: Internally supplied; 1 MHz, crystal controlled; level adjustable from 250 mV to 15 mV for Automatic Mode, to 1 mV for Manual
Decision Output: Green, red, and amber panel lamps indicating "Go," "High," and "Low," respectively; continuity contacts available at rear panel in conformance with test decisions
DC Bias: Internal, continuously adjustable from —6 V to +150 V; external, to ±400 V
Price: $2500.00

Model 77B-S1

Capacitance Limit Bridge—100 KHz

Essentially similar to Model 77B. Has basic capacitance/inductance accuracy of ±0.1%. Operates with internally supplied 100 KHz crystal controlled test signal. Capacitance range, automatic or manual, is 0.001 pF to 1000 pF. Inductance range, 2.5 mH to ∞. Otherwise specifications are as shown for Model 77B.
Price: $2500.00

RF POWER INSTRUMENTATION

Model 41A

RF Microwattmeter

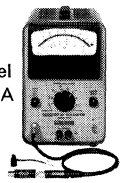
Exceptionally stable microwave power meter providing reliable measurements over a 70 dB range with one power detector. Use of full wave diode detector overcomes limitations of stability, sensitivity, and overload of thermal types. No zero balancing except for fractional microwatt measurements. Can be calibrated from low frequency rf source. Stable dc output proportional to $\sqrt{P}$.
F.S. Power Range: 0.01 μW (—50dBm) to 10mW (+10dBm)
Power Sensitivity: 0.001 μW (—60dBm)
Basic Accuracy: ±0.5 dB
Drift: Less than 0.001 μW/hr
Overload Limit: Input of 300 mW (+25dBm) will not damage power detector.
Input Connector: Type N, Precision
Price: 41A, $600.00; rack-mounting Model 41-AR, $625.00

Power Detectors

	Model 4A	Model 4B
Frequency Range:	0.2 MHz to 7 GHz	0.2 MHz to 12.4 GHz
VSWR:	≤1.3 to 3 GHz ≤1.5 to 7 GHz	≤1.3 to 3 GHz ≤1.5 to 11 GHz ≤1.75 to 12.4 GHz
Price:	$160.00	$250.00

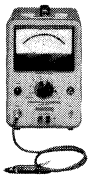
RF VOLTAGE INSTRUMENTATION

Model 91 DA



Sensitive RF Voltmeters

This series of RF Voltmeters provides reliable, reproducible voltage measurements from the low radio frequencies to the gigahertz region over a wide range of amplitudes. The versatility of these instruments plus their accuracy and convenience of operation have established them as standards of performance for the industry. The primary differences among the Models 91DA, 91H, 91C, 91K and 91L are indicated in the specification table below. All five models are characterized by low noise, excellent stability, high input impedance and low input capacitance.



Model 91 H

	Model 91DA	Model 91H	Model 91C	Model 91K	Model 91L
Full Scale Voltage Range:*	1 mV to 3 V	1 mV to 3 V	3 mV to 3 V	10 mV to 30 V	1 mV to 1 V
dB Range:	81 dB**	81 dB**	71 dB**	81 dBm	71 dBm
Voltage Sensitivity:	300 μV	100 μV	1 mV	1 mV	100 μV
Basic Accuracy:	2%	3%	5%	3%	3%
Frequency Range:	20 KHz to 1.2 GHz			0.5 MHz to 600 MHz	*with 91-23A:* 0.2 MHz to 2.5 GHz *with 91-12E:* 20 KHz to 1.2 GHz
Input Resistance: (f<10 MHz)	100 KΩ (at low level) to 1 MΩ (at high level)			>4 MΩ	same as 91H
VSWR:	≤1.2 at frequencies below 1.2 GHz			≤1.2 at 600 MHz	*with 91-23A:* ≤1.2 below 2.5 GHz *with 91-12E:* ≤1.2 below 1.2 GHz
Waveform Response:	True rms below 30 mV (3 V with Model 91-7C 100:1 Voltage Divider) graddally becoming peak-to-peak (calibrated in rms) at 3 V.			Same as 91H except all voltages are 10 times greater	Same as 91H
Price:	$700.00† $825.00††	$650.00† $775.00††	$550.00† $675.00††	$680.00 $805.00††	$ 975.00† $1,100.00††

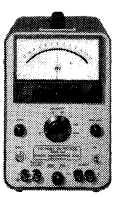
*to 300 V with Model 91-7C 100:1 Voltage Divider
**dBm scale available; order Model nos. with suffix S4
All instruments except 91C have DC Analog; Input capacitance of all probes is approx. 2.5 pF
†Includes 91-12E RF Probe, 91-13B RF Probe Tip and 91-8B 50 ohm Adapter (also 91-23A with 91L)
††With complete Accessory Kit, consisting of 91-12E RF Probe, 91-13B RF Probe Tip, 91-6C Unterminated BNC Adapter, 91-7C 100:1 Voltage Divider, 91-8B 50 ohm Adapter, 91-14A Tee Adapter, 91-15A 50 ohm Termination, all in 91-18A Accessory Storage Box.

DC VOLTAGE INSTRUMENTATION

Model 56A

Sensitive DC Null Detector

Electronic galvanometer providing exceptionally high sensitivity and high input impedance. Especially valuable as indicator in conjunction with dc bridges. Zero-center scale. 60 dB scale compression in Hunt Mode virtually eliminates range switching when measuring specimens of unknown value. Provision for remote mode switching. Amplifier output available at front panel terminals. Either floating or grounded operation.

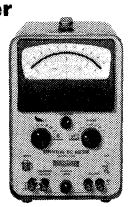


Voltage Sensitivity: 1 μV to 100 V end scale in 8 ranges
Current Sensitivity: 0.1 pA to 10 μA, es
Input Resistance: 10 MΩ, all ranges
OperatingModes: Hunt (60 dB meter scale compression); Calibrate (linear meter scale)
Amplifier Output Capability: ±1 mA into 1000 Ω
Amplifier Gain: —40 to +100 dB
Price: $495.00 (rack mounted Model 56AR, $520.00)

Model 95A

Sensitive DC Microvolt/Picoammeter

Unusually broad range of dc voltage and current measurements covered in 42 ranges. Front panel range and function switching uniquely simple and convenient. Zero-center meter. Fast response. Exceptionally stable amplifier output at front panel. Amplifier output gain and reference level adjustable without interaction with meter. Either floating or grounded operation for voltage; floating for current.



Voltage Range: 10 μV to 1000 V end scale; Accuracy, ±3%; sensitivity, 1 μV
Current Range: 1 pA to 1 A es; Accuracy, ±4%; sensitivity, 0.1 pA
Voltmeter Input Resistance: 10 MΩ, all ranges
Amplifier Output: ±1 V es across 1000 Ω
Amplifier Gain: 100,000 max.
Price: $600.00 (rack mounted Model 95A-R, $625.00)

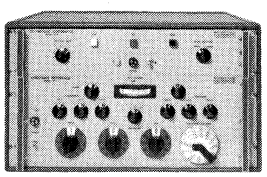
BOONTON ELECTRONICS CORPORATION
AUTOMATION PRODUCTS DIVISION

PRECISION INSTRUMENTATION FOR HIGH-SPEED GO/NO-GO AND COMPLEX LIMIT TESTING

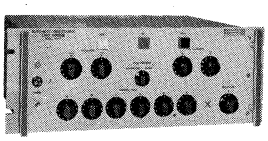
A wide selection of modular units for manufacturing test, process control, incoming inspection, sorting, batching and data logging.



Model 122D Automatic Resistance Limit Bridge

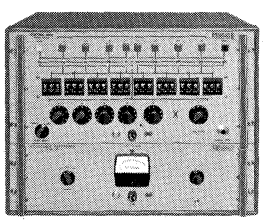
High-precision, 4-wire resistance measuring system which performs dual-limit go/no-go resistance tests at very high rates of speed for either production testing or manual operation. Nominal values programmable from 0.1 Ω to 100 M Ω. Plus and minus tolerances individually adjustable from 0 to ±29.9%. Excitation voltage adjustable from 0 to 100 V, dc. Test results indicated visually by front panel lamps and by continuity contacts. Negligible drift; no need for recalibration; unattended operation possible over extended periods. Test time, 50 milliseconds, minimum; cycle time adjustable from 2 to 20 tests/second.

Alternative versions available: Model 122D-S1 with nominal value programmable from 0.01 Ω to 10 M Ω, and tolerance limits programmable from 0% to ±9.99% in 0.01% steps. Model 122D-S2 with nominal value programmable from 0.01 Ω to 100 M Ω, and tolerance limits programmable from 0% to ±9.99% in 0.01% steps. Accuracy of all units ±0.05% from 10 Ω to 10 M Ω; ±0.15% above 10 M Ω and decreasing below 10 Ω to ±0.5% at 1.0 Ω.



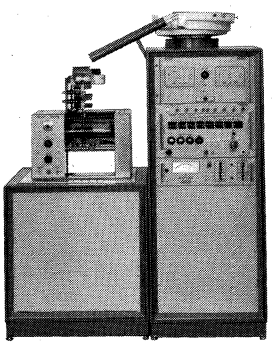
Model 122CD Automatic Resistance Limit Bridge

An integral, highly compact, low-cost rack-mounting automatic 4-wire resistance limit bridge which provides an economical approach to high-speed go/no-go testing. Nominal values selectable from 0.1 Ω to 10 M Ω. Tolerance limits individually programmable from 0 to ±11%. System accuracy, ±0.05% from 10 Ω to 1 M Ω; ±0.1% from 1 M Ω to 10 M Ω, and decreasing below 10 Ω to typically ±0.75% at 1.0 Ω. Excitation continuous dc 50 milliwatt max. dissipation in test resistor. Test speed 50 milliseconds per 2 limit classification. Test decisions indicated by front panel lamps and by mercury-wetted relay contacts. Negligible drift; unattended operation possible over extended periods. Operates in manual and triggered modes. Decisions stored until completion of next test. Size: 7" x 19" panel; 6¾" x 17" x 16" chassis. Primary power, 105-125 V, 50/60 Hz, 75 W.



Model 124C Resistance Sorting Bridge

An automatic, 8-limit, 4-wire resistance bridge for high speed sorting of resistors into categories or "zones". Provision for up to 10 category sorting. Decision outputs for Go_1 through Go_8 plus "High" and "Lo" are indicated by front panel lamps as well as being issued by continuity contacts. System accuracy ±0.05%. Nominal values programmable from 0.1 Ω to 10 M Ω with 5-digit resolution. Sorting limits individually adjustable from 0 to ±11.1% in 0.01% steps. Test speed, 25 ms per test (single limit); 150 ms per final classification, max. Excitation voltage across test resistor continuously adjustable from 0 to 100 V, dc and is monitored at front-panel meter. "Normalized" position of excitation control assures specified system accuracy and limits power dissipation in test resistor to 50 mW max. Operates in manual and triggered modes. Decisions stored until completion of next test. Size: 17" h x 19½" w x 23" d, overall with cabinet. Primary power, 105-125 V, 50/60 Hz, 300 W.



Typical system for 11 category classification of capacitors

Test Systems For Axial Leaded Components

The typical equipment combination illustrated shows a highspeed, axial leaded capacitor sorting system for 11-category classification of components into eight Accept Zones, Capacitance High and Low, plus DF Reject at a 1 KHz test frequency. Parts are sorted and binned at a rate of 6,000 to 8,000 pieces per hour.

Bulk components are introduced into an integral vibratory bowl, which presents a continuous flow of parts to the hopper of the Model 850B Component Feeder. A small reservoir of parts is maintained in tracks and then transported to the test head. The electrical tests are performed, and the tested components are collected in the proper bin, ready for stock or further processing.

Programming of the test equipment consists of merely setting a nominal capacitance value and per cent tolerance limits as boundaries for the desired Capacitance Accept Zones and the DF limit.

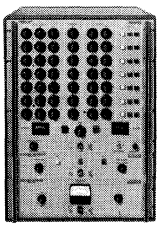
These test systems are designed for high-volume production applications, and a virtually unattended operation is practical. Typically, a half hour reserve of parts may be maintained in the bowl, thus accommodating multiple-station testing by a single operator. All test results are displayed visually in the form of colored lamps and are transmitted to the handling equipment in the form of contact closures.

The mechanical portion of these systems has been designed to make changeovers to accommodate various parts sizes as simple as possible. Track and transport wheel spacing adjustments and hopper exchange is accomplished in only a few minutes. The vibratory bowl accommodates most sizes with only minor baffle adjustments to reject components with badly bent leads.

The axial lead test systems are modular in construction and many combinations of modules are available to suit particular requirements. Systems are available for classification of resistors, capacitors, inductors and other axial leaded components such as diodes and varactors.

The handling system is compatible with the Models 122D, 122CD, 124C, 171K-C-M and 174K-C-M.

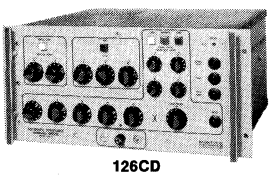
High-Speed Test Instruments & Systems



Model 125A Resistance Scanning Bridge

Primarily intended for final inspection of microcircuit resistor networks. Automatically tests up to 7 resistances on a substrate or other type of multi-resistor assembly in predetermined sequence, providing individual HI/LO/GO decisions plus an "Accept" or "Reject" decision for the total circuit at conclusion of test cycle. Number of resistances per scan selectable from 1 to 7; additional multiples of 7 can be added by slave units. Nominal resistance values are individually selectable from 0.1Ω to 10 MΩ with 3 digit resolution. Tolerances for each resistance are individually selectable from 0 to ±11.0% with 2 digit resolution. Basic system accuracy, ±0.05%. Results of individual resistance tests and final "Accept" or "Reject" decisions are indicated by panel lamps. Individual and final test results are also available as contact closures for actuation of associated materials handling equipment or for data logging. Running totals of "Accept" and "Reject" decisions are kept by front panel electro-mechanical counters. Test time is 50 mS per resistance; 350 mS per 7 resistor scan. Excitation voltage across resistor adjustable at front panel. "Normalized" position of this control guarantees specified accuracy and automatically adjusts voltage to limit power dissipation in test resistor to 50 mW. Programming can be converted from front panel selectors to static card reader by means of add-on Model 52-7A.

Models 126CD/126A/126B/126CD-S5 Resistance Trimming Bridges



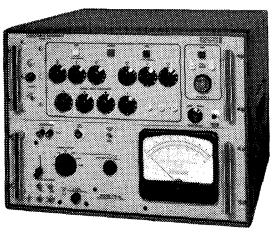
126CD

The Model 126CD is an integral rack mounting, 4 wire Resistance Limit Bridge primarily intended for controlling the trimming of thick film resistors. Upon receipt of a start test signal, the bridge first compares the untrimmed resistor to the "Minimum Start" value, and if this test is acceptable, the trimming command is issued. When the resistor reaches the "Stop" value, the trim command is removed, and after an adjustable delay to make certain that the adjustment process has stopped, a final, double limit inspection is performed with a measurement accuracy of ±0.05%. Each model 126CD is an integral measuring system with its own control logic, isolated power supply and input-output connectors, making the unit suitable for combination with other units for simultaneous trimming of multiple resistor networks. Final values are programmable to 10M ohms, and final value tolerance limits are independently adjustable from 0 to ±11.1%. The power dissipation in a resistor being trimmed is limited to a maximum of 25 mW.

The Model 126A is a programmable version of the Model 126CD and may be used to sequentially trim any number of resistors with complete flexibility. Programming of minimum start value, stop value, final value and tolerance limits is done by means of external B-C-D contact closures.

The Model 126B is a special purpose resistance trimming bridge which is intended for the simultaneous processing of resistors in closed loop configurations such as bridge circuits and delta networks. This bridge provides precisely regulated excitation levels of 0.5 to 1.0VDC.

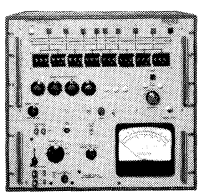
The Model 126CD-S5 is a modified model 126CD which incorporates means for use of external standard arm resistors. With this feature, a simple form of programming may be attained, "match" trimming may be accomplished and greater accuracy may be reached for very low values of resistors. An accessory programming device (Model 126-1A) is available for use with this bridge, which provides means for use of 10 plug-in external standards.



171M

Models 171K, 171C & 171M Capacitance-Inductance Test Systems

The Models 171K, 171C and 171M are a family of high-speed automatic test systems providing test frequencies of 1KHz, 100KHz and 1MHz. The systems consists of a universal, main frame, control unit plus one or more measurement modules. At 1KHz, go, high, low tests for capacitance plus an accept-reject test for dissipation factor are performed and at the 100KHz and 1MHz frequencies, HI/LO/GO inductance tests as well as the basic capacitance tests may be made. Test time is 50mS for the combined "C" and "D" decisions, which are presented in the forms of panel lamps and mercury-wetted relay contacts. Six full scales provide measurement ranges of 100pF to 10μF at 1KHz, 10pF to 10,000pF at 100KHz and 1pF to 1000pF at 1MHz. At 1KHz, dissipation factor may be checked over a range of 0.001 to 0.1 and at 100KHz and 1MHz, inductance may be tested over the respective ranges of 1μH to 10,000μH and 0.1μH to 1000μH. Several fixed excitation levels are available at 1KHz, and at 100KHz and 1MHz the excitation level is 15mV for C and less than 1mV for L. Interface accessory units are available to provide 0 to 10VDC analog outputs with sample and hold features for use with external DVMs, printers and recorders. A 3-terminal measurement permits remote tests without serious errors due to cable capacitance. Panel size is 12¼" x 19" for the Model 171K and 14" x 19" for the Models 171C or 171M.



174M

Models 174K, 174C, 174M Capacitance-Inductance Sorting Systems

The Models 174K, 174C and 174M are multi-category sorting versions of the Models 171K, 171C, 171M. In lieu of a simple High, Low, Go classification for capacitance or inductance, these systems, by virtue of a different control unit, provide (8) go categories plus high and low. The Measurement Modules for these systems are identical to their Model 171 counterparts. Maximum classification time is 125mS and all decision outputs are provided in panel lamps as well as mercury-wetted relay contacts. Panel size is 15¾" x 19" for the Model 174K and 17½" x 19" for either the Model 174C or 174M.

Test Systems For Unleaded Components

Test systems consist of a bowl fed component handler in combination with one of several pieces of high-speed automatic test equipment. A typical equipment combination illustrated shows a multilayer ceramic capacitor sorting system capable of classifying 0.050" x 0.080" pieces into HI/LO/GO capacitance categories and "D" Reject at a rate exceeding 10,000 parts per hour. Bulk components are introduced into an integral vibratory bowl which presents a continuous flow of oriented components to a test head. The electrical tests are performed subsequent to individual part pick-up and the tested components are selected in the proper bin ready for stock or further processing. Changeover of part sizes is accomplished by snap-in tooled components and the system is industrial engineered for virtually unattended operation. Many combinations of test equipment and mechanical feeder are available to meet specific requirements. Standard systems are available incorporating the models 171K, 171C, 171M, 174K, 174C, 174M, capacitance-inductance testing equipment plus several models of resistance testing equipment such as the Model 124C Resistance Sorting Bridge and Model 122D Resistance Limit Bridge. Complete details are available upon request.

0/5	*0.004*	14.30	13.60	14.30	15.75	19.20	30.80

Above prices for 0/5 amp. range also apply to standard ranges of 0/10, 0/15, 0/25, 0/30*, 0/50* amps on all models (self-contained shunts). No. 668 uses external shunt over 5 amps. See Shunt Table below.

D.C. VOLTMETERS

0/1	*1000Ω/V.*	14.80	14.20	14.80	16.20	19.20	30.80

Above prices also apply to standard ranges of 0/3, 0/5, 0/10, 0/15, 0/25, 0/30*, 0/50*, 0/100, 0/150*, 0/300* volts on all models.

0/500	*2000Ω/V.*	—	14.80	15.60	17.05	20.10	31.65

Above prices also apply to standard ranges at 0/600, 0/750 volts on all models except #668.

NOTE:

If "in-between" ranges are required, add $3.70 to price of next higher range listed. If "zero-center" ranges are required, add $5.80 to price of that range. For in-between ranges on moving-coil type Voltmeter 150 volts and up, add $5.80 to next higher range.

Please specify type of case on order from chart above.

All prices are net — subject to change or withdrawal without notice.

(1) Models marked also available in surface mounting metal case. Unless specified, all meters are calibrated on non-magnetic panels. If steel panels are used, give thickness of steel and size of panel hole (No extra charge).

(2) Bezels for behind panel mounting of models 2015, 2025, 2035, 2045 add /B to model no., $30.80 extra.

* These ranges carried IN STOCK . . . Models #582, 597, and 683 only (For non-magnetic panels).

HOYT ELECTRICAL INSTRUMENT WORKS, INC.
BURTON-ROGERS COMPANY SALES DIVISION

Hoyt SINCE 1904

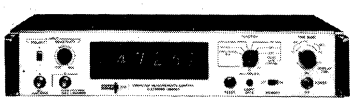
CMC COUNTERS

ALL-SILICON SOLID-STATE SERIES 600

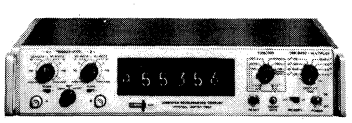
The 600 Series features reliable, all-silicon, solid-state instruments that offer direct frequency measurement to 20 MHz, with prescaling to 225 MHz, with heterodyning to 3.3 GHz, plus the measurement of period, multiple period, average, frequency ratio, time interval, and totalizing, with both preset functions and portability available — all at a minimum cost.

CMC's 600 series are the first counters built with all silicon semiconductors for higher reliability, superior temperature stability. Maximum frequency ranges of 2.5,15, 20 and 225 MHz. Simplified design techniques and advanced "Mother Board" circuitry reduce components by 10 per cent over competitive models. Temperature operation —20 to +65°C standard, —30 to +75°C available. All silicon memory (display storage), a standard feature, is not subject to slow response and upper temperature limitations of photoconductor memory circuits.



MODEL 608 $740.00

Measures frequency and period, determines frequency ratio and totalizes. Frequency, period and frequency ratio measurement ranges: 2 Hz to 15 MHz. Period average and multiple ratio: 1, 10 and 100. In-line long-life biquinary display. Five decades are standard, a sixth is optional.

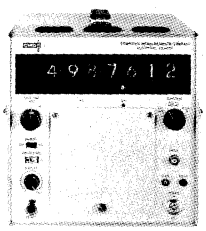


MODEL 609 $1195.00

Measures frequency, period, multiple period average, frequency ratio, time interval, and totalizes. Frequency measurement range: 0 to 5 MHz. Period: 0 to 1 MHz. Multiple period average measurement from 0 to 20 MHz, from 10^0 to 10^7 periods in decade steps. 1 MHz crystal time base; stability ±2 parts in 10^7 per month. Six decade in-line biquinary display, automatically positioned decimal point.

MODEL 614 $1300.00

Preset Multi-function Counter extends applications to normalizing and multiplication by any preselected constant. Gate time presets to any interval from 10 μsec to 100 seconds. Gate time presets by remote selection. Direct displays as mph, rpm, ms, per N periods, etc. 614 also measures frequency and period and totalizes. Frequency range: 2 Hz to 2.5 MHz. Period and frequency ratio ranges: 2 Hz to 500 kHz. Preset count circuitry operates dependably at frequencies through 300 kHz-up to three times as fast as other variable gate time counters. 100 kHz crystal time base; stability ± 2 parts in 10^6 per week. Standard five decade in-line biquinary display (sixth optional) with automaticaily positioned decimal point.



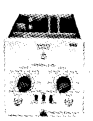
MODEL 616 $1975.00

Model 616 provides low-cost direct frequency measurement from 10 Hz to 225 MHz by means of a unique prescaler built into the instrument. It can be rack-mounted. All-silicon semiconductor circuitry assures dependable operation over wide temperature ranges. 1 MHz crystal time base; stability ± 2 parts in 10^7 per month. Seven decade in-line display is standard — eighth decade optional. Standard automatic decimal and display storage.

MODEL 631 $775.00

Model 631, turret-type, positive switching 100 MHz to 1.3 GHz Heterodyne Converter.

MODEL 633 $300.00



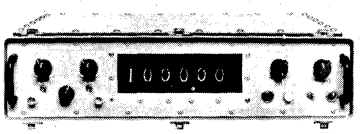
Model 633, 1 μsec resolution Time Interval Plug-in with range from 1 μsec to 10 sec.

MODEL 635 $825.00

Model 635, continuous tuning, 200 MHz to 3.3 GHz Heterodyne Converter.

SOLID-STATE MILITARY COUNTERS

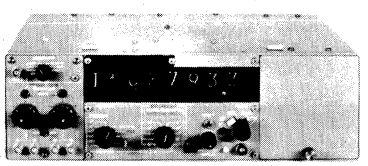
5-MHz COUNTER



MODEL 687 $1875.00

Model 687 is a 5 MHz fully militarized counter that measures frequency, period, multiple period average, frequency ratio, time interval and totalizes. Meets MIL-E-16400 including temperature, humidity and vibration specs.

100-MHz COUNTER



MODEL 880 $3750.00

Model 880 is the first solid-state counter fully militarized to meet Mil Specs. It measures frequency, period, multiple period average, frequency ratio, frequency ratio average, time interval with internal and external clock, and totalizes; scales input frequency in decade steps; provides standard frequency outputs. If you want the safety of a counter providing full Mil Specs reliability at a price surprisingly close to a commercial counter, then check these specs: 0 to 100 MHz frequency range; oscillator stability of 1 part in 10^9; meets or exceeds MIL-E-16400, including applicable temperature, humidity, vibration, shock, and RFI specs; built-in time interval measurement. Eight decade in-line display. Militarized plug-ins available (see below).

MODEL 884
555 MHz
$530.00

MODEL 885
3.2 GHz
$825.00

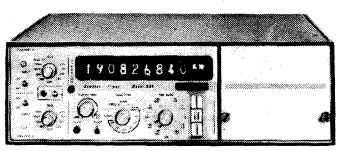
PLUG-INS FOR MILITARIZED 880

Model 884: Heterodyne Converter, turret-type, positive switching, 100 MHz to 555 MHz acceptance tested to MIL-E-16400, MIL-S-901, MIL-I-16910. Model 885: Heterodyne Converter, continuous tuning, 200 MHz to 3.2 GHz.

CMC COUNTERS

INTEGRATED-CIRCUIT 200-MHZ SERIES 900

The Model 901 Universal Counter-Timer is the first to be introduced in CMC's completely new series of integrated-circuit instruments. The Model 901 is also the industry's first, true, 200-MHz, universal counter-timer capable of achieving its range without prescaling, heterodyning, or using plug-ins...while also offering as part of its main-frame capability the measurement of frequency, period, multiple period average, time interval, ratio, multiple ratio averaging, totalizing, scaling, and the measurement of time interval from an external standard...plus a heterodyning capability for gigahertz operation.



MODEL 901 $2475

Gate times are 1 μsec to 100 seconds in decade steps. A special feature of the display control is a fast reset of 10 μsec to accommodate those requiring maximum data gathering abilities.

Input sensitivity of the 901 is 10mV for both A and B amplifiers.

The readout has nine decades with automatically positioned decimal point, large readout tube with units symbols, and an overflow lamp.

Printer output in the form of BCD in the 1-2-4-8 code is a standard feature.

Remote programming of the entire front panel controls, except trigger levels and attenuators, is an optional feature.

Time Interval mode offers resolution to 10 nanoseconds. Gate output useful in determination of the amplifier trigger points in the Time Interval mode, is a standard feature of the 901.

Frequency Extender Plug-ins

MODEL 931 $825

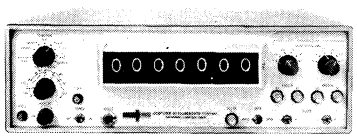
Turret type, positive switching 100 MHz to 1.3 GHz Heterodyne Converter. Sensitivity is 50 mV across its entire range.

MODEL 935 $875

Continuous tuning 100 MHz to 3.3 GHz Heterodyne Converter. Sensitivity is 50 mV across its entire range.

ECONOMICAL SERIES 700

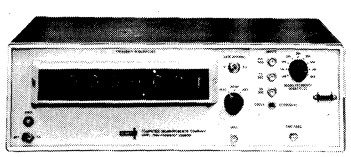
The CMC 700 Series combines versatility with operational simplicity and features economical, solid-state, electronic counters capable of direct readings to 100 MHz and heterodyning to 500 MHz...includes a highly accurate preset counter-controller and a counter/plug-in combination that can't be matched for performance and price.



MODEL 727 $1725.00

UNIVERSAL COUNTER-TIMERS

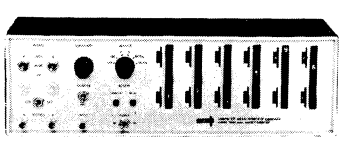
Model 727 directly measures frequency from 0 Hz to 50 MHz, single period from 1 μsec to 10^8 seconds and time interval from 0.3 μsec to 10^8 sec, multiple period multipliers of 1 to 10^7 in decade steps. Oscillator stability ±3 parts in 10^7 per month. Seven decade in-line readout. Memory is standard.



MODEL 738/735 $1650.00

100-MHz DIRECT READING FREQUENCY METER WITH 500-MHz PLUG-IN

Frequency from 10 Hz to 100 MHz measured directly. Seven decade readout. Extends to 500 MHz in 50-MHz steps with Model 735 turret-type, positive-switching, heterodyne converter provided free with the purchase of the basic instrument.

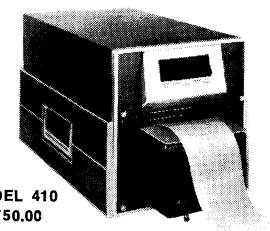


MODEL 786 $1255.00

SOLID-STATE DUAL PRESET COUNTER-CONTROLLER

Absolute accuracy, 100 mV sensitivity, 100 kHz recycling rate. Six decades with count capacity to 999,999. "Count" and "Reset" contact closures at rear panel for remote operation.

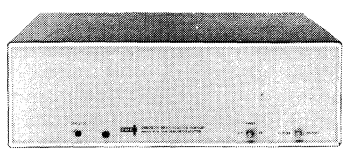
10-Line/Second DIGITAL PRINTER



MODEL 410 $1750.00

HIGH SPEED, NEW LARGE DIGITS, SOLID-STATE DRIVE AND LOGIC

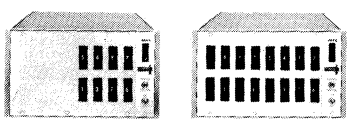
Fastest, easiest to read, not a modified adding machine or calculator. 35 millisecond data acquisition. Prints 10 columns at 10 lines per second. Electrically positioned decimal without loss of digit. Left zero elimination. New simple electromagnetic design eliminates commutators and moving contacts. Column suppression on command. Fan-fold or roll paper. Half-rack size. Up-front pushbutton controls. Error identifying seven segment printed characters. Eight columns are standard. Additional or lesser numbers of columns optional.



MODEL 403 $1375.00

SOLID-STATE TAPE PERFORATOR ADAPTER

Model 403 couples counters with 1-2-4-8 BCD output to the Tally Series 420 Paper Tape Perforator. Compatible with all CMC solid-state counters having standard digital printer output plug, and modifiable to accept other manufacturer's equipment. Accessory output allows simultaneous operation of digital printer in parallel with Tally 420. Up to 6 decades provided (8 optional). Accepts 60 characters per second. Punch command —4V to —12V pulse, 50 μsec wide (min.), into 10,000 ohms.



MODEL 404 $950.00 **$1485.00**

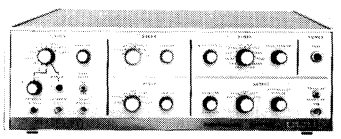
SOLID-STATE GO, NO-GO COMPARATOR

Model 404 compares a binary coded decimal number, obtained from printer output receptacle of a counter with two selected preset numbers in the comparator for go, no-go operation. Provides visual display in "HI", "LO", and "IN" limit lights as well as contact closure outputs for control purposes. Half-rack size permits dual mounting. Weighs only 17 lbs. and uses just 45 watts power. Four decade preset standard, 8 optional. Remote presetting of limits optional

PULSE GENERATORS, TIME DELAY GENERATORS, AND TARGET SIMULATORS

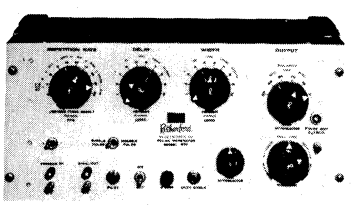
PULSE GENERATORS

CMC's famous line of pulse generators includes both portable and laboratory instruments offering repetition rates from 20 Hz to 50 MHz... rise-and-fall rates as fast as 5 nsec at 10-volt amplitude...and a uniform high level of accuracy and performance.



MODEL 220 $1225.00

NEW 50 MHz PULSE GENERATOR
This new all silicon, solid-state pulse generator adds 50 MHz capability to the famous Rutherford instrument line. Other specs include: 50 MHz repetition rate; delay from less than 10 nanosec to 10 millisec; width from 10 nanosec to 10 millisec; baseline offset variable from −5 volts to +5 volts; ±10 volt amplitude polarity switched; rise and fall time from 5 nanosec to 1 millisec.

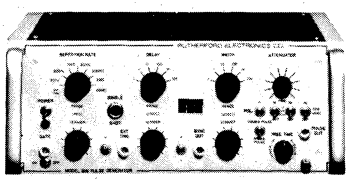


MODEL B-7B $695.00
MODEL B-7D $695.00
MODEL B-7F $825.00

BASIC PULSE GENERATOR
B-7B is a general purpose instrument with repetition rate to 2 MHz and 50V into 50 ohms. Variable rise/fall time control.

B-7D has all specifications of B-7B and simultaneous positive and negative output pulses; separate and independent rise/fall time controls.

B-7F has all B-7B features plus: 2 Hz repetition rate; separate rise/fall time controls; and double pulse output.



MODEL B-14 $340.00
MODEL B-15 $390.00
MODEL B-16 $595.00

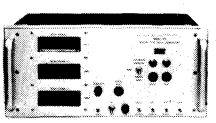
PORTABLE PULSE GENERATORS
Model B-14 is a low cost, portable unit with repetition rate of 20 Hz to 2 MHz. Delay is 0 to 10 msec. Amplitude is 15V into 1k, 8V. into 50 ohms. Pulse width of 60 nsec to 10 msec. Rise/fall time is less than 10 nsec fixed.

B-15 has same rise/fall time, delay, and pulse width. Also offers a repetition rate of 5 Hz to 5 MHz.

B-16 offers repetition rate of 20 Hz to 20 MHz. Variable rise/fall times of less than 5 nsec to greater than 200 nsec. Pulse width 15 nsec to 10 msec. Amplitude 10V. Single or pulse pair operation.

Rack mount available for B-14, -15, -16.

TIME DELAY GENERATORS



MODEL A-10 $2215.00
MODEL A-11 $1070.00
MODEL A-12 $3120.00

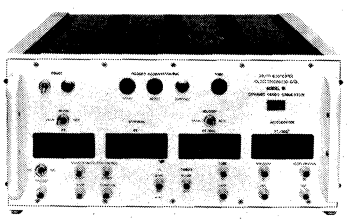
SOLID-STATE DELAY GENERATORS
A-10 has time delays 0 to 1 sec in 100 nsec increments. Accuracy 0.001% of delay. Jitter less than 1 nsec. Amplitude 10V. Rise time 15 nsec.

A-11 has same features as A-10 with exception of amplitude, 6V and rise time 10 nsec.

A-12 was designed for fail-safe operation in explosives testing or other tests where premature triggering might destroy information. Amplitude, 70V; rise time, 100 nsec.

DYNAMIC TARGET SIMULATOR

The Model 301 is a truly unique off-the-shelf instrument that aids in the design, evaluation, checking, and calibration of tracking systems. It does this by producing artificial targets which can be easily and accurately set to various ranges and which can be dynamically moved at various velocities and/or accelerations. It features all solid-state digital logic...low jitter, high accuracy, high stability...1-foot target resolution...and is available for portability or rack mounting.



MODEL 301 $6330.00

DYNAMIC TARGET SIMULATOR
Model 301 is a moving target simulator. It is applicable to tracking radars, weapons control systems, or sonar for calibration, production checkout, or operator training.

The standard Model 301 has a target Range from 0 to 1,000,000 feet in one foot increments with 0.1% of setting accuracy. It has a target Velocity from 0.0 to 100,000.0 feet/second in 0.1 foot/second increments with 0.005% of setting accuracy. Target Acceleration can be set from 0.00 to 10,000.00 feet/second/second in 0.01 foot/second/second increments with 0.005% of setting accuracy.

Special versions of the Digital Target Simulator are available with increased accuracies. 301's have also been built with remote-programming capabilities and ruggedized to meet MIL specifications.

Your local CMC representative will demonstrate these products on your premises at your convenience. Call him or call CMC direct.

CABLEMASTER

A compact, versatile unit for rapid and efficient testing of electrical cable assemblies, harnesses, connectors, and bulk cable

■ Ease of Operation

Simplified operating procedures permit the Model 400-C to be operated by non-technical personnel. Controls are conveniently located and are arranged to provide efficient operation. Test results are displayed on a digital readout to reduce errors. When a fault is located in a cable being tested, the test sequence automatically stops and an alarm is sounded to alert the operator. Testing can be continued at the operator's discretion.

■ Mobile Carrier for Increased Versatility

The Model 400-C is designed to provide maximum convenience and versatility for in-plant or field applications. It is equipped with a mobile carrier to permit easy movement to any location. The Unit can also be removed from the carrier if desired.

■ Permanent Test Record (Optional)

The 400-C is available with an optional printer to provide a complete and permanent record of each test. The type of test, circuit tested, and test results are recorded on a continuous paper tape. Failures are printed in red for easy identification. With the printer in operation the Cablemaster will not stop when a fault is located, but will record the fault and proceed with the test.

■ Insulation Resistance Range From 1 to 5000 Megohms

The Model 400-C automatically checks each conductor against all others to determine insulation resistance under any impressed voltage between 20 and 1000 vdc. Use of plug-in resistance standards and environmental sealing of critical components eliminates acceptance level drift caused by humidity or temperature changes within normal operating conditions. Rapid change from one acceptance level to another is easily accomplished.

■ Continuity Resistance Range from 0.5 to 59 Ohms — 0.5 to 3 Amperes

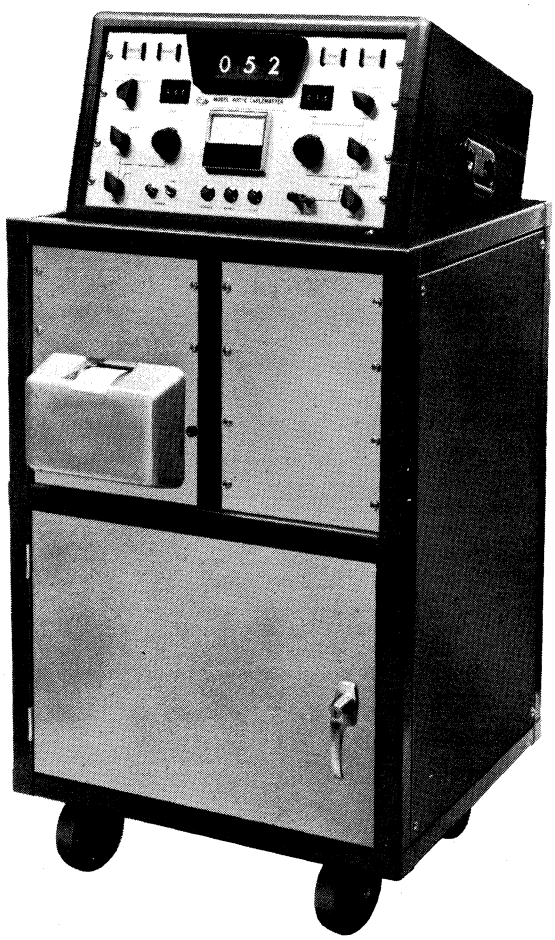
Termination-to-termination continuity on a maximum of 200 simple or complex circuits is quickly accomplished in one test setup. Resistance test level is selected with convenient digital switches.

■ Simplified Testing Capability for Multiple Conductors

A unique programming circuit permits testing of multiple and simple circuits mixed in any sequence. No special programming is required and setup time is greatly reduced.

■ Dielectric Strength (Hipot) Range From 0 to 3000 Volts AC or DC

The Model 400-C automatically checks each conductor against all others for shorts and leakage. Any test voltage up to 3000 vac or vdc can be selected by the operator. The voltage range is continuously variable and is monitored on the precision meter provided on the front panel. Hipot dwell time can be set for any period up to three minutes.



Model 400-C shown with optional console

SPECIFICATIONS

Test Capacity:
- Insulation Resistance: 400 circuits
- Hipot: 400 circuits
- Continuity: 200 circuits

Test Ranges:
- Insulation Resistance: 1 to 5000 megohms
- Hipot: 0 to 3000 volts ac or dc
- Continuity: Resistance 0.5 to 59 ohms; Current 0.5 to 3 amperes

Dwell Time: 0.5 to 180 seconds

Max. Test Rate: 120 tests per minute

Input Power: 110 to 125 volts ac, 50 - 60 cps

Weight: 130 pounds

Dimensions (cabinet): 21 x 13½ x 18½ inches

Information on special models and multipliers available on request.

Other models include new portable units and the Model 400-S, a new concept in shipboard cable checkout.

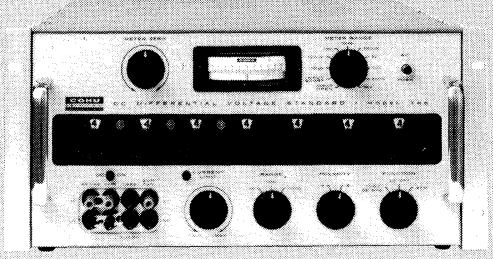
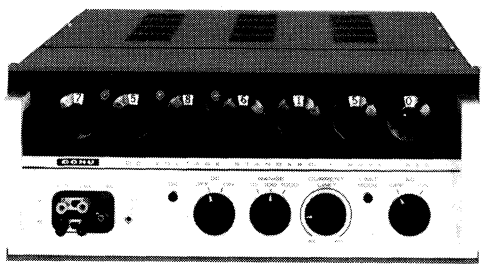
COHU

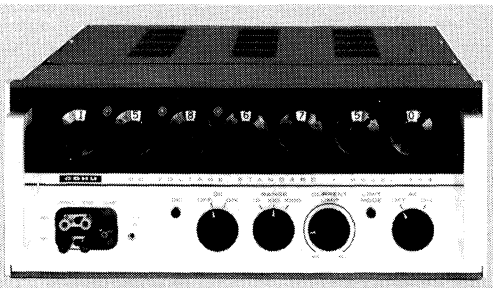
dc voltage standards



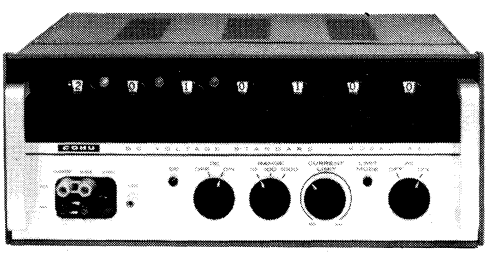
MODEL 365 - DIFFERENTIAL DC VOLTAGE STANDARD - A multifunctional instrument which can be used as: a null indicating, potentiometric, dc voltage measuring instrument (differential voltmeter); a direct reading transistorized dc voltmeter (TVM); or a precision dc voltage source (dc voltage standard). The differential voltmeter and dc voltage standard modes provide 0.001% accuracy and voltages from zero to over 1100 volts with seven-place precision.



MODEL 355 - 10 PPM DC VOLTAGE STANDARD - Provides accuracy to within 0.001% (including all stability variations) for 90 days. Three decade ranges supply voltages from zero to over 1100 volts with seven-place precision and an output current to 50 milliamperes at any voltage setting. Complete isolation and excellent guard shielding permit full output voltage with either positive or negative terminal grounded.



MODEL 353 - 20 PPM DC VOLTAGE STANDARD - Provides accuracy to within 0.002% (including all stability variations) for 6 months. Three decade ranges supply voltages from zero to over 1200 volts with seven-place precision and an output current to 50 milliamperes at any voltage setting. Noise and hum is less than 15 μV rms on the 10V range. Features include: overcurrent protection, overvoltage protection and all solid state active circuitry.



MODEL 351 - 30 PPM DC VOLTAGE STANDARD - A completely solid-state dc voltage standard that can be operated continuously for 12 months to an accuracy within 0.003% (including all stability variations). Output voltage, 0 to $\pm$ 1111.1110V dc, with a resolution as small as 1 μV. Output current to 50 mA at any voltage setting. A rackmounting kit is included for easy and fast conversion from a bench model to a rackmount model. FSN4931-913-3062

MODEL 324AN - DIFFERENTIAL VOLTAGE CALIBRATOR - Combining a passive null indicator with the Model 324A DC Voltage Calibrator creates a system capable of measuring unknown voltages by differential comparisons. Accuracy is to within 0.01%, 100 ppm, over a voltage range of 0 to $\pm$1111.110V dc. Output current to 25mA at any voltage setting, as a dc calibrator. As a null indicator, meter sensitivity at null point is 300 μV/mm.

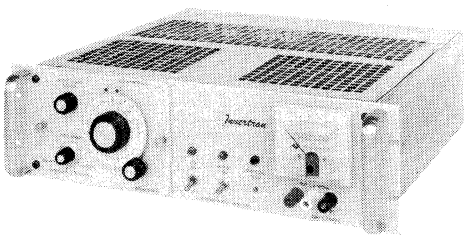
the most respected name in AC power

Invertron



INVERTRONS are versatile AC power sources which supply both stable output voltage and output frequency independent of varying input conditions. These units may be used to regulate for varying lines and loads as well as to provide low-distortion multiphase power.

Precision AC Power Supplies
AC Power Amplifiers
Frequency Converters

- Power output from 40 VA to 45,000 VA.
- Fixed and variable plug-in oscillators from 45 Hz to 5 KHz.
- Frequency accuracies of 1%, 0.5%, 0.1% and 0.001%.
- Available in 1ϕ, 2ϕ, and 3ϕ models.
- Optional input voltages from 117V 1ϕ to 460V 3ϕ.
- Rack or cabinet-type mounting.

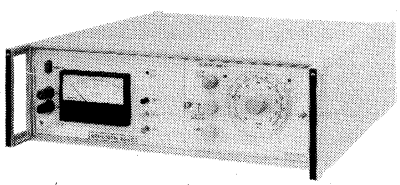
	Four Band: 45-150 Hz; 150-500 Hz; 450-1500 Hz; 1500-5000 Hz	±1%, ±0.5%



FA201 Power Amplifier

The FA201 is a silicon solid-state power amplifier with 200 VA power capability. This broad-band unit provides full power output from 45 to 20,000 Hz. A wide choice of companion oscillators creates a precise INVERTRON system for any specialized requirement. Units may be combined to provide 2ϕ and 3ϕ operation with 400 VA and 600 VA ratings. The output is electronically protected against short circuits.

QA/QOA Quarter-Rack Power Amplifiers

The quarter-rack QA/QOA is a silicon solid-state 40 VA linear power amplifier available with both fixed and variable-frequency quarter-rack oscillators. Three amplifiers and one oscillator may be combined to provide a versatile 3ϕ power source with 120 VA power capability. Units feature Turn-On Transient Suppression and Amplitude-Disturbance Limiting. Write for detailed specifications.

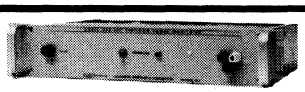
MODEL 1060 DYNAMIC AC LINE CORRECTOR

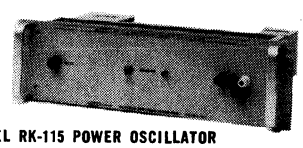
MODEL 1060 DYNAMIC AC LINE CORRECTOR

- Attenuates 10 microsecond AC line transients by 34DB.
- Super-regulation line and load 0.025%.
- Harmonic line distortion reduced 50:1.
- Impulse settling time less than 50 microseconds.
- 100 DB common-mode isolation.
- Peak amplitude instability less than 0.01%.

The **elin** Dynamic AC line Corrector provides power purity and stability by eliminating both line and load high-speed transients and by regulating for varying line and load conditions. All-silicon solid-state. Weighs only 40 pounds. Mounts in 5¼" in 19" rack. Units available in 1 KVA and 3 KVA models for 50, 60 and 400 Hz applications.



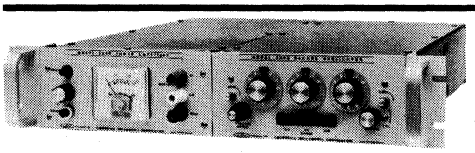
MODEL RK2-102 POWER OSCILLATOR



MODEL RK-115 POWER OSCILLATOR

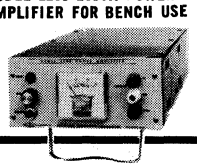
RK SERIES POWER OSCILLATORS

2, 6, 15, 25, 35 and 50 VA outputs. Single voltage and frequency output 10-300 volts, 200-5000 Hz. Line regulation: 0.1%; Load regulation: adjustable to zero with 0.05% resolution. Frequency stability: 0.1%. Total harmonic distortion to 0.1%. Other versions available with multiple output voltages and 2- and 3-phase outputs.



MODEL 2200 POWER AMPLIFIER AND MODEL 2000 DIGITAL OSCILLATOR FOR 19" RACK MOUNT

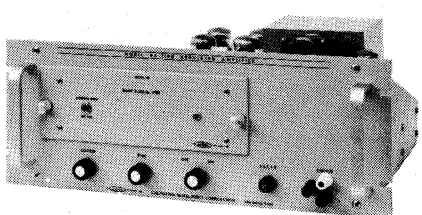
MODEL 2200 200VA POWER AMPLIFIER FOR BENCH USE



MODEL 2000 DIGITAL OSCILLATOR FOR BENCH USE

MODELS 2200 AND 2500 POWER AMPLIFIERS/FREQUENCY CHANGERS

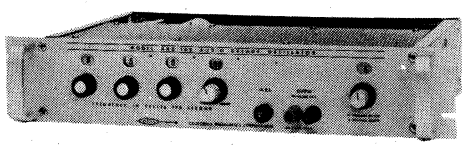
Model 2200 (200VA) and Model 2500 (500 VA) all-silicon solid-state AC Power Amplifiers are the most compact units available. Full power from 105 to 130 volts output. Regulation: 0.02% per volt. Low distortion. Overload, thermal and short-circuit protection. Broad selection of companion plug-in oscillators. 2- and 3-phase combinations ideal for motor drive and many other applications.



MODEL RA-1100 POWER AMPLIFIER

AC POWER AMPLIFIERS/FREQUENCY CHANGERS

Model RA 1100: 100VA output. Frequency response 45-5000 Hz. Front-panel adjustment of output voltage from 0-130 volts. Adds less than 0.25% distortion. Regulation: 0.1%. Versatile selection of plug-in oscillator modules. Also Model 1160A (160VA) and Model 1500 (500VA) AC Power Amplifiers.



MODEL ADO-102 DIGITAL OSCILLATOR

MODEL ADO-102 DIGITAL OSCILLATOR

From 10 Hz to 100 kHz, with direct digital selection and reading of frequency to 1%. Front-panel adjustment of output voltage from 0 to 50 volts. Output power: 2 VA. Frequency stability: 0.5%. Total harmonic distortion: less than 0.1%. Hum, noise and jitter less than —66 db of full output voltage. Remotely programmable versions also available.

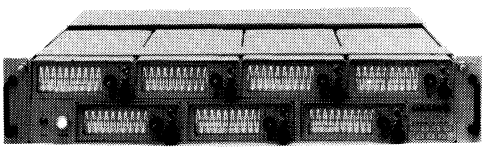
7000 SERIES MONITOR OSCILLOSCOPES

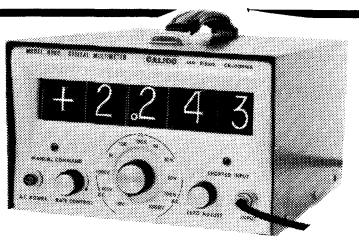
For analog tape recorders or any multichannel monitoring application. Accuracies and linearities equal to laboratory scopes. From one to seven independent, interchangeable plug-in oscilloscope modules in 3½" x 19" Rack Adapter/Power Supply. Bandwidth: DC to 5 mHz within one db. High-intensity 1 x 3" rectangular CRT for large viewing area. Models available with external triggering . . . identical amplifiers for phase comparison . . . common sweeps (slaved to master) . . . medical/biophysical model . . . and 10 mHz version for video monitoring.



MODEL 7000
COMPLETE WITH POWER SUPPLY
AND RACK SLIDES

8000 SERIES DIGITAL MULTIMETERS

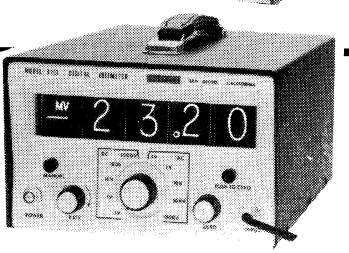
Complete multimeter capability at an economical price. All-electronic, all solid-state. DC volts, AC volts, ohms . . . in one unit. Readout: Large, illuminated 4-digit, with function, overload, range and automatic polarity indication. Resolution: 0.01%. Accuracies: DC—0.05%; AC to 100 kHz—1%; Ohms—0.1%. Display time: 1 sec. to 10 sec. with manual override. Models available with DC volts only . . . AC-DC volts only . . . Ohms only . . . printout capability . . . rack mounting . . . and OEM versions.



MODEL 8000
DIGITAL
MULTIMETER

8100 SERIES LOW-LEVEL DIGITAL MULTIMETERS

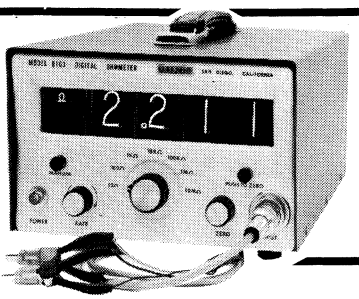
Low-level digital voltmeters, ohmmeters and multimeters. All solid-state, all-electronic. Readout: Large, illuminated 4-digit with function, overload, range and automatic polarity indication. Resolution: to 10 microvolts, 1 milliohm. Accuracies: DC—0.05%; AC—1%; Ohms—0.1%. Models available with DC volts only . . . ohms only . . . printout capability . . . rack mounting . . . and OEM versions.



MODEL 8101
DIGITAL
VOLTMETER

8103 LOW-LEVEL DIGITAL OHMMETERS

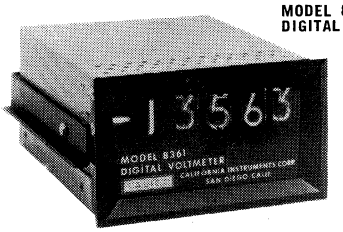
Wide-range, low-level digital ohmmeter 0.001 to 10,000,000 ohms in seven ranges. One milliohm resolution. 0.1% accuracy. Full four-digit illuminated readout with 10% over-range. All-electronic, all solid-state. Includes four-wire input cable with Kelvin clips. Also Model 8113 with only 100 micro-ampere source current, and Model 8103-421 with 100 micro-ohm resolution — 1 ohm full scale through 1 megohm.



MODEL 8103
DIGITAL
OHMMETER

8361/8461 SERIES DIGITAL PANEL METER

The Model 8361 provides a five-digit display including 20% over-range. It is only 2½" H x 3⅝" W x 5" D. Features are: BCD 1-2-4-8 output code, 5 readings per second, programmable decimal, read and hold, non-blinking NIXIE® display, active filter option, 10 megohm input impedance, 100 DB of CMR and automatic polarity. The companion Model 8461 features a four-digit display, including 20% overrange. For OEM applications, cost savings can be realized by omitting metal case and bezel, overrange indication and/or polarity indication.



MODEL 8361/8461
DIGITAL PANEL METER

8300 SERIES DIGITAL MULTIMETERS

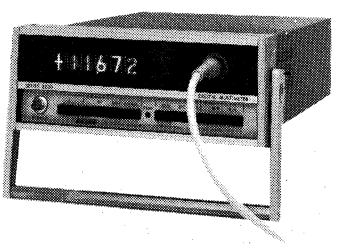
■ SEVEN FUNCTIONS

- Frequency counter
- DC & AC volts
- DC & AC current
- Ohms
- Ratio

■ FEATURES

- .01% Accuracy
- .01% Resolution
- Guarded input high CMR
- Push button range and function
- Plug-in options

New NIXIE®-readout Series 8300 Digital Multimeters feature compact size, four full digits plus overrange into the fifth digit, readout storage printout, automatic polarity indication, 10 microvolt sensitivity, and damage-proof ohmmeter. The plug-in options allow expansion from a single-range DC voltmeter to a complete multimeter, including printout.



MODEL 8300
DIGITAL MULTIMETERS

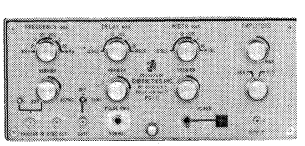
Notes:
1. Effective PRF in double pulse mode
2. Max. Range into 50-ohm loads
3. Separate or combined (bipolar) channels; same polarity on Special Order
4. Variable linearly — 100:1 dynamic range. Separate control of Rise and Fall Times
5. Independent control Pulse 1 / Pulse 2 (double pulse mode)
6. Fully programmable

ADVANCED PULSE GENERATORS



Chronetics' 3-I Pulse Generators represent the most versatile and wide-range instruments in the pulse generator field. Eleven standard models, all solid state, meet most user requirements.

Repetition rates from 0.1 Hz to 100 MHz, output amplitudes from 0 to ±100 volts or ±2A, rise/fall-times of less than 2 ns, wide dynamic ranges, high duty cycles, bipolar outputs, etc. are all available on standard instruments.

3-I Pulse Generators are exceptionally flexible. Most provide single or double pulses of either polarity, single-shot, pulse bursts. Bipolar outputs and current/voltage modes are available. Usually prf, amplitude, risetime and falltime, width, delay and DC-offset are independently and continuously variable.

Price/performance engineering makes 3-I Pulse Generators best buys in the pulser field. Prices begin as low as $375 for the compact, rugged and high-performing PG-11. Sales/Service is on a world-wide basis with more than 45 field offices to respond promptly to any need.

Compare 3-I performance.

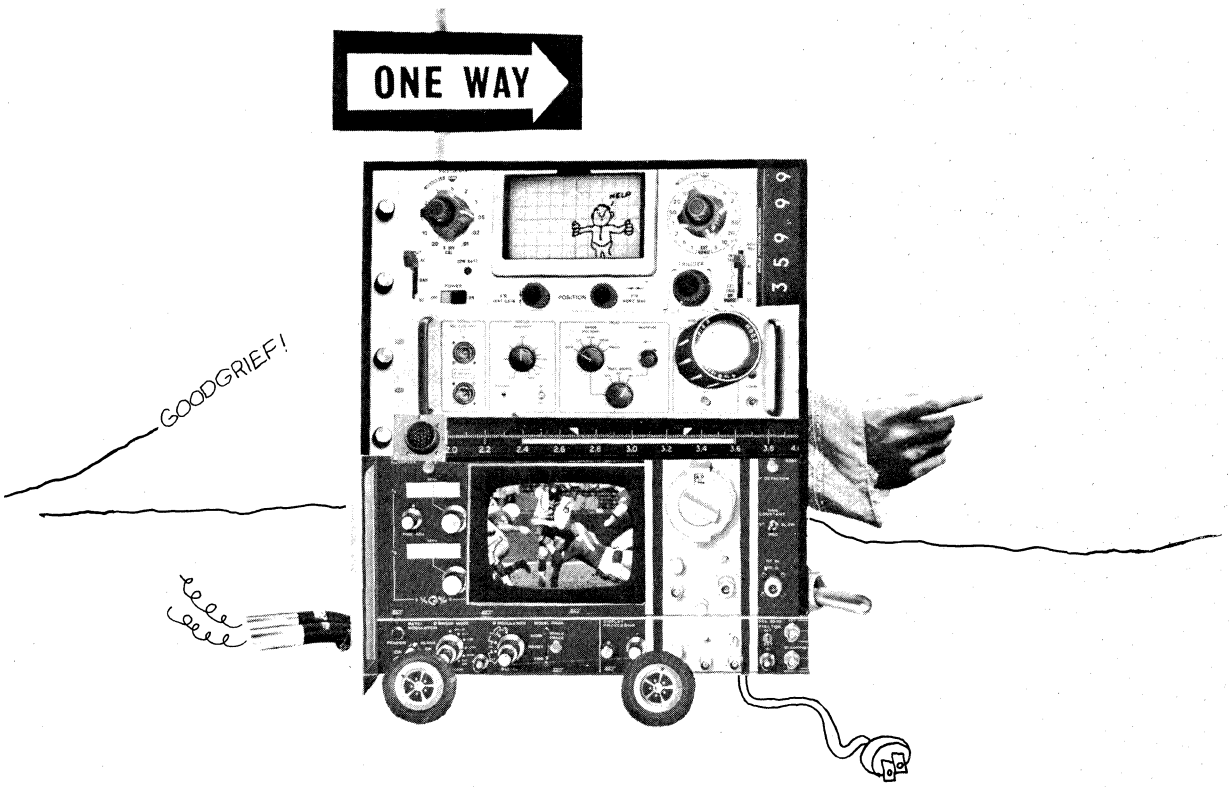
Introducing the Continental Oscillodigimicrowavascope!

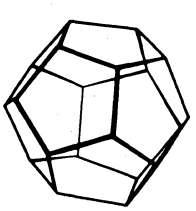


The Continental Oscillodigimicrowavascope is a little incredible. It's our Instrurental. The most sophisticated instrument of all. It can do anything *any* electronic instrument on earth today can do. It will do what instruments *yet* to be invented will do, as soon as they're invented!

But you can't buy a Continental Instrurental. Because this totally capable instrument is really a bold, dynamic Instrument Rental Plan originated by Continental Leasing Company, the largest, most reliable instrument rental organization in the Western World!

The Continental Instrurental is what you want to make it. What you need it to be. Exactly. Different instrument combinations which, as your needs advance, you can exchange quickly for other combinations! All on one rental basis. All without missing a production or r&d stroke.

So don't just hobble along. Check into this dynamic, **lowest cost** Instrument Rental Plan now. Wherever you are, 7 days a week, day or night, call Continental collect on (201) 549-8500.



continental leasing co. inc.

DM 440 BASIC SPECIFICATIONS

Display	4 full digits plus overrange digit, polarity, range and units. With plug-in card modules — AC volts rms, K ohms, DC millivolts, and DC ratio.
Ranges	DC volts: ±0.001 to 1000. in 3 ranges (±10.000, ±100.00, and ±1000) with 20% overrange. 1000 V maximum input on all ranges.
Ranging	Automatic, manual, and remote, selectable on front panel.
Accuracy	±0.01% of reading ±1 digit.
Stability	Accuracy will remain as specified for not less than 90 days from calibration, over the temperature range of 15°C to 35°C.
Linearity	Within 1 digit at all readings.
Reading Time	100 milliseconds at full scale, 110 milliseconds at 120% of full scale.
Input Impedance	Greater than 10,000 megohms on 10-volt range, full time. 10 megohms on 100-volt and 1000-volt ranges, full time. No impedance variation at any time.
Common Mode Rejection	Infinite at DC; 140 dB at all frequencies up to 1KHz with up to 1K ohm source imbalance in either input lead. Common mode voltage up to 1000 VAC peak.
Operating Temperature	0°C to +55°C.
Power Requirement	115 or 230 V rms, 47-63 Hz (47-440 Hz option available) 55VA.
Normal Mode Rejection	Infinite at 20 Hz and integral harmonics including 60 Hz, 400 Hz, and 1000 Hz.*
Input Isolation from Earth Ground	1000 volts DC or peak AC.
Maximum Safe Input	1000 volts DC or AC rms continuous on 10 VDC, 100 VDC or 1000 VAC ranges.
Automatic Range Change Time	100 milliseconds plus one reading time per range change.
Weight	22 pounds.
Dimensions	6¼" high x 19" long x 8½" wide.

* ASA TEST CONDITIONS

PLUG-IN ACCESSORIES

DC mV ACCESSORY

Input Impedance — 100 megohms (minimum, full time) on all ranges.

Resolution — 1μV/digit on 10mV range, 10μV/digit on 100mV range, 100μV/digit on 1V range.

K OHMS ACCESSORY

Input Ranges — 1K, 10K, 100K, 1,000K, 10,000K (plus 20% overrange).

AC ACCESSORY

Input Impedance — 1 megohm shunted by less than 60 pF on all ranges.

Ranges — 10, 100 & 1,000 Vrms full scale + 20% overrange (600 Vrms maximum input 47 Hz to 100 KHz).

Frequency Response — 47 Hz to 10 KHz ± 0.1%, 10 KHz to 20 KHz ± 0.25%, 20 KHz to 100 KHz ± 1%.

DC RATIO ACCESSORY

OPTIONS

- Remote Range Control • Remote Function Control
- Rear Panel Input Option • 10 Line Print Output
- 8421 Variable Level Outputs • Rack Adapter
- Current Measurement

BEST COMBINATION OF SPECS, PERFORMANCE AND FEATURES FOR YOUR DVM DOLLAR

$995 — BASIC DM 440 DC METER
$1695 — WITH mV, K OHMS, AC AND DC RATIO ACCESSORIES

SPECIAL FEATURES

- **INTERNAL PLUG INS: AC, KILOHMS, RATIO, DC PRE-AMP**
- **20% OVERRANGE ON ALL RANGES AND FUNCTIONS**
- **10 READINGS PER SECOND**
- **EXTREMELY HIGH INPUT IMPEDANCE—FULL TIME**
- **FULL 1,000-VOLT MEASURING CAPABILITY**
- **0°C TO 55°C OPERATING RANGE**
- **INTEGRATED CIRCUITS FOR RELIABILITY**
- **GUARDED INPUT PROVIDES IN EXCESS OF 140 dB CMR AT 1 KILOHM IMBALANCE TO 1 KHz**
- **RUGGED CYCOLAC FRONT AND REAR PANELS**
- **1 Mv RESOLUTION**
- **KELVIN INPUT ON OHMS**
- **10,000 MEGOHN INPUT**

OTHER FEATURES

RUGGED CYCOLAC PANELS — Strong, lightweight. Scratches and mars do not show.

COMBINATION HANDLE/TILT BAR — Standard equipment. Latches positively in place.

EXTRA LARGE NON-SKID FEET — Prevent accidental movement or tipping.

OVERLOAD PROTECTION IN ANY RANGE OF AC AND DC/MV FUNCTIONS — Internal circuit techniques protect functions against short term 1,000 volt overload in any range.

EXTREMELY RAPID RANGE CHANGES — 1 reading time plus 100 milliseconds.

RELIABLE, COMPACT ICs — Save space, reduce weight and cost, and insure reliability.

RUGGED PRINTED CIRCUIT BOARDS CONTAIN GOLD PLATED CONTACTS WITH NICKEL UNDERCOATING — Gold to gold contacts with nickel undercoating insures long board life, improve accuracy, reduce non-linearities.

PERIODIC MAINTENANCE ELIMINATED — No mechanical choppers, incandescent lights or other high failure/short life components.

INSTANT INPUT SAMPLE INITIATION — Input voltage is sampled for 50ms. Sample period may be started instantaneously by an external pulse with print option.

AUTOMATIC POLARITY — Both DC and mV functions.

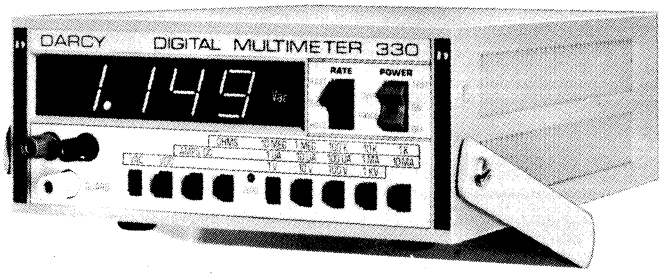
AUTOMATIC RANGE — On DC, AC, Kilohms and mV.

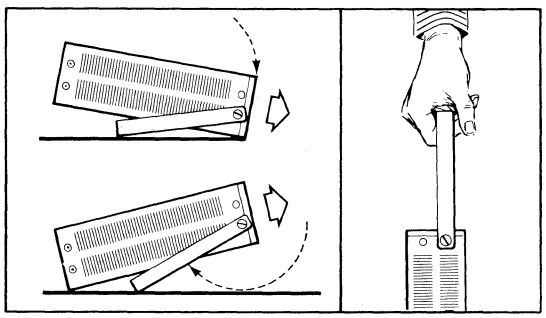
DC PRE-AMP OFFSET ADJUST — Provides compensation to offset thermals in circuit being measured (operational in mV function only).

DARCY INDUSTRIES

"DVMS — JUST FOR GOOD MEASURE"

1723 CLOVERFIELD BLVD. • SANTA MONICA, CALIF. 90404 • Phone (213) EX 3-9611 • TWX (910) 343-6963





HANDY, FUNCTIONAL, HANDLE/TILT BAR — A rugged carrying handle which also functions as a tilt mechanism, allowing the unit to be tilted up or down, is provided as standard equipment.

DM 330 BASIC SPECIFICATIONS

Display: 3 full digits, reads 1500 at full scale. Polarity, range, and units. With AC option — AC volts.

Ranges: DC Volts: ±1 mv/digit to ±1000V full scale. DC input resistance, 10 meg Ω constant. DC current: ±1 na/digit to ±10ma full scale, (Higher ranges optional).

Absolute maximum input current, 25ma on any range, or 30 times range, whichever is less.

AC volts (optional): 50 Hz to 10 KHz with 10 megohm input resistance shunted by 110 pF.

Resistance: 1Ω/digit to 10 megohms, full scale.

Maximum voltage across unknown resistor is 10 v DC at full scale.

CURRENT THROUGH UNKNOWN RESISTOR	RESISTANCE RANGE
1 μa	10 meg
10 μa	1 meg
100 μa	100K
1ma	10K
10ma	1K

Ranging: Pushbutton selected.

Accuracy (all ranges): ±0.1% of reading ±1 digit on DC, KΩ and current functions. 1% ±1 digit on AC Volts.*

Settling Time: .1 sec to within .1% of full scale on DC, KΩ and current functions.

Normal Mode Rejection: Infinite at 60 Hz and multiples thereof.

Common Mode Rejection: >100 dB up to 1 KHz with 1 KΩ source imbalance. >120 dB at DC.

Operating Temperature: 0°C to +55°C.

Power Requirements: 115 or 230 Vrms, (specify at time of order) 47-440 Hz, 15 watts.

Input Isolation From Earth Ground: 500V DC or peak AC.

*Over the temperature range of 15°C to 35°C.

Special Features and Prices

1 nanoamp Current Resolution

Full Multimeter Capability — DC volts, AC volts, DC current, KΩ measurements, all built in.

High Accuracy — ±.1% ±1 digit on DC volts, KΩ and current functions. ±1% ±1 digit on AC volts.

100dB Common Mode Rejection

High Speed Readings — Up to 10 readings/sec.

Brilliant In-Line Display — 25,000 hour life for numerals, decimals and function displays.

Portable — 7½ lbs. ½ rack size (8½" wide x 3⅞" high x 12" long).

Overrange Capability — 3 full digits, reads 1500 at full scale.

DM 330 (with AC volts) **$389**

DD 330 (without AC) **$349**

Expensive DVM Features & Capability At Very Low Cost.

RUGGED CYCOLAC CABINET® — Strong, lightweight, scratches and mars do not show.

EASY TO READ FUNCTIONAL DISPLAY — Automatically positioned decimal point, units display, and automatically selected polarity symbol. Large, easy to read numerals including overrange digit. Front panel test switch checks all segments. Front panel rocker switch selects reading speed from 1 reading/sec to 10 readings/sec.

REAR PANEL POWER CORD WINDUP — Eliminates lost or dragging cords.

UNIQUE CURRENT MEASUREMENT CIRCUIT — Active input circuit provides **sensitivity of 1 na/digit.** Voltage drop is under 10 mv, even at full scale.

RELIABLE ICs AND ULTRA-STABLE ZENER — ICs save space and reduce price. Stability ensured through temperature compensated ultra-stable zener in reference circuit.

OVERLOAD PROTECTION IN ANY RANGE OF AC, DC, AND CURRENT FUNCTIONS — Internal circuit techniques protect against short term 1000 volt overloads.

UNUSUAL ACCURACY AND STABILITY — 0.1% on DC, KΩ and current. 1% on optional AC. All functions retain rated accuracy over temp. range of 15°C to 35°C.

HIGH COMMON MODE AND NORMAL MODE REJECTION — CMR of 100dB from DC to k KHz with 1 KΩ source imbalance. Normal mode rejection is infinite at 60 Hz and multiples thereof.

OPTIONAL AC VOLTS MEASUREMENT BUILT IN — Range of 50 Hz to 10 KHz with accuracy of 1% ±1 digit with a 10 megohm input impedance.

Curtis ELAPSED TIME INDICATORS

SMALLEST SIZE, LOWEST COST, AC or DC, ANY VOLTAGE

HOW THEY WORK

The Curtis Elapsed Time Meter utilizes the patented Curtis Ampere Hour Meter. This is basically a mercury microcoulometer fabricated from precision bore, glass capillary tubing. Filling the capillary bore are two columns of mercury separated by a small electrolyte gap. Electrodes are inserted into the mercury and are sealed to the glass. Application of pure or pulsed DC signals causes mercury at the anode to be electrochemically transferred across the gap to the cathode at a time rate proportional to the current. Mercury transfer effectively moves the gap along the tube length as a function of the current-time integral. A constant-current supply thus provides a precision timing device.

TYPICAL APPLICATIONS

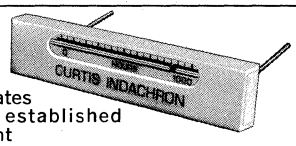
TEST EQUIPMENT UTILIZATION & CALIBRATION—Facilitates calibration based on actual hours of use. Experience has shown savings up to 50% compared to calendar-basis calibration programs. Also provides accurate utilization data on test instruments and other tools and equipment, enabling substantial savings in capital investments.

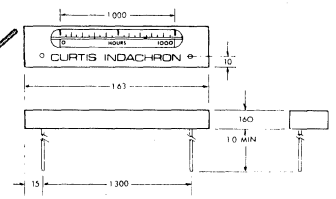
RELIABILITY ENGINEERING—Simple method of determining Mean-Time-To-Failure or sub-system replacement time without costly, unreliable logging.

WARRANTY—Low-cost Curtis meters permit warranty of equipment based on actual usage as well as by calendar period. This affords a definite sales advantage and protects both supplier and buyer. Recommend unit 120 PC.

MODEL L-Series Indachron

Developed for use on OEM equipment as a very low-cost means of validating warranties and for P.M. scheduling. Under $2.00 each in production quantities. AC and DC Models. Various time scales and electrical ratings available. Meters can be mounted on printed circuit cards, or direct to chassis with standard adhesive strips.





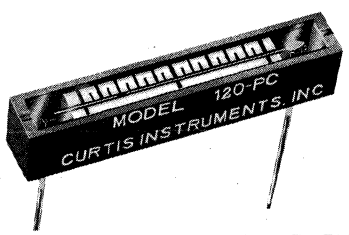
Model 120 L: Operates from DC current established in parent equipment

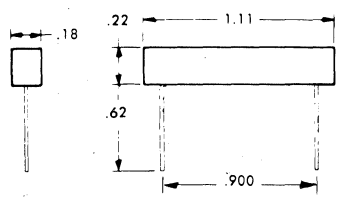
Model 420 L: Operates from any DC voltage

Model 520 L: Operates from 115 VAC

MODEL 120-PC Series

For installation directly on printed circuit cards for "mean-time-to-failure" or preventative maintenance instrumentation. Can be instrumented from available DC voltages for any time scale by use of series resistor. Radial leads spaced for mounting on printed circuit boards. Full scale of .65 inches= 4.16 milliamp-hours.

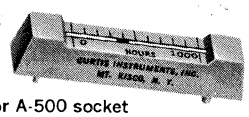


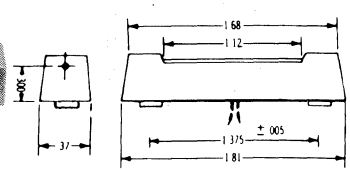


MODEL 150-S Series

Operates directly from DC voltage with calibrating series resistor: full scale of 1 inch = 10.4 milliamp hours. Stud mounting, plug-in, or printed-card configurations available. Fully reversible, no threshold.

150SF two-4/40 inserts
150SS with mounting studs (SF and SS have 8" Teflon leads)
150SP two .080 pins for A-500 socket
150SP-2 Polarized pins for A-501 Socket
150SC Radial leads for direct mtg.

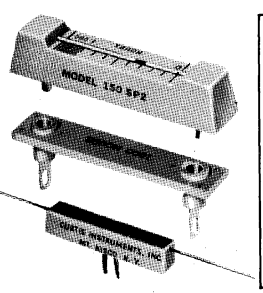


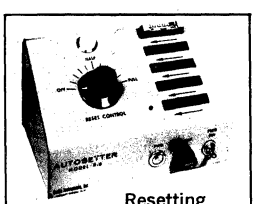


MODEL 500-CP Series

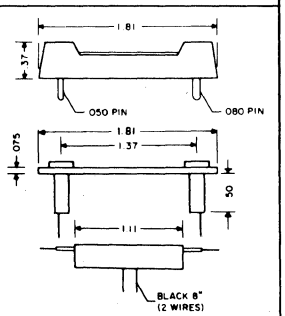
Permits instant replacement of the indicator with rezeroed unit. Available in 500, 600, or 1,000 hour scales. 115 VAC. Any scale, any voltage, can be provided. Model 550-SSR with integral zener regulating circuit also available.

Military Units meeting MIL-I-81219 provide lowest power, lowest weight, smallest size and lowest cost for ground and airborne applications. Write for full data.

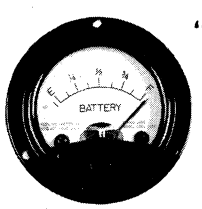




Resetting is accomplished automatically on the Curtis Autosetter.



INFINITE MEMORY INTEGRATORS



BATTERY "FUEL" GAUGES

Meter displays % of discharge (amp-hrs remaining in rechargeable battery systems.) Typical of applications for Curtis 921 Millivolt Integrator.

MILLIVOLT HOUR INTEGRATOR MODEL 921

Printed circuit module using capacitive readout techniques with the Curtis microcoulometer. 0-100 MV input signal provides a 0-100 microampere output analog of the integral. Infinite memory storage, high and low limit detectors, high accuracy, and small size are other significant features. 12 to 36 VDC. 4½" x 4½" overall.

BIPOLAR INTEGRATOR MODEL 922

A portable instrument integrates positive and negative signals to 100 mV. Readout on 4½" taut band meter. Permanently stores recorded integral until reset. Accuracy ±2%; Typical linearity 0.5%. 115 VAC/60 Hz.

Curtis Instruments, Inc. 200 Kisco Avenue Mount Kisco, N. Y. 10549 | (914) 666-2971 TWX 710-571-2163

New Digital Panel Meters

• Low Price • High Performance • New Styling

This new line of DPM's offers features found only in the more expensive models. New integrated circuit techniques are used to give you outstanding performance and reliability while reducing costs.

Write for information on Datascan's full line of Digital Panel Meters — including the new 4-digit model.

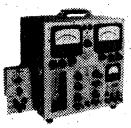
PRECISION INSTRUMENTS TO MEASURE

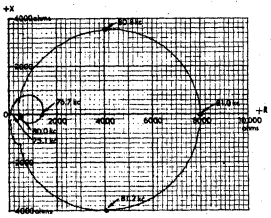
■ IMPEDANCE ■ ADMITTANCE ■ TRANSFER FUNCTION
■ PHASE ANGLE ■ CURRENT ■ QUALITY FACTOR Q
■ REAL AND IMAGINARY POWER

WIDEBAND COMPLEX IMPEDANCE-ADMITTANCE METERS



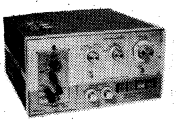
MODEL 100C

Measures R, X, G, B, |Z|, |Y|, $<\theta_x$ and $<\theta_y$ as well as amplitude, phase and real and imaginary components of voltage transfer ratio under CW conditions.



Complex impedance plane locus of piezoelectric ceramic (Plotted on X-Y recorder in 20 seconds)

- **MEASURES**
  - Impedance
  - Admittance
  - Transfer function
  - Power
- **FOR**
  - Transducer calibration
  - Production testing of resistors, capacitors and inductors
  - Filter and other network design and analysis
  - Physiological studies
- **FEATURING**
  - Rapid measurements
  - Direct reading—no bridge balance
  - Wide frequency range—100Hz to 200KHz (Broader on special request)
  - DC Outputs for frequency or complex plane plotting



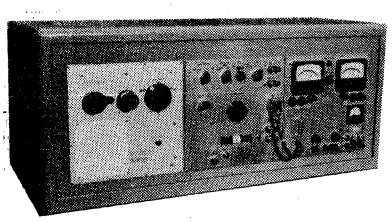
MODEL 202

Measures R, X, G, B, |Z|, |Y|, and real and imaginary components of output to input voltage ratio under pulse conditions.

Standard or special plug-ins and adapters are available for measuring under a wide variety of conditions, including at high and low power, balanced or unbalanced connections, differential admittance, hybrid bridge or comparator circuits, etc. Typical units are described at the right.

TYPICAL ADAPTER CHARACTERISTICS

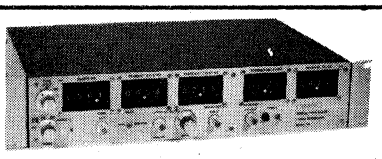
Model	Measures	Ranges
100-PA-1001A	Z or Y	1Ω to 50KΩ; 1μ℧ to 50Kμ℧; 100 to 200,000Hz
100-PA-1002	Y w/one lead at ground	1μ to 5Kμ℧; 100 to 200,000Hz
100-PA-1004	Low Z	0.1Ω to 5KΩ; 100 to 200,000Hz
100-PA-1008	Differential Y	50μ℧ to 500Kμ℧; 100 to 100,000Hz
100-PA-1010A	Z at high input power	1Ω to 10KΩ; 3 to 3000v; 100 to 50,000Hz
100-PA-1011B	Hi V Cap. and Y	up to 0.1mf, 0.1μ℧; 6 to 6000v.
100-PA-1012A	Piezo activity tester	Y; fr; fa; 100kHz to 250kHz
100-PA-1013	Transfer function	Gains of 0.01 to 10,000; 100Hz to 200kHz



DIELECTRIC TEST FACILITY

System S-4

- For rapid laboratory and production testing of ferroelectric and other components — measures capacitance and dissipation at low and high voltage levels as well as f_R and f_A.
- System is complete
- Frequency: 1kHz (or as otherwise specified)
- Applied voltage: 6V to 6 KV rms, up to 1 KVA zero p.f. leading
- Capacitance range: up to 0.1 mfd.
- Loss tangent: up to 100%
- Systems can be tailored to specific requirements

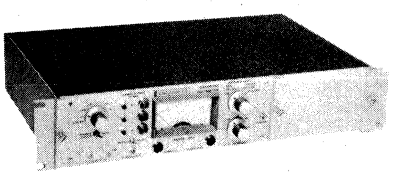


TONE BURST/ TIMING GENERATOR

SERIES 206

A digitally programmable gate generator providing full range independent control of tone burst duration, blanking period, and repetition frequency. Compatible with transmitter / receiver configurations employed with transducer beam pattern, phased array, and transmission media pulse testing systems. Particularly suited for production AC testing.

- Single tone burst or internally/externally controlled gating repetition rate.
- Signal Frequency: 50 Hz to 3 MHz.
- Transmitter/Receiver Gates: 10μ sec. to 1 sec.
- Receiver Delay: 100μ sec. to 10 sec.
- Special circuit design produces zero crossing gating and eliminates switching transients, pedestal, and spurious signal outputs.
- **Remotely Programmable.**



AC SAMPLING VOLTMETER

SERIES 215

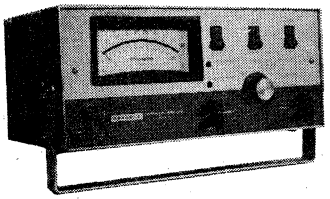
A true average voltage AC Sampling Voltmeter for analysis of complex AC waveforms of single transients, repetitive signals or multiplexed signals. Serves as an excellent high quality gated receiver or production AC testing voltmeter.

- Manual/automatic selection of sampling periods.
- Internally delayed or externally triggered sampling for measurement of any selected portion of signal waveform.
- Excellent noise discrimination during signal measurement.
- Signal Bandwidth: 100 Hz to 1 MHz.
- Sampling rates up to 1000 samples/second.
- Sample and hold D.C. output for DVM or A/D conversion and automatic print-out.

WIDE BAND PHASEMETER

301 Series

Excellent general purpose instruments for electrical or electronics laboratories, or inspection departments and ground support systems.



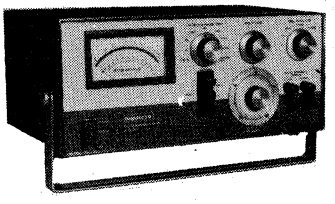
Available in portable or rack mount.

- Completely transistorized
- 5 Hz to 500 Hz
- Input levels: 50 mv to
- 5 Hz to 500 kHz amplitudes, no attenuator controls
- Accuracies to 0.1°
- Square wave output
- DC output available —0 to +3,600 volts corresponding to 0 to 360° —at low impedance

VECTOR IMPEDANCE AMPLITUDE METER

320 Series

An inexpensive instrument for rapid testing of impedance or transfer function.



Available in portable or rack mount.

- Completely transistorized
- Has AC outputs for use by 301 phasemeter to measure phase angle of impedance or transfer function
- 5 Hz to 500 kHz
- Range: 1 ohm to 10 megohms
- Capacitance: 0.1 pfd to 10,000 mfd
- Inductance: 1 microhenry to 100,000 henries
- Self contained oscillator

DYTRONICS

MODEL 311/RT-1/717 PRIMARY PHASE ANGLE STANDARD

- 0.015° accuracy
- Frequency range 30Hz to 10,000Hz
- Self-calibrating
- Shift or measure phase angle
- Maximum 125 volt output
- 12 microdegrees resolution

The first authentic Primary Phase Angle Standard for industry.

Dytronics offers an array of instrumentation for the measurement and generation of phase angle. This successful and advanced measurement technique pioneered by Dytronics is recognized as the finest throughout the world. See our catalog for complete information or contact Dytronics Company Inc., 4800 Evanswood Drive, Columbus, Ohio 43224.

See our catalog for a complete list of models and specs

Model Number	Frequency Range	Accuracy	Measure Phase?	Shift Phase?	Coverage 0° to 360° without Ambiguity?
222	20Hz-500kHz	±0.1*	Yes	No	Yes
301	10Hz-30kHz	±2°	Yes	Yes	Yes
311/RT-1/717	30Hz-10kHz	±0.015°*	Yes	Yes	Yes
312	4kHz-500kHz	±0.02°*	Yes	Yes	Yes

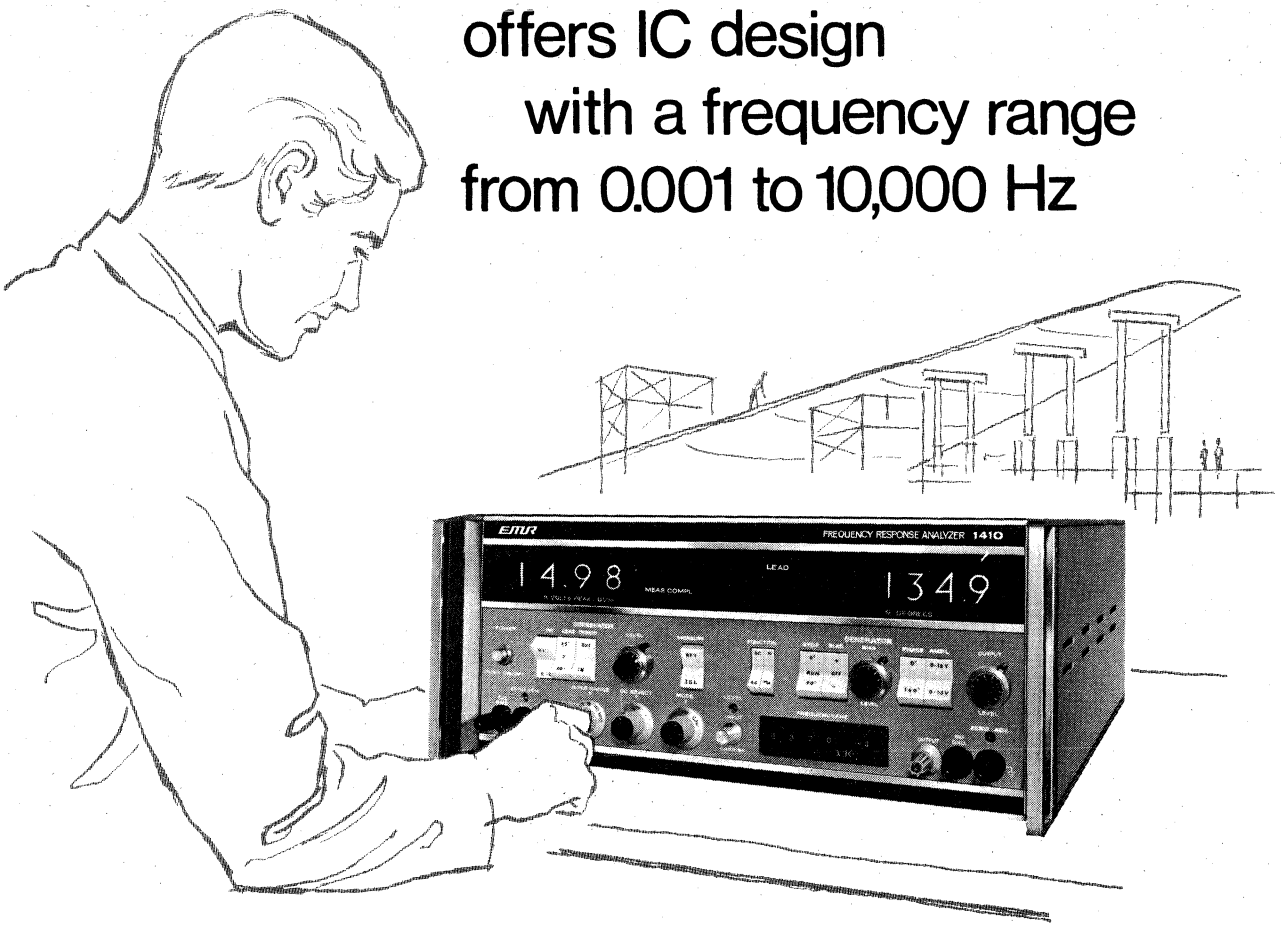
Only one Frequency Response Analyzer offers IC design with a frequency range from 0.001 to 10,000 Hz



It's The EMR Model 1410. ● Frequency range: 0.001 Hz - 10 kHz ● Accuracy: phase ±½°, amplitude ±1% of reading or 0.35% F.S. ● Rejection: 40 db harmonic and noise ● Digital readout of phase and amplitude ● Optional plug-in modules ● Compact 7" x 19" x 18" size.

Now for the first time, all the essentials you need for dynamic analysis of DC and AC control systems have been combined in one easy-to-use instrument. Integrated circuitry and exceptional versatility put the Model 1410 miles ahead of any other frequency response analyzer. Gain and phase characteristics are displayed in digital form for direct Bode plotting. Advanced design even includes a built-in DVM which may be used independently. Optional extras offer such additional features as computer interfacing, remote programming and print out, and auto ranging. EMR Model 1410 is ideal for monitoring process variables or assessing the performance of any feedback control system. Write or call today for Bulletin 1400; EMR-Hatboro, Hatboro, Pennsylvania 19040, (215) 672-1240.

*preliminary data, products to be introduced April 1969.

microwave swept oscillators

amplifiers □ components □ accessories

The E-H 570 series covers the full microwave spectrum from 1 GHz-40 GHz with models 571-577.

The new EH-570 Series—the sweeper that meets or exceeds specifications over its entire frequency band—at all power levels. Features: highest leveled output power □ lowest residual and incidental FM □ highest stability and accuracy □ 5 programmable frequencies with digital readout □ remote frequency programmability with 100 kHz bandwidth □ 5¼" height; lighter weight.

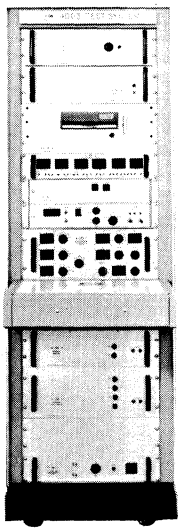
component test systems

dynamic semiconductor test systems



The E-H 4000 series systems for automatic pulse and functional testing of integrated circuits and other components range from simple, punched card programmed systems to complex computer control array testers.

Single-Shot measurements of time and voltage in the μsec to sub ns area.

Wide signal dynamic range and equivalent bandwidth.

Signal detection at the test fixture.

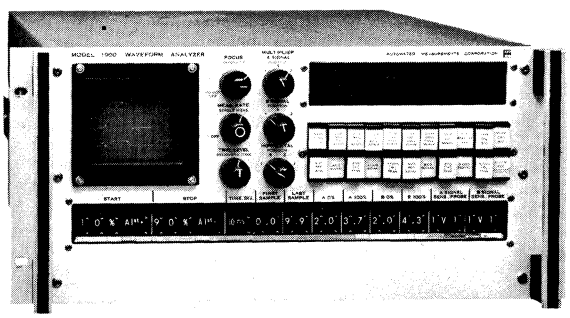
Fast rise programmable pulse generators.

All measurement results available in recordable form.

from AUTOMATED MEASUREMENTS CORPORATION, a subsidiary of E-H Research Laboratories, Inc.:

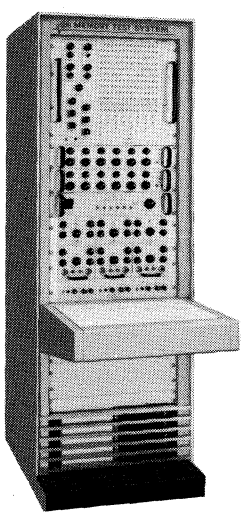
Programmable (ASC II) wave form analyzers, control units, comparators, power supplies.

AMC 9000 series printed circuit card tester.



AMC Model 1000 wave form analyzer, 10 remote sampling channels, digital readout and limits comparison.

memory test systems



E-H has a full range of memory element testers:

Model 8100 programmed current generator for high speed drives.

Model 8305 programmed wire element test station.

Models 8321-8350 automatic core test systems for high throughput multiplex operation of models 8803 dual core handler systems, up to 36 cores/second.

Series 8500 and 8600 computer control analyzers systems for production test and diagnostic routines on planes, stacks and wire elements.

Programmable systems elements; series 1623, 10 channel, up to 25 MHz word generators.

Models 1030-1033 high speed current drivers. Model 153 Strobed Volt Meter.

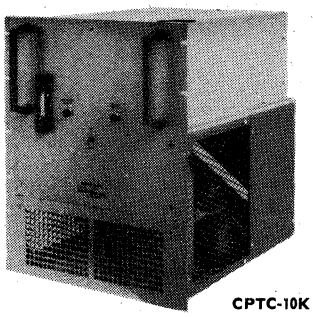
Electro IMPULSE, INC.

CPTC SERIES



CPTC-10K

- 5,000 to 100,000 watts average power
- Frequency range to 10 GHz
- Completely self-contained, requiring only a power line connection
- Nominal input impedance is 50 ohms — other available.

These units are fully self-contained, incorporating an oil-filled termination, an oil to air heat exchanger and circulating system.

Pressure, flow and temperature interlocks insure complete protection for both transmitter and termination.**

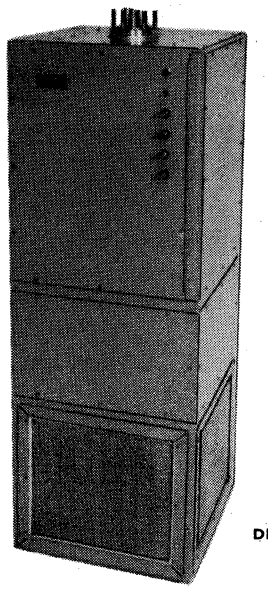
Although 50 ohms is the standard input impedance for this series, impedances of 72, 300 or 600 ohms can be supplied. Please specify all requirements when ordering.

**On most units.

Model	*Frequency Range MHz	Suggested Connector Choice Available	Total Average Power Watts	VSWR Maximum
CPTC-5K	DC-1000	1⅝	5,000	1.15
CPTC-10K	DC-1000	3⅛	10,000	1.15
CPTC-20K	DC-1000	3⅛	20,000	1.15
CPTC-30K	DC-1000	3⅛	30,000	1.15
CPTC-50K	DC-1000	6⅛	50,000	1.15
CPTC-100K	DC-1000	6⅛	100,000	1.15

*Ranges to 10 GHz can be supplied.

DPTC SERIES



DPTC-25K

Model*	Average Power	VSWR	Input Power 60 cps	Input Power 50/60 cps**
DPTC-10K	10,000	1.1	115v ¼ HP 1 Phase	220v ¼ HP 1 Phase
DPTC-25K	25,000	1.15	115/230v ½ HP 1 Phase	220v ½ HP 1 Phase
DPTC-50K	50,000	1.2	208/230v ½ HP 1 or 3 Phase	208/230v ½ HP 1 or 3 Phase
DPTC-100K	100,000	1.2	208/230v 2 HP 3 Phase	208/230V 2 HP 3 Phase

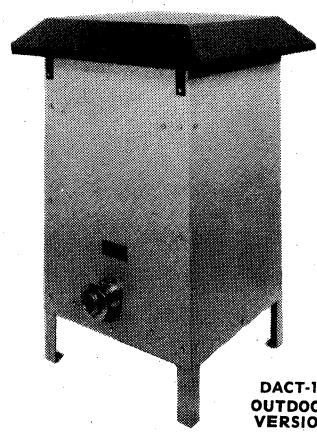
*For Duct Load change prefix to DDL.
**De-rate Power Handling Capacity by 20% at 50 cps.

HIGHEST PULSE CAPACITY IN THE INDUSTRY!
UP TO 100,000 WATTS!
DC-32 MHz

Dry forced air cooling offers the most economical way to terminate this high power. Ducted models can be arranged to use outside air and duct heat out of the immediate area.

DACT SERIES

UNIQUE 25-MONTH WARRANTY!



DACT-14 OUTDOOR VERSION

ABSOLUTELY NO MAINTENANCE!

NO POWER REQUIREMENT!

Power Ratings Available:
3,000, 5,000, 10,000, 15,000 20,000 watts.

VSWR:
1.1:1.

Frequency Range:
Standard to 30 MHz — Models available to 55 MHz.

Impedance:
50 ohms standard. 72, 300, 600 ohms available.

Maximum Ambient Temperature:
52°C. No minimum!

Mounting Orientation:
Non-critical.

ELECTRO-MECHANICAL INSTRUMENT CO. INC., PERKASIE, PENNSYLVANIA 18944

a wholly-owned subsidiary of THE LEECE-NEVILLE CO.

esi Precision Test and Calibration Instruments

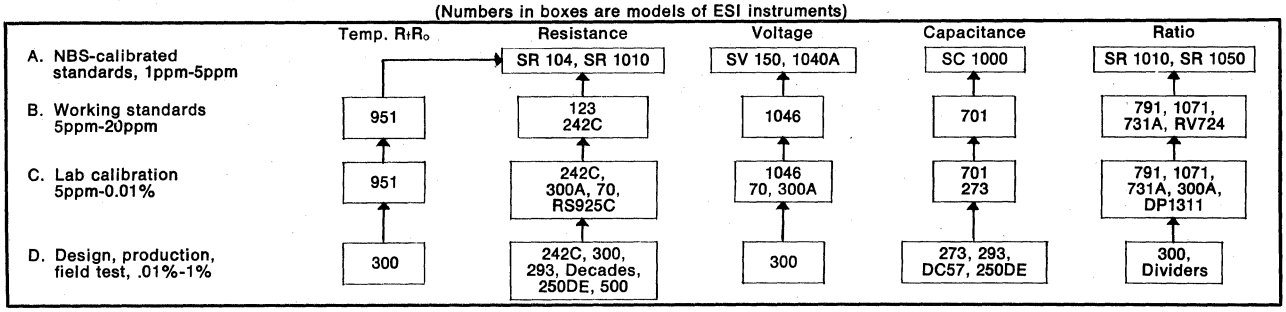
ESI produces a comprehensive line of instruments, standards and system components for the precise measurement of resistance, voltage, capacitance, inductance and ac/dc ratio. The full spectrum of critical application is covered: standards and laboratory calibration, design work, production and field test.

All calibrations on ESI instruments are traceable to the National Bureau of Standards through ESI transportable reference standards. These standards are test reported by NBS and maintained by ESI. They form the base from which our professional grade instruments derive their warranted accuracy.

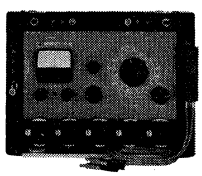
For more complete information than given here, please request our comprehensive metrology catalog.

ESI TRACEABILITY—APPLICATION CHART

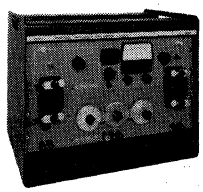
(Numbers in boxes are models of ESI instruments)



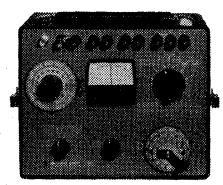
MULTI-PURPOSE INSTRUMENTS



300 PVB® Potentiometric Voltmeter Bridge. Portable, battery-operated DC measuring at 0.02% accuracy or 0.01% in the 300A. Functions in several ranges each as voltmeter, voltage source and ammeter; serves as 4-terminal Kelvin bridge, ratiometer and null detector. Accessories provide resistor sorting, AC voltage, high voltage, pH and temperature measurements.



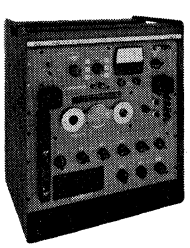
293 Universal Impedance Measuring System. Measures resistance and conductance (0.05% accuracy), inductance and capacitance (0.1%) in five figures of direct, in-line readout, plus D or Q. Sensitivity of 5 microvolts; variable output generator.



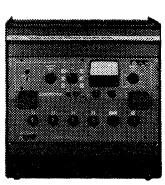
250 DE Portable Impedance Bridge. Measures R, C, L at 0.1%, 0.2% and 0.3%. Includes solid-state AC-DC detector and generator; operates on four 1.5V D batteries. Provision for external bias, range extension.

MODEL	DESCRIPTION	RANGE	NOMINAL ACCURACY	PRICE
300	Measuring E, I, R and ratio (battery)	0-511 V, 0-5.11 A, 0-511 MΩ	0.02%	$ 975.
300A	(same)	(same)	0.01%	1045.
250DE	Measures R, C, L battery operated (line operation and rack mount opt.)	0-12 MΩ 0-1200 μF 0-1200 H	0.1% 0.2% 0.2%	550.
293	Universal bridge for R, G, C, L AC/DC gen.-det. (Bridge alone—$600)	0-1.2 MΩ 0-1200 mmho 0-1200 μF 0-1200 H	0.05% 0.05% 0.1% 0.1%	1200.

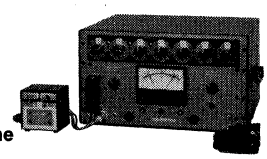
RESISTANCE MEASUREMENTS



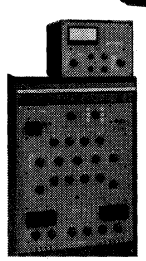
242C Resistance Measuring System. Most versatile system at 10 ppm direct readout accuracy. Four-terminal comparisons to 1 ppm, with 0.1-ppm resolution. Matched generator-detector with complete guarding and shielding provides easy operation over wide range (10 microhms - 120 megohms). Data logging available, as is less accurate, less expensive Model 242B.



231C Guarded Wheatstone System. Direct-reading accuracy of 0.01%. Range 10 milliohms to 12 gigohms with high resolution. Completely guarded internally; Model 801 Generator-Detector provides variable generator output 0 to 600V, detector ranges of 1000 volts to 3 microvolts. Lower range, less expensive 232A System also available.



500 Automated Resistance Deviation Bridge. High volume resistor sorter and tester with 0.01% accuracy or better; ranges from under 1 ohm to over 100 megohms. Available in variety of systems from semi-automated to completely automatic with temperature coefficient readout.



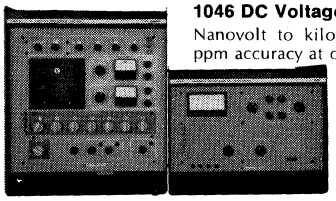
123 Resistance Comparison System. For absolute ratio comparison of resistance standards to 0.2 ppm direct reading. Wide range to 10 megohms. Wenner balance ensures traceability, stability. Includes Model 900 Nanovolt Galvanometer.

MODEL	DESCRIPTION	FULL SCALE RANGES	NOMINAL ACCURACY	PRICE
500	Auto Kelvin bridge and sorting fixture	1111 Ω to 11 MΩ (1 mΩ steps)	0.01%	$2850.
242B	Kelvin bridge, gen.-det. and decade standard	0.1 mΩ-120 MΩ (1 μΩ resolution)	50 ppm	3900.
242C	(same)	(same)	10 ppm	5500.
240	Kelvin comparison bridge, 5 ratio ranges	1 ppm resolution	10-30 ppm	1050.
240C	(same, except trimmable)	0.1 ppm resolution	2 ppm	1600.
231C	Wheatstone bridge, guarded gen.-det.	1.2 Ω -12 GΩ	0.01%	2300.
232A	Wheatstone bridge, gen.-det.	1.2 Ω -12 GΩ	0.01%	1500.
123	Double ratio set, nanovolt detector	1:1, 10:1 ratios	0.2 ppm	7600.
122	Direct-reading double ratio set	1:1, 10:1 ratios	0.2 ppm	4700.

Electro Scientific Industries, 13900 N.W. Science Park Dr., Portland, Oregon 97229

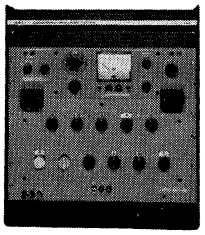
esi® Precision Instruments

VOLTAGE MEASUREMENT



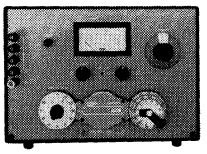
1046 DC Voltage Measurement System. Nanovolt to kilovolt with one system; 5 ppm accuracy at one volt, 0.5% at 1 microvolt; nanovolt sensitivity and resolution; standard cell comparison to 0.005 ppm. Includes both Models 1045A1 and 945.

CAPACITANCE MEASUREMENT



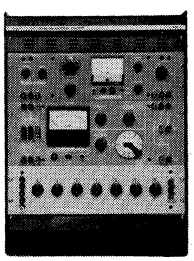
701 Capacitance Measuring System. Two and three-terminal capacitors measured from 0 to 1.2 microfarads with 0.01% accuracy. Resolution of 1 ppm and continuous tuning from 20 cycles to 20 Kc.

273 Capacitance Bridge. Compact, wide-range bridge with matched generator and sensitive detector gives 0.1% accuracy. Features nine ranges to 12,000 microfarads; 2, 3 or 4 terminal connections; complete shielding; checks C and D in seconds.

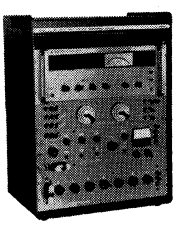


MODEL	DESCRIPTION	FULL SCALE RANGES	NOMINAL ACCURACY	PRICE
1046	Precision DC voltage system, 7 dial	1 nV-1111 V (1 nV steps)	5 ppm	**$8500.**
1045A1	Potentiometric DC voltmeter, two internal detectors	11 V-1111 V (1 μV steps)	5 ppm	**4850.**
945	Nanovolt potentiometer with galvanometer	1 nV-1 V (1 nV resolution)	ext. ref. source	**3650.**
1040A	Guarded absolute voltbox	1:1, 1:10, 1:100 ratios	1-4 ppm	**1100.**
701	Capacitance measuring system, gen.-det.	12 pF-1200 nF (0.0001 pF resolution)	0.01%	**2450.**
273	Capacitance bridge, 4-terminal, gen.-det.	120 pF-12,000 μF (0.01 pF resolution)	0.1%	**900.**

RATIO MEASUREMENT

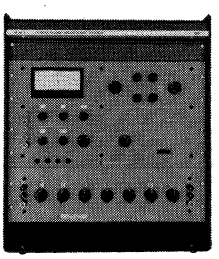


791/1071AC Ratio Calibration Systems. Calibrate AC ratio transformers and resistive decade voltage dividers; compare standard capacitors and inductors; provide 0.5 ppm linearity, traceable to NBS. 791 also determines residual reactances.



731A DC Ratio and Voltage Calibration System. 7-decade lab standard voltage divider, plus guarded absolute ratio voltbox with built-in, self-calibration.

TEMP. R_t/R_o MEASUREMENT



951 Temperature Measuring System. 10 ppm measurement of thermometer/ice-point resistance ratio. Features direct readout of R_t/R_o or resistance; 2 nanovolt sensitivity. Combines Mueller bridge and potentiometric methods of temperature measurement.

MODEL	DESCRIPTION	RANGE	NOMINAL ACCURACY	PRICE
†*731A	DC ratio and voltage calibration (less power supply)	7-dial K-V divider (0.1 ppm/step)	1-10 ppm	**$2700.**

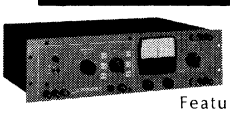
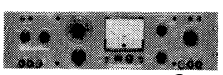
†*1071	AC ratio measuring system, gen.-det.	7-dial transformer (0.1 ppm/step)	0.5-5 ppm	**2000.**
951	Temp. meas., R_t/R_o	0-1111 Ω	10 ppm	**6150.**

*Special order †Certified report of calibration supplied

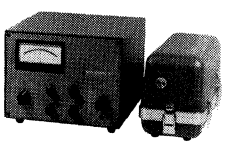
GENERATORS-DETECTORS



801 DC Generator-Detector. Features solid state construction with complete guarding and shielding; 3-microvolt full-scale sensitivity; power-limited output to 1 watt; 600 volts maximum.



861A AC Generator-Detector. Gang-tuned 20 hertz to 20 kilohertz, variable; 1-microvolt sensitivity, very low noise; variable generator output, power-limited.



900 Nanovolt Galvanometer. Precision nullmeter for low-level signal measurement. Wide range: 10 nanovolts to 3 millivolts. No critical adjustments: Operates from any source resistance. Two nanovolt sensitivity with 2% accuracy end scale, all ranges.

MODEL	DESCRIPTION	GEN. OUTPUT	DETECTOR SENS.	INPUT R.	PRICE
801	DC generator-detector 3 μV-1000 V end scale	0-600 V	0.1 μV	100 k-100 MΩ	**$1250.**

861A	AC generator-detector, variable freq.	0-200 V, 20 Hz-20 kHz	0.25 μV	1 MΩ	**850.**
865	AC/DC generator-detector	0-6 V	5 μV	10 MΩ	**575.**
900	Nanovolt galvanometer, 10 nV-3 mV 2nd scale (recorder output opt.)	———	2 nV	1000 Ω	**2175.**

AUTOMATED MEASUREMENT

Since 1963 ESI has pioneered in bringing automation to precision measurement, ranging from data acquisition and computer processing to physical handling. Complete data logging, interfacing and computer programming is now available with all major calibration systems.

Our Model 70 Programmable Meter Calibrator is an integrated system for large calibration labs, which cuts manpower requirements to one-tenth what is needed for normal flow of common meters.

In the field of measuring precision resistors ESI has developed extensive capabilities in automation and speed, while maintaining accuracy and traceability. Our Model 500 series of resistor testers offer GO-NO-GO systems which virtually eliminate operator error while providing 0.01% accuracy on precision resistors at a fraction of a second per measurement. Systems using the 500 series also can provide temperature coefficient readouts automatically for large batches of resistors or can precisely control resistor manufacturing process. Your inquiries and custom requirements are invited.

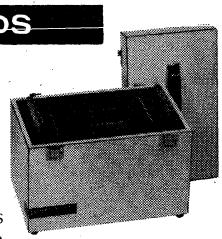
esi® Standards, Calibration and System Components

STANDARDS



SR 104 Transportable Resistance Standard.

Calibration to 1 ppm is available on this 10-kilohm standard. Unique features include a temperature coefficient of less than 0.2 ppm/°C and stability of 1 ppm/yr.

SR 1010 Resistance Transfer Standard.

Twelve aged premium resistors, shielded, provide transfer measurements from a standard resistor to one of different value; accurate to 1 ppm.

SC 1000 Standard Capacitor.

3-terminal, one nanofarad capacitor for calibrating bridges, capacitors. Stability of 20 ppm/yr. guaranteed.

SV 150 Standard Voltage Cell.

First voltage standard easily transported. Four cells sealed in controlled evironment with integral batteries for maintaining power during shipment. Sealed batteries rarely need servicing and cannot spill

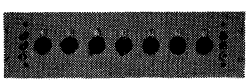
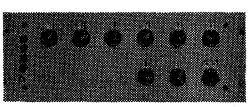
WORKING STANDARDS



RV 722 DEKAVIDER® Decade Voltage Divider. 7-decade Kelvin-Varley circuit provides 0.5 ppm initial linearity, 0.1 ppm resolution and outstanding performance at low settings. Temp. coefficient of 0.5 ppm/°C.

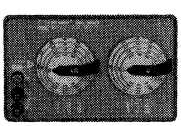
DT 72A DEKATRAN Decade Transformer Standard. Laboratory voltage divider having 0.1-ppm resolution with 7-dial in-line readout. Over-windings provide additional 0.1 taps. Calibration certificate supplied.

DC 57 DEKAPACITOR® Capacitance Decade. Low-loss, 1% accuracy standard. Four decades and interpolating, variable air capacitor for continuous resolution. Range to 1.111120 microfarads.



RS 925C Resistance Standard. Four-terminal, provides 10 significant figures and accuracy of 0.0005%. Value: 1.2 megohm in 10 milliohm steps. First four decades trimmable. RS 624 is 6-decade, less accurate version.

DB 52 DEKABOX In-line Decade. Resistors used for precision dc and audio frequency. Low temperature, power coefficients; minimal leakage. Six-dial DB 62 also available.



DB 877 DEKABOX® Decade Resistor. Compact design employs two coaxial dials (ESI patent) for 8 full decades to 12 megohms at 0.02% accuracy long term.

DC INPUT IMPEDANCE	GREATER THAN 1,000 MEG OHMS
AC REJECTION	BETTER THAN 60 DB @ 60 Hz
INTERFERENCE REJECTION	BETTER THAN 80 DB COMMON MODE FROM DC TO 60Hz WITH 1K OHMS SOURCE UNBALANCED
MAX. COMMON MODE VOLTAGE	500V PEAK
OVER VOLTAGE PROTECTION	100 TIMES F.S. WITHOUT DAMAGE OR DEGRADATION OF PERFORMANCE (NOT TO EXCEED 1KV)
CONVERSION RATE	60, 30, 15 SAMPLES PER SEC. DEPENDING ON MODEL
OVER RANGE	0 to 400% DEPENDING ON MODEL
POLARITY	AUTOMATIC POLARITY INDICATORS FOR + & −
OUTPUTS	1-2-4-8 BCD "0" = +0.4V MAX., "1" = +2.5V MIN. FOR EACH DIGIT
DECIMAL POINT	PROVIDED IN DISPLAY TUBES AND LIGHTED BY MEANS OF JUMPERS TO GND @ REAR CONN.
OPERATING TEMP. RANGE	0°C TO +50°C
INPUT POWER	115 or 230V AC 10%, SWITCH SELECTED, 47-1000 Hz, FUSED AND FILTERED (RFI), APPROX. 6 WATTS
WEIGHT	1.5 LBS.

* AC VOLTAGE (RMS) MEASUREMENT CAPABILITIES: AC TO DC CONVERTER PLUG IN P.C. CARDS TO CHOOSE FROM. FREQUENCY RANGE: 45 Hz TO 10 KHz, 20 Hz TO 20 KHz, 20 Hz TO 15 MHz. INPUT IMPEDANCE 10 MEG OHMS (SHUNTED BY 20 pf) ON ALL MODELS.

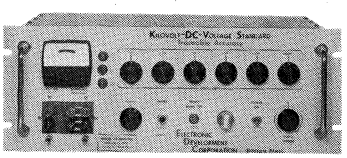
ELECTRONIC DEVELOPMENT CORPORATION

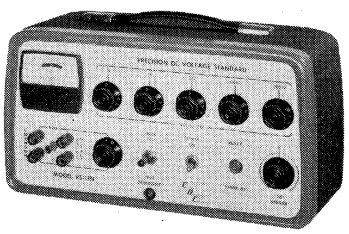
precision engineered
AC/DC voltage and current calibrators
(also standards, sources and references)

DC Voltage Standards

All solid state. Short circuit and overload proof. Fully automatic recovery and zero balance. 30 second warm-up. Stability better than .001% of setting per day.

MODEL	VS-11	VS-111	VS-1000
E_{out}	±11.1110 v	±111.110 v	±1111.110
I_{out}	50 mA	50 mA	10 mA
Absolute Accuracy	±0.005%	±0.005%	±0.007%
Z_{out}	.02Ω	0.1Ω	0.1Ω
Weight	8 lbs.	9 lbs.	20 lbs.
Prices	$620	$795	$995





Options: *Rack Mountable* — $25 additional (add "R" to model number). *Null Meter* — differential measurements with built in null detector. ∞ Z at null — $25 additional (add "N" to model number).

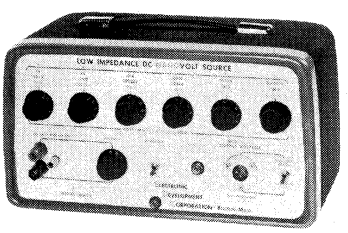
Electronic Galvanometer — differential measurements with built in, protected meter. Input impedance: ∞ at null, 1 MΩ off null, sensitivity 25 μV—$200 additional (add "G" to model number).

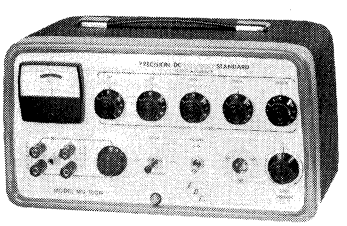
Applications: Calibrators, standards, references, sources and power supplies. EDC DC Voltage Standards are used in calibration laboratories, design and engineering laboratories, field service and production line Q.C.

DC Voltage Standards (special purpose)

EDC introduces a new **Low-Impedance DC Millivolt Standard (Model MV-105)** and a new **DC Nanovolt Standard (Model MV-106).** All solid state. Short circuit and overload proof. Fully automatic recovery and zero balance. 30 second warm-up. Stability better than .001% of setting per day.

MODEL		MV-100	MV-105 NEW	MV-106 NEW
E_{out} Ranges	(1)	±11.1110 v	±11.1110 v	±11.11110 v
	(2)	±111.110 mV	±111.110 mV	±111.1110 mV
	(3)	—	—	±11.11110 mV
Resolution	(1)	100 μV	100 μV	10 μV
	(2)	1 μV	1 μV	100 nV
	(3)	—	—	10 nV
I_{out} Volt Range		50 mA	50 mA	50 mA
Z_{out}	(1)	.02Ω	.02Ω	.02Ω
	(2)	20Ω	1.0Ω	10Ω
	(3)	—	—	10Ω
Accuracy (limit of error)	(1)	±.005%	±.005%	±.005%
	(2)	±.01%	±.01%	±.01%
	(3)	—	—	±.01%
Weight		8 lbs.	8 lbs.	8½ lbs.
Prices		$720	$750	$950





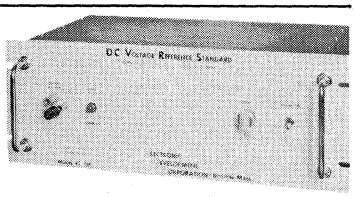
Options: For *rack mountable models, null meters,* and *electronic galvanometers* see "options" listed above.

Applications: Thermocouple and transducer calibration, simulation and measurements. Recorder calibration and linearity. Transducers: bridge excitation. Amplifiers: checking gain and linearity.

Digitally Programmable DC Voltage Standards

True digital programming from BCD logic signals. Serial by digit or parallel entry. Sign and each decade independently selected. The output is isolated from both the chassis and the control circuit. Short circuit and overload protected, fully automatic recovery.

MODEL	MV-100P NEW	VS-11P	VS-111P
E_{out}	166.65 mV	±11.110 v	±111.10 v
Accuracy	±0.015%	±0.01%	±0.01%
I_{out}	N/A	50 mA	100 mA
Z_{out}	20Ω	.03Ω	0.1Ω
Prices	$1995	$1020	$1195



Digital programming: Input programming readers such as punch paper tape, punch card, incremental magnetic tape, pin board, programmer drum, stepping switches or key board.

Memory features: Preserves the register contents without maintaining digital inputs. Programmer can then be used for other functions.

Options: Detailed specifications on these and other models on request.

Multi-purpose Voltmeter and Calibrator

TVM, ΔVM, and source

EDC has been building exclusively solid state instrumentation for 12 years. The **Model 2900** is our latest achievement.

This instrument is a highly versatile transistorized voltmeter, differential voltmeter (infinite impedance null detector) and DC voltage calibrator at a very low cost.

MODEL EDC 2900 NEW

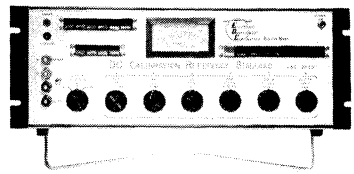
INPUT SPECIFICATIONS

TVM Mode:	
E_{in}	10 μV to 1200 Vdc in 8 ranges
Z_{in}	20 MΩ
Resolution	1 ppm
ΔVM Mode:	
E_{in}	10 μV to 1200 Vdc
Z_{in}	∞ at null, 20 MΩ off null
Sensitivity	10 μV

OUTPUT SPECIFICATIONS

Accuracy	±0.003%
Output	10 nV to ±111.1110 Vdc in 4 ranges
Resolution	1 ppm
Stability	.0005% day
Current	100 mA
Z_{out}	30 milliohms
Weight	10 lbs.
Price	$1650

Recorder output terminals available at rear panel



DC Current Standards

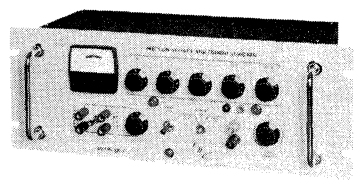
Short circuit and open-circuit proof. 30 second warm-up. Automatic zero.

MODEL	CR-10	CR-100	CR-102
OUTPUT			
I mode	±11.1110 mA	±111.110 mA	±111.110 mA
E mode	±11.1110 Vdc	—	±11.1110 Vdc
COMPLIANCE			
I mode	50 V	100 V	125 V
E mode	50 mA	N/A	100 mA
Accuracy	±0.02%	±0.02%	±0.02%
Prices	$900	$975	$1100

Options: *Null detector* built in and protected for differential voltage measurements. ∞ Z at null. $25 additional (add "N" to model number).

Rack Mountable — $25 additional (add "R" to model number).

Applications: Transducer, relay characteristics, precision checking of zener diodes, calibration of gyro torquers, relays, controllers and recorders.

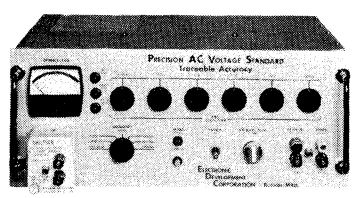


AC Voltage (RMS) Standards

Completely solid state. Short circuit protection. 60 second warm-up. Automatic zero. Low output impedance. Fully self-contained and portable.

MODEL	AC-1000	AC-200	AC-100 NEW
E_{out}	100 μV to 1111.110 V in 2 ranges	100 μV to 211.110 V in 2 ranges	1 mV to 111.110 V
Resolution	10 μV & 1 mV	10 μV & 1 mV	1 mV
E Accuracy	0.01%	0.01%	0.01%
Burden	50 VA or 2 Amps	25 VA or 1 Amp	100 mA
Frequency Range	45 Hz to 5 kHz	30 Hz to 20 kHz	10 Hz to 50 kHz
	Unlimited number of frequencies attained by use of external oscillator via front panel terminals		
5 Internal Frequencies	50, 60, 400 Hz, 1 kHz + Optional f plus line	50, 60, 400 Hz, 1 kHz + Optional f plus line	line only
Z_{out}	.001Ω to 1Ω	.001Ω to .2Ω	.001Ω to .1Ω
Distortion	0.1%	0.1%	0.1%
Weight	50 lbs.	45 lbs.	30 lbs.
Prices	$2690	$2490	$2190

Applications: Calibration of VOM, DVM, VTVM; design and evaluation of amplifiers, converters, filters, rectifiers, filter regulators, demodulators, transformers, and inductors; power source for servo applications.



All EDC instruments are traceable to the U.S. National Bureau of Standards. Certification supplied with each instrument / All instruments are available under GSA Contract / Export prices slightly higher / Line (Mains) power: 115 Vac, 60 or 400 Hz; or 220 Vac, 50 Hz / Instruments available for no-charge evaluation. Contact your local sales representative or the main plant.

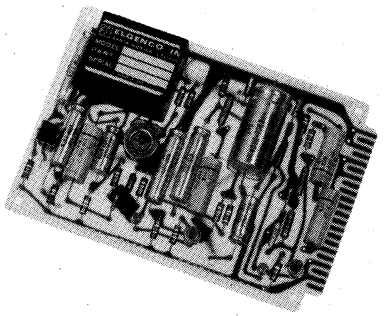
ELGENCO NOISE GENERATORS

SOLID STATE NOISE GENERATORS



FIXED RANGE NOISE GENERATOR CARDS

AMPLITUDE PROBABILITY DISTRIBUTION: Symmetrical non-clipped Gaussian waveform.
OUTPUT LEVEL: (open circuit) 3 volts rms.
AMPLITUDE CONTROL: Continuously variable.
SIZE: 4½" x 6½" x 1".
POWER: —30 volts dc.

SERIES 3602A, 3603A, and 3606A

OUTPUT IMPEDANCE: 600 ohms ±10%.
MAX. LOAD: 300 ohms.

Some of the many frequency ranges available are listed below. Write for further information.

MODEL 3602A

·12124 20 Hz to 20 kHz ±1db	$174
·11124 10 Hz to 20 kHz ±1db	$209
·12154 20 Hz to 50 kHz ±1db	$194
·11154 10 Hz to 50 kHz ±1db	$229

MODEL 3603A

·12115 20 Hz to 100 kHz ±1db	$214
·11115 10 Hz to 100 kHz ±1db	$249
·12125 20 Hz to 200 kHz ±1db	$229
·11125 10 Hz to 200 kHz ±1db	$264
·12155 20 Hz to 500 kHz ±1db	$249
·11155 10 Hz to 500 kHz ±1db	$284

MODEL 3602A

·22154 20 Hz to 50 kHz ±2db	$174
·21154 10 Hz to 50 kHz ±2db	$209
·22115 20 Hz to 100 kHz ±2db	$179
·21115 10 Hz to 100 kHz ±2db	$214
·22125 20 Hz to 200 kHz ±2db	$199
·21125 10 Hz to 200 kHz ±2db	$234
·22155 20 Hz to 500 kHz ±2db	$214
·21155 10 Hz to 500 kHz ±2db	$249
·32155 20 Hz to 500 kHz ±3db	$174
·31155 10 Hz to 500 kHz ±3db	$209

MODEL 3606A

·52124 20 Hz to 20 kHz ±½db	$299
·51124 10 Hz to 20 kHz ±½db	$334
·52154 20 Hz to 50 kHz ±½db	$319
·51154 10 Hz to 50 kHz ±½db	$354
·52115 20 Hz to 100 kHz ±½db	$339
·51115 10 Hz to 100 kHz ±½db	$374
·52125 20 Hz to 200 kHz ±½db	$354
·51125 10 Hz to 200 kHz ±½db	$389
·52155 20 Hz to 500 kHz ±½db	$374
·51155 10 Hz to 500 kHz ±½db	$409

SERIES 3607A

OUTPUT IMPEDANCE: 200 ohms ±10%
MAX. LOAD: 700 ohms.

Some of the many frequency ranges available are listed below. Write for further information.

MODEL 3607A

·15316 5 kHz to 1 mHz ±1db	$345
·35316 5 kHz to 1 mHz ±3db	$195
·25356 5 kHz to 5 mHz ±2db	$570
·35356 5 kHz to 5 mHz ±3db	$460

SOLID STATE NOISE GENERATORS

Model 602A-200 5 Hz to 5 mMz, 3 Ranges. . . **$395**

FREQ. RANGES: 5 Hz to 20 kHz, 5 Hz to 500 kHz, 5 Hz to 5 mHz.
OUTPUT SPECTRUM: 20 Hz to 20 kHz — ±1 db, 20 Hz to 500 kHz — ±2.5 db, 500 kHz, to 5 mHz — ±5 db.
OUTPUT LEVEL: (open circuit), 20 kHz range — 3 volts, 500 kHz range — 2.5 volts, 5 mHz range — 2 volts.
OUTPUT IMPEDANCE: 200 ohms ±10%.
MAXIMUM LOAD: (on direct output) 700 ohms.
OUTPUT STEP ATTENUATOR: X1.0, X0.1, X.01, X.001, and X.0001; calibrated to work into open circuit.
Accuracy: ±3% to 100 kHz, ±10% to 5 mHz.
Output Impedance: 200 ohms ±1%.
SPECTRAL DENSITY: Approximate spectral density (mv/$\sqrt{}$Hz) for 1 volt rms output. 20 kHz band — 5, 500 kHz band — 1.2, 5 mHz band — 0.4.
AMPLITUDE PROBABILITY DISTRIBUTION: Symmetrical non-clipped Gaussian waveform all ranges.
OUTPUT METER: 0-5 volts rms.

Model 602A-1390 5 Hz to 5 mHz, 3 Ranges. . **$330**

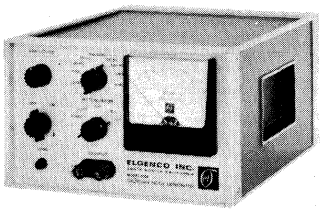
FREQ. RANGES: 5 Hz to 20 kHz, 5 Hz to 500 kHz, 5 Hz to 5 mHz.
OUTPUT SPECTRUM: 20 Hz to 20 kHz — ±1 db, 20 Hz to 500 kHz — ±3 db, 500 kHz, to 5 mHz — ±8 db.
OUTPUT LEVEL: (open circuit), 20 kHz range — 3 volts, 500 kHz range — 2 volts, 5 mHz range — 1 volt.
OUTPUT IMPEDANCE: 900 ohms ± 10%.
MAXIMUM LOAD: (on direct output) no limit.
OUTPUT STEP ATTENUATOR: X1.0, X0.1, X.01, X.001, and X.0001; calibrated to work into open circuit.
Accuracy: ±3% to 100 kHz, ±10% to 5 mHz.
Output Impedance: 200 ohms ±5%.
SPECTRAL DENSITY: Approximate spectral density (mv/$\sqrt{}$Hz) for 1 volt rms output. 20 kHz band — 5, 500 kHz band — 1.2, 5 mHz band — 0.6.
AMPLITUDE PROBABILITY DISTRIBUTION: Symmetrical non-clipped Gaussian waveform all ranges.
OUTPUT METER: 0-5 volts rms.

Model 603A 5 Hz to 5 mHz, 3 Ranges. **$545**

FREQ. RANGES: 5 Hz to 20 kHz, 5 Hz to 500 kHz, 5 Hz to 5 mHz.
OUTPUT SPECTRUM: 10 Hz to 500 kHz — ±1 db, 500 kHz to 5 mHz — ±3 db.
OUTPUT LEVEL: (open circuit) 3 volts rms all ranges.
OUTPUT IMPEDANCE: 200 ohms ± 10%.
MAX. LOAD: (on direct output) 700 ohms.
OUTPUT STEP ATTENUATOR: X1.0, X0.1, X.01, X.001, and X.0001; calibrated to work into open circuit.
Accuracy: ±3% to 500 kHz, ±5% to 5 mHz.
Output Impedance: 200 ohms ± 1%.
SPECTRAL DENSITY: Approximate spectral density (mv/$\sqrt{}$Hz) for 1 volt rms output. 20 kHz band—5, 500 kHz band—1.2, 5 mHz band — 0.4.
AMPLITUDE PROBABILITY DISTRIBUTION: Symmetrical non-clipped Gaussian waveform all ranges.
OUTPUT METER: 0-5 volts rms.

MODEL 3609A Power Supply Card **$67**
(supplies power for up to 2 noise generator cards)
SIZE: 4½" x 6½".
INPUT: 115/230 volts ±10/20 volts, 50 to 1000 Hz.

SOLID STATE NOISE GENERATORS



Model 610A 5 Hz to 5 mHz, 8 Ranges. **$1,275**

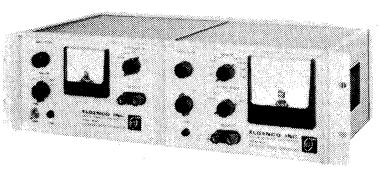
FREQ. RANGES: 5 Hz to 2 kHz, 5 Hz to 5 kHz, 5 Hz to 20 kHz, 5 Hz to 50 kHz, 5 Hz to 200 kHz, 5 Hz to 500 kHz, 5 Hz to 2 mHz, and 5 Hz to 5 mHz.
OUTPUT SPECTRUM: Uniform ± 0.5 db from 10 Hz to 500 kHz and ± 2.0 db from 500 kHz to 5 mHz.
OUTPUT LEVEL: 0 to 1 volt rms, adjustable by front panet amplitude control. A dynamic range of 5 to 1 peak to rms value is provided.
OUTPUT STEP ATTENUATOR: X1.0, X0.1, X.01, X.001, X.0001. Accuracy ± 0.1 db to 500 kHz; ± 0.25 db to 5 mHz.

SPECTRAL DENSITY: Approx. for 1 volt rms output.

Band	mv/$\sqrt{}$Hz	Band	mv/$\sqrt{}$Hz
2 kHz	17.5	200 kHz	1.75
5 kHz	11.0	500 kHz	1.10
20 kHz	5.5	2 mHz	0.55
50 kHz	3.5	5 mHz	0.30

AMPLITUDE PROBABILITY DISTRIBUTION: Symmetrical Gaussian all ranges.
OUTPUT METER: 0 to 1 volt rms. Accuracy ±2% of full scale to 2 mHz; ±5% to 5 mHz.
MAXIMUM LOAD: 500 ohms on direct output.
OUTPUT IMPEDANCE: 50 ohms direct output.
POWER REQUIREMENTS: 115/230 volts ±10/20 volts, 50 to 1,000 Hertz ac.

Model 602A with full rack width mounting option.



Models 602A and **610A** combined by dual unit adapter kit.

OPTIONS & ACCESSORIES FOR MODELS 602A, 603A, 610A, & SERIES 624A

Rechargeable battery option	add $135
Full rack width cabinet and rack mounting hardware option	add $35
Adapter kit, dual unit and rack mounting hardware	$7
Adapter kit, single unit rack mounting (includes blank panel to make dual unit)	$56
Rechargeable battery kit	$145

ELGENCO, INC. 1550 Euclid Street • Santa Monica, Calif. • (213) 451-1635 • TWX 910-343-6475

ELGENCO NOISE GENERATORS

SOLID STATE NOISE GENERATORS

Series 624A Fixed Range Noise Generators

OUTPUT LEVEL: (open circuit) 3 volts rms.
OUTPUT IMPEDANCE: 200 ohms ±10%.
MAX. LOAD: 700 ohms.
OUTPUT STEP ATTENUATOR: X1.0, X0.1, X.01, X.001, and X.0001; calibrated to work into open circuit.
Output Impedance: 200 ohms ±1%.
AMPLITUDE PROBABILITY DISTRIBUTION: Symmetrical non-clipped Gaussian waveform.
OUTPUT METER: 0-5 volts rms.
POWER: 115/230 volts ±10/20 volts, 50 to 1,000 Hertz ac.
DIMENSIONS: 5¼" high x 8⅝" wide x 11" deep.
Some of the many frequency ranges available are listed below. Write for further information.

MODEL 624A

-12124 20 Hz to 20 kHz ±1db	$305
-11124 10 Hz to 20 kHz ±1db	$340

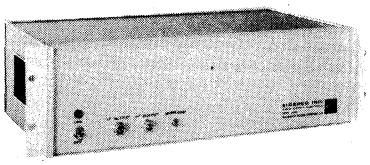
ENCAPSULATED NOISE SOURCE MODULES

Series 1602A, 1603A, and 1606A.....**$95 to $340**
Various frequency ranges and output flatness available. Size: 1¾" x 1½" x ¾". Write for details.

SOLID STATE NOISE GENERATORS



MODEL 632A Dual Output DC to 400 Hz and 5 Hz to 40 kHz.....**$2,595**

LOW FREQUENCY OUTPUT

AMPLITUDE PROBABILITY DISTRIBUTION: Gaussian ±1.0%.
OUTPUT SPECTRUM: Uniform ±0.1 db from DC to 350 Hz.
MAXIMUM OUTPUT: 1.0 volts rms. A dynamic range of 5 to 1 peak to rms value is provided.
MAXIMUM SPECTRAL DENSITY: Approx. 1.5 x 10^{-3} volts²/Hz.
OUTPUT MEAN: Less than 5 mv.
OUTPUT IMPEDANCE: Approximately 1,000 ohms.

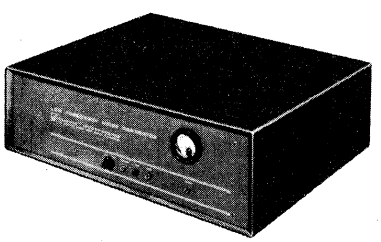
HIGH FREQUENCY OUTPUT

AMPLITUDE PROBABILITY DISTRIBUTION: Gaussian ±2%.
OUTPUT SPECTRUM: Uniform ±0.5 db from 10 to 35,000 Hz.
MAXIMUM OUTPUT: 1.0 volts rms. A dynamic range of 5 to 1 peak to rms values is provided.
MAXIMUM SPECTRAL DENSITY: Approx. 2 x 10^{-5} volts²/Hz.
OUTPUT MEAN: Less than 1 mv.
OUTPUT IMPEDANCE: Approximately 100 ohms.

NOISE REGULATOR: rms output level continuously stabilized against a reference voltage.
OVERLOAD INDICATOR: Panel overload indicator lights when input noise level to regulator is out of regulation range.
POWER: 115/230 volts ±10/20 volts, 50 to 1,000 Hertz ac.
DIMENSIONS: 5¼" high x 17" wide x 11" deep. 19" wide with rack mounting flanges mounted (supplied).

Model 631A 5 Hz to 40 kHz.....**$1,645**

VACUUM TUBE NOISE GENERATORS



Model 301A DC to 40 Hz.....**$2,195**

AMPLITUDE PROBABILITY DISTRIBUTION: Gaussian ±1%.
OUTPUT SPECTRUM: Uniform ±0.1 db from 0 to 35 Hz.
MAX. OUTPUT: 12 volts rms into a 1 megohm input resistance. Dynamic range of 5 to 1 peak-to-rms is provided.
MAX. SPECTRAL DENSITY: Approx. 2.5 volts²/Hz.
D.C. UNBALANCE: Less than 50 mv.
NOISE REGULATOR: rms output level continuously stabilitzed against a reference voltage.
OVERLOAD INDICATOR: Panel overload indicator lights when input noise level to regulator is out of regulation range.
POWER: 115/230 volts ±10/20 volts, 50 to 1,000 Hertz ac.
MOUNTING: Standard relay rack panel 7" high x 19" wide. Can be supplied in deluxe cabinet as shown for $75 extra.

Model 321A DC to 120 Hz.....**$2,295**

OUTPUT SPECTRUM: Uniform ±0.1 db from 0 to 105 Hz.
MAX. SPECTRAL DENSITY: Approx. 1.0 volts²/Hz.

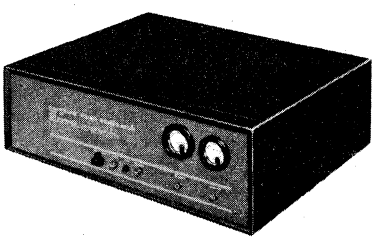
OTHER SPECIFICATIONS SAME AS MODEL 301A

VACUUM TUBE NOISE GENERATORS

Model 331A 5 Hz to 20 kHz.....**$1,395**

OUTPUT SPECTRUM: Uniform to plus or minus 0.5 db from 10 to 20,000 Hz.
OUTPUT LEVEL: 0 to 5 volts rms, adjustable by self contained attenuator. A dynamic range of 7 to 1 peak to rms value is provided.
SPECTRAL DENSITY: Approx. 1 mv/$\sqrt{}$Hz for 5 volt rms output.
AMPLITUDE PROBABILITY DISTRIBUTION: Gaussian ±1%.
NOISE REGULATOR: rms output level continuously stabilized against a zener reference voltage.
OVERLOAD INDICATOR: Panel overload indicator lights when input noise level to regulator is out of regulation range.
OUTPUT METER: 0 to 5 volts rms.
MAX. LOAD: 10,000 ohms.
POWER REQUIREMENTS: 115/230 volts ±10/20 volts, 50 to 1,000 Hertz ac.
MOUNTING: Standard relay rack panel 7" high x 19" wide and is 15" deep. Can be supplied in deluxe cabinet as shown for $75 extra.

MODEL 331A-23	5 Hz to 2 kHz	**$1495**
MODEL 331A-53	5 Hz to 5 kHz	**$1495**
MODEL 331A-54	5 Hz to 50 kHz	**$1495**
MODEL 331A-25	5 Hz to 200 kHz	**$1595**
MODEL 331A-55	5 Hz to 500 kHz	**$1745**



Model 311A Dual output DC to 40 Hz and 5 Hz to 20 kHz.....**$2,595**

LOW FREQUENCY OUTPUT

AMPLITUDE PROBABILITY DISTRIBUTION: Gaussian ±1%.
OUTPUT SPECTRUM: Uniform ±0.1 db from 0 to 35 Hz.
MAX. OUTPUT: 12 volts rms into a 1 megohm input resistance. Dynamic range of 5 to 1 peak-to-rms is provided.
MAX. SPECTRAL DENSITY: Approx. 2.5 volts²/Hz.
D.C. UNBALANCE: Less than 50 mv.

HIGH FREQUENCY OUTPUT

AMPLITUDE PROBABILITY DISTRIBUTION: Gaussian ±2%.
OUTPUT SPECTRUM: Uniform ±0.5 db from 10 to 20,000 Hz.
MAX. OUTPUT: 15 volts rms.
MAX. SPECTRAL DENSITY: 7.5 x 10^{-3} volts²/Hz.

NOISE REGULATOR: rms output level continuously stabilized against a reference voltage.
OVERLOAD INDICATOR: Panel overload indicator lights when input noise level to regulator is out of regulation range.
POWER: 115 v. ±10 v, 50/60 Hertz ac.
MOUNTING: Standard relay rack panel 7" high x 19" wide. Deluxe cabinet as shown not available.

Model 312A Dual output DC to 120 Hz and 5 Hz to 20 kHz.....**$2,695**

LOW FREQUENCY OUTPUT

AMPLITUDE PROBABILITY DISTRIBUTION: Gaussian ±1%.
OUTPUT SPECTRUM: Uniform ±0.1 db from 0 to 105 Hz.
MAX. OUTPUT: 12 volts rms into a 1 megohm input resistance. Dynamic range of 5 to 1 peak-to-rms is provided.
MAX. SPECTRAL DENSITY: Approx. 1.0 volts²/Hz.
D.C. UNBALANCE: Less than 50 mv.

HIGH FREQUENCY OUTPUT

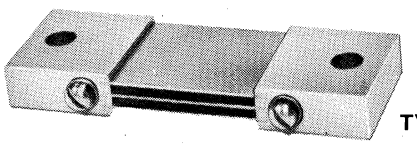
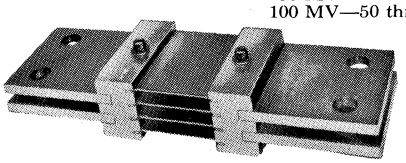
World's Largest Selection of D.C. AMMETER SHUNTS

ACCURACY ¼%



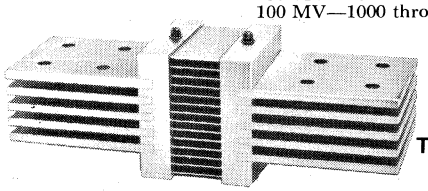
TYPE A

50 MV—15 through 600 amperes
100 MV—50 through 600 amperes



TYPE C

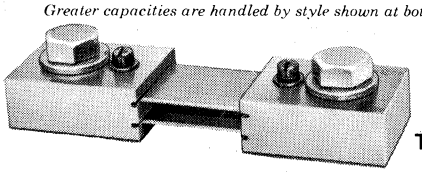
50 MV—1000 through 2000 amperes
100 MV—1000 through 2000 amperes



TYPE F

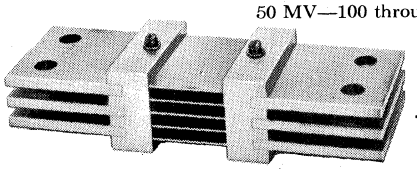
50 MV—2500 through 30000 amperes
100 MV—2500 through 10000 amperes

Style shown here has rated capacities of 10,000 amps and under. Greater capacities are handled by style shown at bottom of page.



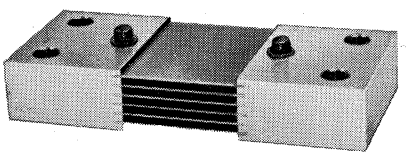
TYPE TRW-50

50 MV—100 through 600 amperes



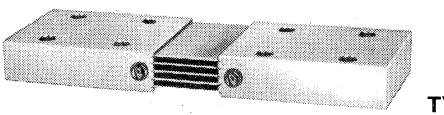
TYPE WT

50 MV—1000 through 10000 amperes
100 MV— 600 through 6000 amperes



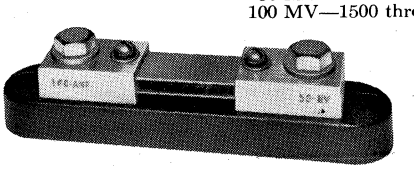
TYPE B

50 MV—300 through 1200 amperes
100 MV—300 through 1200 amperes



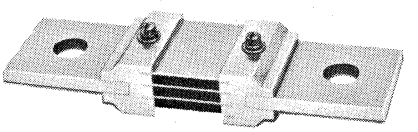
TYPE E

50 MV—1500 through 2000 amperes
100 MV—1500 through 2000 amperes



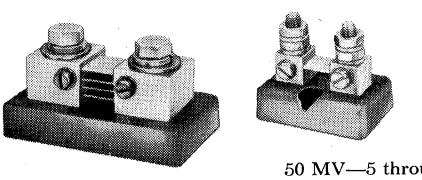
TYPE HA

50 MV—1 through 500 amperes
100 MV—1 through 500 amperes



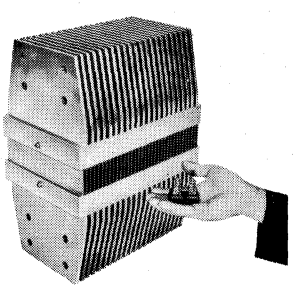
TYPE W

50 MV—500 through 1000 amperes
100 MV—120 through 500 amperes



LIGHTWEIGHT TYPES

50 MV—5 through 1200 amperes



Large capacity Type F shown with Lightweight Type

We offer the widest selection of standard model shunts available anywhere. Both switchboard and portable types. In addition, we produce custom made shunts to your specifications. Our standard models, illustrated on this page, have current ratings up to 30,000 amperes. Many of these can be shipped immediately. Custom made shunts, of course, take a little time to produce. But whether you order a standard or special model, we promise fast service, fine craftsmanship and a personal interest in your complete satisfaction.

WAVEFORM GENERATORS & SYNTHESIZERS

MINIATURE WAVEFORM GENERATOR

A Combination Waveform and Pulse Generator

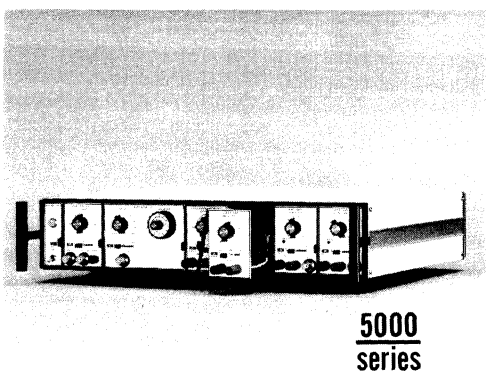
Other miniature waveform generators are:

MODEL 100 WAVEFORM GENERATOR
.001Hz to 3MHz; square and triangle to 5MHz. Sine, Square, Pulse, Triangle and Ramp. Variable 0 to 20V P-P into 600 ohms with variable ±5V D.C. offset. $445

MODEL 103 VCF All Model 100 features plus a precision control of frequency with an external voltage (VCF).

MODEL 104 Triggered All Model 100 features plus manual or external gating and triggering (single shot).

MODEL 105 Triggered VCF All Model 100 features plus the combination of gating, triggering and voltage controlled frequency.



MODULAR WAVEFORM GENERATOR

The 5000 modular system offers the capabilities of building a wide variety of waveform, pulse or signal generators from basic independent modular units. 3½" Thin

Some modules for this system are:

GENERATORS	FREQUENCY RANGE
G5210	0.0001Hz to 2MHz (triangle for sine shaping limited to 1MHz)
G5211 (VCF)	0.0001Hz to 2MHz (triangle for sine shaping limited to 1MHz)
G5212 (ramp)	1000 sec to 1μsec designed to drive VCF G5211
G5213 (ramp)	1000 sec to 1μsec built-in gating, triggering and ramp-hold

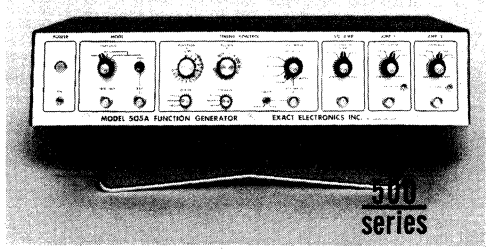
WAVEFORMS
G5210
G5211 (VCF)
G5212 (ramp)
G5213 (ramp)

MODE CONTROLS
C5110 Gate and Trig to generator—variable start-stop point. Adds haversine waveform.

AMPLIFIERS
A5410 Square output only. Features fast rise and fall times. 28V P-P into 600 ohms.
A5420 Built-in sine shaper. External input provided. 28V P-P into 600 ohms.
A5422 General purpose amplifier for ramp generator and S5510

SINE SHAPER
S5510 No output, requires A5422. Ultra low distortion. Available August 1969.

Cabinet/power unit 5001 ±18V regulated, ±30 unregulated, ±8V unregulated



WAVEFORM GENERATOR (SLIM LINE 3.5")

A Combination Waveform and Pulse Generator

Other 500 series waveform generators are:

MODEL 502 WAVEFORM GENERATOR .001 Hz to 1MHz; Sine, Square, Pulse, Triangle and Ramp $385.

MODEL 500 WAVEFORM GENERATOR .0001Hz to 1MHz, square and triangle to 2MHz; Sine, Square, Pulse, Triangle and Ramp. Three independent output amplifiers and attenuators, 25V P-P into 600 ohms with variable D.C. offset. Will drive 50 ohms at reduced amplitude. $495

MODEL 503 VCF GENERATOR All Model 500 features plus precision control of frequency with an external voltage (VCF). 50:1 sweeping ratio. VCF input signal conditioning. $545

MODEL 504 TRIGGERED GENERATOR All Model 500 features plus manual or external gating and triggering (single shot). Variable start-stop point adds haversine waveform. $545

MODEL 505 TRIGGERED, VCF All Model 500 features plus gating, triggering and voltage controlled frequency (reference Models 503 and 504). $645

NEW 201 COMPLEX WAVEFORM SYNTHESIZER SOLID STATE 3½" THIN PACKAGE.

DIGITAL
ANALOG

Produces forty individual and incremental voltage levels, twenty if both the amplitude level and the pulse width are variable. Both digital and analog (variable slope) outputs. Increment programming enables each individual increment to be set to a pre-determined D.C. level by monitoring with VOM or DVM. Increments variable from 20 sec to 2μsec.

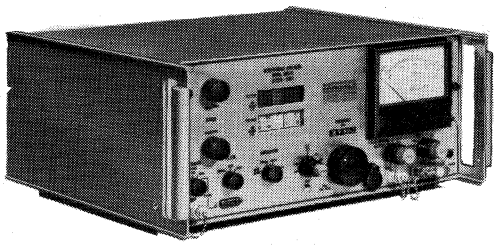
TO MEET MODERN RFI/EMC NEEDS

EMC-10 SERIES INTERFERENCE ANALYZERS

20 Hz to 50 KHz



EMC-10 is an approved, fully solid-state receiving instrument which not only tunes the entire range of 20 Hz to 50 KHz, but can be remotely tuned over this range without mechanical drive. When used in its wide-band, non-selective mode, response extends all the way to 500 KHz.

The Model EMC-10E version incorporates built-in electronic scanning within its own housing for automatically sweeping from 20 Hz to 50 KHz in addition to all regular features of EMC-10.

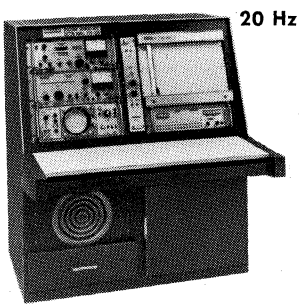
Because the instrument can operate from internal long-life, rechargeable batteries, it can be easily carried into the field, as well as used in tight quarters, without the nuisance of a power connection. Each feature has been carefully engineered, and the overall unit designed to meet the requirements of commercial and military specifications. Its extreme sensitivity of 3 nanovolts in its 5 Hz bandwidth position contributes greatly to its versatility. With 170 DB dynamic range, including 40 DB on the meter, and excellent amplitude and frequency accuracies, many testing problems are eliminated.

EMC-10 and EMC-10E also have full capability of a versatile wave analyzer and outputs for X-Y plotting, spectrum analysis and a tracking signal for network and circuit response.

A wide range of antennas, probes and other accessories are optionally available.

SPECTRUM SURVEILLANCE SYSTEM MODEL FSS-250

20 Hz to 1000 MHz



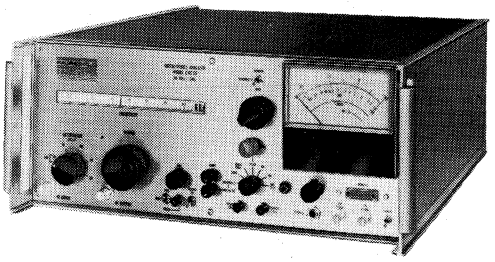
The FSS-250 system incorporates Interference Analyzers Models EMC-10 and EMC-25R, Electro-Scan Programmer Model ESC-125A and Spectrum Analyzer Model SPD-125, all as described above, mounted together with 11" x 17" X-Y plotter Model EXY-125A in a console with amplifier, speaker and various other conveniences, and tested as a completely integrated automatic testing facility. It may be used for RFI/EMC studies, spectrum profiling, continuing frequency surveillance and numerous other applications calling for a programmable, automated system.

With FSS-250 it is possible to set up programming to cover any portion, or all, of the frequency range of 20 Hz to 1000 MHz and automatically plot the signal levels against frequency on the X-Y plotter. The operator can also analyze each of the 15 octave EMC-25R bands in spectrum analysis form on the spectrum analyzer scope, and can switch to fine grain display of a selected signal.

As the first fully solid-state, electronically scannable spectrum surveillance system, Model FSS-250 can be installed either in a laboratory or a mobile van, along with proper antennas and pick-up devices to perform RFI/EMC and field strength measurements or searches for unwanted or elusive signals.

EMC-25 SERIES INTERFERENCE ANALYZERS

14 KHz to 1 GHz



Model EMC-25 is a universal, broad-coverage calibrated receiver designed for RFI/EMC testing and general use. It provides in a single, compact, solid-state package, full frequency coverage from 14 KHz to 1000 MHz and meets the latest military and commercial specifications for both manual and automated data acquisition.

Excellent sensitivity, selectivity and operational simplicity are provided. A choice of two bandwidths at all frequencies is standard. Detector functions provided are Carrier, Peak, Quasi-Peak, Metered Slideback and % Modulation, both AM and FM. Outputs for phones, external meter, X-Y recorder, Pre-IF, Post-IF and AM and FM video are included.

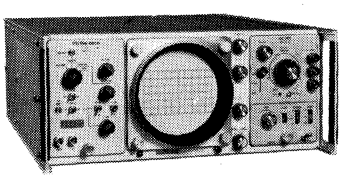
EMC-25 provides capability for being electronically scanned over its entire frequency range; and Model EMC-25R includes remote control of band sequencing. It can be operated from its own internal battery supply or from an external AC or DC source.

Special versions of less than full frequency coverage are available on special order.

ACCESSORIES AND PICK-UP DEVICES

Included in the wide choice of pick-up devices and accessories to EMC-25 are the following:

(1) Electro-Scan Programmer, Model ESC-125A—This instrument adds full programming and automation to EMC-25R. With proper selection, the instrument is automatically scanned and band stepped by the Programmer with the output being plotted on an X-Y plotter or other recording device.



(2) Spectrum Analyzer Adapter, Model SPD-125 For the first time a whole-octave "quick-look" display can be made available to help in test planning. Specific signals can be selected from the spectrum display, and these ballooned for close-look "pan" display.

(3) Standard Accessory Kit, 14 KHz to 1000 MHz, Model AAK-25A—A complete set of antennas, probes and other needed accessories for full coverage of the EMC-25 frequency range is optionally available.

(4) Tunable Rejection Filters, Models TRF-11 Through 14, 14 KHz to 1000 MHz. Each precision rejection filter in this series of five permits attenuation of an unwanted signal by at least 80 DB at any frequency in its range. While designed for use with RFI/EMC instruments, they can easily be used in any receiving system for rejecting unwanted signals.
